The proposed amendment also permits the various State park agencies to receive title directly to the lands acquired under the 1926 act where it is permitted by State law. This is done to do away with the necessity in some States of requiring the State legislature to formally transfer the lands in question from the State to the State park board.

This is not a hastily conceived bill, but is the product of many months of study and negotiation, and merits the approval of Congress. Because many States will be benefited by my proposed bill, I ask unanimous consent that the bill lie on the desk until March 23, 1959, in the event that other Senators may wish to join in sponsoring the bill.

The PRESIDING OFFICER. Without objection, the bill will lie on the desk as requested.

Mr. BENNETT. Mr. President, I ask unanimous consent to have printed in the RECORD at this point as a part of my remarks a table showing Bureau of Land Management lands and percentage of total State acreage; also a table showing lands owned by the Federal Government as of June 30, 1957, and the percentage of the State area.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

State	Bureau of Land Management lands (acres)	Percent of total State acreage
Alabama	16,000	------
Arizona	13,093,000	18.0
Arkansas	8,000	------
California	16,867,000	16.8
Colorado	8,245,000	12.4
Florida	4,000	------
Idaho	11,915,000	22.5
Kansas	1,000	------
Louisiana	4,000	------
Michigan	5,000	------
Minnesota	101,000	------
Mississippi	11,000	------
Montana	6,714,000	7.2
Nebraska	13,000	------
Nevada	47,948,000	68.2
New Mexico	14,536,000	18.7
North Dakota	81,000	------
Oklahoma	41,000	------
Oregon	15,492,000	25.1
South Dakota	278,000	------
Utah	24,404,000	46.3
Washington	471,000	------
Wisconsin	2,000	------
Wyoming	17,176,000	27.5
Alaska	298,925,000	81.8
Total United States	486,353,000	20.9

State	Lands owned by Federal Government June 30, 1957 (acres)	Percent of State area
Alabama	1,075,000	3.3
Arizona	32,415,000	44.6
Arkansas	2,979,000	8.8
California	46,195,000	46.1
Colorado	24,016,000	36.1
Connecticut	5,000	.2
Delaware	32,000	2.5
District of Columbia	11,000	28.7
Florida	3,353,000	9.7
Georgia	1,998,000	5.3
Idaho	34,487,000	65.1
Illinois	412,000	1.2
Indiana	335,000	1.4
Iowa	122,000	.3
Kansas	341,000	.6
Kentucky	973,000	3.8
Louisiana	1,603,000	3.7
Maine	125,000	.6
Maryland	223,000	3.5
Massachusetts	58,000	1.2
Michigan	3,238,000	8.9
Minnesota	3,264,000	6.4
Mississippi	1,510,000	5.0
Missouri	1,671,000	3.8
Montana	28,019,000	30.0
Nebraska	695,000	1.4
Nevada	61,644,000	87.7
New Hampshire	695,000	12.0
New Jersey	97,000	2.0
New Mexico	27,493,000	35.4
New York	259,000	.8
North Carolina	1,879,000	6.0
North Dakota	1,927,000	4.3
Ohio	204,000	.8
Oklahoma	993,000	2.2
Oregon	31,610,000	51.3

State	Lands owned by Federal Government June 30 1957 (acres)	Percent of State area
Pennsylvania	549,000	1.9
Rhode Island	8,000	1.2
South Carolina	1,084,000	5.6
South Dakota	3,200,000	6.5
Tennessee	1,570,000	5.9
Texas	2,630,000	1.6
Utah	36,484,000	69.2
Vermont	248,000	4.2
Virginia	2,122,000	8.3
Washington	12,669,000	29.6
West Virginia	934,000	6.1
Wisconsin	1,782,000	5.1
Wyoming	29,853,000	47.8
Alaska	362,673,000	99.2
Total, United States	771,226,000	34.0

A UNIVERSITY OF AMERICAS

Mr. MANSFIELD. Mr. President, on the first day of this session one of our most distinguished colleagues in the House of Representatives, Representative HALE BOGGS, of Louisiana, introduced a joint resolution providing for a study of the possibility and desirability of establishing a University of the Americas.

This is a proposal in which I have been interested for quite some time, and I was very much pleased to learn that Representative BOGGS has taken the initiative in this area. He is known, and justly so, as a great friend of our Latin American neighbors.

The establishment of such a University of the Americas, if it is feasible, would indeed be a major step in cementing relations between our country and our neighbors to the south. It could do much to foster the cultural, scientific and other relations which are so vital in maintaining harmonious and fruitful relationships among the nations of the Western Hemisphere.

Mr. President, the joint resolution I have sent to the desk is identical with House Joint Resolution 1. I ask that there be printed, at the conclusion of my remarks, the joint resolution, together with a preliminary report on the matter which was prepared by the Department of State at the request of the Committee on Foreign Relations during the 84th Congress.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred; and, without objection, the joint resolution and preliminary report will be printed in the RECORD.

The joint resolution (S.J. Res. 79) providing for a study of the possibility and desirability of establishing a University of the Americas, introduced by Mr. MANSFIELD, was received, read twice by its title, referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

Whereas the nations of the Western Hemisphere have developed a solid foundation for the maintenance of peaceful relations through the inter-American system and the Organization of American States; and

Whereas the increasing degree of cultural, economic, and commercial relations between the United States and its sister Republics of Latin America warrants that consideration be given to the availability of educational facilities which will contribute to a further appreciation of the mutual problems arising from these relations; and

Whereas an effective means of serving this desirable goal would be provided by the facilities of an inter-American university accessible to the students and professors of all nations of the Western Hemisphere and by a curriculum specially drawn to impart deeper understanding of those legal, social, commercial, and political problems common to the nations of the Western Hemisphere; and

Whereas the existence of a university of this character would afford superior opportunities for students and professors from all parts of the Americas to develop closer personal relationships to expand the interchange of ideas, skills, and culture, and to further, through the opportunities thus provided, increased understanding among the peoples concerned: Now therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) there is hereby established a commission to be known as the Commission on the University of the Americas (hereinafter referred to as the "Commission").

(b) The Commission shall be composed of eight members as follows:

(1) Two appointed by the President of the Senate from the Members of the Senate (not more than one from any political party);

(2) Two appointed by the Speaker of the House of Representatives from the Members of the House of Representatives (not more than one from any political party);

(3) Four appointed by the President of the United States from the presidents of such universities as will provide representation from the principal geographical areas of the United States.

(c) Any vacancy in the Commission shall not affect its powers, but shall be filled in the same manner in which the original appointment was made.

(d) Service of an individual as a member of the Commission or employment of an individual by the Commission as an attorney or expert in any business or professional field, on a part-time or full-time basis, with or without compensation, shall not be considered as service or employment bringing such individual within the provisions of section 281, 283, 284, 434, or 1914 of title 18 of the United States Code, or section 190 of the Revised Statutes (5 U.S.C. 99).

(e) The Commission shall elect a Chairman and a Vice Chairman from among its members.

(f) Five members of the Commission shall constitute a quorum.

SEC. 2. (a) The Commission shall make a full and complete investigation and study, including consultations with officials of the Organization of American States, for the purpose of determining the possibility and desirability of establishing a University of the Americas, to be a center of higher education for the people of all nations of the Western Hemisphere.

(b) In making such study the Commission shall consider all possible factors bearing upon the desirability of establishing a university of the type contemplated by this joint resolution, and the prospects for its acceptance and successful operation. The Commission shall recommend a possible site for such university, and in the selection of such site the Commission shall give consideration to geographical accessibility, climate, and the availability of existing facilities.

SEC. 3. (a) The Commission or, on the authorization of the Commission, any subcommittee or member thereof, may for the purpose of carrying out the provisions of this joint resolution, hold such hearings and sit and act at such times and places as the Commission or such subcommittee or member may deem advisable.

(b) The Commission may secure directly from any executive department or agency of the Federal Government information, suggestions, estimates, and statistics for the purposes of this joint resolution; and each such department or agency may furnish such information, suggestions, estimates, and statistics directly to the Commission, upon request made by the Chairman or Vice Chairman.

SEC. 4. (a) Members of the Congress who are members of the Commission shall serve without compensation in addition to that received for their services as Members of Congress; but they shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of the duties vested in the Commission.

(b) The members of the Commission from private life shall each receive $50 per diem when engaged in the actual performance of duties vested in the Commission, plus reimbursement for travel, subsistence, and other necessary expenses incurred by them in the performance of such duties.

SEC. 5. (a) The Commission shall have power to appoint and fix the compensation of such personnel as it deems advisable, without regard to the provisions of the civil service laws and the Classification Act of 1949, as amended.

(b) The Commission may procure, without regard to the civil service laws and the Classification Act of 1949, temporary and intermittent services to the same extent as is authorized for the departments by section 15 of the Act of August 2, 1946 (60 Stat. 810), but at rates not to exceed $50 per diem for individuals.

SEC. 6. The expenses of the Commission as authorized in this joint resolution shall not exceed $50,000, and shall be paid from funds appropriated under the authorization contained in section 401 of the Mutual Security Act of 1954, as amended.

SEC. 7. The Commission shall report its findings and recommendations to the President and the Congress not later than January 31, 1957, and shall cease to exist thirty days after the submission of such report.

The preliminary report presented by Mr. MANSFIELD is as follows:

PRELIMINARY STUDY OF MEANS OF STRENGTHENING THE EDUCATIONAL TIES OF THE AMERICAS WITH SPECIAL REFERENCE TO THE POSSIBILITY OF ESTABLISHING A UNIVERSITY OF THE AMERICAS

I. INTRODUCTION

Senate Joint Resolution 174, 84th Congress, 2d session, providing for a study of the possibility and desirability of establishing a University of the Americas, which was sponsored jointly by Senators MANSFIELD and Knowland, was introduced by Senator MANSFIELD in the Senate on May 16, 1956. The resolution provided for the establishment of a commission which would explore the possibility and desirability of establishing a great university in the Western Hemisphere as a center of higher education for the people of all the American Republics. (Identical resolutions were introduced in the House as follows: H.J. Res. 635 by Mr. BOGGS on June 5, 1956, H.J. Res. 641 by Mr. MORRISON on June 6, 1956, and H.J. Res. 699 by Mr. FASCELL on July 25, 1956.)

In response to a request for the views of the Department of State on this proposed legislation, the following preliminary statement on means of strengthening the educational bonds among the Americas, with special reference to the possible establishment of a University of the Americas, has been prepared.

In both Europe and America the idea of an international university, either worldwide or regional in character, began to receive attention as a promising means of furthering understanding among nations early in the 20th century. Following the First World War many proposals for the creation of an international university were brought before the League of Nations. The

Commission of Intellectual Cooperation or the League, after thorough study of the proposals, concluded that obstacles, which at that time seemed insurmountable, stood in the way of the realization of the ideal of an international university. The Commission recommended, instead, a more modest project for a federation of the institutions which, in the different countries, were devoting themselves to the teaching of those matters which were indispensable for a knowledge of the contemporary world and international relations. An international university established in Brussels in 1920, which only reached its first stage of development, had to close its doors in 1923 because of lack of financial support.

In Europe a number of important institutes were established to deal with international problems. Among these was the Hague Academy of International Law, which was established as a truly international institution and which since its opening in 1924, has ranked among the foremost institutes for international studies. Created through the efforts of the Carnegie Endowment for International Peace, the academy has had continued financial support from U.S. foundations.

In the meantime interest in an inter-American university was increasing in the Western Hemisphere. Both Puerto Rico and Panama had been proposed as appropriate centers for the establishment of such an institution. Panama especially had, since 1912, been trying to develop support for a Pan-American University within its borders. At both the third and eighth Pan-American Congresses recommendations were made supporting the establishment of a Pan-American University in Panama.

Finally an inter-American university was established in Panama in October, 1943. A convention on the Inter-American University was signed by representatives of the 21 American republics meeting in Panama September 27 to October 4, 1943, for the First Conference of Ministers and Directors of Education of the American Republics. The United States signed with certain reservations.

The convention, which was subject to ratification by the several governments, provided that the Panamanian Government would donate to the new institution, the lands, equipment and financial endowment formerly belonging to the National University of Panama. The Governments of the Republics were to contribute to the expenses of maintenance of the university and to the expenses of construction and equipment on a proportional basis. Scholarships would be made available to students of each American country in proportion to the contributions made to the maintenance of the university.

According to its statute the university was to have autonomy in all its internal activities. Its administrative board was to be composed of heads of the diplomatic missions of the American Republics accredited to Panama, or those whom the respective Governments might designate, and the Minister of Education of the Republic of Panama. A comprehensive program of regular instruction on the undergraduate and graduate levels was to be offered in the new university, with special emphasis on courses and facilities for research on the cultural problems which affect the Western Hemisphere.

While waiting for the ratification by the American States of the Convention for the Inter-American University, the new institution began to operate on a transitory statute. When, however, the only State to ratify the convention was Venezuela, the Republic of Panama decided, in 1946, to return the Inter-American University to its former status as a national university, while awaiting ratification of the convention. Since that time there has been no sufficient coordinated effort on the part of the American States to reactivate the Inter-American University in Panama.

In recent years the U.N. agencies and the OAS have been concerned with the development, on a small scale, of international educational centers which give training in specialized fields at the college level. For example, UNESCO, in the establishment of the Latin American Regional Center (CREFAL) at Patzcuaro, Mexico, in 1950, has undertaken a regional educational project which, in organization, is truly international. The work of the center is carried on at the college level. The staff, administrative and professional, is drawn not only from different countries of the region, but also from a few countries in other parts of the world. The student body is composed of teams of students sent by those American States which wish to participate in the work of the center. The OAS cooperates with UNESCO in financing the work of the center.

II. DISCUSSION OF PROBLEMS INVOLVED IN THE CREATION OF AN INTERNATIONAL UNIVERSITY

One of the most controversial questions in the whole field of international intellectual cooperation has been and continues to be the question of the creation of an international university, either worldwide or regional in character. While the universities of many nations are becoming increasingly aware of their international role in the modern world and are taking on more of an international character, in part through their participation in official and private programs of international educational exchange involving the exchange of professors, research specialists and students, there is in existence no truly international university which, with an international staff and an international student body, directs primary attention toward the development of better understanding of the common economic, social and political problems of all nations or of a group of nations.

The idea of a great international university, challenging as it is, has proved to be difficult of realization. Perhaps the time has not been ripe for it. The several attempts made during the 20th century to establish such an institution of higher learning on a worldwide or regional scale did not meet with lasting success.

At the present time, however, when there is so much emphasis on international organization, and when programs of international cultural relations have come to play such an important role in the conduct of foreign affairs, a review of the idea of an international university and its possible realization is timely.

An analysis of recent efforts to establish an international university brings to the fore a number of problems, some of which would seem to be of special importance to those considering the proposal for the creation of a university of the Americas as presented in resolution 174.

The creation of a great inter-American university, like that of any great national university, would be a slow, very complex, and expensive process. If an inter-American university is to have a chance of success it will have to come into being as the result of a very real need recognized by the American States. Otherwise they will not give it the moral and financial support needed for its creation and continuing existence. One of the main reasons why the Inter-American University in Panama, with its well-developed plan for international organization, never actually existed as an international institution was the lack of support from most of the American Republics.

One of the greatest obstacles to the development of an international institution of higher learning has been and continues to be the predominating opinion in university circles that the usefulness of an international university would be very limited and would not justify the enormous effort and expense that its creation would necessitate. Without the strong support fo the universities of the several American countries as well as of universities in other parts of the world, and without continuing opportunities for close collaboration with them in educational, scientific, and cultural interchange, the new international university would find it impossible to develop as a great institution.

The question of financial support for an international university raises very serious problems. The establishment of a new institution of this kind, adequately equipped with buildings, libraries, laboratories, and so on, and adequately staffed, would require enormous financial resources. If it seems preferable to make one of the national universities the international university of the future, the reorganization, with all that it involves, would also call for large funds although the expense would not be as great as for a new institution. There is also the question as to whether all the governments would be able to or inclined to contribute financially to an international university located in another country to the detriment, perhaps, of their own national institutions of higher learning. While private funds, including foundation funds, might be sought, it would be difficult if not impossible to find the large sums needed to finance the establishment of even a small university from these sources.

There are a number of problems involved in the administration and staffing of an international organization or institution of which such international bodies as the United Nations and its specialized agencies and the Organization of American States are well aware. The development of an effective administrative and professional staff, composed of nationals of different countries with very different cultures, is a complicated process involving many kinds of adjustments while developing an esprit de corps in a new international institution. This process of living together and working together on problems of common concern is an extremely important element in the development of international understanding, which is one of the major aims of the international university, but it calls for much understanding of peoples and their cultures and of methods of bringing them together in a common cause.

Only an international staff of the highest quality would draw a high level student body. One of the questions in creating a new inter-American university would be whether or not outstanding professors in the American Republics could or would leave their posts to participate in a new university venture where they would not have some of the perquisites that they now have—tenure, provisions for retirement, and so on. In time the new university might be able to regulate such matters, but in the beginning the finding of an expert staff might be difficult, especially if, as seems probable, the national universities of the area would not want to release their best professors.

Another problem of serious import would be that of the equivalence of degrees and the validity of diplomas. One concept of an international university is that of a kind of superinstitution of higher learning awarding diplomas valid in all counties and substituting itself, so to speak, for the national universities. Such a concept would not only be dangerous to the latter, but would be unrealizable at this time. Moreover, the question of reciprocity of degrees and diplomas continues to present one of the most difficult problems in the whole field of international educational relations in spite of continuing efforts to solve it. It might not be too difficult to establish for the degrees of the inter-American university a purely academic,

scientific or honorary validity, but it is certain that all the Republics would not accept these degrees for the exercise of the professions.

Finally, some of the most basic problems in organizing an inter-American university would be those connected with the development of a curriculum for an international institution such as that suggested in Senate Joint Resolution 174 "a curriculum specially drawn to impart deeper understanding of those legal, social, commercial and political problems common to the nations of the Western Hemisphere." While recognizing the important contribution that study along these lines in an international institution might make to better inter-American relations, the question must be raised as to how to balance the national needs of the several States, which are sending their youth to be educated in the inter-American center, with the international character and aims of the university. How, in this internationally oriented institution, can an education be given which would enable the students both to understand and to exercise their responsibilities as citizens and to prepare them for their future careers in business or the professions in their home countries? Although the inter-American university might be especially qualified to prepare students for careers in the international field, there are not too many opportunities available for careers in the foreign service and other government services, teaching and certain kinds of business enterprises which involve international trade and commerce, for which training in international relations would be of great importance.

III. CONCLUSIONS

Undoubtedly, as the Senate Committee on Foreign Relations states in its report on Senate Joint Resolution 174 (Report No. 2671, 84th Congress, 2d session, July 20, 1956), "the increasing degree of cultural and commercial relations between the United States and its neighbors to the South warrants the development of educational facilities which would contribute to the greater appreciation of mutual problems confronted by our peoples." The suggestion that one way to serve this goal would be the creation of a University of the Americas, is one that is well worth consideration. However, while many of the ideas behind the proposal for the creation of such a university are sound, a project of such magnitude and complexity would be extremely difficult of realization, at least in any immediate future. The prospects for the acceptance of the proposal by the American States, all of whom would have to contribute largely of their educational funds for the support of a great inter-American university, would be doubtful. While the final decision on this matter should not be made before the attitudes of the American States toward it have been surveyed, experience to date with the financing of such regional projects would seem to indicate that many States, even though they were deeply interested in participating in such a project, would find it difficult and even impossible to provide their share of financial support.

Again experience would indicate that the successful operation of a truly international or regional university, in which nationals of the several participating countries would have to learn to live together and work together along new lines of endeavor, would be extremely difficult, especially if the operation was on a large scale.

Since the idea of a great inter-American university has never been fully realized, there is relatively little experience on which to base plans for the development of a new inter-American institution on the university level. Even if a decision were made to create a university, during the early stages the institution should be kept extremely small and should work only within certain very limited areas.

In view of the fact that Senate Joint Resolution 174 only calls for the establishment of a commission to make a full and complete investigation and study, including consultations with officials of the OAS, for the purpose of determining the possibility and desirability of establishing a University of the Americas, to be a center of higher education for the people of all nations of the Western Hemisphere, any further suggestions on the university projects might be premature.

REVIEW BY INTERSTATE COMMERCE COMMISSION OF RAILROAD PASSENGER TRAIN AND FERRY DISCONTINUANCES—ADDITIONAL COSPONSOR OF BILL

Under authority of the order of the Senate of March 9, 1959, the name of Mr. KUCHEL was added as an additional cosponsor of the bill (S. 1331) to amend the Interstate Commerce Act, as amended, so as to strengthen and improve the national transportation system, insure the protection of the public interest, and for other purposes, introduced by Mr. CASE of New Jersey (for himself and other Senators) on March 9, 1959.

PRINTING OF REVIEW OF REPORT ON MISSISSIPPI RIVER AND TRIBUTARIES, HARBOR IMPROVEMENTS AT NATCHEZ, MISS. (S. DOC. NO. 16)

Mr. NEUBERGER. Mr. President, on behalf of the chairman of the Committee on Public Works, the Senator from New Mexico [Mr. CHAVEZ], I present a letter from the Secretary of the Army, transmitting a report, dated September 16, 1958, from the Chief of Engineers, Department of the Army, together with accompanying papers and illustrations, on a review report on Mississippi River and tributaries with respect to harbor improvements at Natchez, Miss., requested by a resolution of the Committee on Public Works, U.S. Senate. The reports of the district engineer and the Mississippi River Commission are favorable for the improvement, with an economic ratio of about 4 to 1, but the report of the Chief of Engineers is unfavorable. Because of the public interest involved, I ask unanimous consent that the report be printed as a Senate document, with illustrations, and referred to the Committee on Public Works.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, March 16, 1959, he presented to the President of the United States the enrolled bill (S. 79) to amend the Federal Food, Drug, and Cosmetic Act to permit the temporary listing and certification of citrus red No. 2 for coloring mature oranges under tolerances found safe by the Secretary of Health, Education, and Welfare, so as to permit continuance of established coloring practice in the orange industry pending congressional consideration of general legislation for the listing and certification of food color additives under safe tolerances.

MEDICAL EXAMINATIONS FOR CIVILIAN PILOTS

Mr. BRIDGES. Mr. President, I ask unanimous consent to have printed in the body of the RECORD, at the end of my remarks, an article entitled "Closer Medical Check on Civilian Pilots Set." This article appeared in Washington's Sunday Star of March 15.

The article reports an important development and a step in the right direction in efforts to provide more adequate tests for civilian pilots, particularly airline pilots.

I drew attention to this important and difficult problem in remarks made on the floor of the Senate on February 16 and 26, this year. It is not my purpose to restate the problem now.

But I do wish to point out that the regulations governing medical requirements for all civilian pilots are being completely rewritten, as the newspaper article reports. I am hopeful that this revision—the first since the rules were set up in 1926—will help to make air travel more safe.

The revision, by the new Federal Aviation Administration, I understand, will include a provision for special tests for older pilots. It is interesting to note, in this connection, that civilian aviation does just the opposite of what the Armed Forces do with their older pilots.

The article points to this and other facts, which I believe the Members of the Senate will find to be both interesting and important in the urgent matter of greater air safety.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New Hampshire?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CLOSER MEDICAL CHECK ON CIVILIAN PILOTS SET—CRACKDOWN IS EXPECTED THIS SUMMER AS OPENER IN FULL OVERHAUL OF CODE

(By Andrew W. Bingham)

The official rules and regulations governing medical requirements for all nonmilitary pilots are being completely rewritten for the first time since they were established in 1926.

The entire job will take about 5 years. But the first elements of the sweeping revision should be in effect sometime this summer, according to Dr. John E. Smith, Acting Civil Air Surgeon.

They will make it tougher for many would-be flyers to get their licenses.

Standards for commercial airline pilots were termed inadequate by three leading authorities in a story in the Star last month. The authorities, urging immediate action, called the situation urgent.

The important revisions for all nonmilitary pilots include:

1. Automatic denial of a license to anyone who is a diabetic taking insulin; has a coronary heart condition, or has a history of a serious mental illness.

2. Special tests for older pilots.

3. Having physical examinations conducted only by doctors designated by the Federal Aviation Agency.

QUESADA'S OK NEEDED

The net result of the changes should be a sound medical program, according to Dr.

Smith. He adds that in certain areas—particularly with the automatic denials—individual rights will be denied arbitrarily in the interests of aviation and public safety. To become effective, the new regulations must be approved by Federal Aviation Administrator Elwood R. Quesada.

Putting across this program with the aviation industry could be one of the severest tests facing the new Federal Aviation Agency, according to at least one veteran authority in the field.

"The current medical program is so full of holes that it has needed a complete redoing for a long, long time," said Dr. W. R. Stovall, head of the Medical Division of the Civil Aeronautics Administration (now the FAA) for 17 years before his retirement a year ago.

CRASH RECALLED

But he added: "Most of the industry will be afraid that many people will get caught up in the new requirements. Many people will hold back and hope the system won't work."

Doctors in the FAA are convinced that the present system is not working.

No plane crash has ever been attributed to the physical failure of the pilot, they admit, but there is much circumstantial evidence that this factor plays a more important part than is generally admitted.

They often cite cases in air transport and private flying to prove their point.

In one commercial airline accident involving several fatalities, for instance, investigation showed that the copilot did not have a valid medical certificate. The pilot did have an unlimited first-class certificate; but it was discovered after the accident that the Navy had previously found him unqualified for duty involving actual control of an airplane because of a serious heart condition.

BOTH KILLED IN ACCIDENT

Both the pilot and copilot were killed in the accident. The Flight Safety Foundation, which cited this case in an official, Government-paid survey of the medical aspects of civil aviation, pointed out these facts were not used to "imply that a medical condition was related to the accident; it does point up, however, the possibility that there could be medical implications in some accidents where no other cause can be found."

Dr. Smith cites another case of a crop duster who, after completing his early morning work, told companions he was hungry and would fly to the local airport for a meal. He crashed and was killed shortly after takeoff.

Investigation showed the man was a diabetic who required insulin. "All the evidence is that this man needed insulin and was having a reaction," Dr. Smith explained, "although the official cause for such crashes as this is usually something like 'flying too low.'"

CASE OF PSYCHOTIC CITED

Another example of the shortcomings of the present system is the pilot who, a few years ago, dangerously buzzed Des Moines, Iowa, for several hours. Examination revealed he was a psychotic who had been denied a driver's license in the State.

FAA officials also point out that while the safety record for commercial airlines is very good, the record for others is nothing to be proud of. According to their official statistics, a total of 10,938,000 hours were flown in general aviation, excluding the transports, in 1957. There were 4,217 accidents, of which 429 involved fatalities. Exactly 800 persons were killed.

Currently, private pilots who have less rigid physical requirements to meet than the commercial pilots, are examined by doctors of their own choosing. This means that of the 230,000 physical examinations checked by the FAA each year, 150,000 are from doctors not designated by the Agency. All pilots except private pilots must go to a designated examiner.

SAFETY REPORT QUOTED

The nondesignated doctors, it is often pointed out, have received no special instructions on how to conduct the exams; they seldom have any knowledge of aviation medicine, and they often have no special feeling of responsibility toward the FAA.

The Flight Safety Foundation pointed out in its report:

"There are known cases where the (medical) certificates have been issued by mail; where examinations are conducted without the applicant being required to remove his coat; where numerous consecutive reports have been turned in with identical blood pressures and identical figures for specific gravity from urinalysis."

There is also, both for the designated and nondesignated examiners, a perpetual question of interpretation of the requirements, which are often stated in the broadest terms. The safety foundation noted, for instance, that "an applicant may be denied certification because an examiner may not feel he is psychologically suited, yet the basis shown on the report may be borderline blood pressure."

REGIONAL TEST CENTERS

The new FAA program, besides requiring all pilots to go to designated examiners, will include more dynamic training for these examiners and an inspection system to check their work and their equipment.

"What we're after is more quality control," said Dr. Smith.

Still another part of the program will be to establish three regional testing centers where pilots who do not pass the initial examination may go for more intensive testing. "It's the only fair thing to do," Dr. Smith said. These tests—unlike the initial ones—would be conducted at Government expense.

The special requirements for older pilots will include more detailed physiological examination and additional eye tests. The standards have not yet been worked out, according to Dr. Smith, and there will be difficulty in doing so.

SENIORITY SYSTEM CITED

"The eye requirements for older men now are completely inadequate," he said, "But at present we don't know any rational basis for making changes."

The problem is an urgent one, he said, because of the airline pilots' seniority system. "Civil aviation does just the reverse of what the Armed Forces do with their older pilots," he said.

The Navy, for instance, automatically downgrades any pilot who reaches 50 years of age. The most senior, and often the oldest, airline pilots on the other hand, get first crack at the newest, fastest equipment.

According to Captain Henry H. Meadows, U.S.N., physical qualifications officer for Navy aviation, pilots start slipping after 40. A usual decline in vision is the primary reason for the automatic downgrading at 50 years, he said, although generally higher blood pressure and slower reflexes also play a part.

Any Navy pilot over 50 who wants to continue flying on an unrestricted basis, he said, must undergo special tests. It is a system such as this which the FAA intends to establish.

MAY SMOOTH RELATIONS

The new medical program should help smooth relations between the FAA and the Civil Aeronautics Board, which until the establishment of the FAA last year made the regulations and which still hears and decides appeals from applicants denied certification by the FAA.

In the past, the CAB has decided many of these appeals against the FAA—and the old CAA. It has, as the Flight Safety Foundation report noted, given certification to "airmen with vision in only one eye, with almost complete hearing loss, with variable loss of limbs (including a quadriplegic), with below-standard depth perception and color vision, and with many other physical or medical deficiencies."

Such cases have occurred in all classes of pilots, although they are most prevalent among student and private pilots.

The FAA feels particularly strongly about 32 recent appeals, 26 of which have been decided so far—and all against the FAA. "With such a situation, there's almost no point in having a medical program," Dr. Smith said.

TROUBLE OFTEN COMPOUNDED

Part of the trouble is caused by the provision in the current physical requirements which permits issuance of limited medical certificates to pilots who have deficiencies but are able to compensate for them.

Also, in these same requirements, under the headings of "General Physical Condition" and "Nervous System," the wording is that the applicant shall not have defects or diseases which "would be likely" to interfere with his safe performance in the air.

In many cases, FAA personnel feel they cannot prove an applicant would be unsafe until he actually has a crash; and then it's too late.

The trouble is often compounded by the inability of the FAA to be represented at the hearings by a medical specialist and by the sketchy data on which it often must base its objections.

A high CAB official, for instance, last week told of one pending appeals case involving a diabetic who requires insulin. The applicant's chief witness at the hearing was a top doctor from the Mayo Clinic who had personally observed the man for a week and who insisted he would not be a danger in the air.

RIGHTS OF INDIVIDUAL

The FAA was represented by one of its regional attorneys, who could state the Agency's general position, but who could not give testimony on the actual condition of the applicant.

"Which way do you think the hearing examiner is going to decide the case?" the official asked.

"All we have been asking," said another CAB official, "is that the agency translate into reasonable terms the significance of the applicant's condition." He added that the Board "has always regarded very seriously the rights of the individual; this is a very fundamental factor."

STORY OF DEAD MAN TOLD

The Board is interested in knowing for instance, why a private pilot should be denied certification for flying by himself when no one questions his capability to drive a car, he said.

Many experts feel, however, that the CAB has gone too far in protecting the rights of the individual.

"I have seen a number of cases in the last 2 years where I would never have granted the applicant his certificate, and the CAB did," said Dr. William J. Kennard, a member of the American Medical Association special committee on aviation medical problems and a retired Air Force brigadier general who was head of the aviation medical division of the Air Force Surgeon General's office.

"There's a story of the CAB granting a man his certificate after a year's delay and finding that he had died," Dr. Kennard said. "Some of the cases I've seen were about that bad."

Dr. Smith and other FAA personnel hope that the new, more specific regulations, combined with an expanded and improved medical examination system, will end the controversy.

"The role of the CAB in the appeals cases then will be to determine whether or not

the applicant meets the medical requirements, rather than whether or not he will be a danger in the air," Dr. Smith said. Under the new regulations, he said, the whole air safety program will have a sound medical foundation.

HORSE AND BUGGY DAYS

Mr. BRIDGES. Mr. President, the March issue of the Freeman magazine contains an article by Mr. Ralph Bradford entitled "Horse and Buggy Days." Mr. Bradford effectively counters remarks that are frequently and sarcastically made about "horse and buggy days" being out of date. This article contains a number of facts which long ago should have been set forth. For example, in referring to those persons who object to going back to the "horse and buggy days," Mr. Bradford asks this question:

Do you happen to believe that a nation, like an individual, should pay its debts honestly and honorably and not defraud its creditors by forcing them to accept payment in depreciated money? Then surely you are a hangover from the horse and buggy period.

I think that many of our young people, as well as their elders, might well refresh their memories as to the principles which were established in past years.

I ask unanimous consent that the article from the Freeman be inserted in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HORSE AND BUGGY DAYS

(By Ralph Bradford)

One way to damn a person who speaks up for solvency in these spendiferous years is to ask him scathingly, "What do you want us to do—go back to the horse and buggy days?"

This not only conjures up the image of an outmoded means of transportation, but denotes also that the person addressed has a primitive and unprogressive outlook. To say of a man that he possesses a horse and buggy mind is to bury him very deep indeed in blackest obloquy.

A President of the United States gave great currency to the phrase in the middle thirties. The Supreme Court had invalidated one of his pet interventionist measures by declaring it unconstitutional. To the joy and satisfaction of his worshipful followers, he put the Court in its place by asserting that its decision would take the country back to the horse and buggy days.

Since then the phrase has served many a progressive spender when he felt the need of administering oral chastisement to some benighted devotee of a balanced budget and a sound currency.

Do you happen to believe that a nation, like an individual, should pay its debts honestly and honorably and not defraud its creditors by forcing them to accept payment in depreciated money? Then surely you are a hangover from the horse and buggy period.

Do you think it is unfair to your grandchildren to pile up mountainous debt and leave it for them to pay as best they can? Ah then, quite clearly you belong to the horse and buggy type of mentality.

Are you concerned lest continued governmental spending, year after year, of more than it takes in will lead to insolvency and ruin? Why then—what's the matter, man, do you want us to go back to the horse and buggy days?

It is a verbal dagger that has caused many a stout heart to quail and grow faint—and I often wonder why. Actually, the horse and buggy days constituted one of the most enlightened and progressive periods in human history.

THE BUGGY CAME LATER

The horse, of course, served mankind from very early times. We see him in prehistoric picture tablets, bearing burdens and drawing loads. Sometimes he is depicted drawing sledges; at others he is hitched to carts or wagons. Here and there we find him galloping fiercely ahead of Assyrian or Roman chariots of war. Later he furnished the power for cumbersome but on the whole rather stately coaches.

But the light, delicate, strong, and easily handled vehicle with the unfortunate name of "buggy"—this was a latecomer in the large family of horse-drawn contraptions and did not reach very general use until around 1800. Its age was roughly the 19th century.

In itself it was a distinct advancement over many of its predecessors. In England it was generally a two-wheeled conveyance drawn by one horse hitched between side members known as shafts. It developed also in India, where it usually had a hood, or top.

The American buggy could be drawn either by a single horse between shafts, or by a team hitched to an equalizer called a double-tree, and harnessed on either side of a guiding pole, usually called the "tongue." There were several varieties of buggy in this country, with or without tops. When there was a top, it could be let down in fair weather and put up in foul. Side curtains could be snapped on when it rained, and a storm curtain was also supplied, with an isinglass window and protected slots for the reins, or "lines" as most people called them. This curtain came from the top down over the dashboard in front, thus enabling driver and passenger to proceed snugly through the rain.

A feature of most buggies was the so-called fifth wheel. This was a horizontal metal ring, made up of two parts that rotated on each other around the king-bolt or center pin of the swinging front axle. This fifth wheel, far from being the useless appendage that its name came later to imply, was a valuable addition to travel comfort in that it prevented careening, and also enabled the buggy to be turned around in a very short compass.

So much for the buggy as a means of transportation—a light, springed, cushioned, sometimes rubber-tired, generally, comfortable, and often gaily painted little conveyance. It was a "modern" vehicle in which people went happily and not at all uncomfortably about the business of getting from one place to another—or of going nowhere in particular. People often "took a spin" for pleasure in their buggies, just as they later did in their automobiles.

A PERIOD OF REMARKABLE PROGRESS

But what of the horse and buggy days? What of that dark and dismal era to which you are quickly consigned if you are so brash as to ask, regarding any piece of public work, "What does it cost?" What, in short, of that period in history which is the present-day symbol of backwardness and stagnation?

The horse and buggy days? Well, to start out with, they were the days of Watt and Evans and Bull and M'Naughton—days in which the imaginations of men dreamed up ways to harness the expansive power of steam to make it push a piston and finally turn a wheel. They were the days of George and Robert Stephenson, of Peter Cooper and their successors, who believed that the steam engine could be made to drive a thing they called a locomotive—and who made it work. They were the days of Symington and Bell and Fitch and Fulton, who set steam to turning the paddles of watercraft; and of Ericsson, who did away with the paddles in favor of a submerged screw.

The horse and buggy days? They saw Corliss perfect the reciprocating engine; they saw De Laval invent the steam turbine. And when it seemed that steam had about reached the zenith of its development, they saw the age of electricity begin and develop. It was the age of Volta, Farraday, Kelvin, Maxwell, Ampere, Ohm—bold thinkers and patient experimenters who advanced the theories and surmises of Galvani, Franklin, and the other pioneers to the point of practical use and application.

And then, right in the middle of the horse-and-buggy period—it was 1837—the name of a portrait painter named Morse flashed upon the electric horizon, and the telegraph was born. A few years later the Brett Brothers, followed by Crampton, pioneered the ocean cable by laying the first wires under the English Channel. And in 1858, while the horse and buggy were still a going concern, the New World and the Old were joined by Field's transatlantic cable.

In 1879, driven to his work no doubt by horse-and-buggy transport, Thomas Edison invented the incandescent bulb, and the era of electric illumination broke splendidly upon the world. And just ahead of that, young Alexander Bell spoke his summoning words to Watson over the first telephone.

While the horse-drawn cabs and carts of Paris went cloppety-clop over the paving stones, a young couple named Curie toiled in their dreary workshop to startle the world with the magic of radium; and while there were as yet only a few automobiles in the whole world, a young Italian named Marconi had dispatched the first wireless message. In the same period the human voice, acoustically recorded on wax and zinc, was reproduced mechanically, and the now-commonplace but then-miraculous moving picture was created.

While all this was going on, sail gave place to steam on the high seas, and men went from continent to continent amid all the comforts and thrills of great luxury liners—but they went to the dock in a conveyance of the horse and buggy days. The crude engines of Stephenson and Cooper evolved into mighty moguls with compound drive, and the American Continent was spanned and crisscrossed with a railroad system of fabulous speed, comfort, and dependability—even while the passengers drove to the depots in horse-drawn cabs and buggies.

That was because men of inventive skills and entrepreneurial talents thought first of mass transport rather than of individual conveyance. When mass transport had been well served by the development of ship and train, those skills and talents were directed to the needs and desires of the individual and the family; the internal combustion engine was soon brought to practical perfection, and the automobile followed.

But while the automobile was still an infant and the horse and buggy age was still in lusty stride, another bit of magic was wrought by men of genius and persistence. The Wright brothers flew above the sands of Kitty Hawk. The air age, too, began in the horse-and-buggy days.

MEDICAL DEVELOPMENT

These paragraphs have traced only the more dramatic and obvious achievements. Medical science also advanced in the same period with seven-league strides. It was the century of Laennec, who invented the stethoscope, of Serturner, who isolated morphine from the opium gum, of Long and Morton, who developed ether. In this dark age Auenbrugger and Corvisart discovered percussive diagnosis; Bright solved the meaning of urinary albumen, Blundell devised blood transfusion, and Semmelweiss discovered the cause and prevention of the deadly puerperal fever. Virchow laid the foundation for cellular pathology, Pasteur

demonstrated the germ theory of disease, Lister began the use of antiseptics, McDowell introduced abdominal surgery, and Roentgen invented, or rather discovered, the X-ray.

Malaria and yellow fever were conquered. Typhoid, once a dread scourge, was practically eliminated. Tuberculosis, the great killer, lost much of its terror. Smallpox was reduced to manageable proportions. Surgery was vastly improved and extended. And perhaps most significant of all, the importance of mind in the cure and prevention of disease was recognized.

SOCIAL AND POLITICAL GROWTH

It was a century of the greatest invention and material progress and general prosperity that the world had ever known or dreamed of, and it was all done in the horse-and-buggy days.

It was a time, too, of social and political progress. Here in the Western World a new Nation had just been founded, based on fresh new principles of self-government. The theory of the divine right of kings had run its course. The ancient ideas of monarchial and other highly centralized authorities were gradually abandoned in favor of representative government. The liberty and importance of the individual were stressed, and statesmen were careful to build up safeguards for man's freedom of conscience and of choice.

At the core of the new attitude was a wholesome fear of government. Comprehending fully that government was necessary for their protection, men who understood its nature, who knew its fatal tendency to grow and spread and feed upon the substance of its own people, men who in their own lifetimes had experienced its tyrannies over mind and body, such men held with Jefferson that the best governed were the least governed; and in forming a wholly new Nation they set up checks and balances among the several arms of their government, all designed to preserve the greatest degree of freedom to people as individuals.

As the 19th century moved further into the horse-and-buggy age, society developed still further its social conscience and consciousness. At a prodigious cost of life and treasure, human slavery was abolished. Child labor was first outmoded by industrial progress, and then outlawed. Within the States, education was broadened and extended. Beneficent laws were enacted to protect the honest and unwary from exploitation at the hands of the unscrupulous. And quite apart from the compulsions of law, enlightened policies evolved in business and industry respecting the relations of management with labor and with the general public.

REVOLUTION IN AGRICULTURE

It was also a time of growth and development in many fields other than those we have mentioned. Agriculture was being studied, and men were going in for what they called scientific farming, with the laudable object of increasing production. They never dreamed that a time would come when they would be paid by their Government not to produce.

Chemistry was then the top magician, as electronics was later to be. Invention was the obsession of many; and out of the great seethe of questing minds, the world was enriched. The moldboard and landside plows, the mowing machine, the semiautomatic hay rake, the multiple-furrow drill that placed seed and fertilizer in the ground at the same time, the mechanical broadcasting machine for sowing grasses and small grains, the checkrow planter for corn and cotton, the reaper, the binder, the steam-powered combine—all these came along in those benighted horse-and-buggy days.

So did the trolley car, at first horse drawn, later pulled by cables, and at last electrically driven. So did the elevator or lift, which made multiple-story buildings possible. The sleeping car, the automatic coupling, the air brake and the refrigerator car—four primary essentials to railroad progress—all were invented in the horse-and-buggy days.

It was an amazing time of development—roughly a century of man-wrought miracles. More strides were made toward speed, production, comfort, health, ease, and general diffusion of material benefits than had taken place in all the previous ages of human experience lumped together.

A TIME OF SOLVENCY

And along with other virtues, it was generally a time of solvency. Following the Revolutionary War the Colonies were heavily in debt. Not yet a united country, not yet truly a self-governing Nation, but rather an alliance of separate and often antagonistic provinces, the war-created Continental Congress of the nation-about-to-be had attempted the impossible by creating a kind of fiat paper money. It was called continental currency to distinguish it from the money issued by the several Colonies on their own authority, and its individual notes were referred to as "continentals." This money soon became so worthless that the phrase "not worth a continental" was invented to describe anything that was completely without value. There was a terrific inflation—which is another way of saying that the Congress had spent on the war far more than it could realize from taxes, and had issued bales of excess and unsupported paper money. The cost of living went sky high—which simply meant that, with no confidence in the plentiful continentals, people preferred things to money and bid up their prices accordingly. But then came the new constitutional Republic, buttressed by the improved monetary policies of Hamilton; and in a short time the young country again had a currency that meant something.

It would, of course, be naive to assert that absolute monetary and financial stability characterized the century of the horse and buggy. These lines are not written to overglamorize that period, nor to gloss over its shortcomings. There was pronounced inflation during the Civil War period; and there were other cycles of financial and industrial boom and subsequent panic.

Certainly it is not contended that voters and their agents in Congress during the 19th century understood thoroughly the fundamentals of monetary and credit policy. Then as now, the exploiters and victims of boom and bust blamed one another, and little suspected that Government tampering with money had helped cause bad conditions—which further tampering was expected to cure.

Nevertheless, the people of the horse-and-buggy century did generally hold a conservatively healthy respect for solvency. Of course, they knew about debt and its proper uses. They did not at all hesitate to borrow when it was good business to do so. They could have understood, and did understand, an occasional deficit year on the part of their government, when some unusual circumstance controlled.

But to operate on a permanent deficit basis, to keep piling debt on top of debt endlessly, cheapening their money and threatening their standards of living in the process—this is a procedure that would have been revolting to their reason and offensive to their practical good sense. Is this another reason to be slightly nostalgic about the horse-and-buggy days?

Now it is about time for somebody to rise up and say, "What do you want to do—go back to those horse-and-buggy days?" And that, needless to say, is nonsense. I couldn't go back if I would, and I wouldn't if I could. Those days had many discomforts and some hardships—though I must say they were not then so regarded. But nobody in his senses wants to go backward. The way of life and of progress is forward, to new comforts, inventions, achievements, adventures.

UNCHANGING TRUTHS

But there are certain things that do not change, whatever the age. Living in the space age does not alter the fact that honesty is the best policy. The miracle of atomic fission does not negate that two and two make four. A thermonuclear bomb may destroy a city and raise a cloud 100 miles high, but it does not destroy the truth that neither a man nor a nation can forever spend more than it takes in and escape bankruptcy. Supersonic speed can never take us away from the truth that human freedom and welfare are conditioned by limitations upon governmental power.

Such truths, which seem so easily forgotten or ignored today, were not merely in existence but were recognized and generally understood and acted upon during the horse-and-buggy days.

Some time ago I saw a drawing that depicted the parlor of an American home around 1900. The windows were heavily draped. The walls were hung with family portraits. An upright piano stood in the corner. A wood stove furnished heat. Even a "God Bless Our Home" motto was hanging above the door. The picture was supposed to be funny to a present-day viewer. But it failed to amuse me.

I was conscious that the scene typified an era. Maybe we shall have other eras as good, but we have not for many years enjoyed a period of time so filled with peace and comfort and lack of fretful worry, so rich with real security, and withall so full of freedom, as that one was.

Maybe the man of the picture had a small income by today's standards; but he had a comfortable home, and he lived well and saved money. And when he had saved that money, he was not haunted by the fear of ruinous inflation or the awareness that his savings were losing their value steadily and inexorably.

Maybe he ran a small business. If so, it was his business, not a kind of adjunct to the State. Nobody at Washington shed crocodile tears over his plight as a small businessman; and by the same token nobody at Washington or elsewhere told him how to run that business. If he wanted to expand it, he did so within the limits of his resources and credit, without securing the consent or approval of any bureau or commission, whether of the State or Federal Government.

Or possibly he was a farmer. If so, he was free to plant as many acres as he liked to whatever crops he pleased and sell his produce at the price it would bring in a relatively free market. If he could devise some way to raise more or better wheat or hogs or beef or wool or cotton, he was free to do so without being subject to fine and prosecution.

He had his problems, that turn-of-the-century householder, whatever his occupation. He probably knew some hardships. But actually he enjoyed a far greater sense of security than he would today.

SECURITY SOUGHT AND LOST

Security. What an irony the word contains. What are we secure from today, with the threat of thermonuclear devastation hanging over our lives? Are we secure in our position as a nation? If so, then why are we afraid? Are we secure economically? Then why the almost frenzied analysis and counteranalysis of the recent business slowup? And what of our so-called social security? What does it mean to the average beneficiary, when the dollars that he and his employer have paid in have already been spent for other governmental operations, while the promised benefits have shrunk to less than half their value, and are still shrinking?

Go back to the horse-and-buggy days? Certainly not. The way of life is forward, even though it may lead to disaster before it leads to fulfillment. But we might very well and with great profit go back to some of the moral values and some of the economic horse sense of that much maligned period.

At least we can stop referring to it with sneering condescension as though it were a kind of modern dark age. It was in fact a great and glowing century, excelling all others before it, and all of them combined, in the richness and variety of its unfoldment.

POLIO IS GAINING

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent to have printed in the body of the RECORD an editorial appearing in the March 11, 1959, issue of the Washington Daily News. This editorial gives a timely warning that the danger of polio is still with us and warns us that we must continue the fight by urging all to use the Salk vaccine.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

POLIO IS GAINING

Remember only a few years ago when people in this country, especially parents with small children, were almost frantic with fear of infantile paralysis, or polio?

In 1954, this disease killed or maimed 18,308 persons.

The next year Dr. Jonas Salk was able to announce an answer—the now celebrated Salk vaccine. The clamor for this vaccine bordered on hysteria. The Government put up money. Doctors' offices were stormed for shots. Vaccine manufacturers worked overtime.

In 1957, the polio casualty list was down to 2,499. People thought of polio as being virtually extinct—as well-conquered as smallpox or typhoid. But something happened. The desperation of 1954 and earlier years disappeared.

The vaccine, 85 to 90 percent effective, was available in abundant quantities. But the alarm subsided. The vaccine isn't being used.

So we cite these statistics: Last year polio cases were up 24 percent; in the first 8 weeks of this year, they are up 55 percent.

If your children (or you, if you are in the susceptible years) have not had the Salk shots and you think this editorial is intended to scare you, that's right. This disease is a killer. It is making a comeback. What more do you need to know?

OUTRAGE IN OIL

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a very appropriate article appearing in the March 16, 1959, issue of Barron's entitled "Outrage in Oil."

This article raises another very important question. If our oil is in such a surplus that we need import quotas as well as production quotas here in our own producing areas to prevent oversupply, then why continue the 27½-percent depletion allowance to encourage even greater discovery and supply?

The time is long overdue when we should cut this special tax privilege and give both the consumer and the taxpayer a break.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

OUTRAGE IN OIL—IMPORT QUOTAS WILL HARM PRODUCER AND CONSUMER ALIKE

In the voluminous annals of American industry, the 27th of August 1859, enjoys a special place. On that redletter day Edwin L. Drake, ex-railroad conductor and entrepreneur extraordinary, made the first commercial discovery of oil, not on some vast Texas plain, as might be expected, but near the quiet little farming town of Titusville, in western Pennsylvania. The epoch-making event already has been celebrated, in story if not yet in song, by publication of an entertaining book aptly titled "The Great Oildorado." In coming months, if all goes according to plan, the centennial also will be marked by the proclamation of Titusville Week, the issuance of a commemorative stamp and, tentatively at any rate, the sealing of a time capsule in a replica of the original well.

Such gestures are a fitting tribute to a remarkable fuel, which, since its discovery, has played a vital part in the mighty U.S. economic and military machine. Unfortunately, however, owing to the untimely intrusion of the Federal Government, the occasion has lost some of its luster. For in a year dedicated to the power and glory of domestic petroleum, Washington perversely has chosen to underscore its growing competitive weakness. Last Tuesday the White House imposed mandatory quotas on imports of crude oil and refined products. According to a proclamation of the President, the move was made to safeguard the national security. More jaundiced observers tend to view it as a political gift to U.S. oil and coal producers, thoughtfully wrapped in the flag. While the causes may be murky, however, the probable effects are all too plain. Import quotas will damage American prestige abroad. They will hurt the consumer at home. In the end, they are likely to lead to outright Federal control of an industry which once was famous for its flaming independence.

This mess of protectionist pottage has been threatening to boil over for a long time. It started to simmer 5 years ago, when Congress, at the behest of domestic producers of coal and oil, passed a special amendment to the Reciprocal Trade Agreements Act. Specifically, the Office of Civil and Defense Mobilization (then known as ODM) was given authority to decide whether imports of any commodity constituted a danger to the country. With this club in the closet, to change the metaphor, the agency soon persuaded the importers (who include not only the major integrated companies, but also a growing number of smaller operators) to embrace a system of voluntary import restraints. Though fairly effective, the velvet glove policy failed to satisfy the protectionists. Under their relentless pressure, the White House last week finally was persuaded to bare its iron fist. Complete details of the mandatory scheme are not available; the harsh outlines, however, may be discerned. To begin with, it covers not merely crude, but also, for the first time, residual fuel oil and other products. Effective immediately, moreover, all imports will be reduced, by as much as 20 percent in some cases. In a new and disturbing departure, finally, the Government plans to act as a kind of watchdog over petroleum prices.

To justify its outrageous program, the administration, as noted, has taken refuge in the plea of national security. Specifically, it cites the decision of OCDM that oil imports, at recent levels, constitute a threat to domestic producers, whose wellbeing, in turn, is viewed as a strategic imperative. Despite its impressive authorship, this finding is clearly suspect. Imports, to begin with, have not throttled the domestic industry; at worst they have tended to slow its growth. From the military standpoint, moreover, Canadian oil, the flow of which also has been curtailed, is surely neither more vulnerable nor less valuable than its U.S. counterpart. Finally, the OCDM seems absurdly out-of-date in its whole approach. Like the proverbial generals, the defense officials are preparing for the next war with the tactics of the last. Yet, if one is to credit the testimony of the Commander in Chief of the Armed Forces (given the very day after he issued his proclamation), the United States never again will fight a major war with anything but atomic weapons. In such a holocaust, oil in the ground is a dubious asset.

The advantages of the mandatory program thus are illusory; the drawbacks, contrariwise, are very real. For consumers, the bill already has begun to mount: Scarcely had the new curbs been announced when one Midwest refiner, the forerunner of others throughout the country, raised the price of gasoline. As to the industry, some producers, notably those misleadingly known as independents, may enjoy a temporary windfall. Their gains, however, in part at least, will come out of the pockets of other oil concerns, notably large refiners such as Tidewater (which estimates its losses at roughly $25,000 per day). What is worse, they will be at the expense of the very system of free enterprise under which the venturesome oil business, perhaps more than most, has grown and prospered. Among other things, the new decree will mean Federal licensing and inspection; freeezing of competitive status; and, if history be any guide, trafficking in quotas and bootlegging of crude. Sooner or later, it could lead to price controls, all the way from wellhead to pump. Two years ago a high-ranking bureaucrat warned that "if mandatory curbs were initiated, there would be no assurance that they would not eventually blanket the industry." Unlike most forecasts out of Washington, his grim prophesy shows signs of coming true.

While the outlook, then, is none too bright, all is not yet lost. According to reports in the trade, several leading companies are planning to challenge the new controls on constitutional grounds. Perhaps in the courts they will succeeed in defending the rights which Congress and the White House have overridden. One can only wish them success in their quest. Meanwhile, as the industry prepares to observe its centennial, it will do well to ponder a homely truth. Since 1859 the oil business has thrived on individual risk and reward, not on Government largesse. Willingness to venture remains its best hope for the next hundred years.

FISCAL CONDITION OF ALASKA

Mr. GRUENING. Mr. President, when statehood for Alaska was debated in the 85th Congress, the question as to Alaska's ability to support a State was often raised, and we have heard echoes of this doubt expressed subsequently.

I have never had any doubt that Alaska would be able to support statehood, although it is clear that, in justice and fair play, Alaska is entitled to consideration for the inequities, discriminations, and injustices that were visited upon the 49th State during the 92 years of territorial rule. During that period, we were for 40 years denied inclusion in the Federal aid highway legislation. We were for years denied the appropriations the University of Alaska was entitled to as a land-grant college. Specific discriminatory provisions were written into the Merchant Marine Act of

1920 which brought about a steamship monopoly, and consequently the highest freight rates in the world—which are, in large part, the direct cause of Alaska's high cost of living. Many other such discriminations have greatly handicapped Alaska. I have named only a few; nevertheless, it gives me great pleasure to report that the first State legislature, while increasing its budget for the first year by $6 million, has balanced the budget, and is asking for no additional taxes to meet these increased appropriations.

I ask unanimous consent that a special dispatch to the New York Times from Juneau, Alaska's capital, reporting on this situation, be printed in the RECORD at the conclusion of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ALASKA BUDGET UP BY 6 MILLION; NO TAX RISE ASKED TO BALANCE IT

JUNEAU, ALASKA, March 14.—Acting Gov. Hugh J. Wade offered the Alaska Legislature yesterday a balanced budget of $26,500,000 for the 12-month period beginning July 1. The budget does not call for any new tax measures.

The State will have a surplus of $3,049,000 on June 30, carried over from Territorial days.

The $26,500,000 budget is about $6 million more than Alaska spent under Territorial status last year.

The bulk of the increases is sought in three fields—education, health and welfare, and the fish and game department.

Alaska's existing State income tax is expected to produce the largest single source of income, $8,102,000. This is more than a million dollars greater than last year's receipts. Leased rentals for oil and gas lands and the State's share of receipts from the seal-fur sales of Pribolofs Island account for much of the additional expected revenue.

Despite the increase, the budget generally reflected the "hold the line" on spending outlined by Gov. William A. Egan shortly after he was elected last last year. More than $6 million was slashed from individual departmental requests. Governor Egan is now in Seattle, recuperating from surgery.

Mr. Wade cut State construction to a minimum, recommending the spending of only $800,000 of the $2 million worth of projects by the education department.

In his budget message, Mr. Wade said Alaska had entered statehood in a "sound financial condition," but he warned against optimism.

The Acting Governnor said Alaskans should not deceive themselves that the oil and gas lease revenue would continue indefinitely. "Sustained production is needed to make this a continuing major item of future income," he said. The rentals produced $3 million last year, but have risen as oil companies have launched large-scale explorations in the State.

The budget was the first presented to an Alaskan Legislature by an Alaska Governor. Under Territorial status the budget was compiled by the State finance department.

THE SOLICITOR GENERAL SUPPORTS THE SUPREME COURT

Mr. CLARK. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the New York Times of Saturday, March 14, 1959, entitled "Rankin Assails Critics of Court."

The PRESIDING OFFICER (Mr. GRUENING in the chair). Is there objection to the request of the Senator from Pennsylvania?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RANKIN ASSAILS CRITICS OF COURT—INSIDIOUS ATTACKS IMPERIL BENCH, SOLICITOR GENERAL TELLS PITTSBURGH BAR

(Special to the New York Times)

WASHINGTON, March 13.—Solicitor General J. Lee Rankin urged the country's lawyers today to support the Supreme Court.

"We cannot permit the Court's independence to be undermined by direct or indirect assaults," he said.

"Nor can we stand by and let the Court suffer for its declaration of some of the finest values in American life; for its recognition that the declared standards must be lived by; for the reaffirmation of the integrity of the individual; and that the State is required to treat its citizens with equality."

Mr. Rankin spoke to a Pittsburgh regional meeting of the American Bar Association.

Just last month, at its midwinter meeting, the association passed a series of resolutions critical of Supreme Court decisions to communism.

Mr. Rankin's speech was released by his office here.

Mr. Rankin offered stronger praise for the Supreme Court than has recently come from any other high administration official.

"If we did not have a Supreme Court today we would have to create one," he said, "or our basic freedoms would rapidly disappear.

"These are heroic times and man is engaged in a period of not only historic thoughts but orbital enterprises * * * With such rapid developments, involving great aggregations of capital, associations of labor and huge government, the individual never needed more the protection of his freedoms by an independent court."

Mr. Rankin suggested that continuous attacks on the Supreme Court may threaten its independence. He described the assault on the Court as "an insidious and indirect effort to affect its judgment."

"The layman cannot fully realize how much the Court means to the preservation of his freedoms and his fundamental rights," he said.

CRITICS RALLYING POINT

"But we who labor in the law know that our responsibility for the defense of the Court is therefore incomparably greater * * * we should be proud to support and defend each additional step toward the day that man shall be judged in accordance with his intrinsic worth as a member of the family of God."

Mr. Rankin traced past attacks on the Supreme Court. He said the Court today was "the target of a rare combination of dissident groups who have found common ground in their displeasure with decisions in their fields of special interest," and he asserted that "segregation is the particular rallying point."

Mr. Rankin defended the school segregation decision of 1954 as the only proper course for the Supreme Court to take. He said to have upheld the constitutionality of racially segregated schools would have broken with the line of recent decisions in racial cases, and he added:

"The consicence of a great people could not be denied so easily. It is also difficult to imagine how we could have justified such a judgment to the peoples of the world after repeated claims that under our law citizens have equal rights."

Mr. CLARK. Mr. President, I should like to associate myself particularly with the comments of the Solicitor General of the United States to the effect that the continuous attacks upon the Supreme Court may threaten its independence. The Solicitor General describes the assaults on the Court as "an insidious and indirect effort to affect its judgment."

As Mr. Rankin says, "The layman cannot fully realize how much the Court means to the preservation of his freedoms and his fundamental rights."

I am sure many Members of this body have the same views about the Supreme Court as those expressed by the distinguished Solicitor General of the United States.

WILEY URGES NATIONAL VIGILANCE IN BERLIN CRISIS

Mr. WILEY. Mr. President, we recognize that today the world faces a serious threat to its peace and security—the Berlin crisis. A major question in the minds of leaders and citizens, at home and abroad, is: How can we find a solution to the crisis without war?

The challenge, as we fully appreciate, is complex. The situation is particularly difficult, since we must deal with the Communists, who have no principles, ethics, standards of conduct, or morality. Over the years, we have experienced that the sole criterion by which they justify action is whether or not it will forward the objectives of the Communist world conspiracy.

To meet the Soviet challenge in Berlin, will require:

First. Ever greater unity among our allies;

Second. Readiness of our Armed Forces including NATO, to protect us in the awful event that the Kremlin should attack us;

Third. Exhaustive efforts to find a reasonable, peaceful solution to the crisis;

Fourth. Mobilization, as much as possible, between now and May 27, of world opinion—perhaps through the United Nations—to "pressure" the Kremlin into a peaceful, or at least a nonwar solution to the crisis, which has been fostered by its own unjustified, immoral, and unlawful acts in Berlin.

Here in our own country, there are definite steps we must take, including:

Keeping our citizens alert to the dangers confronting us;

Encouraging a unified, bipartisan support of foreign policy;

Adoption of a strong defense program; and

Approval of an adequate mutual security program—to assure our allies that we stand with them shoulder-to-shoulder in defense of our world interests.

In our efforts to recognize and fulfill our bona fide obligations to the people of Berlin and the free world, we need to make it clear to the Communists that we will not be blackmailed or threatened into acquiescing in the Soviet's unwarranted demand for territorial expansion or unjustified violation of their international obligations.

Even though the situation is grave, however, I desire to emphasize that this is no time for hysteria. Nor is it a time to rush into a series of crash military programs, which—because of required long planning periods—would make

them useless in the present crisis and perhaps upset long-range planning to meet similar threats in the future.

Instead, we must stand firmly vigilant and ready to act shoulder-to-shoulder with our allies.

However, recognizing the extent to which the Kremlin appears willing to push the world toward war in the current crisis, we had better be forewarned for the future and make our plans, particularly for defense and mutual security, accordingly.

The March 14 edition of the New York Times carried a thought-provoking article on the contribution which mutual defense makes to strengthening the overall defense of the free world, as well as the need for an adequate defense program. I request unanimous consent to have the editorial, with a recently released statement by myself on the need for a strong mutual security program, printed in the RECORD at this point.

There being no objection, the editorial and statement were ordered to be printed in the RECORD, as follows:

[From the New York Times, Mar. 14, 1959]

BERLIN AND MUTUAL DEFENSE

With special reference to the threatening crisis over Berlin, President Eisenhower has opened the annual battle to maintain the collective military defense and defensive strength of the free world.

He had already called for $41 billion for our own Military Establishment, which is all he thinks he can use in this field. But our security, and world peace, do not rest on our own Military Establishment alone. They rest on the alliances and mutual security arrangements we maintain with 42 nations, which add their strength to ours, and on the invulnerability of all free nations to Communist political or economic penetration. With these goals in mind, the President calls for $3,930 million more for what is misleadingly labeled "foreign aid" but is really an integral part of the defense structure of the United States.

The collective Western determination to deter and, if necessary to resist, Soviet aggression, whether in Berlin or elsewhere, is being reaffirmed in continuous consultations, as illustrated by the complete unity of views established between Prime Minister Macmillan and Chancellor Adenauer. This unity will be further cemented when Mr. Macmillan visits President Eisenhower next week. But the congressional battle over mutual security funds promises to be as bitter as ever, and at the moment the psychological impact of that congressional battle could be as important as the funds appropriated.

In his strongly worded message President Eisenhower yesterday gravely warned against any reckless cuts of the mutual security program lest the Communist conspiracy, which maintains 6,500,000 armed men, convert us into "the richest nation in the graveyard of history." Congress itself has become aware of this menace. But, whatever may be said about some controversial aspects of the President's defense budget, too many Congressmen seek safety in a hasty expansion of our own Military Establishment. They are more than willing to provide greater funds for that purpose, but less willing to provide ample funds for mutual security. The principal trouble here appears to be false reasoning.

As the President points out, dollar-for-dollar mutual defense funds add more to our security than would a greater amount spent at home. Mutual security funds have helped to maintain 5 million armed men, 30,000 aircraft, and 250 strategic air, naval, and army bases among our allies and friends to supplement our own strength. Without that added strength it would be difficult to stand fast in Berlin; without it the United States would have to convert itself into a beleaguered Fortress America, sacrificing everything to mere survival. This is true to only slightly lesser degree of our economic aid, designed to meet the Soviet economic offensive.

Let us hope that Congress will weigh these arguments thoughtfully and do nothing to undermine the morale of our allies and friends at this critical moment by a niggling opposition based upon false premises.

STATEMENT BY SENATOR WILEY—STRONG MUTUAL SECURITY PROGRAM URGED

The security of the free world, now and in the future, will depend, to a substantial degree, upon the extent to which we are willing—militarily and economically—to support the efforts of our allies in withstanding the aggression of communism.

As the Communist nations gain in power, the need for strong alliances among free nations is increasing—not diminishing.

We recognize that, today, the free world-Communist conflict, rather than lessening, is becoming more complex and many fronted—covering a wide variety of military, economic, scientific, cultural, psychological, ideological, and other ranges.

If the free world fails to meet these challenges, it may well mean enslavement for more than the nearly 1 billion people—or about one-third of the world's population—now dominated by communism.

So, let us not kid ourselves. The battle is not over. Rather, an ever-greater challenge to our security is ahead of us—perhaps for many years.

Again and again, representatives of the Government, the military, and free enterprise have carefully studied the program and found that, dollar for dollar, the mutual security expenditures buy more security than expenditures, for example, for our own forces.

To the degree that it is possible to provide military support that will prevent the shouldering of weapons by American boys, I say "Let us prove it."

Economically, let us shore up the free world's economic front; however, insofar as feasible, I believe that this aid should be in the form of loans—rather than grants.

Over the years, the principle of mutual security has proved workable. Let us not destroy it at a time when the free world is still in serious danger.

Naturally, the Congress will want to carefully examine the $3.9 billion program offered by the President and perhaps make its own recommendations and changes.

Even though this program, traditionally, is not politically popular, however, I would hope that Members of Congress would be as courageous in supporting mutual security—essential to our defense—as in supporting "pork barrel" legislation—perhaps involving less political hazards.

THE BERLIN CRISIS

Mr. MORSE. Mr. President, I have a series of items to submit for the RECORD as quickly as possible. They are all related items, but I shall not need to exercise all of my rights under the 3-minute rule with respect to each one.

I am today introducing a resolution with reference to seeking an advisory opinion of the World Court on the Berlin crisis. I am also offering for insertion in the RECORD certain sections of the United Nations Charter. It is my desire to make a very brief comment on these items for inclusion in today's proceedings of the Senate before the President's speech tonight.

The resolution reads as follows:

Resolved, That it is the sense of the Senate that the United States should seek to have the appropriate organ of the United Nations request an advisory opinion of the International Court of Justice, pursuant to article 96 of the Charter of the United Nations, which would confirm the continuing validity of the rights of the United States as an occupying power to maintain its Armed Forces in Berlin and to have free and unrestricted access to and from Berlin in connection with its occupation thereof.

I ask that the resolution be appropriately referred.

The PRESIDING OFFICER. The resolution will be received and appropriately referred.

The resolution (S. Res. 92) was received and referred to the Committee on Foreign Relations.

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the RECORD at this point as a part of my remarks the statute of the International Court of Justice.

There being no objection, the statute was ordered to be printed in the RECORD, as follows:

STATUTE OF THE INTERNATIONAL COURT OF JUSTICE

Article 1

The International Court of Justice established by the Charter of the United Nations as the principal judicial organ of the United Nations shall be constituted and shall function in accordance with the provisions of the present statute.

CHAPTER I—ORGANIZATION OF THE COURT

Article 2

The Court shall be composed of a body of independent judges, elected regardless of their nationality from among persons of high moral character, who possess the qualifications required in their respective countries for appointment to the highest judicial offices, or are juris-consults of recognized competence in international law.

Article 3

1. The Court shall consist of fifteen members, no two of whom may be nationals of the same state.

2. A person who for the purposes of membership in the Court could be regarded as a national of more than one state shall be deemed to be a national of the one in which he ordinarily exercises civil and political rights.

Article 4

1. The members of the Court shall be elected by the General Assembly and by the Security Council from a list of persons nominated by the national groups in the Permanent Court of Arbitration, in accordance with the following provisions.

2. In the case of members of the United Nations not represented in the Permanent Court of Arbitration, candidates shall be nominated by national groups appointed for this purpose by their governments under the same conditions as those prescribed for members of the Permanent Court of Arbitration by article 44 of the Convention of The Hague of 1907 for the pacific settlement of international disputes.

3. The conditions under which a state which is a party to the present statute but is not a member of the United Nations may participate in electing the members of the Court shall, in the absence of a special agreement, be laid down by the General Assembly upon recommendation of the Security Council.

Article 5

1. At least 3 months before the date of the election, the Secretary General of the United Nations shall address a written request to the members of the Permanent Court of Arbitration belonging to the states which are parties to the present statute, and to the members of the national groups appointed under article 4, paragraph 2, inviting them to undertake, within a given time, by national groups, the nomination of persons in a position to accept the duties of a member of the Court.

2. No group may nominate more than four persons, not more than two of whom shall be of their own nationality. In no case may the number of candidates nominated by a group be more than double the number of seats to be filled.

Article 6

Before making these nominations, each national group is recommended to consult its highest court of justice, its legal faculties and schools of law, and its national academies and national sections of international academies devoted to the study of law.

Article 7

1. The Secretary General shall prepare a list in alphabetical order of all the persons thus nominated. Save as provided in article 12, paragraph 2, these shall be the only persons eligible.

2. The Secretary General shall submit this list to the General Assembly and to the Security Council.

Article 8

The General Assembly and the Security Council shall proceed independently of one another to elect the members of the Court.

Article 9

At every election, the electors shall bear in mind not only that the persons to be elected should individually possess the qualifications required, but also that in the body as a whole the representation of the main forms of civilization and of the principal legal systems of the world should be assured.

Article 10

1. Those candidates who obtain an absolute majority of votes in the General Assembly and in the Security Council shall be considered as elected.

2. Any vote of the Security Council, whether for the election of judges or for the appointment of members of the conference envisaged in article 12, shall be taken without any distinction between permanent and nonpermanent members of the Security Council.

3. In the event of more than one national of the same state obtaining an absolute majority of the votes both of the General Assembly and of the Security Council, the eldest of these only shall be considered as elected.

Article 11

If, after the first meeting held for the purpose of the election, one or more seats remain to be filled, a second and, if necessary, a third meeting shall take place.

Article 12

1. If, after the third meeting, one or more seats still remain unfilled, a joint conference consisting of 6 members, 3 appointed by the General Assembly and 3 by the Security Council, may be formed at any time at the request of either the General Assembly or the Security Council, for the purpose of choosing by the vote of an absolute majority one name for each seat still vacant, to submit to the General Assembly and the Security Council for their respective acceptance.

2. If the joint conference is unanimously agreed upon any person who fulfills the required conditions, he may be included in its list, even though he was not included in the list of nominations referred to in article 7.

3. If the joint conference is satisfied that it will not be successful in procuring an election, those members of the Court who have already been elected shall, within a period to be fixed by the Security Council, proceed to fill the vacant seats by selection from among those candidates who have obtained votes either in the General Assembly or in the Security Council.

4. In the event of an equality of votes among the judges, the eldest judge shall have a casting vote.

Article 13

1. The members of the Court shall be elected for 9 years and may be reelected; provided, however, that of the judges elected at the first election, the terms of five judges shall expire at the end of 3 years and the terms of five more judges shall expire at the end of 6 years.

2. The judges whose terms are to expire at the end of the above-mentioned initial periods of 3 and 6 years shall be chosen by lot to be drawn by the Secretary General immediately after the first election has been completed.

3. The members of the Court shall continue to discharge their duties until their places have been filled. Though replaced, they shall finish any cases which they may have begun.

4. In the case of the resignation of a member of the Court, the resignation shall be addressed to the President of the Court for transmission to the Secretary General. This last notification makes the place vacant.

Article 14

Vacancies shall be filled by the same method as that laid down for the first election, subject to the following provision: the Secretary General shall, within 1 month of the occurrence of the vacancy, proceed to issue the invitations provided for in article 5 and date of the election shall be fixed by the Security Council.

Article 15

A member of the Court elected to replace a member whose term of office has not expired shall hold office for the reminder of his predecessor's term.

Article 16

1. No member of the Court may exercise any political or administrative function, or engage in any other occupation of a professional nature.

2. Any doubt on this point shall be settled by the decision of the Court.

Article 17

1. No member of the Court may act as agent, counsel, or advocate in any case.

2. No member may participate in the decision of any case in which he has previously taken part as agent, counsel, or advocate for one of the parties, or as a member of a national or international court, or of a commission of inquiry, or in any other capacity.

3. Any doubt on this point shall be settled by the decision of the Court.

Article 18

1. No member of the Court can be dismissed unless, in the unanimous opinion of the other members, he has ceased to fulfill the required conditions.

2. Formal notification thereof shall be made to the Secretary General by the registrar.

3. This notification makes the place vacant.

Article 19

The members of the Court, when engaged on the business of the Court, shall enjoy diplomatic privileges and immunities.

Article 20

Every member of the Court shall, before taking up his duties, make a solemn declaration in open court that he will exercise his powers impartially and conscientiously.

Article 21

1. The Court shall elect its President and Vice President for 3 years; they may be reelected.

2. The Court shall appoint its Registrar and may provide for the appointment of such other officers as may be necessary.

Article 22

1. The seat of the Court shall be established at The Hague. This, however, shall not prevent the Court from sitting and exercising its functions elsewhere whenever the Court considers it desirable.

2. The President and the Registrar shall reside at the seat of the Court.

Article 23

1. The Court shall remain permanently in session, except during the judicial vacations, the dates and duration of which shall be fixed by the Court.

2. Members of the Court are entitled to periodic leave, the dates and duration of which shall be fixed by the Court, having in mind the distance between The Hague and the home of each judge.

3. Members of the Court shall be bound, unless they are on leave or prevented from attending by illness or other serious reasons duly explained to the President, to hold themselves permanently at the disposal of the Court.

Article 24

1. If, for some special reason, a member of the Court considers that he should not take part in the decision of a particular case, he shall so inform the President.

2. If the President considers that for some special reason one of the members of the Court should not sit in a particular case, he shall give him notice accordingly.

3. If in any such case the member of the Court and the President disagree, the matter shall be settled by the decision of the Court.

Article 25

1. The full Court shall sit except when it is expressly provided otherwise in the present statute.

2. Subject to the condition that the number of judges available to constitute the Court is not thereby reduced below 11, the rules of the Court may provide for allowing one or more judges, according to circumstances and in rotation, to be dispensed from sitting.

3. A quorum of nine judges shall suffice to constitute the Court.

Article 26

1. The Court may from time to time form one or more chambers, composed of three or more judges as the Court may determine, for dealing with particular categories of cases; for example, labor cases and cases relating to transit and communications.

2. The Court may at any time form a chamber for dealing with a particular case. The number of judges to constitute such a chamber shall be determined by the Court with the approval of the parties.

3. Cases shall be heard and determined by the chambers provided for in this article if the parties so request.

Article 27

A judgment given by any of the chambers provided for in articles 26 and 29 shall be considered as rendered by the Court.

Article 28

The chambers provided for in articles 26 and 29 may, with the consent of the parties, sit and exercise their functions elsewhere than at The Hague.

Article 29

With a view to the speedy dispatch of business, the Court shall form annually a chamber composed of five judges which, at the

request of the parties, may hear and determine cases by summary procedure. In addition, two judges shall be selected for the purpose of replacing judges who find it impossible to sit.

Article 30

1. The Court shall frame rules for carrying out its functions. In particular, it shall lay down rules of procedure.

2. The rules of the Court may provide for assessors to sit with the Court or with any of its chambers, without the right to vote.

Article 31

1. Judges of the nationality of each of the parties shall retain their right to sit in the case before the Court.

2. If the Court includes upon the bench a judge of the nationality of one of the parties, any other party may choose a person to sit as judge. Such person shall be chosen preferably from among those persons who have been nominated as candidates as provided in articles 4 and 5.

3. If the Court includes upon the bench no judge of the nationality of the parties, each of these parties may proceed to choose a judge as provided in paragraph 2 of this article.

4. The provisions of this article shall apply to the case of articles 26 and 29. In such cases, the President shall request one or, if necessary, two of the members of the Court forming the chamber to give place to the members of the Court of the nationality of the parties concerned, and, failing such, or if they are unable to be present, to the judges specially chosen by the parties.

5. Should there be several parties in the same interest, they shall, for the purpose of the preceding provisions, be reckoned as one party only. Any doubt upon this point shall be settled by the decision of the Court.

6. Judges chosen as laid down in paragraphs 2, 3, and 4 of this article shall fulfill the conditions required by articles 2, 17 (paragraph 2), 20, and 24 of the present statute. They shall take part in the decision on terms of complete equality with their colleagues.

Article 32

1. Each member of the Court shall receive an annual salary.

2. The President shall receive a special annual allowance.

3. The Vice President shall receive a special allowance for every day on which he acts as President.

4. The judges chosen under article 31, other than members of the Court, shall receive compensation for each day on which they exercise their functions.

5. These salaries, allowances, and compensation shall be fixed by the General Assembly. They may not be decreased during the term of office.

6. The salary of the Registrar shall be fixed by the General Assembly on the proposal of the Court.

7. Regulations made by the General Assembly shall fix the conditions under which retirement pensions may be given to members of the Court and to the Registrar, and the conditions under which members of the Court and the Registrar shall have their traveling expenses refunded.

8. The above salaries, allowances, and compensation shall be free of all taxation.

Article 33

The expenses of the Court shall be borne by the United Nations in such a manner as shall be decided by the General Assembly.

CHAPTER II—COMPETENCE OF THE COURT

Article 34

1. Only states may be parties in cases before the Court.

2. The Court, subject to and in conformity with its rules, may request of public international organizations information relevant to cases before it, and shall receive such information presented by such organizations on their own initiative.

3. Whenever the construction of the constituent instrument of a public international organization or of an international convention adopted thereunder is in question in a case before the Court, the Registrar shall so notify the public international organization concerned and shall communicate to it copies of all the written proceedings.

Article 35

1. The Court shall be open to the states parties to the present statute.

2. The conditions under which the Court shall be open to other states shall, subject to the special provisions contained in treaties in force, be laid down by the Security Council, but in no case shall such conditions place the parties in a position of inequality before the Court.

3. When a state which is not a member of the United Nations is a party to a case, the Court shall fix the amount which that party is to contribute toward the expenses of the Court. This provision shall not apply if such state is bearing a share of the expenses of the Court.

Article 36

1. The jurisdiction of the Court comprises all cases which the parties refer to it and all matters specially provided for in the charter of the United Nations or in treaties and conventions in force.

2. The states parties to the present statute may at any time declare that they recognize as compulsory ipso facto and without special agreement, in relation to any other state accepting the same obligation, the jurisdiction of the Court in all legal disputes concerning:

(a) the interpretation of a treaty;

(b) any question of international law;

(c) the existence of any fact which, if established, would constitute a breach of an international obligation;

(d) the nature or extent of the reparation to be made for the breach of an international obligation.

3. The declarations referred to above may be made unconditionally or on condition of reciprocity on the part of several or certain states, or for a certain time.

4. Such declarations shall be deposited with the Secretary General of the United Nations, who shall transmit copies thereof to the parties to the statute and to the Registrar of the Court.

5. Declarations made under article 36 of the Statute of the Permanent Court of International Justice and which are still in force shall be deemed, as between the parties to the present statute, to be acceptances of the compulsory jurisdiction of the International Court of Justice for the period which they still have to run and in accordance with their terms.

6. In the event of a dispute as to whether the Court has jurisdiction, the matter shall be settled by the decision of the Court.

Article 37

Whenever a treaty or convention in force provides for reference of a matter to a tribunal to have been instituted by the League of Nations, or to the Permanent Court of International Justice, the matter shall, as between the parties to the present statute, be referred to the International Court of Justice.

Article 38

1. The Court, whose function is to decide in accordance with international law such disputes as are submitted to it, shall apply:

(a) International conventions, whether general or particular, establishing rules expressly recognized by the contesting states;

(b) International custom, as evidence of a general practice accepted as law;

(c) The general principles of law recognized by civilized nations;

(d) Subject to the provisions of article 59, judicial decisions and the teachings of the most highly qualified publicists of the various nations, as subsidiary means for the determination of rules of law.

2. This provision shall not prejudice the power of the Court to decide a case ex aequo et bono, if the parties agree thereto.

CHAPTER III—PROCEDURE

Article 39

1. The official languages of the Court shall be French and English. If the parties agree that the case shall be conducted in French, the judgment shall be delivered in French. If the parties agree that the case shall be conducted in English, the judgment shall be delivered in English.

2. In the absence of an agreement as to which language shall be employed, each party may, in the pleadings, use the language which it prefers; the decision of the Court shall be given in French and English. In this case the Court shall at the same time determine which of the two texts shall be considered as authoritative.

3. The Court shall, at the request of any party, authorize a language other than French or English to be used by that party.

Article 40

1. Cases are brought before the Court, as the case may be, either by the notification of the special agreement or by a written application addressed to the Registrar. In either case the subject of the dispute and the parties shall be indicated.

2. The Registrar shall forthwith communicate the application to all concerned.

3. He shall also notify the Members of the United Nations through the Secretary General, and also any other states entitled to appear before the Court.

Article 41

1. The Court shall have the power to indicate, if it considers that circumstances so require, any provisional measures which ought to be taken to preserve the respective rights of either party.

2. Pending the final decision, notice of the measures suggested shall forthwith be given to the parties and to the Security Council.

Article 42

1. The parties shall be represented by agents.

2. They may have the assistance of counsel or advocates before the Court.

3. The agents, counsel, and advocates of parties before the Court shall enjoy the privileges and immunities necessary to the independent exercise of their duties.

Article 43

1. The procedure shall consist of two parts: written and oral.

2. The written proceedings shall consist of the communication to the Court and to the parties of memorials, counter-memorials and, if necessary, replies; also all papers and documents in support.

3. These communications shall be made through the Registrar, in the order and within the time fixed by the Court.

4. A certified copy of every document produced by one party shall be communicated to the other party.

5. The oral proceedings shall consist of the hearing by the Court of witnesses, experts, agents, counsel, and advocates.

Article 44

1. For the service of all notices upon persons other than the agents, counsel, and advocates, the Court shall apply direct to the government of the state upon whose territory the notice has to be served.

2. The same provision shall apply whenever step are to be taken to procure evidence on the spot.

Article 45

The hearing shall be under the control of the President or, if he is unable to preside, of the Vice President; if neither is able to preside, the senior judge present shall preside.

Article 46

The hearing in Court shall be public, unless the Court shall decide otherwise, or unless the parties demand that the public be not admitted.

Article 47

1. Minutes shall be made at each hearing and signed by the Registrar and the President.

2. These minutes alone shall be authentic.

Article 48

The Court shall make orders for the conduct of the case, shall decide the form and time in which each party must conclude its arguments, and make all arrangements connected with the taking of evidence.

Article 49

The Court may, even before the hearing begins, call upon the agents to produce any document or to supply any explanations. Formal note shall be taken of any refusal.

Article 50

The Court may, at any time, entrust any individual, body, bureau, commission, or other organization that it may select, with the task of carrying out an inquiry or giving an expert opinion.

Article 51

During the hearing any relevant questions are to be put to the witnesses and experts under the conditions laid down by the Court in the rules of procedure referred to in article 30.

Article 52

After the Court has received the proofs and evidence within the time specified for the purpose, it may refuse to accept any further oral or written evidence that one party may desire to present unless the other side consents.

Article 53

1. Whenever one of the parties does not appear before the Court, or fails to defend its case, the other party may call upon the Court to decide in favor of its claim.

2. The Court must, before doing so, satisfy itself, not only that it has jurisdiction in accordance with articles 36 and 37, but also that the claim is well founded in fact and law.

Article 54

1. When subject to the control of the Court, the agents, counsel, and advocates have completed their presentation of the case, the President shall declare the hearing closed.

2. The Court shall withdraw to consider the judgment.

3. The deliberations of the Court shall take place in private and remain secret.

Article 55

1. All questions shall be decided by a majority of the judges present.

2. In the event of an equality of votes, the President or the judge who acts in his place shall have a casting vote.

Article 56

1. The judgment shall state the reasons on which it is based.

2. It shall contain the names of the judges who have taken part in the decision.

Article 57

If the judgment does not represent in whole or in part the unanimous opinion of the judges, any judge shall be entitled to deliver a separate opinion.

Article 58

The judgment shall be signed by the President and by the Registrar. It shall be read in open court, due notice having been given to the agents.

Article 59

The decision of the Court has no binding force except between the parties and in respect of that particular case.

Article 60

The judgment is final and without appeal. In the event of dispute as to the meaning or scope of the judgment, the Court shall construe it upon the request of any party.

Article 61

1. An application for revision of a judgment may be made only when it is based upon the discovery of some fact of such a nature as to be a decisive factor, which fact was, when the judgment was given, unknown to the Court and also to the party claiming revision, always provided that such ignorance was not due to negligence.

2. The proceedings for revision shall be opened by a judgment of the Court expressly recording the existence of the new fact, recognizing that it has such a character as to lay the case open to revision, and declaring the application admissible on this ground.

3. The Court may require previous compliance with the terms of the judgment before it admits proceedings in revision.

4. The application for revision must be made at latest within 6 months of the discovery of the new fact.

5. No application for revision may be made after the lapse of 10 years from the date of the judgment.

Article 62

1. Should a state consider that it has an interest of a legal nature which may be affected by the decision in the case, it may submit a request to the Court to be permitted to intervene.

2. It shall be for the Court to decide upon this request.

Article 63

1. Whenever the construction of a convention to which states other than those concerned in the case are parties is in question, the Registrar shall notify all such states forthwith.

2. Every state so notified has the right to intervene in the proceedings; but if it uses this right, the construction given by the judgment will be equally binding upon it.

Article 64

Unless otherwise decided by the Court, each party shall bear its own costs.

CHAPTER IV—ADVISORY OPINIONS

Article 65

1. The Court may give an advisory opinion on any legal question at the request of whatever body may be authorized by or in accordance with the Charter of the United Nations to make such a request.

2. Questions upon which the advisory opinion of the Court is asked shall be laid before the Court by means of a written request containing an exact statement of the question upon which an opinion is required, and accompanied by all documents likely to throw light upon the question.

Article 66

1. The Registrar shall forthwith give notice of the request for an advisory opinion to all states entitled to appear before the Court.

2. The Registrar shall also, by means of a special and direct communication, notify any state entitled to appear before the Court or international organization considered by the Court, or, should it not be sitting, by the President, as likely to be able to furnish information on the question, that the Court will be prepared to receive, within a time limit to be fixed by the President, written statements, or to hear, at a public sitting to be held for the purpose, oral statements relating to the question.

3. Should any such state entitled to appear before the Court have failed to receive the special communication referred to in paragraph 2 of this article, such state may express a desire to submit a written statement or to be heard; and the Court will decide.

4. States and organizations having presented written or oral statements or both shall be permitted to comment on the statements made by other states or organizations in the form, to the extent, and within the time limits which the Court, or should it not be sitting, the President, shall decide in each particular case. Accordingly, the Registrar shall in due time communicate any such written statements to states and organizations having submitted similar statements.

Article 67

The Court shall deliver its advisory opinions in open court, notice having been given to the Secretary General and to the representatives of members of the United Nations, of other states and of international organizations immediately concerned.

Article 68

In the exercise of its advisory functions the Court shall further be guided by the provisions of the present statute which apply in contentious cases to the extent to which it recognizes them to be applicable.

CHAPTER V—AMENDMENT

Article 69

Amendments to the present statute shall be effected by the same procedure as is provided by the Charter of the United Nations for amendments to that Charter, subject however to any provisions which the General Assembly upon recommendation of the Security Council may adopt concerning the participation of states which are parties to the present statute but are not members of the United Nations.

Article 70

The Court shall have power to propose such amendments to the present statutes as it may deem necessary, through written communications to the Secretary General, for consideration in conformity with the provisions of article 69.

Mr. MORSE. In particular, I invite attention to chapter IV, article 65, under the heading "Advisory Opinions":

1. The Court may give an advisory opinion on any legal question at the request of whatever body may be authorized by or in accordance with the Charter of the United Nations to make such a request.

2. Questions upon which the advisory opinion of the Court is asked shall be laid before the Court by means of a written request containing an exact statement of the question upon which an opinion is required, and accompanied by all documents likely to throw light upon the question.

Next, I invite attention to the fact that the United Nations Charter provides, in article 96, that the General Assembly and Security Council of the United Nations may call for an advisory opinion. I ask unanimous consent that article 96 of the charter be printed in the RECORD at this point as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ARTICLE 96

1. The General Assembly or the Security Council may request the International Court of Justice to give an advisory opinion on any legal question.

2. Other organs of the United Nations and specialized agencies, which may at any time be so authorized by the General Assembly, may also request advisory opinions of the

Court on legal questions arising within the scope of their activities.

Mr. MORSE. Mr. President, I ask unanimous consent that article VI of the United Nations Charter, entitled "Pacific Settlement of Disputes," be printed in the RECORD at this point as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CHAPTER VI—PACIFIC SETTLEMENT OF DISPUTES

ARTICLE 33

1. The parties to any dispute, the continuance of which is likely to endanger the maintenance of international peace and security, shall, first of all, seek a solution by negotiation, inquiry, mediation, conciliation, arbitration, judicial settlement, resort to regional agencies or arrangements, or other peaceful means of their own choice.

Mr. MORSE. I read the first section of article 33:

The parties to any dispute, the continuance of which is likely to endanger the maintenance of international peace and security, shall, first of all, seek a solution by negotiation, inquiry, mediation, conciliation, arbitration, judicial settlement, resort to regional agencies or arrangements, or other peaceful means of their own choice.

The second section reads as follows:

2. The Security Council shall, when it deems necessary, call upon the parties to settle their dispute by such means.

It is my view that article 33 is in no way a prohibition against any nation seeking, as a preparation for negotiations, an advisory opinion of the Court through the appropriate United Nations agency. I happen to believe that the situation in Berlin is so critical, because many nations other than Russia, the United States, West Germany, France, and Great Britain have such a great interest in the Berlin crisis—the interest of peace—that we ought to be proceeding with the judicial processes of the United Nations now.

We would strengthen our position on the Berlin crisis if we would stop threatening Russia and the rest of the world with a nuclear war and call upon the United Nations to take jurisdiction now over the Berlin crisis. I do not believe that the proposed negotiations on the Berlin crisis outside the United Nations augurs very well for peace. We ought to buttress our position for negotiations with an advisory opinion of the World Court. Article 33 provides, as the State Department stated when I raised the question, that the parties should seek a solution by negotiation. However, it is not mandatory that we try to negotiate with Russia before we go to the United Nations.

Negotiations have been in progress. We have not had "showcase" negotiations, but negotiations have been going on. So far as we can see, there is no strong indication any negotiations outside of the United Nations may prove to be successful. I think United Nations negotiations might be if the other nations of the world, aside from the party litigants in the Berlin crisis, would do what I think is their duty under the United Nations Charter at the present time. They are not doing it.

The time has come for nations other than the party litigants to the Berlin crisis to proceed to make clear to Russia, the United States, France, Great Britain, and West Germany that there is no moral justification for a nuclear war.

Every time I listen to a member of the State Department or someone from the Pentagon say, "If such and such happens, it means all-out nuclear war." I am shocked and aghast. Neither my Nation nor Russia can justify a nuclear war over Berlin.

We have the duty as a peace-loving nation to proceed under the judicial processes of the United Nations Charter now. I say to the other countries of the world, "What are you doing in this crisis? Why are you not raising your voices to make clear, in accordance with the resolution adopted on November 3, 1950, that it is within the power of the other nations of the United Nations to call a special assembly of the General Assembly of the United Nations?" That assembly should be called forthwith.

If Russia, the United States, France, and Great Britain cannot settle their differences quickly through negotiations by way of the Security Council—and that is where they ought to be negotiating now, in my judgment—the General Assembly of the United Nations should proceed to take jurisdiction over this serious threat to the peace of the world. Under the powers which the other nations have under the resolution of November 3, 1950, they should call upon the United Nations through its judicial processes to take over. I think that is the way to strengthen the hand of the United States, and make clear to Russia that we are ready to proceed with Russia, within the framework of the United Nations, to a settlement of what appears to be the greatest threat to peace and the greatest danger leading to a possible inhumane nuclear war that has confronted our generation.

We should repudiate those American leaders who are talking about a horrible nuclear war over Berlin. The world should rebuke Russia for its sinister scheme to use Berlin as a threat to peace in order to gain its designs on Germany and Western Europe.

Neither Russia nor the Western Powers should be allowed by the rest of the world to inflict upon all mankind for the next several thousand years the horrible damages to all human and animal life in large parts of the world which the radiation from a nuclear war would cause. I plead with the leaders of the world to conform to the moral law on this issue before it is too late.

RELATION BETWEEN ADMINISTERED PRICES AND INFLATION

Mr. PROXMIRE. Mr. President, in this morning's Washington Post Mr. Bernard Nossiter makes a revealing analysis of the growing unanimity of economic opinion that administered prices are causing inflation. I am also happy to read in Mr. Nossiter's article that the distinguished economist, Gardiner Means, is becoming increasingly recognized as the man who is primarily responsible for this new economic realism. It is Gardiner Means' careful and thorough analysis of the nature of our inflation that is puncturing the mythological nonsense and providing Congress and the administration with a genuine opportunity to do something about this enormously important problem of inflation which is just beginning to be understood.

Mr. President, I ask unanimous consent that this article by Bernard Nossiter be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD as follows:

[From the Washington Post and Times Herald, Mar. 16, 1959]

ECONOMISTS SWITCH TO FINGER POINTING IN FIXING BLAME FOR SLOW RECOVERY

(By Bernard Nossiter)

The jawbone, or open-mouth attack on slump-breeding price increases took a new and decisive turn last week.

The administration and the Federal Reserve Board abandoned their traditional, generalized appeals to business and union chiefs for restraint. Instead, key economists for the Federal Reserve System and the President got down to cases and named names, or at least industries.

Raymond J. Saulnier, chairman of President Eisenhower's Council of Economic Advisers, was the first to signal the new approach. A letter of his was made public which blamed price increases in autos and heavy industry for holding down output between 1953 and 1957.

Ralph Young, the Fed's research director, went a step further. He said last year's steel and auto price increases didn't make economic sense because demand was falling. Their effect, Young said, is to cut demand to which output and jobs are tailored.

Woodlief Thomas, the Fed's economic adviser, next took up the cudgels. He made the crucial point that administered prices and wages not only create inflation, but more importantly slow up economic growth and breed unemployment.

Presumably, none of the three would have spoken out without the approval of President Eisenhower and Fed Chairman William McChesney Martin.

The switch from the general to the particular, a form of finger pointing that is considered lese-majeste in the corporate world, reflects the seriousness with which the Government views the present state of economic affairs.

The recovery has been modest almost to the vanishing point for the last 3 months, a leveling off that is coming much earlier than usual after a slump. Unemployment is high and shows few signs of receding to tolerable levels. The Treasury is having aggravating problems refinancing the maturing portions of the debt because investors, counting on rising prices, want stocks. Finally, the Fed feels a sense of frustration. Its money-tightening measures apparently can't break the administered prices of corporate giants this side of a depression.

The surprising degree of bipartisan unanimity about the causes of recent inflation and slump is pointed up by the support John Kenneth Galbraith gives to the auto-steel administered price role. Galbraith is the Democratic Advisory Council's chief economist.

Implicit in all this discussion is a tribute to Gardiner Means. This remarkable economist has been pointing for a generation to

the decisive economic power of corporate giants. In autos, steel, oil, and other concentrated industries, Means has been observing, prices and wages are administered—set and held by conscious decision and raised despite drops in demand.

To be sure, economists who do not speak for a vested interest have not yet reached a point of total agreement on all questions. Young, for example, believes that excess demand was more important than price-administering power in the 1953–57 inflation. There is wide disagreement over whether unions or management are more responsible for the price increases and slump that followed. However, this debate, many economists believe is sterile and the key question is what to do about it all.

The administration is clearly trying to influence the forthcoming steel wage negotiations. In the past, the industry has used them to grant substantial gains, jack up prices, and according to the experts, multiplied our economic woes.

Senator ESTES KEFAUVER, Democrat of Tennessee, chairman of the Antitrust Subcommittee, has spent 2 years, virtually unnoticed except by the business press, documenting the power of United States Steel and General Motors. Last week, he warned the United Steelworkers and the industry that this was their last chance to respond to the pointed pleas for the restraint. Many economists are convinced that no matter how pointed, appeals won't work and before long, new institutional devices for controlling the key price-wage decisions will have to be invented. Just as important, many in Congress agree with these economists.

AN AROUSED RESERVE BOARD

Mr. PROXMIRE. Mr. President, Saturday's New York Times carries an editorial entitled "An Aroused Reserve Board." This editorial marks an extremely significant breakthrough for those who have agreed that inflation in recent years has been caused largely by the power of a few huge corporations to administer their prices upward without regard to demand, supply, or consumers.

Here is the good, gray New York Times, a paper that has earned as solid a reputation for constructive economic conservatism as any in the Nation, calling administered prices, and I quote, "inflationary policies that are socially and economically unsupportable."

But, Mr. President, the most significant aspect of this editorial is that the New York Times is praising, as indeed it should, the remarks of the Federal Reserve Board's Director of Research, Mr. Ralph A. Young, who represented the Federal Reserve Board itself in protest against the excesses of administered prices. The Times points out that the Board's role has traditionally been one of dignified detachment from controversies such as this. The inflationary impact of administered prices, however, has become so extremely serious that the Board decided that it must speak out in protest.

Mr. President, when you have two institutions like the New York Times and the Federal Reserve Board speaking vigorously against the inflationary policies of top management in this country, it seems to me that the American people should take notice and recognize that the cost of their living has been shoved up by men who are exercising a power that has become excessive.

Mr. President, I ask unanimous consent that the editorial from the New York Times entitled "An Aroused Reserve Board," was ordered to be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD as follows:

[From the New York Times, Mar. 14, 1959]

AN AROUSED RESERVE BOARD

Hearings were resumed during the past week before the Senate Antitrust Subcommittee, which has been considering the situation in those heavy industries that are most prominently identified with the issue of administered prices. The renewed hearings brought the unusual spectacle of a high-ranking representative of the Federal Reserve Board joining actively, and even vigorously, in the criticism that has been leveled at the steel and automotive industries for raising prices in time of business recession.

The Federal Reserve Board representative was Ralph A. Young, its Director of Research and Statistics. There is no question among students of monetary and price problems that to the extent that rising prices in recent years have had their origins in the wage-price push it has presented the monetary authorities with an extremely serious dilemma. The Board can always refuse to validate such price rises by clamping down on the volume and availability of credit. But general credit controls are too blunt an instrument for dealing with this type of price rise. If applied with sufficient vigor they can slow down the whole economy and produce widespread disemployment, thus creating the impression that the Federal Reserve Board was neglecting its responsibilities under the Employment Act of 1946.

While the wage price situation has undoubtedly had a moderating influence on the Board's policies since recovery got under way last year, the Board has chosen up to now to let the public do its own speculating on that subject. Its decision to take an active part in the controversy is, it seems to us, a healthy one. It has proceeded as long as any agency could reasonably be expected to proceed on the assumption that the problem would disappear. And this, we think, is all to the good. The Board's role traditionally has been one of dignified detachment from controversies such as this one. And there is much to be said for that attitude up to a point. But that point has certainly been reached when it finds itself forced into the position of taking the rap for inflationary policies that are socially and economically unsupportable, but with which it isn't equipped to deal. To continue to ignore such a situation could be to invite political action directed against the monetary authorities themselves, a development that would merely serve to strengthen the forces of inflation.

Mr. PROXMIRE. Mr. President, in yesterday's New York Times Mr. Edwin L. Dale, Jr., reported how widespread the conviction has become among responsible and informed Federal officials that administered prices are indeed a prime cause of creeping inflation. Mr. President, I ask unanimous consent that this article also be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

U.S. AIDS UNEASY ON PRICE POLICIES—ADMINISTERED LEVELS SEEN AS LEADING TO POSSIBLE GOVERNMENT CONTROLS

(By Edwin L. Dale Jr.)

WASHINGTON, March 14.—Price and wage developments during last year's recession have brought a quiet revolution in the thinking of key Government economic officials.

In brief, these officials have come to accept the concept of administered prices. They accept recent evidence that important sectors of the private economy can hold or even increase prices when demand is weak.

If the revolution in thought goes far enough—and if future events warrant—the result could be some form of Government price control.

The reason for controls would be that the concentrated industries that administer their prices appear largely immune from the classic Government instruments for controlling inflation. These are mainly balanced budgets and tight money, which are aimed at curbing demand.

ROSE AGAINST TREND

Last year, demand was sluggish because of the recession, and yet prices in the administered sector rose anyway. Steel and automobiles are the most commonly cited examples.

The major retreat has been in the Federal Reserve Board, long the stronghold of classic economic thinking. In the last week two leading officials of the Board have gone on record publicly with expressions of their concern at the consequences of private economic power in steel and autos.

The same view was expressed, also publicly, by Raymond J. Saulnier, Chairman of the President's Council of Economic Advisers. It is known that even Robert B. Anderson, the Secretary of the Treasury, is persuaded that the inflation outlook will depend at least as much upon wage and price decisions by powerful economic groups as upon balancing the budget.

HAD MINIMIZED THREAT

In the Federal Reserve, officials long minimized the fear that monopolistic power among concentrated industries was a serious threat to the price level. The conviction was that when things got tough and orders fell off, prices would be cut in these sectors of the economy just like any other.

Last year this did not happen. Prices in several of such areas actually rose. The result was that the Federal Reserve has begun taking this problem far more seriously than in the past.

None of this means that officials now favor price or wage controls or any form of direct Government intervention—even intervention limited to the big business-big labor part of the economy. But the sharp change in thinking about the problem is the sort that would necessarily precede a decision that controls are necessary.

A great deal will depend on this year's steel wage negotiations and subsequent pricing decisions. If the steel settlement, with or without a strike, is not followed by a price increase, the wave of concern will subside to a considerable degree.

AUTO DECISION AWAITED

This would be particularly the case if such an event was followed by a decision in Detroit next fall not to raise the prices of the 1960 automobile models.

In the background is the possibility of a Democratic President after 1960. A number of leading Democrats were convinced of the administered price problem in advance of the more conservative officials in the Eisenhower administration.

Thus a Democratic President might be even less reluctant than President Eisenhower to choose the road of controls.

Much of the groundwork for the increasing awareness and acceptance of the administered price problem has been laid by hearings of the Senate Antitrust Subcommittee, headed by Senator ESTES KEFAUVER, Democrat, of Tennessee. The hearings have gone on for nearly 2 years and produced nine volumes of testimony.

LAST CHANCE IS SEEN

Even Senator KEFAUVER is not yet persuaded that direct controls are necessary. But he warned last week that the steel and auto industries are now having their last chance.

There remain a number of economists and others who do not believe the administered price problem is a major one, threatening the future stability of prices. But some of these men, while not worrying about the economic power of big business to raise prices, do find dangers in the upward push on costs exerted by big labor.

Others argue that the effect on consumers of recent developments in the steel and other concentrated industries is much overrated.

One witness before the Kefauver subcommittee, Simon N. Whitney, sought to show last week that the 33 percent increase in steel prices since 1953 could have been the cause, at most, of only six-tenths of 1 percent increase in the Consumer Price Index, the usual measure of inflation.

The cost of living, he noted, is dominated by food, services, and such soft goods as apparel.

But these reservations have not changed the growing concern about the problem in the Government. There is a strong belief in the Federal Reserve, for example, that the persistent failure of unemployment to decline with the recovery from the recession, particularly unemployment in the durable goods industries, is attributable in great part to price and wage decisions in those industries in recent years.

In brief, the idea is that these industries, to a significant degree, have "priced themselves out of their market." By the same token, so have their workers.

Again, this view is sometimes challenged. But it was stated in explicit terms last week by Woodlief Thomas, economic adviser to the Federal Reserve Board, in a lengthy letter to the Washington Post and Times Herald. In part, this is what Mr. Thomas said:

"One of the considerations in fixing prices, of course, should be what price can be sustained and whether markets might be lost for a longer period by asking the highest possible price for any short period of time. Criticism arises with respect to administered prices when they are not adjusted properly in response to supply and demand forces.

They are harmful if prices are raised so as to choke off demand and lead to reductions in output or if prices are held up in the face of declining demand when lower prices might sooner or later stimulate some demand."

HYDROELECTRIC POWER, THE KEY TO MONTANA'S FUTURE

Mr. MANSFIELD. Mr. President, the past 100 years are unsurpassed in history for the great multiplication of mankind's abilities to produce for his needs. This multiplication of abilities is due in large part to the increasing use of power sources additional to human and animal power. First it was steam. Then came electric power. In fact, throughout the world there is a close identity between the per capita use of electricity and living standards.

Electric power is now an essential of a modern diversified economy. An abundance of assured power is indispensable for the continued growth of the economy of each of the 49 States. Assured power supplies are a prerequisite to the establishment of a firm industrial base in the Western States. Insufficient supplies of electric power now restrict western areas, rich in raw materials, to what are, essentially, exploited economies whose potentials for serving the peoples of these areas and the entire Nation are scarcely tapped.

My home State of Montana is an example. It is, in an economic sense, a nation within a nation, with a great future. Its growth is dependent on the equitable and proper exploitation of its abundance of resources. That, in turn, depends on an adequate supply of hydroelectric power. Industry and commerce follow the transmission lines; they come after, not before, the power that they need.

Montana, today, does not have adequate electric power. The inadequacy is reflected in the small number of manufacturing and processing industries. And, today, it is also reflected in Montana's high rate of unemployment.

What we lack in Montana is not power potential but power development. Montana is richly endowed with hydroelectric resources. Great rivers rise in my State. Out of the mountains, the waters of the Columbia and Missouri River systems plunge down steep grades through deep canyons and gorges along which are many sites suitable for reservoirs.

Regrettably, these great hydroelectric resources are largely undeveloped. Less than 15 percent of Montana's 6,500,000-kilowatt potential has been harnessed. According to the Federal Power Commission, there are, in the State, some 70 potential power projects with an aggregate capacity of over 5 million kilowatts.

In Montana there are several sites which cry out for Federal development at an early date: Libby Dam, Yellowtail Dam, and the proposed Knowles Dam are examples. We already have Hungry Horse Dam and the Fort Peck Dam. If we add to them the others I have cited, we will assure an adequate supply of power for present consumers, and preference customers, and we will provide the incentive for new industries to move into one of the most seriously underdeveloped areas of the Nation.

Just one-fourth of this 5 million kilowatts of hydroelectric potential, which I have just mentioned, would double Montana's entire supply of electricity from all sources. If this additional power can be put in service, it would convert communities now stagnant with unemployment into prosperous centers. One-fourth of the undeveloped hydroelectric potential of Montana's rivers would bring diversified industries to our towns. It would bring diversified markets to our farms and ranches. It would do much to restore, on a sound and continuing base, a measure of prosperity for Montana and it would, at the same time, add to the strength and security of the Nation.

We have seen this happen in one portion of my State. In 1952, the generators at Hungry Horse Dam went into service. By the terms of the congressional authorization, Montana has preference in the the use of Hungry Horse power. This great energy supply has brought industry and commerce to the western part of the State. Following the flow of power, came the Anaconda Aluminum plant, the Victor Chemical Co., the Diamond Match Works, and expanded lumber activity. Around these clustered new shops, new homes, new services, and new trading centers. In addition, the new power made possible the extension of rural electrification to the farming and ranching areas of western Montana.

Mr. President, there are two significant observations to be drawn from the Hungry Horse experience. First of all, we had to develop the potential power resource—that is, we had to build the dam and install the generators. The second is that the power had to be reserved by a preference to the State of Montana where it was produced; that is what brought industry to the area. This was done by the authority and guidance of Congress. By way of clarification, I ask unanimous consent to have printed at the conclusion of my remarks, the February 19, 1959, letter of the Assistant Secretary of the Interior, reciting the manner in which this preference works out.

The Hungry Horse story is a happy one. Unfortunately, we also have an unhappy story, involving another large multipurpose project, Fort Peck Dam in eastern Montana. This great project was authorized in 1938 and was intended to supply power for meeting Montana's needs. The records of the Senate show that this was the original intent, but unfortunately, the congressional authorization was not explicit in fixing the preference. As a result, today, with 175,000 kilowatts capacity being installed at Fort Peck, Montana will receive less than 24,000 kilowatts of the power which will be drawn from its reservoirs. This is the allotment decided upon by the administration, not by Congress. It seems to me persuasive evidence that allocations should be fixed by Congress rather than left to the discretion of the Department of the Interior. It is a consideration which will be uppermost in my mind in considering any future legislation which authorizes additional development of Montana water resources. Montana must have a first and definite claim on all waters rising within the State.

There is one final point I would like to make. In seeking to assure to the people of Montana a fair share of the benefits of the State's resources, I do not intend to ignore the needs of neighboring States. We are all citizens of one Nation. The people of Montana have no desire to be less generous in their attitudes toward others, than others are toward them.

By building Hungry Horse to its maximum effectiveness, benefits have accrued, not only to Montana, but also to downstream neighboring States. This approach, I believe, ought to be the key to future public power projects. By full development of each site, it will be possible to share the benefits widely and generously. As we move forward with water resource programs, I believe we must, to the fullest extent possible, seek the benefit of whole regions of the Nation. No State will suffer if the needs of all are met. No State in the long run will gain, if the needs of any are ignored.

Mr. President, in conclusion I want to say that any multipurpose project in

the State of Montana must have the following prerequisites:

First. Montana must be given primary preference on the order of the Hungry Horse project.

Second. Any proposed project must be feasible and economically sound.

Third. Any proposed project must have the approval of the majority of the people directly affected by its construction.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a letter addressed to me by Fred G. Aandahl, Assistant Secretary of the Interior, dated February 19, 1959, which indicates beyond any peradventure of doubt that, so far as the preference for Montana of power from the Hungry Horse project is concerned, there can be no question.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

UNITED STATES
DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., February 19, 1959.

Hon. MIKE MANSFIELD,
U.S. Senate, Washington, D.C.

DEAR SENATOR MANSFIELD: In your January 30, 1959, letter pertaining to Hungry Horse power for the State of Montana, you ask if the legislative history regarding this project did not firmly establish a power preference for the State of Montana and if the Department of the Interior translated this preference by engineering and administrative computation to be the at-site capability of Hungry Horse under coordinated operation. Your statement appears to be substantially accurate. The legislative history and the Hungry Horse Act of June 5, 1944, did firmly establish a power preference for the State of Montana.

Numerous studies were made as to the amount of power that should be included in such a preference. It was obvious that the at-site isolated generation of about 90,000 kilowatts would be too small and not in keeping with the legislative history or the economy of operations. Also, it would be uneconomical to bring large amounts of power from downstream plants for sale in Montana. The at-site capability of Hungry Horse under coordinated operation is approximately equal to the transmission capability that was economically feasible. This is the transmission system that was constructed to tie in the Hungry Horse project with the balance of the Federal Columbia River power system.

Sincerely yours,

FRED G. AANDAHL,
Assistant Secretary of the Interior.

NATIONAL OUTDOOR RECREATION RESOURCES REVIEW COMMISSION

Mr. JOHNSON of Texas. Mr. President I ask unanimous consent that the Senate proceed to the consideration of Order of Business No. 53, Senate bill 82. It is a noncontroversial measure. The House has passed a similar bill and it is desired to substitute the House bill for the Senate bill.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas?

There being no objection, the Senate proceeded to consider the bill (S. 82) to amend the act of June 28, 1958, to provide for a National Outdoor Recreation Resources Review Commission, and for other purposes.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed a bill (H.R. 1776) to amend the act of June 28, 1958, entitled "An act to provide for a National Outdoor Recreation Resources Review Commission, and for other purposes," in which it requested the concurrence of the Senate.

The bill was read the first time by title and the second time at length, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 4 of the Act of June 28, 1958, entitled "An Act to provide for a National Outdoor Recreation Resources Review Commission, and for other purposes" is amended to read as follows:

"The Commission is authorized, without regard to the civil service laws and regulations, and without regard to the Classification Act of 1949, as amended, to appoint and fix the compensation of an executive secretary and such additional personnel as may be necessary to enable it to carry out its functions, except that any Federal employees subject to the civil service laws and regulations who may be assigned to the Commission shall retain civil service status without interruption or loss of status or privilege."

NATIONAL OUTDOOR RECREATION RESOURCES REVIEW COMMISSION

Mr. JOHNSON of Texas. Mr. President, a message just received states that the House has passed a bill similar to the one which the Senate has just taken up for consideration. I ask unanimous consent that the House bill be substituted for the Senate bill and be now considered.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill (H.R. 1776) was considered, ordered to a third reading, read the third time, and passed.

The PRESIDING OFFICER. Without objection, Senate bill 82 is indefinitely postponed.

Mr. JOHNSON of Texas. Mr. President, I move that the Senate reconsider the vote by which H.R. 1776 was passed.

Mr. DIRKSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JOHNSON of Texas. Mr. President, I congratulate the Senator from New Mexico [Mr. ANDERSON] for having obtained such expeditious action on the bill. It is characteristic of his actions throughout the years, as I have observed them.

Mr. President——

The PRESIDING OFFICER. The Senator from Texas.

LEGISLATIVE PROGRAM

Mr. JOHNSON of Texas. Mr. President, I desire to make an announcement about the program of the Senate for the remainder of the week.

Following the conclusion of the business of the Senate today, it is planned to have the Senate go over until Wednesday. Tomorrow is St. Patrick's Day.

It is planned to have a call of the calendar on Wednesday. At the conclusion of the calendar call, it is planned to have the Senate go over until Thursday.

It is possible that Thursday the television education bill will be called up, to be followed by the depressed areas bill. The minority of the Committee on Banking and Currency has until Wednesday to file its views on that bill. We want to be certain that the hearings and the report, including the minority views, are available before we proceed to the consideration of that bill.

I have consulted with some of my colleagues concerning the bill. There will be some discussion of it. Friday is not a good day on which to have votes. Since there will be some amendments offered to the bill, there will be some votes. It is expected that there will be considerable controversy about the bill, and if it is agreeable to the minority leader, I should say to Senators that we will attempt to have no yea-and-nay votes for the remainder of this week. Beginning on Monday, voting on the amendments can begin.

Mr. DIRKSEN. Mr. President, I should like to ask the distinguished majority leader about one measure which is at the desk, Senate bill 308, relating to the diversion of water from Lake Michigan. Of course, I am agreeable to having that bill passed today, if that were possible; but I am afraid that that would involve some difficulty.

Mr. JOHNSON of Texas. It is not possible to have the bill passed today. The Senator from Illinois, however, as usual, has a very excellent memory. I am thankful for it, and I rely on it greatly. I simply forgot to mention that bill. It is planned to have the Senate debate it, discuss it, and vote upon its referral, I trust, on Wednesday. I should like to have all Senators on notice that H.R. 1, the Lake Michigan water diversion bill, is at the desk. I ask that it remain there so that Senators may know that precipitate action is not being taken on it. On Wednesday, perhaps, the reference of the bill will be debated and possibly voted on.

Mr. DIRKSEN. Obviously, the majority leader cannot foresee how long the debate may take on the area redevelopment bill. But assuming expeditious action on that bill, is it his belief that probably the Senate could go over from Thursday until the following Monday, assuming the area redevelopment bill is disposed of on Thursday?

Mr. JOHNSON of Texas. I should think there would be enough discussion on the bill to occupy the Senate on Thursday and Friday. If not, I should be willing to follow the procedure suggested by the distinguished minority leader. I will be guided by his wishes. We can determine the question on Thursday. If many speeches are to be made, they can be made on Friday. If not, and if the minority leader agrees, we may ask that the Senate go over from Thursday until Monday. But there will be no votes on the area redevelopment bill this week.

It is possible that there will be a vote on the TV education bill, if some Senator seeks to have it, on Thursday. We may have a vote on the reference of the Lake Michigan water diversion bill on Wednesday. But the controversial area redevelopment bill will not be taken up until Thursday, and there will be no votes on that bill until the early part of next week. But every Senator should take notice of the possibility or likelihood that voting will begin on next Monday on the area redevelopment bill.

SENATOR GRUENING'S ESSAY "ALASKA: THE 49TH STATE"

Mr. NEUBERGER. Mr. President, now, that we of the Senate happily have added a 50th State, I desire to herald an event associated with our new 49th State, Alaska. The 1959 edition of the annual "Yearbook of the Encyclopaedia Britannica" features a superlative full-length article about Alaska. The eminent and skilled author of the article is also our colleague, the able junior Senator from Alaska [Mr GRUENING].

In my opinion, Mr. President, this article, entitled "Alaska: The 49th State," is the finest modern compendium of facts ever assembled in comparatively short space about our vast new sister State in the Far Northwest. The editors of the "Britannica" deserve credit for their editorial ingenuity and originality in publishing Senator Gruening's thoughtful and informative article. It is valuable and outstanding.

This is merely one more achievement in this respect by ERNEST GRUENING. His book "The State of Alaska" was the almanac and the source and fountainhead of many of the best arguments for statehood. His article in the 1959 "Yearbook of the Britannica" tells, succinctly and dramatically, of the long struggle for full membership in the Union, and how it finally succeeded.

"Alaska *is still* a frontier," writes ERNEST GRUENING, as he concludes his splendid and vivid essay. Yes, Mr. President, Alaska is still a frontier. But the wise leadership of ERNEST GRUENING and his popular and tireless senatorial partner, E. L. (BOB) BARTLETT, the senior Senator from Alaska, will help to bring about the industrial and economic development which that frontier needs in order to grow and prosper.

I congratulate Senator GRUENING upon a fine article; and I congratulate the voters of the State of Alaska, State No. 49, for sending to us and to the Nation two such outstanding characters as Alaska's first U.S. Senators, E. L. (BOB) BARTLETT and ERNEST GRUENING.

Mr. GRUENING. Mr. President, will the Senator from Oregon yield?

The PRESIDING OFFICER (Mr. YOUNG of Ohio in the chair). Does the Senator from Oregon yield to the Senator from Alaska?

Mr. NEUBERGER. I am happy to yield.

Mr. GRUENING. Needless to say, Mr. President, I am extremely grateful for the very generous remarks of my old and good friend, the junior Senator from Oregon. He has made many notable contributions to the progress of Alaska, and Alaskans will eternally be grateful to him on several very important counts. I should not take the time of the Senate to list his various contributions, because if I were to do so I would have to violate the 3-minute rule; it would take very much longer than that to give an adequate account of the splendid services and great aid the Senator from Oregon has rendered the 49th State. His assists to Alaska date far back to before World War II when Alaska was a Territory much less developed than today and was aspiring to the position it now has by virtue of the action of the 85th Congress—a long-sought goal which the junior Senator from Oregon helped greatly to achieve.

Mr. NEUBERGER. I thank the Senator from Alaska.

Mr. YARBOROUGH. Mr. President, will the Senator from Oregon yield to me?

Mr. NEUBERGER. I yield.

Mr. YARBOROUGH. Mr. President, I wish to have the privilege of being associated with the Senator from Alaska in the splendid things he has said about the junior Senator from Oregon [Mr. NEUBERGER], and I also desire to be associated with the Senator from Oregon in the splendid things he has had to say about the Senator from Alaska [Mr. GRUENING] and the State of Alaska.

I wish to inform my colleagues how proud we who live in Texas are that Alaska is a member of the Union. Texans are not jealous one whit of Alaska. Instead, both of the Texas Senators, who supported the bill for Alaskan statehood, believe that Alaska will be one of the brightest stars in the Union.

Mr. GRUENING. Mr. President, if the Senator from Oregon will yield further to me, let me say that we Alaskans are very appreciative of the great help the State of Texas has rendered us.

There was a feeling—it was wholly mistaken—that some representatives of Texas in the Congress opposed the admission of Alaska to the Union because of a not expressed but somewhat subconscious feeling that Texas might thereby lose its status as the largest State. But we Alaskans are always happy to point out that if it had not been for the two great Texans at the two ends of the Capitol—the Speaker of the House of Representatives, SAM RAYBURN, and the majority leader of the Senate, LYNDON JOHNSON—Alaska would not today be a State. We are happy to record that history for the benefit of all future generations.

ARCHBISHOP JAMES AND ARCHBISHOP EZEKIEL, OF THE GREEK ORTHODOX CHURCH

Mr. DIRKSEN. Mr. President, recently the American people generally, and the Greek Orthodox faithful in United States specifically, were happy to learn that for the first time in Greek Orthodox history, two American-trained Greek Orthodox bishops, namely, Metropolitan James and Bishop Ezekiel, were elevated to be Archbishop of the Western Hemisphere and Archbishop of Australia, New Zealand, Philippines, Japan and Korea, respectively.

The Ecumenical Patriarch, his Holiness Athengaros, announced the election of Archbishop James as head of the Greek Orthodox Archdiocese of North and South America. The new archbishop had previously served as Vicar of Patriarch at the World Council of Churches in Switzerland, and Dean of the Cathedral in Boston, Massachusetts.

I ask unanimous consent to have printed at this point in the RECORD a biographical sketch of Archbishop James.

There being no objection, the biographical sketch was ordered to be printed in the RECORD, as follows:

METROPOLITAN JAMES OF MELITA ELECTED ARCHBISHOP OF THE GREEK ORTHODOX CHURCH OF NORTH AND SOUTH AMERICA

Metropolitan James of Melita (Malta), who was elected the new permanent archbishop of the Greek Orthodox Church of North and South America by the Holy Synod of the Ecumenical Patriarchate in Istanbul on February 14, 1959, was born Demetrios A. Coucouzis in 1911 on the Turkish island of Imbros. He graduated with high honors from the Theological School of Halki of the Ecumenical Patriarchate in Istanbul in 1934, and was ordained a deacon in 1939. In that year he came to the United States and served as archdeacon of the Greek archdiocese and as professor of the archdiocese theological school, then located in Pomfret, Conn.

He was ordained a priest in Boston on June 14, 1940, and served in this capacity at Hartford, Conn., in 1940–41. He was a preacher at the Holy Trinity Cathedral in New York from 1941–42, and later in 1942 served for a brief period in St. Louis, Mo.

In 1942, he was appointed dean of the Cathedral of the Annunciation in Boston and served in that capacity until 1954. For a brief period in 1954, prior to his election as a bishop, he served as director of the Holy Cross Orthodox Theological School in Brookline, Mass.

On December 17, 1954, he was elected bishop of Melita (Malta) and was assigned to the archdiocese of central and western Europe. In March 1955, he was appointed permanent representative of the Ecumenical Patriarchate at the World Council of Churches headquarters in Geneva. On April 4, 1956, he was elected a metropolitan.

While in Boston, Metropolitan James studied at the Harvard Divinity School and earned the degree of master of sacred theology (S.T.M.). As the representative of the Ecumenical Patriarchate in the World Council of Churches, Metropolitan James traveled extensively throughout the world and attended many ecclesiastical meetings and councils. During this time, he also visited the United States on several occasions and delivered lectures at Harvard, Boston University, and at other institutions and at several religious conferences. He is the author of many religious books and pamphlets.

Metropolitan James is an American citizen, the first to hold the position of archbishop of the Greek Orthodox Church of North and South America. He has close ties with Protestant and Episcopal groups in the United States, especially within the World Council of Churches and the National Council of Churches. The new archbishop is expected to assume his duties at the Greek Archdiocese of North and South America in New York City in April 1959. As the permanent archbishop, he succeeds Archbishop Michael, who died on July 13, 1958.

The Greek archdiocese, which is under the jurisdiction of the ancient Ecumenical

Patriarchate of Constantinople now headed by Patriarch Athenagoras I, has 1,500,000 communicants and 375 churches in the United States. It is the headquarters of the Greek Orthodox Church, which is the largest of the many Eastern Orthodox bodies in America. The combined total of Eastern Greek Orthodox in United States is 6½ million.

Mr. DIRKSEN. Mr. President, the Ecumenical Patriarch's announcement of the elevation of Bishop Ezekiel was accepted with mixed emotions, since all in this country will very much miss him, although they realize the importance of his new post in the Pacific, where the Orthodox Church is beginning to grow as it did here in the United States 40 years ago.

Mr. President, I know Bishop Ezekiel well; and I know what wonderful work he has done as bishop of Chicago, with an area from Canada to the Gulf of Mexico; as former bishop of New England; and as former head of the theological seminary in Boston. I know of his inspiring leadership in the proper recognition of his faith, and his cooperation with other faiths in bringing true understanding between the four great faiths in this country—Protestant, Catholic, Greek Orthodox, and Jewish. I wish Archbishop Ezekiel well. I ask unanimous consent that an article in the column of James Mezilson, in the Greek Press of Chicago, dated March 6, be inserted in the CONGRESSIONAL RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ELEVATION

A fortnight ago the omogenia of this country was heartened by the news of the selection of Metropolitan James to be the new head of the archdiocese of North and South America. Then in a subsequent announcement from the Phanar, headquarters of the Ecumenical Patriarchate, Patriarch Athengaros I revealed the election by the holy synod of the elevation of our own beloved Bishop Ezekiel to the rank of Metropolitan to head the archdiocese of Australia and of New Zealand. This news brought a mixed reaction, happy that Bishop Ezekiel had been selected to receive this honor, and sad that he would be leaving his Chicago post after 5 years of progressive and constructive leadership.

Archbishop-elect Ezekiel's reaction to the news brought forth the response: "I am deeply honored and I feel very happy upon the occasion of my election." He added further that "from the bottom of my heart I give glory to God and I express humble thanks to Him, who has guided my steps up to now and led me in the service of our Church and entrusted me with the care of the souls of His flock."

The new primate of the land "down under" expressed the important lesson learned from his 22 years of service here—that in America there is democracy in action, and furthermore, there is certain proof of what Christian spirit and Christian love can accomplish. He pointed out that "If this Christian and democratic spirit existing among the many minorities comprising this great land of America could be spread to all the nations and to all the peoples of the world, then the ideal of peace and of one world, which many consider a utopia can indeed become a reality."

Chicago will bid farewell to its beloved leader and one-time dean of the Holy Cross Theological Seminary at a dinner at the Hotel Sherman on Wednesday evening, March 11. The event will be under the auspices of the official Greek Orthodox Church family in this area. This includes the members of the mixed council of the archdiocese, the clergy, the presidents of the church boards, the Philoptohos societies, GOYA, and the Greek Archdiocese Welfare Foundation. The communities' various fraternal, social, civic, and cultural groups will join the official sponsors in honoring Bishop Ezekiel. This is the first time that Chicago has been so afforded to honor its bishop. Metropolitan Ezekiel's predecessors, Bishops Callistos and Gerasimos, died in office.

Prior to his departure from Chicago, his grace headed for the New England area, where he served for many years, and was honored on March 5 at a farewell testimonial dinner at the school he once headed, Holy Cross, in Brookline. He returns to Chicago on Saturday, March 14, to officiate at vespers in the Cathedral of the Annunciation, and marking his last official duty before his departure, but he will serve as celebrant of the liturgy at St. Constantine Church on Sunday morning, March 15.

All of Chicago will miss him, but we are happy for what he left behind in his works and his love for all.

Mr. DIRKSEN. Mr. President, I conclude with the note that the just solution of the Cyprus issue by our three friendly allies—England, Greece, and Turkey—and its acceptance by Archbishop Makarios, on behalf of the people of Cyprus, gives Cyprus an independence status, and again brings strength and cooperation to our Greek-Turkish alliance which guards the eastern Mediterranean Sea and gateway to the East.

THE POSITION OF THE UNITED STATES IN THE BERLIN CRISIS

Mr. FULBRIGHT. Mr. President, as Mr. Khrushchev maneuvers the Berlin situation on a giddy course toward the conference table, the doubts and fears of our people are probably growing almost in proportion to his capricious and thoroughly unpredictable statements.

Clearly, the executive branch must have a free hand in finding an acceptable solution to the Berlin question. Yet, it is also clear that all Americans should have a keen appreciation of our Government's position and of just what is meant when we say we are standing firm. They want, I should think, and surely deserve, to see in a clearer and deeper perspective the inherent character of our policy. And this applies to our friends abroad, as well as to the American people.

Among many responsible Europeans, there is a suspicion that we are weakening, that we are being lured into a conference in which all important concessions will be made by our side. They observe that, even as we profess firmness, we are trimming our conventional forces. A prominent French editor has been quoted as saying:

They—

Meaning some French officials—

think you are about to commit treason in a war that has already started.

So it becomes urgent that not only the Russians, but the entire world, understand our intentions—intentions which I believe are shared by Republicans and Democrats alike. If we fail to make our intentions clear, we shall have disheartened our friends and people everywhere who value freedom; and we shall, of course, have done our adversary a great service.

My purpose in making this brief statement, therefore, is not only to reassure our friends, but also to make clear to the leaders of the Soviet Union, and thereby avoid miscalculations on their part, that, despite the free debate characteristic of a democracy, the American people, regardless of party, stand united on the following propositions:

First. The United States will make no separate, or unilateral, deals with the Soviet Union.

Second. The United States will not be driven or enticed from Berlin or from West Germany. We intend to stay until such time as we, in concert with the Governments of West Germany, France, and Britain, decide to withdraw. Such withdrawal will come only as a result of some agreement with the Russians on issues larger than Berlin which we and our allies believe is in our interest. To leave Berlin prematurely, or before Russia's goad, would induce consequences of a psychological nature in both the German sectors, ranging from cynical mistrust of our reliability to despair itself. The fabric of the Western Alliance would undoubtedly begin to unravel. And the neutral societies, anxiously watching this struggle of two great systems, would probably commence an unflattering evaluation of our chances.

Third. The United States cannot in honor accept, even tacitly, any proposition designed to formalize the subjugation of the once free satellite peoples. Our society owes much of its character to the 18th century philosophers who gave meaning and depth to the term "freedom." We could no more accept the permanent subjugation of freedom in the satellites than we could consent to any compromise of freedom in Berlin or West Germany.

This is not to say that we intend to use force against the Soviets to bring about the liberation of these presently subjugated peoples. False hopes of physical intervention by us should not be encouraged.

It does mean that we deny that the Russians have any legal or moral right to dominate these subject peoples. We reject the validity of their position based solely upon superior physical power.

It does mean, we believe, that in time the public opinion of the world will cause the Russian people to relinquish their control of the once free peoples of Poland, East Germany, Hungary, Czechoslovakia, Latvia, Estonia, Lithuania, Rumania, and Bulgaria.

We may even hope that as conditions of life improve in the U.S.S.R., the harsh and brutal attitude of the Russians toward their fellow men may be humanized.

These basic intentions having been stated, it is necessary to add that I see no peculiar virtue in the status quo. We must not, therefore, be unreceptive to fresh, soundly reasoned ideas. We welcome all responsible suggestions aimed

at dissipating this glow of crisis hanging over Central Europe and the sense of futility that goes with it.

There are negotiable points. Agreements by us and the Russians on some of them might serve the interests of both nations. In Germany, we find both sides, each bristling with nuclear weapons, eyeing one another balefully across an unrealistic boundary. It seems to me, for example that if both were to move back an equal distance—however slight the distance—the possibility of war, especially accidental war, would be reduced.

Much of the difficulty of making progress toward relieving tensions in Central Europe derives from the growing use of such terms as "easement," "relocation of forces," and, especially, "disengagement." If, as seems to be the case, there is a fundamental ambiguity clinging to words like "disengagement"—and even "negotiation"—it should be cleared up. These terms must not be equated with appeasement and retreat, as too often they are.

It should be clearly understood by friend and foe alike that under no circumstances will the United States disengage, or relocate its forces, except in return for a bone fide quid pro quo—in short, an agreement that would benefit the Western Allies at least as much as it would benefit the Soviet Union.

We ought not to accept the facile axiom that the Russians have no intention of ever coming to reasonable terms on any matter directly affecting their own interests. To endorse such dogma would be to accept an annealing of the present situation, surely insupportable over the stretch of time. To the corollary admonition—that any deal with Russia would have to be policed—we agree. Neither the United States nor any of its allies is prepared to trade an easement of the situation for any agreement that could not be effectively monitored.

Finally, as the time for negotiation draws nearer, it is essential to remind ourselves not to expect too much in the way of results. A willingness on our part to negotiate, even to relocate military forces under the right circumstances, is all to the good. However, to expect any substantial easement in the near future would be the height of wishful thinking. Indeed, it may be a matter of years rather than months before the Russians will extend a quid equal in value to our quo. As before, our duty is to strengthen our defenses and our resolve. Also, we must not be discouraged. Instead, we should chip away relentlessly at the encrusted Communist mixture of dogma, braggadocio, and fear that contributes so much to keeping world peace in a recurring state of serious jeopardy.

ORDER TO DISPENSE WITH CALL OF THE CALENDAR TODAY

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the call of the calendar, scheduled for today under the rule, be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

CALL OF THE CALENDAR ON WEDNESDAY—LEGISLATIVE REVIEW COMMITTEE

Mr. JOHNSON of Texas. Mr. President, I announce, for the information of the Senate, that there will be a call of the calendar, for the consideration of bills to which there is no objection, on Wednesday, at the conclusion of morning business. I have previously worked out that arrangement with the distinguished minority leader, and have previously announced it, but I want all Members of the Senate to have ample time to be prepared.

In connection therewith, the majority has a legislative review committee, and the Senator from California [Mr. ENGLE], the Senator from Alaska [Mr. BARTLETT], and the Senator from Michigan [Mr. HART], are the members of that committee. It is their responsibility to take the 20,000 bills which are introduced each year and analyze and evaluate them, and to analyze carefully bills which are reported; and if they can be passed without controversy and without objection, as many can be, then they are passed.

If any Member of the Senate wants measures passed over or wants objection made to bills on the consent calendar, if he will communicate with the three Senators I have named, they, or any one of them, will act for that particular Member of the Senate.

Furthermore, in the case of bills that involve controversy and have more substance, and which may require some debate and amendments, the Senators mentioned will attempt to work out amendments that are satisfactory and that will result in their passage. If they fail in that attempt, they will make their recommendations to the policy committee. We ask them, through their staffs, to make the recommendations, and I think we will ask them to sit with us in scheduling legislation before this body.

I need not inform the minority, but I wish to repeat to the minority leader and his legislative review committee, or whatever is comparable to it—I am informed it is called the calendar committee of the minority—that we welcome their suggestions at any time and will always try to comply with them, if possible, because this is a matter which requires as much unity as is obtainable.

Mr. President——

The PRESIDING OFFICER. The Senator from Texas.

JOINT MEETING OF THE TWO HOUSES ON WEDNESDAY NEXT TO HEAR ADDRESS BY HON. SEAN T. O'KELLY, PRESIDENT OF IRELAND

Mr. JOHNSON of Texas. Mr. President, I announce, for the information of the Senate, that on Wednesday next the Senate will proceed to the House of Representatives for a joint meeting at 12:30 o'clock. The two Houses will hear an address to be delivered by Mr. Sean T. O'Kelly, President of Ireland.

I hope that all good Irishmen will return from their St. Patrick's Day celebrations and be here to welcome this very able President.

THE NEED FOR PROPER PRIOR PLANNING REGARDING WEST BERLIN

Mr. YARBOROUGH. Mr. President, there is a little alliterative saying in the Army which I believe has an important meaning to this Nation today.

In preparing to become officers or noncommissioned officers, candidates are reminded that "Proper prior planning prevents poor performance."

The date of May 27 is circled on the world's calendar. That is the date when Russia's Mr. Krushchev, in a cold-blooded game of worldwide Russian roulette, has demanded that the West get out of West Berlin. The Communist dictator has said the deadline may be extended to June or July—if things are going to suit him. However, Wednesday, May 27 could still become the day which will mark the beginning of world war III.

Another old quotation is applicable. Shakespeare said:

> All the world's a stage.

And one of the principal players in the gripping drama currently being presented is the United States of America. The other nations, our friends as well as our enemies, make up the audience. The audience is closely watching the happenings on the stage because, unlike what happens in most plays, the events affect all of them.

What must the audience think of a nation which, in the face of the situation currently facing it, talks of cuts in its armed forces and seems resigned to becoming a second-rate power in the missile race?

The cold war may not suddenly turn hot on May 27, but the failure of the United States to show that, although it wants peace, it is willing to defend the rights and principles for which it stands, could well so weaken our position in the eyes of the audience, the world, as to cause us to lose our current position of leadership of the free nations.

In remarks before this distinguished body on March 12 I discussed this problem. I should like to repeat three short statements from that discussion:

First. It is known that the Russians have 175 ground divisions ready for combat and equipped with the most modern tanks and other implements of war. We have very small forces with which to meet them.

Second. At this time, as in all periods of grave crisis, all of us stand firmly with President Eisenhower. If the Soviet leaders think they will find us divided in our fight against communism—divided by political parties or divided by political ideology or divided on any other ground—they have made what will prove to be their greatest mistake, and perhaps their fatal mistake.

Third. We are the only nation which has the strength to save West Berlin, and the free world is looking and watch-

ing to see whether we will have the resolution and courage to do so.

In preference to the horrors of war, negotiation is advisable at any time. However, we can only negotiate with the Communists from a position of military strength. We must have prior planning to prevent not just poor performance but to prevent a tragedy. The time for the planning is now.

Negotiation does not mean retreat. Any retreat in the case of West Berlin would be fatal.

Mr. President, a thoughtful examination of our position was included in an editorial published in the Columbus, (Ga.) Enquirer. I request unanimous consent to have printed in the RECORD at this point the editorial from the Enquirer for Saturday, March 14, 1959, under the heading "President's Attitude Toward Size of Ground Forces Disconcerting."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

PRESIDENT'S ATTITUDE TOWARD SIZE OF GROUND FORCES DISCONCERTING

In continuing his stand against the position of those who are fighting a cutback in ground forces, President Eisenhower made a surprising statement at his news conference Wednesday. The Chief Executive, not in the habit of making statements containing little or no substance, declared to reporters that if Congress persists in providing more manpower for the Army and Marines, he supposes he will have to put them "someplace where it's nice, to keep them out of the way, because I don't know what else to do with them."

This does not sound like President Eisenhower.

The statement not only is surprising, but it is a bit shocking.

Mr. Eisenhower pleaded with the country to stand ready, to avoid hysteria and going a little bit off half-cocked. He said that because of the actions and attitudes of communism, "we are living and we are going to live in a tense period."

The President said it would be ruinous to be "pushed off" time and again by something suddenly described as a crisis, from a defense plan he said represents the nearest approach to a consensus of those people who are best informed on the subject.

In connection with the opinions of those best informed on the subject of military preparedness, it is interesting to note that Senator LYNDON B. JOHNSON made this statement right after a Senate preparedness subcommittee had questioned Gen. Maxwell D. Taylor, Army Chief of Staff.

"One conclusion is inescapable. That is that the size and composition of the Army does not reflect the judgment of the men who must lead the Army in the event the Army must be used."

This does not seem to bear out President Eisenhower's contention that the policy he has put into effect is the nearest approach to a consensus of those who are best informed on the subject.

On the contrary, it appears that those whose duty it is to lead the ground forces are not in agreement with plans to cut their size.

The Eisenhower program contemplates cutting the Army from 900,000 to 870,000 men and the Marine Corps from 200,000 to 175,000 by midyear. An Associated Press dispatch from Washington said Wednesday that General Taylor told reporters he twice has recommended 925,000 men for the Army and that he nodded assent that he still wants that many. This, said the AP dispatch, was something like an hour after Mr. Eisenhower told newsmen:

"I don't think that an Army of 870,000 is a small Army. And I don't see why we should get so hysterical or excited about it."

The President asked what would be done with more ground forces in Europe—start a war? The man who commanded Allied forces in the invasion of Europe in World War II stated that to win and enforce your will "you have got to go to other means." He apparently was alluding to nuclear weapons.

A reporter told the President at his Wednesday news conference that some of his critics are saying that $90 million is being spent for jet transports for the White House and Pentagon, whereas 60 million more would bring 55,000 men into the Army and Marine Corps. The President replied he believed it would take 250 millions to provide for an extra 55,000 men a year. He added:

"I have never asked for a jet plane and I am not sure that I will ever be riding in one."

The Chief Executive said he authorized the military to acquire two or three jet transports because he knows of no other way they can decide whether the jets are an efficient and effective means for supporting our forces.

The strong opposition to a cut in the ground forces developed anew on Capitol Hill when the Berlin crisis developed.

Senator STUART SYMINGTON said Wednesday that General Taylor had shown "very clearly that he completely disagrees with the administration position" on the Army's size.

The Berlin situation points up the need for the President to give serious consideration to the view of those military leaders who view with alarm the plans to cut materially the size of the ground forces.

It is disconcerting when the President says he would not know what to do with additional manpower if voted by Congress. Indeed, it is distressing.

There seems to be little doubt that the military leaders of the country are disturbed by the plans to chop off 30,000 members of the Army and 25,000 from the Marines.

To whom does the President refer when indicates that those who are best informed on the subject favor the reduction?

It is hoped that Congress will act with bipartisan vigor in such a way as to convince the administration that the United States must maintain an adequate ground force. To fail to do so would invite tragedy.

DEATH OF HENRY PATRICK KILEY

Mr. KEFAUVER. Mr. President, I have received word today of the loss of a public servant whose devotion to his country and his friends went far beyond the call of duty. I am speaking with respect and sadness of Henry Patrick Kiley, who died this morning at Georgetown Hospital, where he had apparently been on the road to recovery after a serious operation.

Mr. Kiley's record of conscientious, effective service is one which has been equalled by few. It began when he entered the U.S. Army on September 19, 1918, and continued through the Superior Provost's Court, the State Department, the Department of Justice, the Senate Committee To Investigate Campaign Expenditures, and the Senate Crime Committee, where his fine work deserves special mention.

In the past few years Pat Kiley, as he was known to most of us, had not been in good health. Yet he still carried on as a part-time employee on my staff, working for the public. Pat Kiley was a warm and friendly man, with a very big heart. All who knew him will be saddened by his passing—especially my staff and I, who will remember him with special affection.

The PRESIDING OFFICER. Is there further morning business?

Mr. KEATING. Mr. President, I have further business during the morning hour.

The PRESIDING OFFICER. The Chair recognizes the Senator from New York.

LEO O'BRIEN: A GREAT CHAMPION OF ALASKAN AND HAWAIIAN STATEHOOD

Mr. KEATING. Mr. President, it is with a great deal of pleasure that I rise to pay a somewhat unique tribute to a true friend of mine, Representative LEO W. O'BRIEN, of New York. Although LEO is of a different political persuasion from myself, his quick wit, his active mind, his powers of warm understanding, and his readiness to cooperate above and beyond the call of partisanship, have endeared him to all Members of Congress, regardless of political affiliation.

LEO O'BRIEN'S name has been preserved for immortality by events of the past 2 years. Through his skillful and successful quarterbacking of the Alaskan and Hawaiian statehood bills, LEO O'BRIEN'S name has been indelibly written on the history books of our Nation. And rightly so, for more than any other single man, he deserves the credit for these two great achievements.

Undaunted by repeated rebuffs and slow action by Congress, LEO has plugged away on these two projects with his usual determination and stick-to-itiveness. Much of the success of his efforts can be traced to the intensive, painstaking manner in which he convinced himself—and any doubters—about the soundness of statehood for these two Territories. LEO'S careful research into every aspect of statehood for Alaska and Hawaii convinced him—and enabled him to convince a majority of both bodies—that the cause was right and just.

I am pleased to salute him as the godfather—if not father—of Alaska and Hawaii statehood. Particularly since his most recent spectacular success came on the eve of St. Patrick's Day, it is reassuring to note that his name will be written boldly, and perhaps in green, on the pages of our Nation's history. I congratulate LEO O'BRIEN for this job well done. It will be a pleasure to continue our pleasant association, working together for those things we feel are good for New York and the Nation.

Mr. President——

The PRESIDING OFFICER. The Senator from New York.

HUNGARIAN INDEPENDENCE DAY

Mr. KEATING. Mr. President, March 15 marked the anniversary of Hungarian

Freedom Day or Hungarian Independence Day. In ceremonies all across our land, the memory of the great Louis Kossuth and other leaders of the noble Hungarian people was evoked and audiences were exhorted to rededicate themselves to the cause of Hungarian freedom.

It was in 1848 that the Hungarians, along with other liberty-loving peoples of Europe, won freedom from despotic rule. The incomparable Kossuth led his people in a bloodless uprising which resulted in the abolition of serfdom, the proclamation of a charter of freedom, and other manifestations of a victory over tyranny. That day, March 15, will never be forgotten by the people of Hungary and their friends throughout the world.

It is important for those of us who are fortunate enough to live in the free world to continue the observance of Hungarian Independence Day. For by these ceremonies, and the resultant publicity which seeps through the Iron Curtain, we can assure those brave people still under the yoke of Kremlin imperialism that they are not forgotten. Because the Hungarian people in their native land cannot celebrate this day, it is doubly important that we mark it and mark it well.

We know that the spirit of liberty is not dead in Hungary. The spirit of 1848 was clearly manifested in the October 1956 revolution which shook the Kremlin to its foundations. It has been demonstrated in numerous acts of sabotage and other activities of silent resistance to the Red overlords.

We in the United States, who have benefited so much from the Hungarians who have come to our land and contributed so much to our progress and strength, must on this occasion reaffirm our belief in the freedom of Hungary. We must hope and pray for the day of liberation.

I salute Hungarians on both sides of the Iron Curtain on this anniversary occasion, and express the hope that the day will not be long delayed when this fine country will once more regain its rightful place in the family of free nations.

Mr. President——

The PRESIDING OFFICER. The Senator from New York.

FORTY-SEVENTH ANNIVERSARY OF THE FOUNDING OF THE GIRL SCOUTS OF AMERICA

Mr. KEATING. Mr. President, the week of March 8 to 14 marked the 47th anniversary of girl scouting in America. I want to take this opportunity to extend my hearty congratulations to this fine organization and its members, and to express the hope that it will continue to grow and prosper.

Throughout its history in our Nation, the Girl Scout movement has consistently contributed to better citizenship and to making this a better place in which to live. Through programs such as aid-to-voters, the proficiency badges stressing good citizenship and contributions to good government, and other worthy projects, the Girl Scouts of America are doing much to insure that the women of tomorrow will be fully informed, wholly alert, and valuable members of the American community.

Through its international programs, the Girl Scouts are contributing much to the building of strong bonds of friendship with our world neighbors. Their personalized, people-to-people contacts help break down barriers of misinformation and distrust, and help immeasurably to enhance prospects for a lasting peace based on mutual understanding and trust.

It is encouraging to note, in these days when we hear so much about juvenile delinquency, that the programs of the Girl Scouts are contributing so successfully to the sound development of our youth. It is worthy of note, also, that the Girl Scouts seek not to displace, but rather to supplement, the basic foundations for the development of happy and useful citizens—namely, the home, church, and school.

In its 47 years of existence, the Girl Scouts of America have become a nationwide symbol and movement for better citizenship among girls and women. By melding constructively and effectively in its programs the virtues and teachings of love, worship, work, and play, the Girl Scouts are contributing magnificently to the building of a stronger America.

I salute this great, high-minded organization on its birthday and wish all concerned Godspeed and every success in the years ahead.

THE PROBLEM OF AGRICULTURAL SURPLUSES

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the RECORD at this point as a part of my remarks a letter which I have received from Mr. Noel Cover, who conducts some of the most extensive agricultural operations in the State of Nebraska. The letter deals with the problem of agricultural surpluses.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COZAD, NEBR., *March 5, 1959.*

Hon. WILLIAM LANGER,
U.S. Senator, North Dakota,
Washington, D.C.

DEAR SENATOR: I am Noel Cover, Dawson County, Cozad, Nebr. I have been one of the big meat producers of the country. Have bred, raised, grown, fed, and marketed large numbers of cattle, hogs, and sheep—running into millions of head. Never bought on order nor sold on commission.

In these operations would feed a million bushels of corn and thousands of tons of alfalfa hay each year. Buying 80 percent more than I produced.

In the thirties bought hundreds of thousands bushels of good, sound corn for 8 to 15 cents bushel. Also thousands of tons of alfalfa hay at $2 to $5 a ton, and other feeds on same price level.

While I buy many times more corn than I produce, I would rather pay $1.60 bushel for corn to feed than any price less than $1.60. In doing so, I am not being a philanthropist.

Dawson County stands in the first 100 agriculture counties in the United States. Has more irrigation in Dawson County than any county in the State.

Farm sales are many, many times greater this winter and spring than at anytime in the past. Farm tenants are throwing in the sponge.

I have some choice irrigated farms that I have been unable to rent—not even a prospect since September. There has always been more renters than farms.

I am a Republican. Have never complied with the farm program. Even though the farm program was set by the Democrats, it was the greatest thing—not only for the agriculture—but for all the people until President Eisenhower and Secretary Benson took over.

Secretary Benson started at once to destroy the farm program. His answer to the agriculture problem was farmers cooperative.

Shipping millions of bushels of corn and wheat on the open market. He puts forth every effort to injure, damage, and destroy the farm program.

Having enough wheat in the bins now to carry us a year, and 300 million bushels over, without a crop this year, is a wonderful position to be in, especially at this time.

Even though the farm population is down to 15 million we are dependent upon agriculture for our very existence and the most important segment in our economy, where new wealth comes from.

If there was 90 to 100 percent parity on cotton, wheat and corn, set to run until Congress could make any changes, giving the Secretary of Agriculture limited power and directions in disposing of the surplus. This would be an answer.

If the agriculture program was put to where it was when President Eisenhower and Secretary Benson took over, even if, it cost 15 billion a year, every dollar would go into channels of commerce and taxes. It would not cause inflation—it would be prosperity.

I am from the grassroots, with agriculture experience second to none, successful to a degree. If there is any possibility I can do agriculture any good in appearing before committees or hearings, I will be glad to do so at my own expense. I want no job nor publicity.

Secretary Benson and his agriculture program and the 5 million unemployed is what put the Democrats in the saddle.

Thanking you, I am,
Yours truly,

NOEL COVER.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. YOUNG of Ohio in the chair). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. Is there further morning business? If not, morning business is closed.

THE SUPREME COURT

Mr. KEATING. Mr. President, there is a widespread debate in the Nation today regarding the role of the Supreme Court. Unfortunately, this controversy has led to extreme pronouncements by both the Court's unqualified defenders and its irrepressible detractors. The extremists in one camp have proposed measures which would endanger the very institution of the Supreme Court. The extremists in the opposite camp

have bitterly attacked even proposals to study the decision of the Court. I am convinced that neither of these factions reflects the sentiments or best interests of the American people.

There is a tendency under our constitutional system of checks and balances for controversies to develop between the respective branches of the Government. Such controversies are an inevitable and, I believe, an intended result of the division of governmental responsibility decreed by the fundamental law. The clashes often produce a compromise between those who want too much and those who would give too little, which provides the people with just enough. I hope this will be the outcome of the present controversy between Congress and the Supreme Court.

The Supreme Court, like the other branches of Government, has served us well in its 179 years of existence. Its justices have established an outstanding record for integrity and impartiality. The Court should not be any more immune from criticism than other branches of the Government. But its imperfections should be brought to light and remedied by intelligent and constructive scrutiny of its decisions, not by vindictive and intemperate attacks on the Court itself.

It is of vital importance that we avoid precipitous action which will plague us ever after. We must act with wisdom and not in anger. We must be judicious in our approach so that we may, with clear conscience, criticize whatever injudiciousness we uncover in the approach of others. Exercise of legislative self-restraint in this area will earn us respect and remove all doubts as to our good intentions.

I was delighted to note the strong reaffirmation of faith in the institution of the Supreme Court contained in the preamble to the recent resolutions adopted by the American Bar Association. This report has been so widely misrepresented that I believe it would be well to quote its very first "whereas" clause in full. It reads:

> The Supreme Court of the United States and an independent judiciary created by the Constitution have been and are the ultimate guardians of the Bill of Rights and the protectors of our freedom, and as such it is the duty of the members of the bar to defend the institutions of the judiciary from unfair and unjust attacks.

This reverent attitude toward our judicial institutions should be shared by all Americans, particularly lawyers, no matter what their opinion may be of any particular decisions. The first canon of professional ethics enjoins upon each of us who are privileged to be members of the legal profession, the sacred duty "to maintain toward the courts a respectful attitude not for the sake of the temporary incumbent of the judicial office, but for the maintenance of its supreme importance." This canon also contains the practical observation that: "Judges not being wholly free to defend themselves, are peculiarly entitled to receive the support of the bar against unjust criticism and clamor." This is advice which every citizen should take to heart.

Congress has a responsibility to prevent the undermining of our judicial system and to protect and preserve the rule of law. This is a sacred mission. The difference between a society governed by principles of justice and a society governed by arbitrary fiats is the difference between democracy and tyranny. I want to make it clear that I will always defend with all my vigor the institution of the Supreme Court as one of the pillars of our constitutional structure.

The Court's role has not always been readily accepted. In many periods of controversy between the Court and both the legislative and executive branches of the Government, attempts have been made to undermine and destroy the structure and power of the Court itself.

Many of the earlier Jeffersonian Democrats, for example, because they were fearful of the direction of the Court, attempted to repudiate the whole idea of judicial review of acts of Congress. Their view was that Congress had the exclusive right to interpret the Constitution.

President Andrew Jackson, expressed like sentiments when he said:

> The Congress, the Executive, and the Court must each for itself be guided by its own opinion of the Constitution * * * The opinion of the judges has no more authority over Congress than the judges, and on that point the President is independent of both.

The most far-reaching and potentially dangerous attack upon the status of the Supreme Court came in the 1930's after the Supreme Court overturned a number of administration statutes. It was proposed at that time to increase the number of judges on the Court in an obvious attempt to pack it with jurists sympathetic to the threatened legislation. If this plan had succeeded, it might have permanently impaired the respect for the judicial process of our Nation.

More subtle but equally pernicious proposals were made at the same time to compel the Court to comply with the Chief Executive's will. One proposal was to adopt an amendment under which Congress could overrule any Supreme Court decision by simply reenacting the law. Another proposal would have deprived the Supreme Court of its appellate jurisdiction in cases involving Federal constitutional questions. And there was even a proposal to require the vote of seven members of the Court rather than a majority in order to hold a statute unconstitutional.

By what logic could reiteration constitutionalize an unconstitutional law? By what reasoning could it have been urged that the conflicts in lower court decisions should be permanently perpetuated by the absence of appellate review? By what system of political mathematics could it have been calculated that any two members of the Court should be allowed to frustrate the constitutional determinations of a court majority? Perhaps this foolishness was apparent then, too, for we know that after a bitter controversy, all of these proposals were rejected. Yet we have recently seen evidence of their reappearance.

We may disagree most strongly with the opinions of the Court, and I, for one, find fault with a good number of recent vintage, but disagreement with individual decisions does not excuse extreme attacks on the members of the Court nor upon the institution itself. The critics who would have us impeach members of the present Court, or submit them to reconfirmation every 4 years, and who have advanced other such schemes, reveal a lack of understanding for the basic concept of the Court and the part it must play in the American system.

In my view there are three major circumstances under which Congress is warranted in revising decisions rendered by the Court. The most obvious is when the Court departs from its role as interpreter of the law and presumes to pass upon the wisdom of the statutes. Next, when it has mistaken the intention of Congress in construing the meaning of the law. And, finally, when it has sought to adopt laws of its own when Congress has been silent.

In these situations, it is the duty of Congress, as the elected body duly constituted to enact the Nation's laws, to state its intentions forcefully and unmistakably. Such action is not an attack on the Court, but an effort to fulfill the congressional responsibility under the Constitution. Only shortsighted and naive judicial purists, who fail to comprehend our system of checks and balances, could reasonably object to allowing Congress to have its say on such matters. In my opinion it is as subversive of Congress' functions under the Constitution to doubt its right to examine such decisions as it would be subversive of the Court's functions to propose its submission to either legislative or executive domination.

Indeed, nothing is better calculated to encourage unjustifiably drastic measures against the Supreme Court, than the antics of the extremists on the other side who engaged in an overzealous, emotional defense of the merits of every judicial pronouncement. These judicial absolutists condemn every legislative effort to consider the decisions of the Court. Such people, because they believe that the present Court faithfully serves their libertarian interests, attempt to undermine and belittle even the most moderate congressional exercise of its own lawmaking authority in this field. In their zeal for a particular decisional doctrine, they would destroy the fundamental constitutional doctrine of checks and balances on which our governmental structure is built. We must always respect and defend the institution of the Court, but it would be fatal to our system of Government to confer upon the Court immunity from legislative scrutiny.

To maintain that the Court is infallible, is to deny history. After all, it was a decision by the Supreme Court in the Dred Scott case which held that Congress could not constitutionally prohibit the extension of slavery in the Louisiana Territory north of Missouri. The immediate result of this decision was to make a slave out of a human being intended by Congress and God to be a

free man. It took a Civil War and a constitutional amendment to completely undo the consequences of this action of the Supreme Court.

It was Supreme Court decision in the Pollock case which invalidated the first Federal income-tax law and required the 16th amendment. I know that no one particularly enjoys paying taxes, but think of where this country would be today if Congress had not reviewed, and the people had not revised, this decision by the Supreme Court.

It was the Supreme Court which declared the first Federal workmen's compensation act for employees of interstate carriers unconstitutional.

It was the Supreme Court which declared that it was unconstitutional to prohibit an employer from discriminating against union members.

It was the Supreme Court which at one time held unconstitutional early Federal civil rights laws.

It was the Supreme Court which at one time said that Congress exceeded its power in attempting to legislate against child labor.

It was the Supreme Court that declared that Congress could not establish a minimum wage law for women in the Nation's Capital.

I could, as could any other Senator, multiply these examples. Those which have been cited, however, are sufficient to demonstrate the desirablity—indeed, the necessity—for surveillance of the rulings of this third branch of Government. Study of the operations and decisions of the Court can contribute as much to the public welfare as in other cases study by the Court of the operations and actions of the other branches of Government has contributed to the public welfare.

Unfortunately, some legislative critics of the Supreme Court approach their task with a degree of hostility which makes constructive action impossible. I am particularly concerned about the unrestrained attacks upon the Court in some quarters because of its decision in the school segregation cases. In my opinion the Court's desegregation decision was eminently sound, both in law and in morals. The ruling was forecast by a number of cases ordering the admission of Negroes to State institutions of higher learning. As early as 1938, the Court, speaking through Chief Justice Hughes, in *Gaines* v. *Canada* (305 U.S. 337) held that a Negro living in Missouri was entitled to study law at the University of Missouri, a State school, there being no other law school maintained by the State which he could attend. The significant fact about this decision was its teaching that the requirement of equal protection of the laws was not satisfied by Missouri's offer to pay tuition at a school of comparable standing in a nearby State. Later, in 1950, in *Sweatt* v. *Painter* (339 U.S. 621), the Supreme Court said it was proper to examine intangible as well as tangible factors in determining whether separate law schools maintained for Negro residents were equal to schools open to white residents only. This clearly presaged the Supreme Court's reliance, in the 1954 school desegregation cases, on the psychological and sociological impact on children of enforced educational separation based on their race.

An eminent legal scholar, Dean Pound, once remarked that while the law must be stable, it cannot stand still. It strikes me that the school desegregation decision is a good illustration of the kind of growth in the law which has always been necessary to prevent stagnation. In my opinion, this decision was a logical and inevitable step after the Gaines and Sweatt opinions, unless we were to erect a constitutional principle upon the difference between elementary and advanced education. Moreover, it was a decision which added strength and character to our claim of being a Nation of free and equal people.

My strong support of this decision, however, does not blind me to the reasonableness of criticisms directed against decisions of the Court in other fields, particularly in cases involving subversion and law enforcement. While I was a Member of the House of Representatives, I introduced a number of bills to deal with these cases on an individual and selective basis, and I have already introduced or cosponsored similar measures in the Senate. I regard it as my duty as a legislator, and particularly because of being honored by membership on the Committee on the Judiciary, to keep myself as fully informed as possible about the fate of legislative enactments in the courts. When I feel that the intention of Congress in passing a law has been misconstrued, I will work hard for a congressional reiteration of its views in unambiguous and unmistakable terms. But I will never do this in a way which challenges either the motives or the power of the High Court, and I will firmly oppose any indiscriminate legislation sponsored by others which would curtail the Court's jurisdiction and methods of operation.

One of the most significant shortcomings of the 85th Congress was its failure to enact bills designed to remove unreasonable impediments to effective action against subversives and the criminal underworld revealed by several Court decisions. In the Nelson case the Supreme Court held that the States could not act against Communists seeking the overthrow of the Republic because that was a field which the Federal Government had preempted; then, in the Yates case, the Court held that the Federal Government's own antisubversive laws did not apply to organizing a cell or a unit of the Communist Party because only participation in organizing the original Communist Party ran afoul of the law, and finally in the Kent and Briehl cases the Court held that the Federal Government could not prevent even known Communists and other subversives from leaving and returning to the country at will. The result of these decisions was virtually to immunize the Communist Party from either State or Federal prosecution and at the same time to permit its traitorous members to improve their techniques and spread their poison in foreign lands all over the globe. These decisions of the Court, which in large part were based on alleged constructions of congressional intent, made a mockery of our national effort to keep this country secure against Communist treachery.

Under the legislation proposed to meet this situation, the States would be authorized to prosecute all traitors; the Federal Government would be authorized to prosecute anyone for teaching and advocating the violent overthrow of our Government if he tried to form a cell of the international Communist movement for this purpose; and the Secretary of State would be authorized to deny passports to Communist Party members and their agents.

Congress should also act to unshackle law enforcement efforts against the domestic garden variety type of criminal by correcting a number of Supreme Court decisions which have disclosed entirely unwarranted obstacles to anti-crime measures.

In the Mallory case, for example, the Supreme Court imposed a system of timetable justice on police officers which has made it impossible properly to investigate crime. In the Benanti case the Supreme Court completely destroyed the effectiveness of State wiretapping laws and transformed the ordinary telephone into a privileged instrument for criminality. In the Sullivan case the Supreme Court gave entirely undeserved financial assistance to professional gamblers by ruling that they could deduct the expenses incurred in carrying out their illegal operations in figuring their income taxes.

The bills dealing with these rulings would restore the constitutional test of voluntariness and reject the Supreme Court test of timeliness in determining the admissibility of confessions; would authorize any wiretapping by local law enforcement officers sanctioned by State law, as in New York, while at the same time tightening up on illegal wire tapping by "private eyes," and others, who misuse that medium; and would enable the Federal Government to deal with criminal conspiracies operating across State lines; and would close the tax loophole for gamblers.

As I have indicated, it is not the intent of any of the bills to which I have referred to undermine the Court as an institution or to interfere with its jurisdiction or procedures. The attempt by some judicial activists to cast these bills in anti-Supreme Court mold is therefore inexcusable. The only objective of these bills, and their only consequence, would be to carry out the legislative responsibilities vested in the Congress by the Constitution. Members of Congress certainly may disagree as to the merits of these proposals, but I earnestly hope that their consideration will not become mired in another battle over whether this is a good or a bad Court.

Many eminent authorities with no axes to grind have strongly suggested that the Supreme Court overstepped itself in the cases to which these bills relate. Professor Corwin, a leading expert on the Constitution, has pointed to the problem of keeping the Court out of legislative and executive territory. In his characteristically blunt way, he has publicly

stated that on one recent decision day the Court "went on a virtual binge and thrust its nose into matters beyond its competence, with the result that, in my judgment at least, it should have aforesaid nose well tweaked." He described as "irresponsible" the Court's decisions in the field of subversion, pointing out that the total result of its actions was "to leave the country exposed to unjustifiable propaganda urging the right of revolution." Professor Corwin concluded that "the country needs protection against the aggressive tendency of the Court."

For myself, I am so much interested in having the Court's nose "tweaked" as I am in having Congress deal on a selective and sound basis with the substance of any misconceived judicial encroachments on the legislative power. I stand with the great sage, Judge Learned Hand, in his criticism of judges who attempt to serve as communal mentors or who attempt to suppress measures of which they do not approve. I know that anyone truly interested in preserving our democratic form of government will share Judge Hand's repugnance at being "ruled by a bevy of platonic guardians."

There must be added to the voice of Judge Hand and Professor Corwin what is perhaps the most impressive of all warnings against the tendency of these Supreme Court decisions to overrule congressional and executive policies. I refer to the action of the conference of chief judges in adopting a resolution and report highly critical of the Supreme Court for its alleged lack of judicial self-restraint and its invasion of the field of legislation. This resolution expressly calls upon the Court to recognize and give effect "to the difference between that which, on the one hand, the Constitution may prescribe or permit, and that which, on the other, a majority of the Supreme Court, as from time to time constituted, may deem desirable or undesirable." Knowing the traditional reluctance of judges to criticize the High Court, the approval of this resolution by the judges of 36 of the 44 jurisdictions represented attests to the serious proportions of the situation.

The remedy for this situation is squarely in the hands of Congress. Congress can act decisively by approving curative legislation without in any way infringing upon the vital function of the Supreme Court to interpret the law. The bills I have discussed are not attempts to wreak vengeance on the Court or retaliation against any member of it. They do not deal with matters of personality or abstract philosophy. They simply are attempts to enact commonsense laws to restore public protection against subversion and lawlessness.

I suggest that we approach our task with a profound respect for the place of the Supreme Court in our system of Government. Only a balanced and moderate approach will halt the trend toward Federal judicial legislation without undermining the status of our great institutions. Let us earnestly strive for that proper working together of all of the components of our Federal system, which offers the best hope for meeting the needs of the people.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. KEATING. I am happy to yield.

Mr. SCOTT. I wish to compliment the distinguished Senator from New York on having presented a comprehensive wrapper of the problem which so confused the 85th Congress. I sometimes feel that in the last Congress we lost sight of exactly what needed to be done.

I ask the distinguished Senator from New York if he does not agree that it is, in fact, a very sloppy practice to attempt, in a spirit which seems, at least to me, to be somewhat petulant, the meat-ax approach of slashing away at the constitutional powers of the Court and our traditional checks and balances in an attempt to cure misapprehensions of the Court, which, in fact, we, I think, agree did call for specific relief. Does not the Senator agree that that is the case?

Mr. KEATING. Mr. President, I entirely agree with the distinguished Senator from Pennsylvania. I appreciate his remarks. I believe the only proper way to approach all these problems, where the Court has misconstrued what we believe to be the intent of Congress, or has entered into what we believe to be legislative areas, rather than interpretive areas, is to take up each case separately.

One other difficulty in enacting legislation which is too broad is that it may do things Congress never intended. I remember, as does my colleague, the bill we debated last year at some length in the House of Representatives. To the surprise of many Members, during the debate it developed that the bill would have struck a fatal blow at the railroads. Of course, the railroads had never been thought of in the framing of that proposed legislation, nor was any such result intended. This illustrates the importance of confining our legislation in this field to the specific situations we are seeking to correct.

Mr. SCOTT. As I recall—and I am sure the distinguished Senator from New York also recalls it—there was likewise a great deal of concern that the overall approach might well have wreaked havoc with the status of our labor-management statutes.

Mr. KEATING. That is very true.

Mr. SCOTT. Again I should like to say that the distinguished Senator from New York certainly is as well qualified as any other Member of this body to present and discuss this subject, in view of his long service and his many years of work as the ranking member of the Judiciary Committee of the House of Representatives, in which I had the privilege of serving with him in the 84th Congress. I compliment him on what he has said today.

To conclude these comments by me, I should like to point out, if I may, that I recall that Chief Justice Hughes referred to freedom of speech as freedom for the thoughts we hate, rather than for the thoughts we love. I think the analogy applies in this instance. Some of the opinions of the Court may well have been obnoxious to us as lawyers and as legislators; and, so far as I am concerned, I specifically include in that category, the Court's decisions in the Nelson, Mallory, and Jenkins cases. I do not believe that, from my standpoint, the Supreme Court ever went so far off base as it did in its decision in the Nelson case.

However, be that as it may, we have an obligation to maintain the Court in all its authority and all its constitutional power; and we do not solve specific problems by acting in a petulant spirit or by seeking to sweep away the substructure of the judicial branch of our Government.

Again I thank the distinguished Senator from New York.

Mr. KEATING. Mr. President, I appreciate the remarks of the Senator from Pennsylvania. His entire legislative record attests to his respect for the institution of the Court and his respect for the fundamental structure of our Government. I felt sure that the approach I have suggested here would strike a responsive chord with the Senator from Pennsylvania, whose fine work I have so long admired and respected.

Mr. MORTON. Mr. President, will the Senator from New York yield to me?

Mr. KEATING. I yield.

Mr. MORTON. I, too, wish to commend the Senator from New York for putting this problem in such good perspective. I believe it is high time that was done. Today it has been ably and succinctly done by the distinguished Senator from New York.

The Senator from New York will recall that, last year, during the 85th Congress, House bill 3, as I recall its number, was passed by the House, and was sent to the Senate; and in the Senate it was offered as an amendment to some other pending legislation, and at that time it was defeated by a majority of only one vote. A great deal of support was generated for that measure. That support was sincere, but I believe it was misdirected. Those of us who voted against that meat-ax approach, or omnibus approach, were rather harshly taken to task by some of our constituents, since that measure failed by a majority of only one vote. Some persons said that a change of only one vote would have changed the result.

Therefore, I wish to commend the Senator from New York for so ably putting this matter into proper perspective.

I believe all of us who voted against House bill 3 last year had misgivings, in various degrees, as to some of the actions of the Court. But even though we felt strongly on that subject, we felt that we took the proper approach.

As I recall, the Senator from New York [Mr. KEATING], at that time the ranking member of the House Committee on the Judiciary, spoke very ably against that measure on the floor of the House of Representatives.

Mr. KEATING. Mr. President, the Senator from Kentucky is correct. The chairman and the ranking Republican member of the House Judiciary Committee and the ranking member on the Democratic side all fought against the bill. Nevertheless, the bill went sailing

through—in large measure, I believe, because of a misapprehension. It was argued that the bill, if enacted, would take care of the Court's decision in the Nelson case. Nearly every Member of the House of Representatives wanted something done to take care of the decision in the Nelson case. Later, a bill to do specifically that was passed by the House. But the difficulty was that the bill contained other language, which went far beyond the Nelson case decision, and dealt with areas which I believe were not envisioned by many of those who supported that measure.

This is an intricate field. I am in no way critical of those who voted for H.R. 3, because I am sure they were actuated by the highest motives. But I feel strongly that they failed to understand fully the impact of that proposed legislation in many areas which never entered their minds.

Mr. MORTON. I believe the consequences of all these decisions tend to be oversimplified, especially in the case of those of us who are not lawyers. These matters really must be thought through; and there is great danger that we may restrict the Court as an institution.

So I appreciate very much the succinct manner in which the Senator from New York has pointed out this problem and the suggested remedies.

An incident which occurred in either 1954 or 1955 points out some of the difficulties involved. After the two decisions the Senator from New York has mentioned—namely, the decision in the Kent case and the decision in the Beiehl case—the State Department was "up against it" as to what should be the policy in regard to denying passports. Of course, all of us believe in freedom of travel; but I think there have to be certain practical limitations.

I remember that at that time there was pending the case of Jane Foster Zlatovski, an American girl who had married a Russian who had become a naturalized citizen. She was living in Paris, and came to this country to visit her mother, who was ill. While she was in the United States, the State Department picked up her passport, and refused to return it to her, thus making it impossible for her to return to Paris. At that time I happened to be Chairman of the Appeals Board. She went through the appeal procedures. I was told by the FBI under no circumstances to let her have a passport; that she was a member of a ring which was engaged in international espionage; that the FBI had about concluded the preparation of the case, and they could not afford to let her know that. So I was given the job of finding other grounds for denying her a passport.

The only ground I could find was that at the age of 19 or 20, she had picketed the White House—a mistake which a certain number of young people have made. On that ground, I denied her a passport. She got another lawyer, and took the matter to court; and the case was pending at the time of the decisions to which the Senator from New York has referred. I went to the Department of Justice, and I said, "We are getting tired of losing these cases. Either you will have to give me more evidence or permit me to use more evidence, or we are not going to fight this case."

It was decided it would have been worse to disclose our hand than to let her go to Paris. She went to Paris. Soon after that she was indicted for espionage in, I believe, the New York court. In any event, of course, she is in Paris. She is not to return. Perhaps it was better to let her go than to have tipped our hand.

I cite this instance to show that the question is not so simple as some think it is. It is not all black or white. Freedom to travel is a guaranteed, inherent freedom, yes; but we are going to have to face up to this problem, in addition, to the other matters which the Senator from New York has mentioned. I think Congress should face up to it. Certainly there should be a better answer than to let a known spy leave the country with no punishment whatsoever.

Again I wish to commend the Senator from New York for his very able statement.

Mr. KEATING. I thank the Senator from Kentucky. I think he has, in this particular instance, pointed up the necessity for legislation in this field. We must be careful, in framing such legislation, to protect the right of loyal Americans to travel, but I think we need to legislate, and do it carefully, in this area as in others.

Mr. President, I yield the floor.

Mr. CANNON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. YOUNG of Ohio in the chair). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CLARK. Mr. President, I ask unanimous consent that further proceedings under the quorum call may be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

METROPOLITAN PROBLEMS

Mr. CLARK. Mr. President——

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. CLARK. A short time ago I sent to the desk, for appropriate reference, a bill to provide for the establishment of a Commission on Metropolitan Problems.

Sixty percent of all Americans live in metropolitan areas. That means more than 100 million individuals.

If Census Bureau forecasts are correct, the population of this country, now 175 million, will double within the lifetime of most people now living. There is every reason to believe that the percentage of those living in metropolitan areas will increase. Indeed, it is likely that by the year 2,000 more than 300 million Americans will be living in such areas.

Already our cities and suburbs are expanding into the countryside at a rapid rate. Already they are merging with one another. Already one vast metropolitan area stretches along the Atlantic seaboard, embracing parts of 11 States and the District of Columbia.

Mr. President, 2 years ago the New York Times published an excellent series of articles analyzing the problems created by the explosive growth of metropolitan areas. In that series it listed 24 standard metropolitan areas which in reality constitute a single metropolis reaching from Massachusetts to Virginia and including 27 million people.

I ask unanimous consent, Mr. President, that this list of eastern seaboard metropolitan areas, with their 1950 populations, printed in the New York Times of January 27, 1957, may appear in the RECORD at this point in my remarks.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Lowell-Lawrence-Haverhill, Mass.	340,906
Boston	2,558,581
Fall River-New Bedford, Mass.	278,247
Providence, R.I.	775,985
Worcester, Mass.	332,261
Springfield-Holyoke, Mass.	407,255
Hartford, Conn.	358,081
Waterbury, Conn.	154,656
New Britain-Bristol, Conn.	146,983
New Haven, Conn.	264,622
Bridgeport, Conn.	258,137
Stamford-Norwalk, Conn.	196,023
New York-northeast New Jersey	12,911,994
Trenton, N.J.	229,781
Atlantic City, N.J.	132,399
Allentown-Bethlehem-Easton, Pa.	437,824
Philadelphia, Pa.	3,671,048
Reading, Pa.	255,740
Lancaster, Pa.	234,717
Harrisburg, Pa.	292,241
York, Pa.	202,737
Wilmington, Del.	268,387
Baltimore, Md.	1,337,373
Washington, D.C.	1,464,089
Total	27,510,067

Mr. CLARK. Mr. President, the New York Times article explains that an urban region is defined as an expanse in which two or more standard metropolitan areas overlap or adjoin. A standard metropolitan area consists of a county containing at least one city of 50,000 or more population, or several adjoining counties containing such cities.

As defined by the Census Bureau, it includes also "contiguous counties if, according to certain criteria, they are essentially metropolitan in character and socially and economically integrated with the central city."

An exception was made for New England, where the Census Bureau defines a metropolitan area in terms of towns and cities instead of counties.

Under these terms, the great eastern seaboard region is technically two urban regions, with the Boston-centered cluster of metropolitan areas, from Haverhill to Worcester, a separate urban region. But for all practical purposes, the eastern seaboard's 600-mile strip is regarded as a single region.

The article lists 17 other urban regions, with a total population in 1950 exceeding 32 million. Mr. President, I ask unanimous consent that the list of these regions and their populations be printed in the RECORD at this point.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

The 17 other urban regions, in order of size, are:

Chicago, Kenosha, Racine, Milwaukee	6,551,234
Cleveland, Lorain-Elyria, Akron, Canton, Youngstown, Wheeling-Steubenville, Pittsburgh, Johnstown, Altoona	5,833,593
Los Angeles, San Diego, San Bernardino-Riverside	5,376,407
Detroit, Flint, Saginaw, Bay City	3,529,136
San Francisco-Oakland, Sacramento, Stockton, San Jose	3,009,204
Cincinnati, Hamilton-Middletown, Dayton, Springfield	1,620,599
Seattle, Tacoma	1,008,868
Dallas, Fort Worth	976,052
Houston, Galveston	919,767
Kansas City, St. Joseph	911,183
Wilkes-Barre-Hazleton, Scranton	649,637
Syracuse, Utica-Rome	625,981
Norfolk-Portsmouth, Hampton-Newport News-Warwick	589,427
Greensboro-High Point, Winston-Salem	337,192
Lansing, Jackson	280,866
Raleigh, Durham	238,089
Springfield, Decatur	230,337
Total	32,686,572

Mr. CLARK. Mr. President, the populations of all these urban regions total 60,196,639, according to the 1950 census. The urban regions include 77 of the Nation's 174 standard metropolitan areas.

Since 1950 there has been an extraordinary—indeed, an almost explosive—additional growth in the suburban regions which are a part of these urban and metropolitan areas, and, consequently, during the years since the 1950 census the populations of those urban regions have grown by an additional 10 million.

Already this explosive growth has created social, economic, and political problems which are getting out of hand. As President Eisenhower said in 1957 at Williamsburg, Va., "the needs of our cities are glaringly evident. Unless action is prompt and effective, urban problems will soon almost defy solution."

Those, Mr. President, are words of truth; indeed, if anything, they are conservative. I should like to stress the need for prompt and effective action, as advocated by the President of the United States, before these problems do get so definitely out of hand that their successful solution may become impossible.

Let us consider the major metropolitan problems.

Perhaps the most serious is transportation. The question is, How can people be moved cheaply and quickly into, out of, and around our metropolitan areas? Millions of people must travel daily from their homes to their places of employment and back, and must move around their home areas for dozens of other proper purposes. While mass transit and suburban rail traffic wither on the vine, we are committed to a vast federally sponsored urban highway program, with costs running in at least one instance as high as $17 million a mile. Think of that, Mr. President, $17 million to build 1 mile of a highway on the Federal system through a congested urban area. Meanwhile, automobile and truck traffic congestion clogs our existing urban roads and threatens the slow economic strangulation of our cities.

Mr. President, those of us who live in the Greater Washington metropolitan area and who motor back and forth to work in the Capitol during rush hours are keenly aware of what traffic strangulation can do to our personal convenience and to the business of the Government. We are keenly aware of the fact that Washington has no subway system and that its trolley system is quite inadequate to meet the needs of the community. We are also aware of the fact that the bus system, while a fine one, nevertheless, does not fully meet the needs of the people of this great area in their effort to go about their daily business, and to attend to those social and recreational activities which are a part of daily living.

We are all aware of the wide range of plans for inner loops and outer loops, and the need to provide even more space for the automobiles while the automobiles get bigger and seem sometimes to carry fewer and fewer passengers.

We know the railroads in this area carry very little of the daily suburban traffic load, and bring few people in and out of downtown Washington. We have here, under our noses, in our own Nation's Capital, a good example of the problems of traffic control and transportation and we can observe how inadequate transportation is slowly strangling the life of a great city.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield to my friend from Oregon.

Mr. MORSE. I think the excellent account of the traffic problems of the District of Columbia stated by the Senator from Pennsylvania should include at least one item which I believe the Senator, by oversight, failed to mention.

We cannot get through the Congress the necessary appropriations for the building of a number of bridges across the Potomac River, which bridges are necessary to handle the traffic bottleneck situations. I say this for the purpose of illustration and emphasis.

I suspect if an analysis were made of the loss sustained by the Government of the United States as a result of the delays caused employees in getting to and from work, it would probably be found that we are wasting every year an amount of money sufficient to pay for half the cost of building one of those bridges.

Probably from four to six bridges are needed; yet we get into a big debate in the Senate each year when it is proposed to build only one.

Mr. CLARK. The Senator from Oregon is eminently correct. Of course, he is a distinguished member of the Committee on the District of Columbia of the Senate, and has been for some years, so he has had an opportunity to learn intimately of these problems. What the Senator has to say about the bridges is very well exemplified by the difficulties during the 85th Congress which, the Senator may recall, when we could not agree whether to build a bridge or a tunnel. Long and far into the night the controversy raged. Meanwhile, the people who lived on the other side of the Potomac River and who had to travel to Washington, D.C., to perform their daily work were hard pressed to get across the river. In fact, I would not have been surprised—and I am sure the Senator would agree—to find in the hot weather that some of the people might have started to swim across, on a day or two, simply because they could not get to Washington, D.C., any other way.

Mr. MORSE. The only thing which stopped them was the pollution of the river.

Mr. CLARK. That is another problem. How much chlorine will it be possible to put into the waters of the Potomac River and still have water which is drinkable? That is something I believe we shall have to find out in the reasonably near future.

The Senator will recall that he and I, on at least one occasion during the 85th Congress, made a field trip to study the need for reservoirs for the water supply of the city of Washington, D.C. We were very much concerned as to whether certain land had been reserved, adequate for the long-range reservoir needs of this rapidly growing area. Though, as the Senator knows, the Federal interest is very often neglected in the appropriations the Congress makes for the District, the Federal interest is at least clear in Washington, D.C. If we do not do our job the spotlight is on us.

The Federal interest, as I pointed out in connection with the urban highway program, and as I shall shortly point out with respect to some other metropolitan problems, is equally keen in all the other metropolitan areas; yet, as I expect to develop at greater length—and I believe the Senator will agree with me—often the right hand does not know what the left hand is doing. We have cleared a number of slums for the urban segments of the Interstate Highway System, which has been paid for $9 from Federal funds and $1 from local and State funds, and in doing so have displaced many people without making arrangements to put them anywhere, and there simply is not an adequate amount of safe and decent housing for them.

Mr. President, I turn next to the major metropolitan problem of shelter. Thirteen million housing units which are unsafe or unsanitary are occupied by American families, most of them in metropolitan areas. Slums and blight spread faster than ambitious plans are able to remove them. Commercial and industrial slums are almost as serious as those in residential districts.

Only recently we approved what, in my judgment, is a very good housing bill. It includes massive Federal assistance for our metropolitan areas. So this is clearly another area where the Federal Government is already deeply involved.

I turn now to the subject of water. Water shortages are no longer only a Western problem. "The day the taps run dry" is approaching for the industrial Northeast as well as for the Great Plains and Western States. Stream pollution is not yet under control. Here again, Federal water development and conservation programs are under way on a large scale.

These problems are of intense interest to our metropolitan areas. At the present time the Army Corps of Engineers is completing an intensive 3-year study of the all-purpose use of the waters of the Delaware River, which rises in New York State, forms for many miles the boundary between New Jersey and Pennsylvania, and finally flows into Delaware Bay, with the State of Delaware abutting on its western bank.

All four of these States have a keen interest in the use of Delaware River water. The huge metropolitan area which stretches from Trenton to south of Wilmington, on both sides of the Delaware River, has a particularly keen interest in the proper use of Delaware River water, not only for domestic water supply for our cities and their populations, but also because of the enormous use which is made of water for industrial purposes.

A large part of the Delaware River is a tidal basin. Salt water and tides are involved all the way from the Delaware Bay up to Trenton. This is a matter of grave concern to the industrial and residential users of water alike. So here again we find the Federal Government prepared to build large dams through the Corps of Engineers and small dams through the Department of Agriculture. There is a large Federal interest in the dredging of the channel of the Delaware River to a depth sufficient to enable heavy oceangoing shipping to go up from Delaware Bay all the way to Philadelphia, and, indeed, eventually all the way to Trenton and to the great United States Steel Corp. plant at Morrisville, Pa., across the river from Trenton. We find a great Federal interest in water resources development, which is essential to the continued prosperity of that large metropolitan area.

If we shift to the western part of my State, we find the same interest in the all-purpose development of the Allegheny, Monongahela, and Ohio Rivers, where there is a never-ending threat of flood damage. The Federal Government is already preparing to start construction of the great Kinzua Dam on the Allegheny River, for purposes of flood control and water supply in Pittsburgh and in the many other urban communities on the Allegheny River.

These are but two examples of the great interest of our metropolitan areas in water resource development in general and in making certain that Federal participation in water resources development is coordinated with State and local efforts in the same field.

Another metropolitan problem, which may seem minor to some, is that of air pollution. But in my own State, at Donora, and in Los Angeles in California, people have died from the poisonous effects of smog and air pollution.

We already have a Federal program for research into the causes of air pollution and methods of eliminating it. The distinguished senior Senator from California [Mr. KUCHEL] is pressing a bill, which I have cosponsored, to obtain further Federal participation in the air-pollution field. Here again, the problem of coordinating local, State, and Federal efforts remains unsolved.

Turning to another field, massive problems of health and welfare are straining State and local facilities and finances to the breaking point. Already the Federal Government has spent billions of dollars to assist local efforts in both these fields.

In the field of health I make mention only of the Hill-Burton Hospital Act, under which the Federal participation is substantial, and in which even greater Federal participation is being sought.

In the field of welfare we are all aware of the several categories of public assistance under which the Federal Government picks up the larger part of the tab. Most of these Federal public assistance funds are being expended in metropolitan areas.

I had occasion to introduce in the Senate earlier today a bill which would make Federal payments for assistance available to children who are unable to maintain a normal, healthful diet because the breadwinner in the family is unemployed.

I turn next to the field of education. Our educational system needs drastic expansion. One of the major strains to which it is subjected comes from exploding suburbs and the declining population in core cities which are the heart of metropolitan areas.

As new housing developments are built in what formerly were rural areas, the need arises for schools. If the area has no industry within its boundaries, the taxes necessary to provide the schools are indeed a heavy burden on residential property. On the other hand, if a large industry happens to be located in the area, residential property may bear a relatively low burden for the support of schools. In the meantime, in the core area many people of substance have fled to the suburbs. The vacuum which they leave behind has been filled by minority groups and lower income groups who are not able to afford the levy on their property which is necessary for a continued support of a first-class school system.

Last year the Federal Government embarked on a program of Federal aid to education. All of us are aware of the limitations in the National Defense Education Act. It is my hope that the Federal Government will move further in the field of education at this session of Congress.

In the field of education, also, it seems important that a study of the impact of local, State, and Federal participation be made so that we may have a better understanding of the way in which metropolitan areas should be able to treat this important problem, and the extent to which the contributions toward its cost should be shared by the varying levels of Government.

Mr. YARBOROUGH. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield to my good friend from Texas.

Mr. YARBOROUGH. I should like to commend the able senior Senator from Pennsylvania for the bill he has introduced, and for the fine statement he is making. Inasmuch as he is commenting now on education, I should like to ask him if the proposed study would include a study of the inadequate college facilities which will be available 5 years from now, for example, when it is believed the potential college population may be double the present college population, as the children of veterans of World War II reach college age and the need for greater participation by our people in higher education becomes evident.

Mr. CLARK. I thank the able Senator from Texas for his penetrating question. He serves with distinction as a member of the Committee on Labor and Public Welfare, and has been one of the leaders of that committee in studying our educational problems, and in advocating Federal legislation to help solve those problems.

I do indeed feel that one of the areas for investigation by the commission, which I hope will be established as a result of the proposed legislation, would be the field of higher education, with particular regard to the need for establishing in our metropolitan areas the kind of higher educational institutions which students could attend while living at home and in which they could get just as good an educational opportunity as if they were to go many miles away from home and have the extra expense of board and lodging superimposed on their educational expenses.

Mr. YARBOROUGH. I thank the Senator for his comment. I believe that is a very important element in the growing problem connected with an adequate number of persons attending institutions of higher learning in our country, so as to raise the level of those sufficiently trained to enable us to keep ahead of any other country in the world.

Mr. CLARK. In the housing bill, which was passed by the Senate a month ago, a relatively modest amount was authorized for loans for academic facilities at colleges and universities. I hope that a further study will reveal the extent to which the expense of the needed expansion in university facilities may be distributed among private agencies and individuals, whose charitable impulse impels them to make contributions, and the extent of possible further support by local and State governments, in order to determine what, if anything further, the Federal Government should do in this field.

Mr. YARBOROUGH. I should like to ask the Senator from Pennsylvania if, in the study he is proposing in the forward-looking bill concerning the problems of urban renewal in the metropolitan areas of the United States, provision is made for a study of the problem of older universities, such as New York University and Columbia University, which see the slums creeping up on them? That is

happening in many of the larger cities of America, even in the vicinity of Harvard itself.

Mr. CLARK. The Senator from Texas is quite correct in that regard. I believe this is a matter which the housing bill we passed earlier this year does encompass. The Committee on Banking and Currency received much testimony on this subject earlier this year. A number of educational institutions, in addition to those which the Senator from Texas has mentioned, were referred to. It was stated that urban blight is creeping into the university areas, making it difficult to acquire land for needed scientific laboratories, libraries, and academic facilities. The University of Chicago was particularly mentioned. It may well be that there are similar situations in the Senator's own State of Texas.

Mr. YARBOROUGH. I commend the distinguished Senator from Pennsylvania again for his leadership in the effort to establish a commisison to study the major problem of the changing nature of our population.

Mr. CLARK. I thank the Senator from Texas for his most helpful assistance in this regard.

Mr. President, in the same series of articles in the New York Times, to which I had occasion to refer earlier, there was printed a table showing examples of growth in school costs in the suburbs of several metropolitan centers. The table shows the increases from 1945 to 1955 in population, school enrollment, and school tax rates, and the percentage of increase in typical suburban areas throughout the Nation. I ask unanimous consent that the table be printed in the RECORD, at this point in my remarks.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Examples of growth in school costs

	Population		Enrollment		School tax rates (per $100)		Percent increase
	1945	1955	1945	1955	1945	1955–56	
New York suburbs:							
Carle Place, Long Island	1,220	10,400	174	2,600	$1.10	$4.16	278.2
Great Neck, Long Island	25,000	48,000	3,429	9,313	1.14	4.04	255.4
Rockville Center, Long Island	16,000	22,000	2,600	4,000	1.09	3.88	256.0
Levittown, Long Island	721	55,572	40	14,943	.73	4.24	480.8
White Plains	42,000	53,000	6,240	7,939	1.45	1.96	35.2
Tenafly, N.J.	8,000	13,000	1,789	2,820	1.86	4.56	145.2
Westport, Conn.	8,670	16,776	1,500	3,731	1.80	2.50	38.9
Boston suburbs:							
Newton	77,257	86,535	11,194	14,679	.91	1.73	90.1
Dedham	16,659	21,450	2,626	3,540	1.31	2.02	54.2
Cleveland suburbs:							
Parma Heights	[1] 1,330	22,000	3,153	10,078	.93	1.79	92.5

[1] 1940 figures; 1945 not available.
[2] Decrease indicated is not actual tax reduction. All assessments were raised 100 percent 4 years ago. Thus, present tax of $2.19 is actually $4.38 in terms of 1945 tax base, a 68-percent increase.

Mr. HART. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield.

Mr. HART. I think one safe prediction, in the always dangerous business of predicting, is that no area will be more compelling in its demands for sound answers in the years immediately ahead than the area to which the senior Senator from Pennsylvania is now addressing himself. I am sure I voice the sentiments of all Senators in commending him for the leadership he seeks to give us.

I was struck by the table to which he referred. Traditionally, we think the urban population problem, with all its tragic consequences, affects the older sectors of our Nation. I hope the readers of the RECORD will be impressed by the fact that America is a mature Nation, east and west, north and south, and that this is a universal problem.

I am struck, too, by the modesty of the senior Senator from Pennsylvania. I spent the first 22 years of my life just outside Philadelphia. I spent the past weekend in Philadelphia. I make this point for two reasons: First, to pay a very deserved tribute to the leadership of the senior Senator from Pennsylvania because of his drive to renew the city of Philadelphia itself during the period when he was the distinguished mayor of that city. I saw evidences of it on all sides on Saturday afternoon, when I was riding along Schuylkill River Drive. I think his is a voice which can be relied upon to respond to one of the very first objections we may expect to hear about the proposal; namely, that it is an undue intrusion upon the responsibility and jurisdiction of local governmental units.

Here we have a proposal advanced by a man who served with very great distinction as the mayor of—is it still the third largest city in the Nation?

Mr. CLARK. I regret to say it is now the fourth largest city. But, after all, quality is more important than quantity, as the Senator from Michigan knows. I suspect it may even be that the great metropolis in the State which the distinguished junior Senator from Michigan so ably represents, in part, may catch up to us in the not too distant future. I would not want to say then that quality was more important than quantity, because I think we are both deep in quality.

Mr. HART. Without making any qualitative analysis, I know we will not overtake Philadelphia in population if highway construction requires $17 million a mile, because the principal crop of Michigan uses the highways.

Last Friday, I received a letter from the supervisor of the county of Wayne, which contains the city of Detroit. He himself has been the principal leader in Michigan in the effort to coordinate several areas of local government most directly affected by the concentration of urban population. I should like to read one paragraph from the letter I received from Ed Connor, councilman of the city of Detroit, who is chairman of the intercounty committee, which comprises seven counties, six of which are in Michigan. The paragraph reads:

> Incidentally, I was very much impressed with Senator CLARK's speech before the National Municipal Association, and I think the idea of the joint conference on urban problems is an extremely good one. Anything else I can do to help, let me know.

Here, again, is a spokesman who realizes that Federal interest in the urban problem is not an indication of distress or an effort to overreach any local unit of government, but rather a recognition or an acknowledgment on the part of communities that the various units of government, Federal, State, and local, have a common responsibility which can be met only by a common undertaking. The problem is simply too big for us in Michigan. I think I am pleading guilty to nothing which anybody else will be able to deny.

Mr. CLARK. I thank the Senator from Michigan for his very kind words. I regret that he did not choose to stay in Philadelphia for the rest of his career. If he had, perhaps he would be in my shoes instead of in those of the distinguished former Senator from Michigan whom he replaced in the last election. So perhaps it is my good fortune that he did not stay in Pennsylvania. But there is no new Member of the Senate who is more keenly aware of the problem of the metropolitan areas than the distinguished junior Senator from Michigan, and I want him to know how very deeply I appreciate his support in this matter.

The Senator had occasion to refer to a talk which I had the good fortune to make in Boston, in December, before the American Municipal Association on some problems which confront our cities, particularly in connection with their relations with the Federal Government.

I point out that a study such as the one I am proposing is advocated by the American Municipal Association, which includes among its members representatives of practically all the large and small urban communities of the United States.

Mr. President, another growing metropolitan problem is that of open land for

State and regional parks and recreational areas. Land is being gobbled up for residential and commercial development on the outskirts of all metropolitan areas. Unfortunately, adequate prior planning has not been done, and the cost of the land is now so high that it is difficult for the States and local governmental units to acquire it for the needed recreational facilities of their communities. As the metropolis expands, the cost of land increases, so it is more and more difficult to provide the means for escape which the urban populations need for relaxation and relief from the tensions of urban life.

In metropolitan areas the Federal Government is also involved in the problem of crime and juvenile delinquency. A high crime rate and increasing juvenile delinquency are unhappy characteristics of many metropolitan areas. A substantial part of the effort of the Federal Bureau of Investigation is already devoted to assisting local and State police forces to deal with these problems.

I can recall, when I was the mayor of Philadelphia, the enormous assistance which the FBI gave our local police force in successful raids which rounded up the principal vendors of narcotics in Philadelphia. That was, to some extent, an interstate matter, because criminal gangsters in control of the narcotics trade were bringing narcotics from New York by smuggling them on boats which were landing at Philadelphia. I know that our local police force would not have been able to cope with the problem if it had not been for the high degree of cooperation it received from the FBI.

The distinguished senior Senator from Tennessee [Mr. KEFAUVER] has for several years been actively identified with investigation of the causes of juvenile delinquency. There is already on the statute books legislation which provides for Federal assistance in research in the fields of crime and juvenile delinquency. This problem is getting worse, instead of better. The commission I am proposing would be most useful in making a study in depth of Federal-local relations and responsibilities in regard to juvenile delinquency.

Mr. JOHNSON of Texas. Mr. President, will the Senator from Pennsylvania yield to me?

The PRESIDING OFFICER (Mr. HARTKE in the chair). Does the Senator from Pennsylvania yield to the Senator from Texas?

Mr. CLARK. I am very happy to yield to the distinguished majority leader, whose advice I have sought in connection with this proposed legislation, and whose support is very welcome.

Mr. JOHNSON of Texas. Mr. President, I wish to commend the Senator from Pennsylvania for the great interest he has exhibited in this extremely important field. As he is aware, I have, from the public rostrum, on occasion, in speaking to various groups of officials, urged that the Congress take a step similar to the one suggested by the very able Senator from Pennsylvania. His leadership in this field and his dedication to this cause have been an inspiration to me. I am hopeful that the efforts he has expended in attempting to set up a just, fair, and effective vehicle for finding the solution to this most troublesome problem will be effective.

I congratulate the Senator from Pennsylvania. I commend him on the efforts he has made. I assure him of my support. Anything that one Senator can do to bring about early action on the bill the Senator from Pennsylvania has submitted will be done by the senior Senator from Texas.

Mr. CLARK. Mr. President, I wish to thank the distinguished majority leader for his kind remarks and for his most welcome support. I know he has long had a keen interest in this field. While I was considering drafting this bill last fall, I had an opportunity to read a speech the Senator from Texas had made in his home State, in which he pointed out the desirability of doing just what this bill calls for. I derived that encouragement from his remarks then, and I repeat that I am most grateful to him for his assistance now.

Mr. HARTKE. Mr. President, will the Senator from Pennsylvania yield to me?

The PRESIDING OFFICER (Mr. HART in the chair). Does the Senator from Pennsylvania yield to the Senator from Indiana.

Mr. CLARK. I am happy to yield to my good friend, the junior Senator from Indiana, who, himself, was a distinguished mayor before he came to this body, and who has, I think, as wide and and as deep a command of metropolitan area problems as does any other Member of the Senate.

Mr. HARTKE. I thank the Senator from Pennsylvania.

Mr. President, I wish to say to the distinguished Senator from Pennsylvania that I have long looked upon him as my ideal of the man who represents what I believe is necessary if the cities of the Nation are to be restored to their full stature.

I am fearful, as he is, that we have not paid enough attention, soon enough, to this problem.

I know that his inspirational leadership of the city of Philadelphia and the great interest he was able to inspire in organizations such as the American Municipal Association League for Municipal Development will result, for a large number of our people, in a rebirth of the type of living they should have.

I hope the distinguished Senator from Pennsylvania will continue with his zeal and with this type of thinking. Not only does he have my support; but I certainly shall be more than happy to do all within my power, and to devote as much time as I possibly can, to assist in any activity of any kind in this most important field, in which he is providing such outstanding leadership.

Mr. CLARK. I thank the Senator from Indiana. I assure him that if the bill is to become law, we certainly shall depend upon his efforts and his deep thinking in this area.

Mr. President, transcending all of these specific problem areas, in which the Federal Government is already committed, is the need for metropolitan-area planning to assure sound and orderly growth and development of the many public services which citizens of metropolitan areas require from government.

In short, the Federal Government is already massively involved in metropolitan problems. But State and city officials constantly complain that the impact of various Federal programs on local planning is haphazard and uncoordinated.

Mr. President, probably there is no one in the general field of State and local government who is more learned regarding this entire area than is Luther Gulick. He recently declared that—

> The Federal Government must do a better job of interrelating its activities so that they are rationally coordinated at the grass roots, which in this case is "on the sidewalks.
>
> God help us if the Federal Government goes on building highways with one hand, dredging harbors with another, regulating commerce with another, erecting hospitals and schools with another, supporting urban renewal with another, locating factories with tax writeoffs and defense contracts with another, developing civil defense with another, and dabbling negatively in water resources and water pollution with another.
>
> Viewed from the metropolitan areas, Uncle Sam begins to look like the Buddhist idol Kuan Yin, with a thousand arms. But in our case the arms do not seem to connect with the same backbone or with a single brain.

Mr. President, complicating and handicapping every effort of the States and cities to cope with metropolitan problems are the twin obstacles of archaic government organization and inadequate public finance.

Many studies—of which the report of the Kestnbaum Commission on Intergovernmental Relations is the most recent, and perhaps the most important—have detailed the weaknesses of State and local governments in grappling with even their present range of metropolitan-area problems. Obsolete State constitutional provisions, underrepresentation of urban areas in State legislatures, outmoded administrative structures, regressive and relatively unproductive forms of taxation available to States and cities—all of these are pointed out in the report of the Kestnbaum Commission; but the States are either unable or unwilling to undertake the necessary basic reforms; and the hands of the cities and suburban areas are tied, through lack of both financial resources and governmental powers.

In some areas, perceptible progress has been made, as in Atlanta, Ga., and Dade County, Fla.; but there has been no systematic study on a nationwide basis of how to deal with metropolitan area governmental problems within our American structure which distributes power between local, State, and Federal governmental units.

There are many who resist the expansion of Federal activity which has already taken place. Yet I suggest the clock will not be turned back on these matters. The problems cry for solution. A sound solution will require a cooperative effort of government at all levels—local, State, and Federal.

I suggest to my colleagues that the time has come to think through the Federal role in dealing with metropolitan-

area problems. It may be that ways and means can be found to give State and local governments the financial powers they need in order to deal with these critical areas of public service. It may be that a fourth layer of government is needed in some places for their solution. If either of these suggestions is feasible, then perhaps the Federal Government could withdraw from many of the activities in which it is now engaged. But if a careful study should show that Federal activities must be expanded if these problems are to be solved, then let them be expanded on a national and coordinated basis.

The bill I have introduced would create a commission to examine this entire problem and to report to the Congress and the President by February 1, 1961. This Commission, like the two Hoover Commissions and the Kestnbaum Commission, would include Members of both branches of Congress and individuals appointed by the President. Its members would represent Federal, State and local government.

The Commission would consist of 18 members: 6 from each House of Congress—4 from the majority party and 2 from the minority; and 6 Presidential appointees, of whom 2 would be officials of the executive branch; 2 would be Governors—1 from each party; and 2 would be mayors—1 from each party. The chairman and vice chairman would be elected by the Commission from among its congressional members. In preparing the bill, I have worked closely with the distinguished majority leader, who put forward a proposal for such a commission last November.

It is my hope that the Commission proposed in the bill will help us chart our course in dealing, for the foreseeable future, with social, economic, and governmental problems unlike any ever before experienced on earth—problems which, in truth, affect the survival of Western civilization, for today our civilization is largely centered in our metropolitan areas.

Mr. President, if we do not plan intelligently to meet these problems right now, they may well overwhelm us tomorrow.

ADJOURNMENT TO WEDNESDAY

Mr. MORTON. Mr. President, I move that the Senate adjourn until noon on Wednesday next.

The motion was agreed to; and (at 3 o'clock and 12 minutes p.m.) the Senate adjourned until Wednesday, March 18, 1959, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 16, 1959:

IN THE U.S. COAST GUARD

The following-named persons to be chief warrant officers, W–2, in the U.S. Coast Guard:

Frederick W. Rix	Joseph E. Franken
Joseph C. Chighizola	George M. P. Young
Loyd R. Smith	James W. Johns
Arthur E. Vincent	Isadore L. Souza
Howell M. Joynes, Jr.	Carl L. Smith
Lester H. Green	Bernhart A. Wicks
Frank N. Campagna	John T. Renfroe
Earl W. C. Harris	John H. Bettis, Jr.
William R. Hendricks, Jr.	Albert V. Carver
	Mack E. McGuffin
Leonard E. Tarvers	Hubert F. Midgett
Samuel N. Low	Hull O. L. Tanner
Max Trepeta	John E. Simpson
Sherwood N. Patrick	Oscar A. Erickson
Albert N. Dill	Claude A. Broadus
Kenneth N. Black	Robert L. Walters
James L. Cropper	Edward T. Lowe
Newton P. Caddell, Jr.	Ernest N. Yaroch
Wayne R. Glenny	Duane A. Force
Lee D. Wooden	Ernest G. Crispi
Louis L. Bayers	Stephen T. Watson
John H. Bunting	John W. Schiffbauer
John H. Westbury	Lawrence A. Taylor
John G. Schwelm	Russell R. Hickman
Harold R. Dycus	Arnold S. Knudsen
Eugene B. Cox	Joseph C. Gimbl
Charles W. Wicks	Wilton A. Hockenberry
Joseph J. Zagiba	Dallas W. Palmer

HOUSE OF REPRESENTATIVES

MONDAY, MARCH 16, 1959

The House met at 12 o'clock noon.

Rev. Paul J. Harrell, pastor, Memorial Baptist Church, of Arlington, Va., offered the following prayer:

O God, Thou art my God, I seek Thee, my soul thirsts for Thee. I have looked upon Thee in the sanctuary, beholding Thy power and glory. Because Thy steadfast love is better than life, my lips will praise Thee. I will lift up my hands and call on Thy name (Psalm 63: 1–4).

Almighty and eternal God, we call upon Thee even now, in a spirit of praise and humility and thanksgiving and with a keen and conscious sense of need.

We have, on yesterday, looked upon Thee in the sanctuary, beholding Thy power and glory. We knew Thee to be near and to be real. Let that be no passing salute only, but rather let Thy presence continue with us in all the business of this day.

Especially, our God, we pray Thee to be present here with the Members and officers of this body as they take up the duties of the day. Give them a due sense of responsibility. Enable them to see their responsibility to those who elected them, but enlarge that responsibility to include a Nation and even a world and remind them that our final responsibility is to Thee, the Supreme Ruler and Ultimate Judge of all.

And Thou, O Christ, who hast commanded us to work while it is yet day, enable the Members of this body to make the best use of their time, despite all the difficulties of these days, that all vital matters may be cared for with due consideration and saved from becoming the victims of rush and exhaustion.

Save us, our Father, from vagueness in our faith, commitments, and loyalties and enable us firmly to grasp what we know to be the will of God.

Enlighten our minds, O God, stimulate our spirits and keep Thy love in our hearts.

Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of Friday, March 13, 1959, was read and approved.

FRANCE DESERVES BETTER

Mr. CELLER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CELLER. Mr. Speaker, it is difficult to understand the opposition of the Joint Congressional Committee on Atomic Energy to the proposal that the United States make available to France an atomic powerplant for a French atomic submarine. Our Secretary of State Dulles pledged just such aid to our stanch NATO ally. That pledge should be kept.

We are building a plant for another NATO ally, Great Britain. France has taken umbrage, and properly so. We should not treat her differently than Great Britain. That is hardly the way to create a united front against Russia, especially during the Berlin crisis. It is a most shortsighted policy.

France will get the atomic submarine. She has the ingenuity and expertise to build her own. Only valuable time and funds will be unnecessarily lost. French scientists like the Curies and the Joliot-Curies gave the world basic discoveries that made nuclear energy possible.

General De Gaulle is affronted and in all likelihood will hold his Mediterranean naval forces under this own control and will refuse Western Combined Command. This is regrettable, but understandable.

What else can we expect?

We get a rebuff in return for humiliation.

If the shoe were on the other foot and France treated us that way, we would bridle too.

SUBCOMMITTEE ON IRRIGATION AND RECLAMATION

Mr. ROGERS of Texas. Mr. Speaker, I ask unanimous consent that the Subcommittee on Irrigation and Reclamation of the Committee on Interior and Insular Affairs may be permitted to sit during general debate this afternoon.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

MR. BENSON'S MESS

Mr. JONES of Missouri. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. JONES of Missouri. Mr. Speaker, whenever I criticize the Secretary of Agriculture, it is understandable that I might be charged with prejudice. Whatever I might say in opposition to the views of the Secretary might be interpreted as being biased or based upon politics. Now while I have not hesitated to call attention to what I think are

mistakes of Secretary Benson, and expect to continue to do so, I would not deny that I do have some prejudices—justified, I believe.

That is why, Mr. Speaker, it was so refreshing to read in the "Letters to the Editor" in last Saturday's Washington Post, a reply by Joseph Alsop, which was identified with an appropriate heading "Mr. Benson's Mess." Now, I do not know Mr. Alsop, personally, but through his writings I think he is known to a rather large portion of the newspaper-reading public, both as an accurate reporter and as a competent news analyst. I regret that the letter he wrote as an answer to Secretary Benson's did not appear in his syndicated column rather than in the "Letters to the Editor" column in the local newspaper.

Mr. Alsop has made several statements of fact that should be read by all Americans, particularly those who have been misled into believing that the Secretary of Agriculture is performing a valuable service to the people of this Nation.

Mr. Alsop states in his letter that, "I myself was a strong supporter of Secretary Benson when he took office." Now, apparently, Mr. Alsop is willing to accept his part of the responsibility for the Benson myth which has done irreparable damage to American agriculture, for he also states in his letter, "I am only ashamed that it took me so long to notice that Benson's long suit was pious talk rather than positive performance."

I think we should accept Mr. Alsop's frank confession, and extend him an invitation to join with those of us who are trying to give the truth to the American public.

Mr. Alsop has made a great start when he writes that the agricultural mess that he—Benson—found was much less bad than the agricultural mess he has made. The fact cannot be denied, so it had better be faced.

COMMISSION FOR A BETTER PAY SYSTEM IN THE FEDERAL GOVERNMENT

Mr. REES of Kansas. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. REES of Kansas. Mr. Speaker, I have today introduced a bill to create a temporary commission to develop a better pay system for the entire Federal Government.

My bill establishes an action commission. The Commission is directed to review, in depth, the entire range of salaries in the executive, legislative, and judicial branches of the Government and submit firm recommendations for a coordinated, Government-wide salary policy.

I would like to point out that the present uncoordinated, polyglot variety of Federal pay practices is inefficient and wasteful from the standpoint of the taxpayers as well as unfair to many Federal employees.

Our committee studies in cooperation with the administration have disclosed that the $13 billion annual Federal civilian payroll is paid out under 77 widely varied statutory or administrative plans; that no attempt has been made for 40 years to modernize the overall pay structure, although employment has increased from 390,000 to 2,300,000; that no proper relationship exists between pay rates in the three branches of the Government—or, in fact, within any one branch; that there is no reliable means to compare Government salary rates with those in private industry as a guide to proper Federal pay rates; and that existing pay practices are unjust to many employees as well as inefficient and uneconomical for the Government. For example, supervisors in many cases are paid less than personnel they supervise.

Nearly 1 million professional, management, administrative, and clerical employees are classified and paid under this act. The new bill provides the basis for classifying and paying these and all other Federal employees in proper relationship.

I want to stress the need for prompt and decisive action on my bill to control rising payroll costs, maintain maximum efficiency in our vital defense effort, and enable the Government to recruit and retain the best qualified employees to carry out all essential Government programs.

PERSONAL ANNOUNCEMENT

Mr. ALGER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. ALGER. Mr. Speaker, it is my intention in a special order tomorrow to discuss the urban renewal problem with or without Federal funds. I have some rather strong views on this subject, having been a student of it for some time. I take this time merely to announce to my colleagues, to those who are interested in urban renewal, that I shall make this speech and invite them to participate in the discussion following my remarks, if they wish.

THE AMERICAN'S CREED AND WILLIAM TYLER PAGE

Mr. ARENDS. Mr. Speaker, on behalf of the gentlewoman from Ohio [Mrs. BOLTON], I ask unanimous consent that she may revise and extend her remarks with respect to "The American's Creed and William Tyler Page," a new book by Myrtle Cheney Murdock.

Because each of us in the House has received a gift copy of this volume, the gentlewoman from Ohio [Mrs. BOLTON] also asks unanimous consent that all Members who desire to do so may have 5 legislative days in which to extend their remarks on this subject.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

COMMITTEE ON BANKING AND CURRENCY

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the Committee on Banking and Currency may sit during general debate this week.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

COMMITTEE ON THE JUDICIARY

Mr. McCORMACK. Mr. Speaker, although I have not had an opportunity to consult the minority leader on this matter, at the request of the gentleman from New York [Mr. CELLER] I ask unanimous consent that the Committee on the Judiciary may sit during general debate this week.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

THE LATE RIGHT REVEREND (MSGR.) RICHARD J. HABERLIN

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, on March 10, 1959, the Right Reverend (Msgr.) Richard J. Haberlin died. Monsignor Haberlin was a close and valued friend of mine whom I admired intensely. For years he was one of the outstanding priests of the archdiocese of Boston. He was not only a great priest, but a great American.

Monsignor Haberlin was loved by all persons: Catholic, Protestant, and Jew. Without regard to their race, color, or creed, he was the friend of the poor, the sick, the underprivileged. The life of Monsignor Haberlin as a priest, from the time he was ordained in Rome, where he prepared for his ordination at the North American College, until his death, was one of outstanding spiritual leadership, of great understanding, and of love of God, and of love of neighbor. His life was an active one, during which he held many positions of church responsibility.

Monsignor Haberlin was ordained to the holy priesthood in 1911. He was appointed by the Holy Father as a domestic prelate in 1922. He later had the additional honor conferred upon him of being named a protonotary apostolic, as well as knight commander of the Order of the Holy Sepulcher.

During his priestly career, which was one of great activity, Monsignor Haberlin was vice chancellor of the archdiocese of Boston; secretary to the late William Cardinal O'Connell; and chancellor and vicar general of the archdiocese of Boston; and pastor of St. Peter's Church in Dorchester for 32 years. In addition to his priestly duties, Monsignor Haberlin gave untiringly of his time to the success of civic and patriotic and charitable activities.

A courageous fighter for justice, Monsignor Haberlin vigorously fought bigotry and injustice in any form wherever their ugly heads appeared.

The sick, the afflicted, the poor have lost a real friend in Monsignor Haberlin. Mrs. McCormack and I have lost a close and valued friend.

CONSENT CALENDAR

The SPEAKER. This is Consent Calendar Day. The Clerk will call the first bill on the Consent Calendar.

MOUNT VERNON MEMORIAL HIGHWAY

The Clerk called the bill (H.R. 2228) to provide for the acquisition of additional land along the Mount Vernon Memorial Highway in exchange for certain dredging privileges, and for other purposes.

Mr. SAYLOR. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore (Mr. ALBERT). Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

PEACETIME LIMITATION ON NUMBER OF LIEUTENANT GENERALS IN THE MARINE CORPS

The Clerk called the bill (H.R. 3323) to establish a peacetime limitation on the number of lieutenant generals in the Marine Corps.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5232(b) of title 10, United States Code, is amended by striking out the word "two" and inserting in place thereof the word "five."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SUBSISTENCE ALLOWANCE FOR FEDERAL JUDGES

The Clerk called the bill (H.R. 2909) relating to the maintenance and travel expenses of judges.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first paragraph of section 456 of title 28, United States Code, is amended to read as follows:

"Each Justice or judge of the United States and each retired Justice or judge recalled or designated and assigned to active duty, while attending court or transacting official business at a place other than his official station, shall be paid by the Director of the Administrative Office of the United States Courts all necessary traveling expenses, and also a per diem allowance in lieu of actual expenses of subsistence (as defined in the Travel Expense Act of 1949, as amended, 63 Stat. 166; 5 U.S.C. 835) at the rate of $12 per day or, in accordance with regulations prescribed by the Director of the Administrative Office of the United State Courts with the approval of the Judicial Conference of the United States, reimbursement for his actual expenses of subsistence not in excess of $25 per day."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDMENT OF TITLE 10, UNITED STATES CODE, ELIMINATING CERTAIN REPORTS

The Clerk called the bill (H.R. 3290) to amend title 10, United States Code, to eliminate the requirement that each chaplain make an annual report to the Secretary of the Navy.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (d) of section 6031 of title 10, United States Code, is hereby repealed.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CHANGING DESIGNATION OF CERTAIN MEDALS

The Clerk called the bill (H.R. 3291) to amend title 10, United States Code, with respect to certain medals.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 857 of title 10, United States Code, is amended as follows:

(1) Section 8742 is amended—

(a) by amending the catchline to read as follows:

"§ 8742. Air Force cross: award"; and

(b) by striking out the words "a distinguished-service cross" and inserting the words "an Air Force cross" in place thereof.

(2) Section 8744 is amended—

(a) by amending the catchline to read as follows:

"§ 8744. Medal of honor; Air Force cross; distinguished-service medal: limitations on award"; and

(b) by striking out the words "distinguished-service cross," wherever they appear therein and inserting the words "Air Force cross," in place thereof.

(3) Section 8745 is amended—

(a) by amending the catchline to read as follows:

"§ 8745. Medal of honor; Air Force cross; distinguished-service medal: delegation of power to award"; and

(b) by striking out the words "distintinguished-service cross," and inserting the words "Air Force cross," in place thereof.

(4) Section 8747 is amended—

(a) by amending the catchline to read as follows:

"§ 8747. Medal of honor; Air Force cross; distinguished-service cross; distinguished-service medal; silver star: replacement"; and

(b) by inserting the words "Air Force cross," after the words "medal of honor,".

(5) The catchline of section 8748 is amended to read as follows:

"§ 8748. Medal of honor; Air Force cross; distinguished-service cross; distinguished-service medal; silver star: availability of appropriations".

(6) Section 8750 is amended—

(a) by amending the catchline to read as follows:

"§ 8750. Airman's Medal: award; limitations"; and

(b) by striking out the words "Soldier's Medal" wherever they appear therein and inserting the words "Airman's Medal" in place thereof.

(7) The analysis is amended by striking out the following items:

"8742. Distinguished-service cross: award.
"8744. Medal of honor; distinguished-service cross; distinguished-service medal: limitations on award.
"8745. Medal of honor; distinguished-service cross; distinguished-service medal: delegation of power to award.
"8747. Medal of honor; distinguished-service cross; distinguished-service medal; silver star: replacement.
"8748. Medal of honor; distinguished-service cross; distinguished-service medal; silver star: availability of appropropriations.
"8750. Soldier's Medal: award; limitations."

and inserting the following items in place thereof:

"8742. Air Force cross: award.
"8744. Medal of honor; Air Force cross; distinguished-service medal: limitations on award.
"8745. Medal of honor; Air Force cross; distinguished-service medal: delegation of power to award.
"8747. Medal of honor; Air Force cross; distinguished-service cross; distinguished-service medal; silver star: replacement.
"8748. Medal of honor; Air Force cross; distinguished-service cross; distinguished-service medal; silver star: availability of appropriations.
"8750. Airman's Medal: award; limitations."

SEC. 2. For the purposes of sections 8744 (a) and 8750(b) of title 10, United States Code, a person who was awarded a distinguished-service cross or Soldier's Medal before the date of enactment of this Act shall be treated as if he had not been awarded an Air Force cross or Airman's Medal, as the case may be.

SEC. 3. References that other laws, regulations, and orders make, with respect to the Air Force, to the distinguished-service cross and the Soldier's Medal shall be considered to be made to the Air Force cross and the Airman's Medal, respectively.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FURNISHING SUPPLIES AND SERVICES TO FOREIGN VESSELS

The Clerk called the bill (H.R. 3292) to amend title 10, United States Code, to authorize the Secretary of the Navy to furnish supplies and services to foreign vessels and aircraft, and for other purposes.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. GROSS. Reserving the right to object, Mr. Speaker, I should like to ask someone why we have required cash

payments in the past for the services we have provided foreign ships?

Mr. KILDAY. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield.

Mr. KILDAY. This bill was not reported out of my subcommittee. The gentleman from North Carolina [Mr. DURHAM] would be informed about it, but I do not see him at the moment. He will probably be here in a minute.

Mr. PRICE. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield.

Mr. PRICE. I am familiar with this bill. I was present at the time the hearings were held on it. This is a bookkeeping matter which expedites services to these vessels.

Mr. GROSS. The point is why have we required cash in advance in the past? We now are going to perform these services not only for naval vessels but foreign airplanes will be serviced.

Mr. PRICE. The requirement of cash to be paid in advance has caused many inconveniences and held up repairs on ships and has delayed the performance of many important missions.

Mr. GROSS. These are foreign ships that we are talking about; are they not?

Mr. PRICE. Yes. This is a matter of reciprocity.

Mr. GROSS. Why in the past have we required cash to be paid in advance?

Mr. PRICE. Because there was no provision in the law before which permitted us to operate on this reciprocal basis. This is for our convenience more than anyone else.

Mr. GROSS. Let me put the question in another way. Has there been any question that we would not be reimbursed for services performed on naval vessels of foreign countries?

Mr. PRICE. There has been no question as to reimbursement at all.

Mr. GROSS. The provision for servicing and supplying foreign airplanes as well as naval vessels could run into quite an item of cost?

Mr. PRICE. Yes. There is the same problem there. This matter of reimbursement permits these matters to be handled expeditiously so as to prevent any delays in operation, and further, this is being sought by us and not by anyone else.

Mr. GROSS. I merely want to point out to the gentleman that my interest is on the question as to whether we are going to get paid for our services on these foreign naval vessels and airplanes.

Mr. PRICE. We definitely are going to get paid.

Mr. GROSS. With that assurance, Mr. Speaker, I have no objection to the bill. I just wanted to be sure that this is not going to be an addition to and more of the great foreign giveaway business.

Mr. PRICE. No; it is not.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 7227 of title 10, United States Code, is amended to read as follows:

"§ 7227. Foreign naval vessels and aircraft: supplies and services

"(a) The Secretary of the Navy, under such regulations as he prescribes, may authorize any United States naval vessel or activity to furnish any of the following supplies or services, when in the best interests of the United States, on a reimbursable basis without an advance of funds if similar supplies and services are furnished on a like basis to naval vessels and military aircraft of the United States by the friendly foreign country concerned:

"(1) routine port services in territorial waters of the United States or in waters under United States control, including pilotage, tugs, garbage removal, linehandling, and utilities, to naval vessels of friendly foreign countries;

"(2) routine airport services, including landing and takeoff assistance, use of runways, parking and servicing to military aircraft of friendly foreign countries;

"(3) miscellaneous supplies, including fuel, provisions, spare parts, and general stores, but not including ammunition, to naval vessels and military aircraft of friendly foreign countries; and

"(4) overhauls, repairs, and alterations together with necessary equipment and its installation required in connection therewith, to naval vessels and military aircraft of friendly foreign countries.

"(b) Routine port and airport services may be furnished under this section at no cost to the foreign country concerned where such services are provided by United States naval personnel and equipment without direct cost to the Navy.

"(c) Payments for supplies and services furnished under this section may be credited to current appropriations so as to be available for the same purpose as the appropriation initially charged."

SEC. 2. The analysis of chapter 631 of title 10, United States Code, is amended by striking out the following item:

"7227. Foreign naval vessels: supplies and services."

and inserting the following item in place thereof:

"7227. Foreign naval vessels and aircraft: supplies and services."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

OREGON AND CALIFORNIA RAILROAD GRANT LANDS

The Clerk called the bill (H.R. 3495) to direct the Secretary of the Interior to administer certain acquired lands as revested Oregon and California railroad grant lands.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior shall hereafter administer the east half, section 24, township 21 south, range 8 west, Willamette Meridian, in the State of Oregon, as revested Oregon and California railroad grant lands under the Act of August 28, 1937 (50 Stat. 874), as amended (43 U.S.C. 1181a–1181j), and all other laws which are or may become applicable to such lands.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REVISING BOUNDARIES OF KINGS MOUNTAIN NATIONAL MILITARY PARK, S.C.

The Clerk called the bill (H.R. 3496) to revise the boundaries of the Kings Mountain National Military Park, S.C., and to authorize the procurement and exchange of lands, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. HEMPHILL. Mr. Speaker, reserving the right to object, I do so only for the purpose of commending and thanking the gentlewoman from Idaho [Mrs. PFOST] for handling this matter expeditiously.

In behalf of the people of the Fifth Congressional District of South Carolina, I want to thank the gracious and hard working chairman of this subcommittee for her early application and hearings on the legislation "To revise the boundaries of the Kings Mountain National Park, S.C., and to authorize the procurement and exchange of lands, and for other purposes." If I might be personal, I might say that the bill was in good hands, as we recognize the able chairman of the subcommittee to be one of the most diligent, conscientious, and most hard working Members of Congress. I served with her on another committee, and her work has always been outstanding.

I would like to thank the Department of the Interior, and especially Mr. Harrison, who testified, for their handling of this matter. The bill is a good bill, and will improve the area facilities of the park considerably. The part which is to be cut off proposed difficulties in management and supervision, and will not be advantageous in present or future plans.

The parts which will be brought into the park, the 140 acres, will be a protection to the present park area and its immediate environment.

The Battle of Kings Mountain was fought on October 5 or 6, 1780, and the revolutionary troops defeated Patrick Ferguson, an able soldier, and an equal or larger force of British antagonist. That battleground is a hallowed shrine today, and marks the turning point of the Revolutionary War in the South.

This wonderful park is in my district and I am proud of it.

I urge the passage of this legislation and welcome the further productivity of our very fine Park Service.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to consolidate the Federal ownership of lands in, and to facilitate protection and preservation of, Kings Mountain National Military Park, South Carolina, the boundaries are hereby revised as follows:

(1) Federally owned lands lying west of the easterly right-of-way line of State Route

P–11–123, containing approximately two hundred acres, are excluded from the park;

(2) Privately owned lands lying east of the easterly right-of-way line of State Route P–11–123, containing approximately eighty acres, are included in the park; and

(3) Lands of the Mary Morris estate lying south of the southerly right-of-way line of the historic Yorkville-Shelbyville Road, and forming the triangle bounded by the new State Route P–11–86, the historic Yorkville-Shelbyville Road and the present park boundary (Old Houser tract), aggregating approximately sixty acres, are included in the park.

SEC. 2. The Secretary of the Interior is authorized to acquire lands and interests in lands within the revised boundary by purchase, donation, with donated funds, or by exchange, utilizing for such exchanges federally owned lands of approximately equal value excluded from the park pursuant to this Act. Federally owned lands so excluded which the Secretary of the Interior determines are not needed for such exchanges shall be disposed of in accordance with the provisions of the Federal Property and Administrative Services Act of 1949, as amended.

SEC. 3. Lands and interests therein acquired pursuant to this Act shall thereupon become a part of the Kings Mountain National Military Park and be subject to all the laws and regulations applicable thereto.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING ACT OF JUNE 28, 1958, PROVIDING FOR A NATIONAL OUTDOOR RECREATION RESOURCES REVIEW COMMISSION

The Clerk called the bill (H.R. 1776) to amend the act of June 28, 1958, entitled "An act to provide for a National Outdoor Resources Review Commission, and for other purposes."

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Reprsentatives of the United States of America in Congress assembled, That the fourth section of subsection (a) of section 2 of the Act of June 28, 1958, entitled "An Act to provide for a National Outdoor Recreation Resources Review Commission, and for other purposes" is amended to read as follows:

"The Commission is authorized, without regard to the civil service laws and regulations, and without regard to the Classification Act of 1949, as amended, to appoint and fix the compensation of an executive secretary and such additional personnel as may be necessary to enable it to carry out its functions, except that any Federal employees subject to the civil service laws and regulations who may be assigned to the Commission shall retain civil service status without interruption or loss of status or privilege."

With the following committee amendment:

Page 1, line 3, strike out the words, "That the fourth section of subsection (a) of section 2" and insert in lieu thereof the words "That subsection (a) of section 4."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING ACT OF JUNE 21, 1950, RELATING TO APPOINTMENT OF BOARDS OF MEDICAL OFFICERS

The Clerk called the bill (H.R. 3320) to amend the act of June 21, 1950, relating to the appointment of boards of medical officers.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2 of the Act of June 21, 1950 (ch. 342, 64 Stat. 249), is amended by striking out the last proviso and inserting the following in lieu thereof: "*And provided further,* That competent medical authority shall consist of a board appointed from available medical officers or physicians under his jurisdiction by the head of whichever of the following departments or agencies is providing medical treatment for the member, or by a person designated by the head of that department or agency:

"(1) Department of the Army
"(2) Department of the Navy
"(3) Department of the Air Force
"(4) Department of Health, Education, and Welfare
"(5) Veterans' Administration

If the hospitalization or medical care of the member is not provided by the United States, the board shall be appointed by the secretary of the department having jurisdiction of the member. Each board shall consist of at least three qualified medical officers or physicians one of whom must be specially qualified in the treatment of mental disorders."

SEC. 2. Section 3 of the Act of June 21, 1950 (ch. 342, 64 Stat. 249), is amended by inserting the words "and the Administrator of Veterans' Affairs" after the words "department concerned."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING TITLE 10, UNITED STATES CODE

The Clerk called the bill (H.R. 3322) to amend title 10, United States Code, and certain other laws to authorize the payment of transportation and travel allowance to escorts of dependents of members of the uniformed services under certain conditions, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, this bill will in no way be used to pay people who have been used in the past to wet-nurse dogs and cats on military transports; will it?

Mr. KILDAY. No; I can assure the gentleman it will not apply to cases of that kind. It will reimburse a few men who under orders have escorted families with men missing in airplane accidents or in other actions, to their homes. But that is only to the extent of about 1,600 of the cases previously accumulated.

Mr. GROSS. Does the gentleman know whether we are still paying people to take care of dogs, cats, and other pets?

Mr. KILDAY. I have no knowledge that we are, and I am quite sure we are no longer doing that if we did.

Mr. GROSS. I thank the gentleman. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 53 of title 10, United States Code, is amended—

(1) by adding the following new section after section 1035:

"§ 1036. Escorts for dependents of members: transportation and travel allowances

"Under regulations to be prescribed by the Secretary concerned, round trip transportation and travel allowances may be paid to any person for travel performed or to be performed under competent orders as an escort for dependents of a member of the Armed Forces, if the travel is performed not later than one year after the member—

"(1) dies;
"(2) is missing; or
"(3) is otherwise unable to accompany his dependents;

and it has been determined that travel by the dependents is necessary and that they are incapable of traveling alone because of age, mental or physical incapacity, or other extraordinary circumstances."; and

(2) by adding the following new item at the end of the analysis:

"1036. Escorts for dependents of members; transportation and travel allowances."

SEC. 2. Section 3(a) of the Act of August 10, 1956, chapter 1041, as amended (33 U.S.C. 857a(a)), is amended—

(1) by redesignating clauses (1), (2), (3), (4), (5), (6), and (7) as clauses "(2)", "(3)", "(4)", "(5)", "(6)", "(7)", and "(8)", respectively; and

(2) by inserting the following new clause at the beginning:

"(1) Section 1036, Escorts for dependents of members: transportation and travel allowances."

SEC. 3. Section 221(a) of the Public Health Service Act, as amended (42 U.S.C. 213a(a)), is amended—

(1) by redesignating clauses (1), (2), (3), (4), (5), (6), and (7) as clauses "(2)", "(3)", "(4)", "(5)", "(6)", "(7)", and "(8)", respectively; and

(2) by inserting the following new clause at the beginning:

"(1) Section 1036. Escorts for dependents of members: transportation and travel allowances."

SEC. 4. Travel and transportation allowances paid before the effective date of this Act to persons ordered by competent authority to escort dependents of members of the uniformed services are hereby validated, if they would have been authorized under section 1 of this Act.

SEC. 5. Any person who was ordered by competent authority after January 1, 1950, and before the effective date of this Act to escort dependents of members of the uniformed services and who has not been paid travel and transportation allowances, or who has repaid the United States the amount so paid to him, is entitled to be paid the amount otherwise authorized by section 1 of this Act, if application for such payment is made not later than one year after the effective date of this Act.

SEC. 6. The Comptroller General of the United States, or his designee, shall relieve disbursing officers, including special disbursing agents, from accountability or responsibility for any payments described in section 4 of this Act, and shall allow credits in the settlement of the acounts of those disbursing officers or agents for payments which are found to be free from fraud or collusion.

With the following committee amendment:

Page 4, line 11, insert:

SEC. 7. No regulations under section 1 of this act relating to the military departments shall be prescribed by the Secretary of a military department unless such regulations are first approved under procedures prescribed by the Secretary of Defense. Regulations of the Secretaries of the Treasury, Commerce, and Health, Education, and Welfare under section 1, 2, or 3 of this act shall, to the extent practicable, agree with regulations so approved.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING TITLE 10, UNITED STATES CODE, BY REPEALING SECTION 7475

The Clerk called the bill (H.R. 4068) to amend title 10, United States Code, by repealing section 7475, which restricts the increasing of forces at naval activities prior to national elections.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title 10, United States Code, is amended as follows:

(1) Section 7475 is repealed.

(2) The analysis of chapter 643 is amended by striking out the following item:

"7475. Force at naval activities not to be increased before elections."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NORTH ATLANTIC TREATY PARLIAMENTARY CONFERENCE

The Clerk called the resolution (H. Con. Res. 34), favoring the meeting of the North Atlantic Treaty Parliamentary Conference for 1959 in Washington, D.C.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

Mr. GROSS. Mr. Speaker, I ask unanimous consent that this resolution be passed over without prejudice.

The SPEAKER pro tempore. Is there objection?

There was no objection.

CENTENNIAL OF ESTABLISHMENT OF LAND-GRANT COLLEGES AND STATE UNIVERSITIES AND THE ESTABLISHMENT OF THE DEPARTMENT OF AGRICULTURE

The Clerk called the bill (H.R. 4012) to provide for the centennial celebration of the establishment of the land-grant colleges and State universities and the establishment of the Department of Agriculture, and for related purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. FORRESTER. Mr. Speaker, reserving the right to object, I would like to inquire what subcommittee of the Committee on the Judiciary this bill was referred to. Subcommittee No. 4, of which I am chairman, ordinarily has jurisdiction of matters of this kind. I would like to know what subcommittee did have the legislation and just why.

Mr. LANE. Mr. Speaker, will the gentleman yield?

Mr. FORRESTER. I yield.

Mr. LANE. I doubt if I can answer the gentleman from Georgia as to the reason the chairman [Mr. CELLER] has referred this bill to Committee No. 2. What his reasons were I am not aware of. I yield to the gentleman from New York.

Mr. CELLER. Mr. Speaker, will the gentleman yield?

Mr. FORRESTER. I yield.

Mr. CELLER. The gentleman from New York is rather embarrassed. This is one of those slips. I would say that ordinarily the bill would be referred to the subcommittee headed by the distinguished gentleman from Georgia [Mr. FORRESTER]. I am at a loss to explain why it went to the so-called Subcommittee No. 2 headed by the gentleman from Massachusetts [Mr. LANE]. I hope the gentleman from Georgia will not object, because it is a very meritorious bill concerning the celebration of the 100th anniversary of the setting up of the Department of Agriculture and land-grant colleges and State universities.

Mr. FORRESTER. I would like to ask the gentleman from Massachusetts [Mr. LANE] is that all that this bill does, that stated by the gentleman from New York [Mr. CELLER]?

Mr. LANE. It does a little more than that. This sets up a commission and gives the various departments the right to participate in this commission. It is estimated that the amount will be in the nature of about $200,000. Much of this money can be taken from the various departments, such as the Agricultural Department and the Department of Health, Education, and Welfare, the defense agencies all will participate in this establishment of this commission.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, I am not opposed to centennial celebrations, but why should there be the expenditure of $200,000 for a proposition of this kind? Why create another commission to spend more money? We are already surfeited with commissions. Can this not be carried on without the establishment of a commission and without the expenditure of $200,000 from the Treasury?

Mr. LANE. May I say to the gentleman that this bill comes about as the result of an Executive communication. As you know, it provides for the centennial celebration of the establishment of land-grant colleges, State universities and the Department of Agriculture. In the year 1962 would mark this anniversary both for the establishment of the Department of Agriculture and the land-grant colleges.

This bill was introduced, as I say, through Executive communication. The Department of Agriculture, as the gentleman from Iowa knows, was established way back in 1862, and under the first Morrill Act approved in that year there was provided the beginning of aid to the land-grant colleges through the setting aside of public lands for their support.

This commission would initiate and prepare plans with the Department and the land-grant colleges. For example, the Department of Agriculture has a working relationship with the State departments of agriculture. The Department is not concerned with the colleges. On the other hand, the land-grant colleges and universities have much in common with the Department of Defense and with the Department of Health, Education, and Welfare.

As I understand, Mr. Speaker, although this may cost that amount of money, if the Department can see fit to obtain part of this cost from various agencies in the Department they may be able to carry out the program without going in excess of the money appropriated.

Mr. GROSS. I wonder if when the national debt reaches $300 billion a commission will be created to celebrate that event at a cost of $200,000 or $300,000.

Mr. LANE. I hope not, Mr. Speaker.

Mr. FORD. Mr. Speaker, reserving the right to object, although the indication is that the estimated cost will be $200,000 for this centennial program, there is nothing in the bill which limits the proposed expenditure to that amount. In fact, as I read the bill, it says there is an authorized appropriation of such sums as may be necessary. That is a wide open authorization. I personally feel that if this is the estimate we ought to write that limitation into the legislation.

Mr. CELLER. Mr. Speaker, will the gentleman yield?

Mr. FORD. I yield.

Mr. CELLER. Would not the Appropriations Committee have the last say on that?

Mr. FORD. Yes; but I think it is healthy and wholesome in the authorizing legislation to have a limitation right at the very outset.

Mr. CELLER. Does the gentleman believe you should have a limitation now before we know exactly what the needs may be? This, to my mind, is a rather important centennial; it affects a great many Members of the House who come from agricultural districts, and their constituents naturally are interested.

I simply offered the bill at the suggestion of the Secretary of Agriculture. I think it is a wholesome bill and worth while. I cannot conceive of its costing much more than $200,000. It may cost more. I have not the slightest knowledge as to what the ultimate cost will be.

Mr. FORD. What I am saying, Mr. Chairman, is that they estimate it will cost $200,000. If that is their estimate I think it would be wholesome and helpful

to have that written into the legislation as a limitation so that the total is fixed and unequivocal from the outset.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. FORD. I yield.

Mr. GROSS. Page 9, section 12, of the bill provides that member institutions receiving benefits under the second Morrill Act, and so on and so forth, are authorized to utilize such funds and prepare such plans; in other words, more than the $200,000 can be spent. As it stands we do not know what this is going to cost.

Mr. CELLER. I would not have any objection if the gentleman cares to offer an appropriate amendment.

Mr. FORD. May I make one other comment I think would be appropriate? Would there be any objection to imposing on the individual States some responsibility for the expenses of these ceremonies and celebrations?

Mr. CELLER. I would not know how to answer that. I would want to take advice and counsel from the real authors of the bill who are the representatives of the Department of Agriculture.

Mr. LANE. Mr. Speaker, will the gentleman yield?

Mr. FORD. I yield to the gentleman from Massachusetts.

Mr. LANE. May I say to the gentleman from Michigan that according to information from the Secretary of Agriculture they felt this amount would not exceed $200,000. We put that in our report, that the Department of Agriculture has estimated that about $200,000 will be needed to carry out the observance part of this bill. As far as your committee is concerned, we felt there should be a limitation and that amount would be perfectly all right, as we have the evidence before us it would not take any more than that. Perhaps a good part of this sum could be taken from the various departments that are working in connection with this commission and it may not call for any additional funds.

Mr. FORD. May I suggest that the committee prepare such an amendment which could be submitted the next time the Consent Calendar is called before the House?

Mr. LANE. Yes, that is all right.

Mr. FORD. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

AUTHORIZING SECRETARY OF THE TREASURY TO SETTLE CERTAIN CLAIMS

The Clerk called the bill (H.R. 2741) to amend section 2734 of title 10, United States Code, so as to authorize the Secretary of the Treasury to settle claims arising in foreign countries incident to noncombat activities of the Coast Guard.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill:

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title 10 of the United States Code is amended as follows:

(1) Section 2734 is amended as follows:

(A) The catchline is amended to read as follows:

"§ 2734. Property loss; personal injury or death: incident to noncombat activities of the armed forces; foreign countries."

(B) Subsection (a) is amended as follows:

(i) by striking out the words "of a military department" and inserting in place thereof the word "concerned"; and

(ii) by striking out the words "the department concerned" and inserting in place thereof the words "the military department concerned or the Coast Guard; as the case may be."

(C) Subsections (c) and (d) are amended by striking out the words "of the military department."

(D) Subsection (f) is amended as follows:

(i) by striking out the words " a military department" and inserting in place thereof the words "the department concerned"; and

(ii) by striking out the word "military."

(E) Subsection (g) is amended to read as follows:

"(g) Payment of claims against the Coast Guard arising while it is operating as a service in the Department of the Treasury shall be made out of the appropriation for the operating expenses of the Coast Guard."

(2) The analysis of chapter 163 is amended by striking out the following item:

"2734. Property loss; personal injury or death: incident to noncombat activities of the Department of Army, Navy, or Air Force; foreign countries."

and inserting the following item in place thereof:

"2734. Property loss; personal injury or death: incident to noncombat activities of the armed forces; foreign countries."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

VALIDATING PAYMENTS OF CERTAIN QUARTERS ALLOWANCES MADE IN GOOD FAITH

The Clerk called the bill (H.R. 2975) to validate payments of certain quarters allowances made in good faith, and pursuant to agreements by authorized officials, to employees of the Department of the Navy, but which were subsequently determined to be inconsistent with applicable regulations.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. FORD. Mr. Speaker, reserving the right to object, from a study of this proposed legislation I can see merit to those people who are individually involved. I wonder, however, if we may not be setting a precedent unless we make it clear that the disbursing officer is not having any waiver of his responsibility. Could somebody from the committee discuss that aspect of the question with me?

Mr. LANE. May I reply to the gentleman from Michigan by stating that in the bill, H.R. 2975, beginning with line 6, it is stated:

Any employee or former employee of the Department of the Navy who has made repayment to the United States of any amount so paid him as quarters allowance is entitled to have refunded to him the amount so repaid.

In other words, your committee, Mr. Speaker, is only interested in those employees of the Department of the Navy and not in the disbursing officers.

Mr. FORD. There is by this proposal no waiver of the fundamental responsibility of the disbursing officer for any erroneous action on his part?

Mr. LANE. None whatsoever.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all payments of quarters allowances made after January 1, 1949, and before August 16, 1953, to civilian employees of the Department of the Navy on duty in London, England, are hereby validated. Any employee or former employee of the Department of the Navy who has made repayment to the United States of any amount so paid him as a quarters allowance is entitled to have refunded to him the amount so repaid. Any appropriation that was available for the payment of salaries of civilian employees of the Department of the Navy at any time during the years 1949 through 1953 is available for the payment of the refunds authorized by this act.

The bill was ordered to be engrossed and read a third time, was read a third time, and passed, and a motion to reconsider was laid on the table.

RELIEVING CERTAIN MEMBERS AND FORMER MEMBERS OF THE NAVAL SERVICE OF CERTAIN LIABILITY

The Clerk called the bill (H.R. 4615) to relieve certain members and former members of the naval service of liability to reimburse the United States for the value of transportation requests erroneously furnished them by the United States, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. FORD. Mr. Speaker, reserving the right to object I make the same inquiry of the gentleman from Massachusetts in this case as I did before. Is there by this legislation any waiver of the disbursing officers' responsibility for erroneous payments?

Mr. LANE. As far as the committee is concerned, there is no intention to waive anything as far as the disbursing officer is concerned. We seek to relieve the claimants in this particular bill, of which there are seven or eight of them, due to the fact there was an error made by somebody outside of the naval service.

The committee feels that on the state of these facts it is clearly unfair to penalize the individual Navy men. The mistake was made in the application of

travel regulations to a group of sailors traveling under official orders. It was the conclusion of the committee that these sailors were entitled to relief.

Mr. FORD. I believe the comment made by the gentleman from Massachusetts is appropriate. The individual sailors were not responsible, but somebody in the disbursing office or in the travel office made an error. And, they are not relieved of that responsibility by this legislation.

I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the issuance of transportation requests (including the cost of transporting excess baggage) and payments made for mileage or per diem, or both, to members of the naval service for travel performed by them by commercial carriers after June 30, 1955, and before July 1, 1958, under orders that transferred them between duty stations (including vessels) outside the United States and authorized them leave en route in the United States are validated. Any member or former member of the naval service who has wholly or partly reimbursed the United States for the value of transportation requests so issued to him or for payments so made to him is entitled to have refunded the amount he has so reimbursed the United States.

SEC. 2. Current appropriations available to the Department of the Navy for the pay and allowances of members of the naval service are available for refunds under this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING THE COLUMBIA BASIN PROJECT ACT

The Clerk called the bill (H.R. 1306) to amend section 2(b) of the Columbia Basin Project Act, as amended.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2, subsection (b), of the Columbia Basin Project Act (57 Stat. 14, 15, 16 U.S.C. 835a), as amended, is hereby further amended by designating subdivision (v) as subdivision (vi), and by adding thereto a new subdivision (v) reading as follows:

"(c) Water may be delivered from, through, or by means of the project works to or for conformed farm units comprising a total irrigable area of not more than six hundred forty acres held by the State of Washington for use by the State College of Washington for agricultural research purposes, notwithstanding the maximum irrigable area limitations on the delivery of water to farm units provided in subdivision (iii) of this subsection or the fact that one or more of those units may be deemed to be excess lands under the provisions of subdivision (iv) of this subsection."

With the following committee amendment:

Strike out all after the enacting clause and insert:

That notwithstanding any provisions of sections 2(b)(iii), 2(b)(iv), and 4(b) of the Columbia Basin Project Act, as amended (16 U.S.C., ch. 12D), conformed farm units, or portions of farm units, comprising not more than six hundred and forty acres of irrigable land on the Columbia Basin project may be sold by the Secretary of the Interior and others to the State of Washington for use by the State College of Washington for agricultural research purposes, and water may be delivered from, through, or by means of the project works to or for conformed farm units comprising no more than that acreage, as nonexcess lands, whether so acquired or already held by the State, as long as they are used for those purposes. Except as otherwise provided in this Act, any lands sold to the State under this Act shall be governed by the provisions of the Columbia Basin Project Act, as amended, and regulations of the Secretary issued pursuant thereto.

The title was amended so as to read: "A bill to provide for the sale of Columbia Basin project lands to the State of Washington, and for other purposes."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WATER RESOURCES—SALT FORK AND PRAIRIE DOG TOWN FORK, TEX.

The Clerk called the bill (H.R. 4405) to authorize and direct the Secretary of the Interior to conduct studies and render a report on the feasibility of developing the water resources of the Salt Fork of the Red River in the State of Texas.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. FORD. Mr. Speaker, reserving the right to object, could we have a further explanation from the author of this bill? What is the Federal responsibility here, who will be the prime beneficiaries, is this a new start, and so forth?

Mr. ROGERS of Texas. Let me say this. This bill is for the purpose of authorizing the Bureau of Reclamation to make a survey of two streams in the Panhandle of Texas which are the only streams that supply a source of water in that area. There are some surveys already prepared, but the Bureau of Reclamation will make their surveys in connection with some of the surveys that have been made in order to develop or answer the question of feasibility in this particular area with relation to a possible reclamation project at that point.

Mr. FORD. Will the ultimate beneficiaries be solely those people living within the area; is this an expansion of the idea of the Bureau of Reclamation's fundamental responsibility?

Mr. ROGERS of Texas. No. The beneficiaries will be the same as they are in most every other reclamation project. The fact of the matter is this, that a reclamation project built in this particular area would be almost wholly reimbursable to the Federal Government insofar as the cost of the project is concerned. These are the only two sources of water or the only two streams from which water can be had in that area. Unless these streams are developed, the territory there will remain in a semiarid state.

Mr. FORD. I notice in the report it says "the potential requirements of water by municipalities, industries, and irrigation projects." It seems to put the emphasis on municipalities and industries rather than irrigation for agricultural purposes.

Mr. ROGERS of Texas. Of course, that is right. This bill, though, may I say to the gentleman, does this. It is a question of priority insofar as the survey is concerned. They already have the authority to do the very thing that is named in this bill. It is simply a question of priority that should have been gone into, I think, several years ago.

Mr. FORD. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. MORRIS of Oklahoma. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

Mr. ROGERS of Texas. If the gentleman will withhold that for a minute, I will be happy to answer any questions concerning it. I have discussed it with the gentleman.

Mr. MORRIS of Oklahoma. Well, I do not want to prejudice my right by making such a request. Mr. Speaker, I have discussed it with the gentleman and, of course, I am not opposed to the purposes of his bill other than this, that the whole stream ought to be investigated instead of stopping at the State boundaries. I would hope that the gentleman and I might agree on an amendment, but I must insist at this time to have the opportunity to further study the matter.

Mr. ROGERS of Texas. Mr. Speaker, will the gentleman yield?

Mr. MORRIS of Oklahoma. I yield to the gentleman from Texas.

Mr. ROGERS of Texas. I will say this to the gentleman, as I told him before, this bill has nothing in the world to do with Oklahoma. The fact of the matter is this, that the surveys anticipated in this bill are presently being conducted in Oklahoma, and an amendment to it would serve no purpose in the world. As a matter of fact, the money has already been allocated and the work being done in Oklahoma on this type of project, and I sincerely hope that the gentleman will not hold it up.

Mr. MORRIS of Oklahoma. Mr. Speaker, I certainly have no disposition to hold it up indefinitely, but I just learned about this recently, as the gentleman knows, and I do feel we can sit down and work the matter out. I certainly see no objection to an investigation going on in his great State, but I do not want to stand by and permit a situation to arise where there might not be the same proper investigation in my own State where the streams flow. I, therefore, must insist upon my request. I should be glad to sit down with the gentleman, and I think we can work out something that will be satisfactory.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma [Mr. MORRIS]?

There was no objection.

INDEPENDENCE NATIONAL HISTORICAL PARK

The Clerk called the bill (H.R. 2154) to authorize the Secretary of the Interior to acquire certain additional property to be included within the Independence National Historical Park.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is authorized to acquire by donation or with donated funds, or to acquire by purchase, the land and buildings immediately adjacent to, but not including, the St. George's Methodist Church property, which land and buildings are identified generally as 318, 320, and 322 New Street, for inclusion in the Independence National Historical Park: *Provided,* That the Secretary shall first enter into an agreement with the proprietor or proprietors of the St. George's Methodist Church property, such agreement to contain the usual and customary provisions for the protection and physical maintenance of said church property, without expense to the United States, in keeping with, but not as a part of, the nearby Independence National Historical Park and providing for its continued use, without limitation or control, for customary church purposes.

SEC. 2. There are hereby authorized to be appropriated such sums, not exceeding $25,000, as may be necessary to carry out the purposes of section 1 of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REVISION OF BOUNDARIES OF EDISON LABORATORY NATIONAL MONUMENT

The Clerk called the bill (H.R. 318) to authorize a revision of the boundaries of the Edison Laboratory National Monument, N.J., and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is authorized to rocure for addition to the Edison Laboratory National Monument, such additional lands and interests in lands lying directly across Main Street and northwest of the monument, not to exceed two and one-half acres, as in the discretion of the Secretary are necessary for the proper administration and interpretation thereof.

SEC. 2. Lands and interests in lands acquired pursuant to this Act shall become a part of the Edison Laboratory National Monument upon the issuance of an appropriate order or orders, by the Secretary of the Interior, setting forth the revised boundaries of the monument, such order or orders to be effective upon publication thereof in the Federal Register. Lands and interests therein so added to the monument shall thereafter be subject to all the laws and regulations applicable thereto.

With the following committee amendment:

Page 1, line 3, strike out the word "rocure" and insert in lieu thereof "procure."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LEASE OF BUILDINGS FOR NASA

The Clerk called the bill (H.R. 4913) to amend the National Aeronautics and Space Act of 1958 to authorize the National Aeronautics and Space Administration to lease buildings in the District of Columbia for its use.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. PELLY. Mr. Speaker, reserving the right to object, I should like to have some information concerning these various locations which would be consolidated, and whether the rentals now exceed the total called for here.

Mr. BROOKS of Louisiana. If the gentleman will yield to me, I should be glad to explain the situation. This bill provides that the General Services Administration may make leases to take care of the needs of the National Aeronautics and Space Administration. The NASA is presently housed in a number of locations all over Washington. For instance, it is housed on Jackson Place in a building that is going to be torn down within the year, so I am informed. It is housed at 9th and C Street in Washington. It is housed in 1512 I Street in Washington. A portion of it is housed in 1520 I Street in Washington. We have divisions of it housed at 7th and D Street in Washington in a temporary structure belonging to the Government, which the Government is taking away from them.

This bill would permit the General Services Administration to make arrangements for a lease not exceeding 120,000 to 130,000 square feet for the personnel of that organization. It would provide to bring them together so that they may operate efficiently. Right now they are moving from one part of the city of Washington to another, and they cannot get any efficiency when they are separated in so many places, even more than I have already mentioned to the gentleman.

The purpose is to give the General Services Administration the authority to lease in Washington sufficient space to take care of their local employees. They estimate that the lease will cost something like $6 per square foot. That is what they have been paying for leased space in Washington, so I am informed. The idea of the whole thing is to take care of the present needs of the Space Administration.

Mr. PELLY. I should like to know whether the amount that is being paid in the various locations that are being rented now would exceed $800,000 a year, which this authorization would permit.

Mr. BROOKS of Louisiana. No, this is not an authorization of $800,000. You figure it out at the rate of $300 per square foot, and with 120,000 or 130,000 square feet, that is the ultimate it will reach. But actually there is no authorization for that particular amount at all.

Mr. FULTON. Mr. Speaker, will the gentleman yield?

Mr. PELLY. I yield to the gentleman from Pennsylvania.

Mr. FULTON. In the absence of the gentleman from Massachusetts (Mr. MARTIN] I have been the senior Republican on the committee. We have checked into this thoroughly. We find that this is immediately necessary. Do not under estimate the importance of our space program in relation to Washington, I should like to warn the House.

Secondly, this is not additional money and is merely a correction bill. Under the act of March 3, 1877, any leasing or buying of a building in Washington, or rather, the District of Columbia, must be by appropriation of the Congress. When the act was passed last year, 1958, for the National Aeronautics and Space Administration that was not called to our attention. This puts it in proper form where it is solely under the General Services Administration, not the National Aeronautics and Space Administration, giving the General Services Administration, just as it usually has, the power to lease when the necessity is shown. Likewise, it will go before the Committee on Appropriations to justify the amount.

May I answer the gentleman's question individually on this. Of course, part of this space is Government buildings now, and we are going to have to give it up, in one place within a year, and in another because it is a temporary building and they want them to get out. So I should say it is not more than 10 percent. But there is all the authorization to lease. The peculiar thing about it is that if we did not come in here and ask for this authorization under this bill, the National Aeronautics and Space Administration can lease or buy any place in the United States outside the District of Columbia. It already has that authority. So obviously the thing to do is pass this bill and make them go to the Committee on Appropriations, who will force them to justify it. It corrects the legislation and does not add any other money.

Mr. BROOKS of Louisiana. May I say also to the gentleman that the act we passed last year creating the National Aeronautics and Space Administration authorized that Administration to make leases, but we figured perhaps it was better policy to let the General Services Administration make all the leases. This simply corrects the law to authorize the General Services Administration to make the leases for the Administration. That is the change we make.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. PELLY. I yield to the gentleman from Iowa.

Mr. GROSS. Does this mean the leasing of two or more floors of the Arlington Towers Apartments?

Mr. BROOKS of Louisiana. It was justified before our committee that they had no place in mind. We asked them, and they said it was up to the General Services Administration to find the cheapest available space.

Mr. GROSS. The gentleman knows this new organization started out to take

over two or more floors of the Arlington Towers Apartments, does he not?

Mr. BROOKS of Louisiana. No; I do not. I never had any information on that whatsoever; not one bit.

Mr. FULTON. Mr. Speaker, will the gentleman yield further?

Mr. PELLY. I yield.

Mr. FULTON. The problem is this. It should be under the control of the General Services Administration because that is the regular practice. It had not previously been because under the act we passed last year, 1958, authorizing the National Aeronautics and Space Administration, they were given extra powers. This takes it away from them and puts it completely under the General Services Administration. It is really just what the gentleman wants and what I want, too, as the Republican on the committee.

Mr. GROSS. I do not necessarily agree that the General Services Administration should be the last word because I understand it recently leased five floors in the new Cafritz Building at a rental of $6,500,000 for 10 years for another agency. The owner of the building said that he had $10 million invested in it. Now he has the other five floors of the building to lease. He should do very well on that.

Further, let me say to the gentleman that in the Arlington Towers apartment building is located the Foreign Service Training School, which I assume is a General Services Administration deal. I am told that even with the erection of the new $50- to $60-million State Department Building no provision is being made to put the Foreign Service Training School in the new structure, so they apparently will go on indefinitely and forever leasing from the Arlington Towers apartments some 75,000 square feet of space.

Mr. BROOKS of Louisiana. I have no information on that. I want to say that this simply provides 300 square feet per individual or per employee. It is a reasonable space to allow. The General Services Administration no doubt is going to leave this space at the very lowest cost, and if they do not do that some of these buildings are going to be torn down and others will be vacated by the Government.

Mr. FULTON. Mr. Speaker, will the gentleman yield?

Mr. PELLY. I yield.

Mr. FULTON. You see, it should be pointed out that the National Space Agency has the authority to do this under the law passed in 1958, and this is simply limiting legislation that puts it under the General Services Administration and under the act of 1887 of March 3 forced them to go before the Committee on Appropriations to justify the appropriation. What more does the gentleman from Iowa want? Of course, go before the Committee on Appropriations and object to it, if you do not like it, but let us put this through because I may say to the gentleman we are in a race for life with Russia and when we tell you we are falling behind in space in some ways, let us get it most efficiently as we can and protect the security of this country. When I tell you there is not one extra dollar being authorized by this bill, but it is being tightened up by putting it under the General Services Administration, let me tell you it conforms to our regular Government practice, and I believe the General Services Administration generally has been doing a good job. If the gentleman from Iowa wants to object, go on over to the Committee on Appropriations and object to the total amount because we are not changing the amount in this legislation.

Mr. PELLY. I would like to say to the gentleman from Pennsylvania that the idea of consolidating the operation certainly appeals to me so far as doing an effective job.

Mr. Speaker, I withdraw my reservation of objection.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

WAGE EARNERS' PLANS—OF THE BANKRUPTCY ACT

The Clerk called the bill (H.R. 2237) to amend chapter 13—Wage Earners' Plans—of the Bankruptcy Act.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That paragraph (8) of section 606 of the Bankruptcy Act (11 U.S.C., 1006(8)) is amended to read as follows:

"(8) 'wage earner' shall mean an individual whose principal income is derived from wages, salary or commissions."

SEC. 2. That paragraph (3) of section 659 of such Act (11 U.S.C., 1059(3)) is hereby amended to read as follows:

"(3) an additional fee for the referees' salary fund, to be graduated and charged in the manner outlined in paragraph (2) of subdivision c of section 40 of this Act, and to be computed upon the amount of the payments actually made by or for a debtor under the plan; and commissions to the trustee of not more than 5 per centum to be computed upon and payable out of the payments actually made by or for a debtor under the plan;".

SEC. 3. The provisions of this Act shall apply to all cases in which the petition initiating the proceedings under the Bankruptcy Act is filed subsequent to the date of the enactment of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

AMENDING SECTION 3238 OF TITLE 18, UNITED STATES CODE

The Clerk called the bill (H.R. 4154) to amend section 3238 of title 18, United States Code.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3238 of title 18, United States Code, is amended to read as follows:

"§ 3238. Offenses not committed in any district.

"The trial of all offenses begun or committed upon the high seas, or elsewhere out of the jurisdiction of any particular State or district, shall be in the district in which the offender, or any one of two or more joint offenders, is arrested or is first brought; but if such offender or offenders are not so arrested or brought into any district, an indictment or information may be filed in the district of the last-known residence of the offender or of any one of two or more joint offenders, or in the District of Columbia."

With the following committee amendment:

On page 2, line 3, after the word "or", insert the following: "if no such residence is known the indictment or information may be filed".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EXTENDING LEASING PROVISIONS OF ACT OF JUNE 14, 1926

The Clerk called the bill (H.R. 4748) to extend the leasing provisions of the act of June 14, 1926, as amended by the act of June 4, 1954 (68 Stat.; 43 U.S.C. 869—869-3), to certain lands in Oregon, and for other purposes.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act of April 13, 1928 (45 Stat. 429; 43 U.S.C. 869a), is hereby repealed.

SEC. 2. The second sentence of subsection (c) of section 1 of the Act of June 14, 1926 (44 Stat. 741), as amended by the Act of June 4, 1954 (68 Stat. 173; 43 U.S.C. 869–869–3), is hereby amended to read as follows: "Nothing in this Act shall be construed to apply to lands in any national forest, national park, or national monument, or national wildlife refuge, or to any Indian lands or lands set aside or held for the use or benefit of Indians, including lands over which jurisdiction has been transferred to the Department of the Interior by Executive order for the use of Indians, or, except insofar as this Act applies to leases of land to States and counties and to State and Federal instrumentalities and political subdivisions and to municipal corporations, to the revested Oregon and California Railroad grant lands and the reconveyed Coos Bay Wagon Road grant lands in the State of Oregon."

With the following committee amendment:

Page 2, following line 11, add a new section to read as follows:

"SEC. 3. A new section is hereby added to the Act of June 14, 1926, as amended, supra, to read as follows:

" 'SEC. 6. All moneys received from or on account of any revested Oregon and California Railroad grant lands or reconveyed Coos Bay Wagon Road grant lands under this Act shall be deposited respectively in the Oregon and California land-grant fund and the Coos Bay Wagon Road grant fund, and shall be applied in the manner prescribed respectively by title II of the Act of August 28, 1937 (50 Stat. 875), as amended (43 U.S.C. 1181f), and by the Act of May 24, 1939 (53 Stat. 753).' "

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NORTH ATLANTIC TREATY PARLIAMENTARY CONFERENCE FOR 1959

The SPEAKER. For what purpose does the gentleman from Ohio [Mr. HAYS] rise?

Mr. HAYS. Mr. Speaker, I ask unanimous consent to return to Calendar No. 20 for the consideration of the concurrent resolution (H. Con. Res. 34) favoring meeting of the North Atlantic Treaty Parliamentary Conference for 1959 in Washington, D.C.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. GROSS. Mr. Speaker, reserving the right to object, and I shall not object, I should like to ask the gentleman this question. Where is it proposed to hold this meeting?

Mr. HAYS. It is proposed to hold this conference in the committee room of the Committee on Ways and Means in the New House Office Building.

Mr. GROSS. May I ask the gentleman another question? Is it proposed to use the dining facilities of the House or the cafeteria in the New House Office Building to entertain these people?

Mr. HAYS. Presumably, any Member of Congress can take anyone there as his guest. But, if the gentleman inquires as to whether the United States is going to pick up the check, or not, the answer is, unqualifiedly, "No." Each person will have to pay his own way.

Mr. GROSS. I asked that question because when the Interparliamentary Union met in Washington, this House Chamber and the dining room downstairs was used. And my understanding is we finally woke up to the fact that some of the foreign delegates were going down to the dining room, eating and walking out and we were left holding the bag. I hope that does not happen in this case.

Mr. HAYS. I can assure the gentleman, it has already been made clear that all of the delegates will be paying their own way including any hotel bills and meals, unless they are invited by some individual to be their guest.

Mr. GROSS. We were also assured that that was the case when the Interparliamentary Union met here, but we found it did not work out that way. I do not want us to wake up this time to find out that the taxpayers are providing a free eating place for these foreign delegates.

The SPEAKER. Is there objection to the present consideration of the concurrent resolution?

There was no objection.

The Clerk read the concurrent resolution, as follows:

Whereas United States delegates have attended each of the four North Atlantic Treaty Parliamentary Conferences which have been held in Paris; and

Whereas the Fourth North Atlantic Treaty Parliamentary Conference, by resolution, expressed a wish to hold the next conference in Washington, District of Columbia: Therefore be it

Resolved by the House of Representatives (the Senate concurring), That the Chairmen of the United States delegation to the North Atlantic Treaty Parliamentary Conference be requested to invite the North Atlantic Treaty Parliamentary Conference to hold its annual meeting for the year 1959 in Washington, District of Columbia.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

CALL OF THE HOUSE

Mr. HOFFMAN. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently no quorum is present.

Mr. MILLS. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 15]

Barden	Fountain	Moulder
Barrett	Frazier	Multer
Bennett, Mich.	Frelinghuysen	Nix
Bonner	Gallagher	Osmers
Bowles	Granahan	Philbin
Bray	Grant	Polk
Buckley	Griffiths	Porter
Burke, Mass.	Gubser	Powell
Carter	Hall	Prokop
Chelf	Hardy	Randall
Collier	Healey	Rivers, Alaska
Corbett	Hechler	Rivers, S.C.
Cramer	Henderson	Rostenkowski
Davis, Tenn.	Hoffman, Ill.	Scott
Dawson	Holland	Shelley
Diggs	Kasem	Staggers
Dixon	Lesinski	Taylor
Dorn, N.Y.	McCulloch	Teller
Dulski	McDowell	Toll
Durham	McGinley	Tuck
Fallon	Macdonald	Walter
Farbstein	Madden	Weaver
Feighan	Martin	Zelenko
Fino	Meader	
Forand	Moorhead	

The SPEAKER. On this rollcall 353 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

TEMPORARY UNEMPLOYMENT COMPENSATION

Mr. MILLS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5640) to extend the time during which certain individuals may continue to receive temporary unemployment compensation.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That paragraph (1) of section 101(a) of the Temporary Unemployment Compensation Act of 1958 (42 U.S.C. 1400) is amended—

(1) by striking out "April 1, 1959" and inserting in lieu thereof "July 1, 1959"; and

(2) by adding at the end of such paragraph the following: "Payment of temporary unemployment compensation under this Act to any individual shall be made only if such individual's first claim under this Act was filed before April 1, 1959."

The SPEAKER. Is a second demanded?

Mr. SIMPSON of Pennsylvania. Mr. Speaker, I demand a second.

Mr. MILLS. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. MILLS. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, on April 1 next, the temporary program enacted by the Congress last year for the payment of additional unemployment compensation expires. When Congress enacted the program it did so with the thought in mind that it would be a temporary program and that all payments under the program would cease on April 1.

The bill before the House provides for a continuation of payments to those who have established claims prior to April 1, not to continue longer than July 1, next. In other words, we have made it possible for people who were eligible, who are now eligible for temporary unemployment compensation, to draw that compensation in accordance with the provisions of the statute, but that no payment may be made beyond July 1, next. The bill is very simple in that respect. It does not do all that many would have had us do, I am certain.

There was a suggestion made that the program should be extended for at least a year or until April 1, 1960. However, Mr. Speaker, when the committee gave consideration to this matter on last Thursday it became quite evident in the committee that if we were to enact a program we must do it by April 1, or in fact, by March 26, if the Congress takes the contemplated Easter recess, and that to do more than we are proposing at this time in the bill would not lead to the enactment of an extension at all. So the committee finally decided, I think by almost a unanimous vote if not a unanimous vote, that we would propose to the House this extension of payments to those people who have established their claim under this program by April 1, so that payments could be made in accordance with the provisions of the program, but that all payments would have to stop by July 1, next.

The Congress in the last session appropriated some $665 million for the program. It is estimated that the cost of the program through March 30 will be approximately $447 million, leaving approximately $218 million appropriated that will not be spent under the existing program.

This extension will apply to approximately 405,000 people and it is estimated that it will cost, out of this $218 million remaining unexpended, some $78 million. When the matter was being considered in the committee, the Department of Labor thought that a number less than 405,000 would be involved and that the total cost of the program would be around $49 million, but upon further consideration the Department of Labor reached the conclusion that this extension would involve an additional $78 million, virtually all of which would be spent within this fiscal year. None of the amounts, except for some slight number of claims that might be in dispute, would carry over into the next fiscal year.

As I say, it does not go as far as some on the committee wanted it to go, but it became quite evident to me that we could not go further than we have gone here and expect to enact a program of any extension whatsoever in this field.

We think that this is the humane thing to do, at least, so that we can prevent an abrupt termination of payments. Some people will have established their eligibility under the program and perhaps have drawn only one week of these extended benefits. Maybe they are entitled in, say, the State of Pennsylvania to some 14 weeks additional. Under this bill those additional payments could be made, but no new cases will be added to the rolls, no new cases will be set up after April 1 for the benefits that are envisioned in this bill.

I trust that the bill will merit approval of the House and that it will be passed by the House.

Mr. Speaker, I ask unanimous consent to include with my remarks a statement that was prepared, at the request of the chairman of the committee, by the Department of Labor setting forth certain pertinent information concerning this program, and also including a number of tables.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The matter referred to follows:

TEMPORARY UNEMPLOYMENT COMPENSATION PROGRAM

1. GENERAL

The Temporary Unemployment Compensation Act of 1958, which became effective June 19, provides that unemployment benefits may be extended to individuals who, since June 30, 1957, have exhausted their benefit rights under State unemployment insurance laws and the unemployment compensation programs for Federal workers, ex-servicemen, and for veterans (UCFE, UCX, and UCV). Temporary benefits are payable to claimants under the laws of States which have entered into agreements with the Secretary of Labor to participate in the program. The States have the option of participating fully, partially, or not at all, in the temporary Federal program. The TUC law expires on March 31, 1959; that is, temporary benefits are not payable for any weeks of unemployment beginning after that date.

2. PARTICIPATING STATES

On February 24, 1959, there were 36 States in which Federal temporary unemployment compensation programs were in effect. Seventeen States had adopted the Federal plan for UI, UCFE, UCX, and UCV exhaustees and another 14 States had adopted the Federal plan for UCFE, UCX, and UCV exhaustees, but had not provided for their State UI exhaustees. Five other States had elected to pay temporary benefits to State UI, UCFE, and UCX exhaustees within the framework of their own laws and adopted the Federal plan only for UCV exhaustees.

The following table indicates States participating in the TUC program and States which have extended benefits under their own law:

State	UI-TUC		UCX-UCFE-TUC		UCV-TUC	
	Exhaustion date	Date benefits payable	Exhaustion date	Date benefits payable	Exhaustion date	Date benefits payable

Wisconsin	do	June 21, 1958	do	June 21, 1958

[a] Colorado law extends benefits by 25 percent rather than 50 percent of regular benefits.
[b] See "Interstate Claims Taking Handbook, Connecticut, Revision of Apr. 16, 1958," for explanation of Connecticut extended benefits.

3. LAG IN THE RECOVERY IN EMPLOYMENT AND UNEMPLOYMENT

As usually occurs when the economy is coming out of a recession, the recovery in employment and the reduction in unemployment is lagging behind the expansion in industrial production and other indicators of economic well being.

Production generally increases before employment rises, partly because employers first lengthen hours of work and partly because output per worker usually rises in this stage of the business cycle. The increased output reflects the technological improvements and more efficient utilization of employees which are emphasized during a period of recovery under highly competitive market conditions. Because of these factors manufacturing output in January 1959 was within 1.2 percent of prerecession production in the third quarter of 1957, while manufacturing employment was still 6.5 percent below the average for that quarter (both figures seasonally adjusted).

Unemployment levels tend to stay high even after employment begins to rise, partly because of technological unemployment in some areas and industries, but largely because the labor force continues to expand even during a recession. As a result, more job opportunities are needed every year to keep unemployment from increasing. Reflecting these factors, total unemployment, and insured unemployment in January 1959 were, on a seasonally adjusted basis, about 40 percent higher than during the third quarter of 1957, even though total employment, seasonally adjusted, had about returned to the levels of that quarter.

4. INSURED UNEMPLOYMENT AND EXHAUSTIONS WILL CONTINUE HIGH

It is estimated that State insured unemployment will remain at high levels through

fiscal year 1960, in spite of continued economic recovery. As will be seen from the following table,[1] average monthly insured unemployment during fiscal year 1960 is estimated at 2,100,000, as compared with an average of 2,250,000 in fiscal year 1959 and 1,284,000 in fiscal year 1957. The lag in reemployment will be principally due to increased productivity per worker and a faster growth in the labor force than in the growth of demand for labor.

As a result of these expected high levels of insured unemployment, exhaustions of benefits are also expected to continue at high levels, averaging about 190,000 a month from April through September 1959. There will be no considerable drop in exhaustions until after October 1959, when 195,000 exhaustions are estimated. Thereafter, it is expected that they will taper off more than insured unemployment, dropping to 130,000 in June 1960 (see following table).

State-insured unemployment level and State UI and UCFE exhaustions—actual, July 1956–January 1959; estimated, February 1959–June 1960

Month in fiscal year	State-insured unemployment (in millions), fiscal year—				State UI and UCFE exhaustions (in thousands), fiscal year—			
	1957	1958	1959	1960	1957	1958	1959	1960
July	1.196	1.269	2.483	2.1	86.6	98.9	285.4	210
August	1.046	1.134	2.175	1.9	88.1	91.6	255.0	190
September	.977	1.151	1.875	1.8	73.5	82.9	237.4	195
October	.868	1.218	1.698	1.7	73.8	94.5	224.3	195
November	1.004	1.492	1.758	1.8	70.4	84.4	177.7	155
December	1.277	2.087	2.088	2.1	73.3	110.6	213.1	165
January	1.727	2.846	2.491	2.6	106.7	147.1	212.4	170
February	1.719	3.133	2.8	2.5	95.2	145.5	195	150
March	1.580	3.244	2.7	2.4	112.5	191.4	200	155
April	1.465	3.274	2.5	2.2	115.1	231.2	195	150
May	1.338	2.957	2.3	2.1	106.5	236.8	175	140
June	1.239	2.643	2.1	1.9	92.5	254.0	170	130
Fiscal year total	1.284	2.193	2.25	2.1	1,094.1	1,768.7	2,540	2,005

5. UNEMPLOYMENT IN 17 PARTICIPATING STATES

Insured unemployment in the 17 fully participating States during the week of February 14, 1959, averaged 6.7 percent. Insured unemployment averaged 5.1 percent in the nonparticipating States. (The Department classified areas with 6 percent or more unemployment as areas of substantial unemployment.) Practically all of these States are industrial and share in the lag in reemployment.

For the week ended February 14, 1959, all but 1 (Delaware) of the 17 States had less insured unemployment than in the corresponding week of 1958. On the other hand, all but the District of Columbia (1.9 percent) and Indiana (4.9 percent) had an insured unemployment rate in excess of 5 percent. (See following table.)

Exhaustions were also higher in January 1959 than in January 1958 in all but 2 of the 17 States; namely, Indiana and Rhode Island. For all of the 17 States, the exhaustions totaled 113,186 in January 1959 as compared with 73,713 in January 1958. From past experience, practically all of these exhaustions will become TUC beneficiaries.

Comparison of State and UCFE insured unemployment and exhaustions with same period in 1958

	Insured unemployment, week ended Feb. 14, 1959			Exhaustions		
	Number	Rate, percent	Change from year ago	January 1959	January 1958	Change from year ago
Alabama	32,607	5.6	−13,703	4,354	3,382	+972
Arkansas	24,005	9.1	−4,301	1,759	1,535	+224
California	230,846	6.1	−84,997	14,740	8,895	+6,845
Delaware	8,427	6.5	+2,289	742	488	+254
District of Columbia	8,359	1.9	−1,764	738	713	+25
Indiana	54,854	4.9	−32,717	6,183	7,213	−1,030
Maryland	46,239	6.2	+1,593	3,795	1,707	+2,088
Massachusetts	89,846	5.8	−20,980	7,352	5,589	+1,763
Michigan	127,873	6.7	−95,130	12,198	9,102	+3,096
Minnesota	47,081	6.8	−8,004	2,953	2,063	+890
Nevada	5,959	8.2	−1,462	464	367	+97
New Jersey	112,716	7.2	−30,096	11,068	9,546	+1,522
New York	337,604	6.5	−23,835	22,206	10,228	+11,978

Rhode Island	18,064	7.2	−8,253	2,055	2,412	−357
West Virginia	35,838	9.3	−7,546	3,606	1,317	+2,289
Total	1,460,020	6.7	−358,808	113,186	73,712	+40,473

6. FUNDS REMAINING AT END OF PRESENT TUC PROGRAM

Through January 1959, almost $350 million had been expended in benefits under the TUC program. It is estimated that $74 million will be paid out in benefits in February and March, making an estimated $434 million that will be expended for benefits during the operation of the program. This will leave a balance of approximately $206 million of the $640 million appropriated for benefits.

It is estimated that $13 million will be spent on State administration of the program through April 1959, assuming that the program ends at that time. This will leave a balance of $12.1 million of the $25.1 million appropriated for State administration. If the program is extended, the balance will be somewhat larger, since there will be some costs of closing out the program in April that would be available for the continued payment of benefits.

It is estimated that the Federal administrative costs, if the program is not extended, will amount to $330,800, leaving a balance of $269,200 of the $600,000 appropriated for Federal administration.

[1] No estimates of total unemployment are presently available. The estimates for insured unemployment contain an allowance for recovery.

	Salaries and expenses	Grants for administration	Benefit payments
Appropriated	$600,000	$25,100,000	$640,000,000
Estimated costs to Apr. 30, 1959	330,800	13,000,000	434,000,000
Estimated balance remaining Apr. 30, 1959	269,200	12,100,000	206,000,000

7. ESTIMATES OF COST OF EXTENSION OF TUC

If the TUC program is extended for 6 months through September 30, 1959, the cost of extension would be $210 million. If provisions were made for a runoff of benefits to those in compensable status at the end of the program, an additional $45 million would be required.

If the TUC program were extended for 15 months through June 30, 1960, under present rules, the cost of extension would be $480 million.

The bases for these estimates are contained in parts A and B which follow:

Part A

Table 1 showing the number of new beneficiaries, average weekly number of beneficiaries, and weeks compensated, by months, July 1958–June 1960.

Table 2 showing the estimated average weekly number of beneficiaries and estimated benefit costs, by calendar quarters, April 1959–June 1960.

Part B

Basic assumptions used in estimating coverage, number of beneficiaries in compensable status, new beneficiaries, average weekly number of beneficiaries, duration of benefits, weeks compensated, average weekly benefit amount, and benefit costs contained in part A.

PART A

PRESENT TUC PROGRAM

TABLE 1.—*New beneficiaries, average weekly number of beneficiaries, weeks compensated for TUC program; actual, July 1958–January 1959; estimated, February 1959–June 1960 [all figures in thousands]*

Year and month	New beneficiaries	Average weekly number of beneficiaries	Number of weeks compensated
1958—July [1]	479	276	1,290
August	278	512	2,160
September	201	527	2,319
October	124	383	1,759
November	115	337	1,348
December	131	319	1,468
1959—January	122	310	1,365
February	112	305	1,127
March	116	290	1,161
July 1958–March 1959	1,678	357	13,937

EXTENSION OF TUC PROGRAM

1959—April	110	271	1,191
May	106	260	1,091
June	111	247	1,088
July	125	249	1,144
August	120	258	1,082
September	115	266	1,169
October	108	263	1,156
November	104	249	1,046
December	100	231	1,064
1960—January	98	224	940
February	96	222	934
March	94	216	994
April	92	207	868
May	84	199	877
June	80	190	838
April 1959–June 1960 [2]	1,808	236	15,482

[1] Includes data for last part of June in 11 States.

[2] Includes 265,000 beneficiaries in compensable status as of Mar. 31, 1959, who must be included in the total count of beneficiaries.

TABLE 2

Calendar quarter	Average weekly number of beneficiaries	Benefit costs
	Thousands	*Millions*
April–June 1959	268	$105
July–September 1959	266	105
October–December 1959	246	101
January–March 1960	220	89
April–June 1960	198	80
15 months	236	480

If the present TUC program were extended to run off an estimated 265,000 beneficiaries in compensable status as of March 31, 1959, these beneficiaries would receive an average of 6 weeks of benefits at an average of $31 per week for a total of about $49 million.

An estimated 264,000 beneficiaries would be in compensable status as of September 30, 1959, and would receive an average of 5.5 weeks of benefits at an average of $31 per week for a total of about $45 million in run-off benefits for unemployment after this date.

A total of about 950,000 beneficiaries, including those in compensable status as of March 31, 1959, would receive an average of 7.1 weeks of benefits at an average of $31 per week for a total of about $210 million if the TUC program were extended 6 months through September 1959.

A total of about 1,800,000 beneficiaries would receive an average 8.6 weeks of benefits at an average of $31 per week for a total of $480 million, if the TUC program were extended 15 months through June 1960.

Extension of TUC program—Part B

The estimates contained in part A were made under the assumptions specified below:

1. Present coverage of States in TUC program: 17 States with full State and Federal UI participation; 14 States with UCFE and UCV participation only; and 5 States with UCV participation only.

2. Assumed State insured unemployment levels and estimated State and UCFE exhaustions for all States are given in table under section 4. To include UCV exhaustions, increase figures in this table by 3 percent (UCV experience).

3. Sixty percent of all State UI, UCFE, UCX, and UCV exhaustions in the 51 States are covered under the TUC program in the 17 fully participating States, 14 UCFE, UCX, and UCV participating States and the 5 UCV-only participating States (current experience).

4. While 80 percent of covered State and Federal UI exhaustees file first claims immediately (current experience) the remaining 20 percent file first claims within a few weeks. Thus 100 percent of covered exhaustees are assumed to file soon after exhausting regular State and Federal UI programs.

5. Ninety-six percent of first claims become beneficiaries (estimated figure adjusted from State UI experience as TUC experience is too unstable).

6. Probability of remaining unemployed for another week is 96 percent.

7. Average potential duration of 11 weeks of benefits per beneficiary based on one-half average potential duration in State and Federal UI programs. (State UI, UCFE experience of 23.4 weeks in October–December 1958.)

8. Average weekly benefit amount of $31 (current TUC experience is slightly below, but is expected to increase).

9. These assumptions are based on an extension of the present law without substantive amendment. Any change in the rules for determining eligibility for TUC benefits would necessitate revision of the estimates.

8. UI COVERED WORKERS IN STATES PARTICIPATING IN THE TUC AND TED PROGRAMS

The following table indicates that 52.5 percent of the covered workers under the UI program in the United States are in the 17 States that have accepted the TUC program and that an additional 17.5 percent are in the 5 States that have extended their own laws to provide for temporary benefits (TED).

	Average number of covered workers	Percent of total
Alabama	584,566	1.4
Alaska	46,946	.1
Arkansas	265,163	.6

9. EXHAUSTIONS OF BENEFITS UNDER THE UI AND UCFE PROGRAMS

The following table shows the number of UI–UCFE exhaustions that occurred in the period July 1, 1957, to July 31, 1958, and each month thereafter through January 1959. Data is shown for the total United States and for the fully participating TUC States. These States show 53.2 percent of U.S. total UI–UCFE exhaustions during the 13-month period (July 1958 through July 1959) and an average of 57.8 percent in the 6-month period (August 1958 through January 1959).

The national total of exhaustions of regular benefits averaged approximately 100,000 per month during calendar year 1957. A sharp rise was experienced during the period January to July 1958, reaching a peak of 284,550 exhaustions in July. There has been some decline since then but the monthly figure still exceeded 200,000 in December 1958 and January 1959. No significant change is anticipated until April when the monthly rate of exhaustions under the UI–UCFE programs is expected to decline gradually to a level of approximately 170,000 in June 1959:

Exhaustions of UI-UCFE benefits

States	July 1, 1957–July 31, 1958	1958					1959, January	Total, July 1, 1957–Jan. 31, 1959

10. NEW BENEFICIARIES UNDER THE TEMPORARY UNEMPLOYMENT COMPENSATION PROGRAM

From the beginning of the TUC program on June 19, 1958, to January 31, 1959, a total of 1,296,141 different individuals have received benefits under the temporary unemployment compensation program. The following table shows the number of new beneficiaries by month for the 17 States fully participating in the TUC program.

Also included in the table are monthly figures for new beneficiaries in the 8 to 14 (varying by month) States which are participating in the TUC program with regard to all Federal (UCV, UCFE, and UCX) programs.

A total of 20,213 different individuals received benefits in these States for the period June 1958 to January 1959. In addition approximately 8,450 persons who exhausted UCV claims received TUC benefits in the 5 States which participate in the TUC program only with respect to UCV exhaustions. These five States have their own temporary benefit (TED) programs which cover UI and UCFE–UCX exhaustees.

It is estimated that 116,000 new beneficiaries will receive their first TUC payment in February and 121,000 additional persons will receive a first payment in March. Thus, by the time the TUC program terminates on March 31, 1959, approximately 1,533,000 different persons will have received at least one weekly payment under the TUC program.

New TUC beneficiaries June 1958 to January 1959

States	1958						1959, January	Total

11. EXHAUSTIONS OF BENEFITS UNDER THE TUC PROGRAM

The following table shows the number of individuals who have exhausted their benefits under the TUC program from July 1958 through January 1959. The number of such individuals was 612,752 and this figure is expected to reach approximately 800,000 by the end of the program on April 1, 1959. It is estimated that there will be approximately 250,000 individuals whose benefits will cease because of the termination of the TUC program. Thus there will have been a total of approximately 1,050,000 individuals whose TUC benefits ceased because of exhaustion of benefits or termination of the program.

As indicated in section 6 of this report, the total number of beneficiaries under the TUC program through March 1959 is estimated to be 1,533,000.

Thus two out of every three TUC beneficiaries were or will be still unemployed when their benefits under the program are exhausted.

Exhaustions of benefits under the TUC program

	July	August	September	October	November	December	January	Total

12. CHARACTERISTICS OF TUC CLAIMANTS

There is very little information currently available on the characteristics of claimants under temporary programs. Because of our urging, all but 2 of the 22 States which have complete temporary programs are going to conduct studies, but most of these will not be completed until after the program has ended. Only 10 States have submitted any material so far and some of this is fragmentary.

While it is difficult to draw conclusions from the spotty information available it is probable that there is little real difference between the claimants under TUC and those under the regular programs that cannot be attributed to the industry from whence the claimants came. In other words, differences between TUC claimants and regular claimants as far as sex, occupations, and geographic locations are concerned can be accounted for by the characteristics of the industry, and when it held its layoffs. (Industries which laid off early in the recession are more highly represented in the TUC programs because claimants had been unemployed long enough to exhaust their regular benefits.)

In addition to differences which can be attributed to the industry, it appears that TUC claimants, particularly men, tend to be older than do claimants under the regular programs.

The most significant data so far comes from New York and Illinois. In New York a higher proportion of TUC claimants than of regular claimants come from the metals, machinery, and transportation equipment industries; a higher proportion are in upstate New York; and a somewhat higher proportion are males.

In Illinois there seemed to be no significant differences between the temporary and regular beneficiaries although proportionately there were somewhat more temporary beneficiaries from the primary metals and electrical machinery industries, and a somewhat higher proportion of women.

The data from the other States indicate that the characteristics of the temporary claimants vary widely from State to State, probably depending upon the industrial composition of the State, the types of workers employed, the extent to which specific industries were affected by the recession, and the timing and duration.

At least two States, Delaware and Rhode Island, believe their data indicate that many temporary claimants are not firmly attached to the labor market—that there is a heavy proportion of older workers drawing pensions.

13. STATUS OF TUC BENEFIT FUNDS AND TUC BENEFIT PAYMENTS BY STATE

Benefit payments from the beginning of the TUC program through January 1959 have totaled $359,693,196. Estimated benefits to be paid in February and March equal $74 million, making a total of approximately $434 million which will have been expended for TUC benefits during the 10 months prior to termination of the program on March 31, 1959.

Table A which follows shows the monthly rate of TUC benefit expenditures including estimates for February and March 1959. This table indicates that approximately $206 million of the $640 million appropriation for benefits will remain unexpended at the end of the program.

The following table B provides the distribution of TUC benefit expenditures by

States and by months from June–July 1958 to January 1959. The table shows that five States, New York, New Jersey, Pennsylvania, California, and Michigan, paid out 75 percent of all TUC funds.

The average duration of benefits under the TUC program has been 9 weeks and the average weekly benefit amount, $31.

TABLE A.—*Status of TUC benefit funds*

Grand total								358,866,903

Mr. SIMPSON of Pennsylvania. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, I join the distinguished chairman of my committee to urge the membership of the House to pass the bill H.R. 5640, which would provide for the phasing out of a program we passed last year commonly referred to as the Temporary Unemployment Compensation Act.

What we did a year ago, I am sure you will recall, was pass a law which took into recognition the facts that, first, persons were drawing unemployment compensation; second, their entitlements to payments were nearing an end; and third, they had not regained employed status. This legislation at the Federal level reflected the fact that the State legislatures were not then in session. Inasmuch as unemployment compensation has been viewed to date as an area in which the State determines the amount of benefits and the periods for which the benefits are available, it was somewhat unusual for the Congress to take even temporary action in this field.

But, I repeat, because the respective State legislatures were not in session, we did take action and we did pass a temporary unemployment compensation program. We provided a substantial amount of money, over $665 million, to take care of this temporary program.

We did not apply any means test whatever. We did it within the framework of the existing State administered programs and in the way that unemployment compensation must be administered; namely, on the basis of giving a man unemployment insurance for which he pays while he works through a tax. Of course, it is a tax paid in fact by his employer. It is money which otherwise might be used to pay him an increased wage. It might otherwise be used to pay dividends. It might otherwise be used for business expansion. It might otherwise be used to afford lower prices to the consumer. But at all events, it is a charge against the product of that man's work and it is used to buy unemployment compensation.

A year ago we provided for 1 year a temporary supplementation of the availability of that program provided the States determined they wanted to accept it on a loan basis and would repay the Federal advances by the imposition of an increased tax, if necessary, upon the employers of their State. That is the law today. It is that law which is scheduled to terminate on April 1.

What your committee has done, and why it is before you at the moment, is to prepare a bill and to recommend its passage to provide an extension beyond April 1 so that unemployed persons eligible for benefits in the phasing-out period may continue to draw benefits under this temporary unemployment compensation program. We are here providing that until those persons' rights under the temporary unemployment compensation law, as it is today, have expired, this law will continue provided that those payments are received by July 1, 1959.

Mr. MASON. Mr. Speaker, will the gentleman yield?

Mr. SIMPSON of Pennsylvania. I yield to my distinguished committee colleague.

Mr. MASON. As the gentleman knows, I opposed any extension of this temporary unemployment compensation. I did agree finally to this tapering off, or feathering off, as it is called, so that it would not end abruptly. But I insisted that no new beneficiaries should be placed on the rolls after April 1.

Mr. SIMPSON of Pennsylvania. I thank the gentleman. I know that he has in mind the fact that the legislatures of practically all the States are in session at this moment. They may pass legislation, if they so desire, which would further continue or increase the benefits under the unemployment compensation programs in effect in the respective States.

Mr. ADAIR. Mr. Speaker, will the gentleman yield?

Mr. SIMPSON of Pennsylvania. I yield.

Mr. ADAIR. Do I understand the gentleman to say that no new appropriations will be required by this legislation?

Mr. SIMPSON of Pennsylvania. No new appropriations will be required. As a matter of fact, as the committee chairman pointed out, the total cost of the bill we passed last year including that which will be authorized in this legislation is approximately $125 million less than we anticipated the cost would be last year.

I support this legislation and urge my colleagues in the House to join in voting for its passage today.

Experience under the temporary unemployment compensation program has found that 17 States have fully participated in the program. These 17 States have 52.5 percent of the workers covered under the unemployment insurance programs. In addition, five States have extended benefits entitlement under temporary programs within the framework of their existing State laws.

Mr. Speaker, we find from our study of the economic indicators that measure the health of our economy that the Nation is well on the way to recovery from the downward adjustment of last year. We find that compared with a year ago we have 700,000 more people working and 400,000 fewer people unemployed. We find the index of industrial production at 143 compared to 133 in 1958 and such other economic indicators as car loadings and personal income rising. I cite these evidences of economic resurgence not in disregard of unemployment levels that in my judgment continue to be too high. Instead, I have referred to them as indications of the economic growth that is ahead.

If this TUC program extension is to be effective, it will be necessary that the legislation be enacted by April 1 of this year. Accordingly, it is my hope that we can pass this legislation at this time so as to permit consideration of the measure in the other body. To those who would like to do more in the areas of Federal legislation on the subject of the unemployment compensation program, I would call attention to the fact

that the Committee on Ways and Means is scheduled to begin hearings on this subject on April 7.

Mr. MILLS. Mr. Speaker, I yield 4 minutes to the gentleman from Missouri [Mr. KARSTEN].

Mr. KARSTEN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous material.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. KARSTEN. Mr. Speaker, in the opening statements, the gentleman from Arkansas [Mr. MILLS] and the gentleman from Pennsylvania [Mr. SIMPSON] have very well and completely explained the intent and scope of the legislation before the House at this time.

It is intended to phase out the temporary unemployment compensation program and is limited to those individuals who are eligible to apply and file vailid claims before April 1, 1959. We have received two estimates as to the number of unemployed involved. The first estimate was 265,000. Later the Labor Department revised those figures to about 405,000. The bill, however, is silent with reference to the remainder of the unemployed, which is estimated at something in excess of 4½ million.

Under this legislation the temporary compensation program will enter the phasing-out stage on April 1, and it will terminate completely on June 30, after which no additional payments may be made. The figures compiled by the Department of Labor disclose that the average benefit period under this phasing-out process will amount to about 6 weeks. In some cases the benefit period would be perhaps as little as 1 week.

Many have asked me why the Committee on Ways and Means selected June 30 as the date to end this program. Some have asked me whether on that date it is expected unemployment will show a substantial decrease. This unfortunately is not the case, and I am afraid I must report that the date June 30 is simply an arbitrary date.

I have tried to answer the inquiries I have received by quoting official estimates of the Bureau of Labor Statistics. The estimates which have been projected through October 1959 show that unemployment will continue at abnormally high rates and that exhaustion of benefits under the various State programs will also continue at high levels. The Department of Labor predicts that in the fiscal year 1960 monthly insured unemployment will be approximately 2.1 million as compared with 2.25 million in 1959. As a result of the expected high levels of insured unemployment, the Department of Labor predicts that exhaustions of benefits from April through September 1959 will average 190,000 a month.

In October we will still be at the very high level of 195,000 exhaustions, and only after that does the Department expect employment conditions will significantly improve.

I should like to include as a part of my remarks the official estimates and predictions of the Department of Labor at this point:

State-insured unemployment level and State UI and UCFE exhaustions—actual, July 1956–January 1959; estimated, February 1959–June 1960

Month in fiscal year	State-insured unemployment (in millions), fiscal year—				State UI and UCFE exhaustions (in thousands), fiscal year—			
	1957	1958	1959	1960	1957	1958	1959	1960
July	1.196	1.269	2.483	2.1	86.6	98.9	285.4	210
August	1.046	1.134	2.175	1.9	88.1	91.6	255.0	190
September	.977	1.151	1.875	1.8	73.5	82.9	237.4	195
October	.868	1.218	1.698	1.7	73.8	94.5	224.3	195
November	1.004	1.492	1.758	1.8	70.4	84.4	177.7	155
December	1.277	2.087	2.088	2.1	73.3	110.6	213.1	165
January	1.727	2.846	2.491	2.6	106.7	147.1	212.4	170
February	1.719	3.133	2.8	2.5	95.2	145.5	195	150
March	1.580	3.244	2.7	2.4	112.5	191.4	200	155
April	1.465	3.274	2.5	2.2	115.1	231.2	195	150
May	1.338	2.957	2.3	2.1	106.5	236.8	175	140
June	1.239	2.643	2.1	1.9	92.5	254.0	170	130
Fiscal year total	1.284	2.193	2.25	2.1	1,094.1	1,768.7	2,540	2,005

Neither the Congress nor the unemployed can take much comfort in these statistics. Instead of a return to normal levels of employment this summer we can expect to see continued serious unemployment over the next several months. In my opinion, if sound reasons exist to extend this program to June 30, the same reasons could and should be applied to extend the program until at least October after which the Department of Labor anticipates employment conditions will improve.

Mr. Speaker, I do not oppose this bill because it contains a little good. I do not support it enthusiastically because it falls far short of any effective relief for the thousands of persons the Department of Labor predicts will exhaust their unemployment benefits under State laws over the next several months. I urge the House to adopt this legislation, and it is my hope that it can be improved in the other body.

Before long the Congress must face up to the real problem of bringing our basic unemployment insurance system up to date. If last year we had enacted the proposed Federal Standards bill, we would not now be faced with the need for another emergency action. If we fail to enact such a bill at this session of Congress we will be faced, in the future, with similar demands for emergency action whenever unemployment reaches disturbing levels. My colleague, Representative MACHROWICZ, of Michigan, and I—with the announced support of more than 130 Members—have introduced bills for a reasonable set of Federal standards which would provide benefit rates of realistic levels and for 39 weeks—such benefits to be available to all covered workers regardless of the level of unemployment or the decision of any given State to participate in a temporary program. The misery of an unemployed worker's family does not depend upon the number of unemployed nor on the State in which he resides.

Mr. MILLS. Mr. Speaker, I yield 6 minutes to the gentleman from Michigan [Mr. MACHROWICZ].

Mr. MACHROWICZ. Mr. Speaker, I have asked for this time merely to make clear, as has already been done by the gentleman from Missouri [Mr. KARSTEN] and the gentleman from Illinois that this is by no means an extension of the present unemployment compensation program but a mere tapering off.

Mr. Speaker, we are considering today merely a continuation of temporary unemployment compensation benefits for an estimated 265,000 unemployed workers for an average of about 6 weeks after April 1.

Under the procedural rule which allows no amendment to be made in this measure on the floor of the House today and recognizing that without its passage these 265,000 unemployed workers would be cut off on the April 1 termination date of the current TUC law, I hope the bill is passed by an overwhelming vote.

But, Mr. Speaker, today we have almost 2 million men and women who are out of work and who have exhausted all their unemployment benefits or were never eligible for any benefits. This bill does nothing for them.

In fact it provides no improved benefits or extended weeks of coverage for 4½ million of the currently unemployed. And it will not help a single one of the estimated 10 to 12 million men and women who will become unemployed through no fault of their own after April 1 and during the next 12 months at various times and for substantial periods.

Mr. Speaker, during the 12 months beginning April 1, 1959, the Labor Department expects an additional 2,125,000 of the unemployed to completely exhaust their unemployment benefits. This figure does not include those most unfortunate among the unemployed who are not covered by unemployment insurance and receive no benefits at all. Of the approximately 2 million unemployed who are not now receiving benefits slightly more than half are from uncovered jobs.

Mr. Speaker, on January 29 of this year when I joined with the gentleman from Missouri [Mr. KARSTEN] and about 130 other colleagues to introduce H.R. 3457, the Federal standards for unemployment compensation bill, I said:

> It may well be, Mr. Speaker, that we shall have to provide for some extension of the temporary unemployment compensation bill which is now due to expire April 1, 1959.
>
> * * * But such extension, if made, must not be allowed to become a substitute for action on this substantial and permanent improvement in the entire Federal-State unemployment compensation system.

With all the good will and hard work of which the 86th Congress and the American people are capable in the next 2 years, large-scale unemployment is all too likely to continue to be a major problem.

And I called attention to the role of advancing technology, including automation and of corporation pricing policies in relation to our continuing mass unemployment.

Mr. Speaker, I am sorry to report that last Thursday before the Ways and Means Committee, the Labor Department witness confirmed my fears about stubborn hard core unemployment. It is still with us. Recovery in employment and in the reduction of unemployment are lagging far behind the expansion of production.

For example, the Department reports that manufacturing output in January of this year "was within 1.2 percent of prerecession production in the third quarter of 1957, which manufacturing employment was still 6.5 percent below the average for that quarter."

And we learned this revealing fact regarding our 1959 economic situation: In January 1959 unemployment in the whole economy was 40 percent higher than in the prerecession last quarter of 1957 although employment was about the same if all figures were seasonally adjusted.

The economic effect of the increasing efficiency of our industrial plant, including automation, is heightened by the fact that the labor force continues to expand even during the recession.

We are therefore not only continually able to produce more goods with fewer workers but we have continually more men and women for whom jobs must be provided or unemployment will increase. Our economy is not expanding fast enough to supply these jobs.

For this reason the work-force side of our economy will present no picture of emerging health in the year ahead. While the production picture is improving gradually, the unemployment picture improves at an excruciatingly slow rate.

Mr. Speaker, we cannot ignore these basic facts about our unemployment problem. It would be irresponsible and economically stupid of us to be guided by the mirage of production performance and stock prices in our decisions here on this floor concerning the economic health of this Nation.

The Labor Department figures show, that even allowing for the recovery which the administration expects, about 190,000 people a month will run out of benefits and still be without jobs right on through this recovery year.

Mr. Speaker, I said here in January and I say again today, we cannot do the whole job of putting idle men and machines and capital back to work through improvements in our unemployment compensation system. We need a whole kit of measures to do that—measures on which I hope the 86th Congress will act courageously in the critical months ahead. But we can do a part of this job by increasing benefit levels, extending the weeks of coverage, covering additional people, and providing for reinsurance to realistically help cushion the blows of the kind of recession we are now undergoing. Had the Federal standards bill been enacted in the last Congress we could now look forward, beginning July of this year, to its substantial material aid to millions of unemployed and to its significant assistance to recovery by way of circulation of fast moving dollars in the communities where sales most need stimulation.

We have this measure before us which goes just a little way to help. I hope it passes. If it comes back to conference from the Senate I hope our conferees and the Members from the other body in conference will reform it to meet the awesome need of the currently unemployed and of those who will become unemployed prior to the effective date of proposed Federal standards legislation.

And, Mr. Speaker, I hope that the Congress subsequently this year, with the inescapable lesson of the inadequacy of temporary measures and the huge hard fact of continuing mass unemployment, will act to substantially strengthen that massive bulwark of personal dignity and economic stability which is our great Federal-State unemployment compensation system.

Mr. SIMPSON of Pennsylvania. Mr. Speaker, I have no further requests for time.

Mr. MILLS. Mr. Speaker, I yield the remainder of the time on this side to our majority leader, the gentleman from Massachusetts [Mr. McCORMACK].

Mr. McCORMACK. Mr. Speaker, it is very important that we notice, and pay attention to and evaluate certain unusual phenomena which have taken place during the present recession. If you analyze objectively the present recession you will find one significant factor is that as business gets better large unemployment still remains. You will also find that the unemployment problem in this recession has been worse than in any other post-war recession.

You will also find, adjusted for seasonal factors, that unemployment last August reached a peak of 7.5 percent of the labor force. During the recession period in 1949–50 it was slightly under 7 percent and in the period of 1953–1954 it barely touched 6 percent. More alarming, unemployment has remained at a high level despite rising business activity.

I refer to the August figure of 7.5 percent of unemployment. This dropped in November 1958 to 5.7 percent. In December it went up to 6 percent and in January of this year it went up to 6.2 percent.

In January, 4,700,000 persons were out of work, 200,000 more than in January of 1958, with our gross national product higher in January of this year than it was in January last year. With our labor force growing all the time to get unemployment in 1959 down to a 5 percent basis, which some are talking now as a percentage of unemployment, we will have to live with but which is a sad admission of defeat, I repeat, with our labor force growing all the time to get unemployment in 1959 down to 5 percent we will have to add another 2,200,000 jobs this year. Furthermore, the period of unemployment is now longer than in past recessions. The layoffs were broader than in the 20-, 30-, and in the early 40-year groups, due mainly to seniority rights; but whenever older workers have lost jobs they find it harder to get one back.

Also, as unemployment increased, the price level did not decrease, but in fact, increased.

These are all factors that are going to live with us. In a number of our States there is a persistent unemployment, for example, in Michigan because of automobiles; in Pennsylvania mainly because of steel, coal, and the railroads; in New York, New Jersey, Connecticut, Illinois, Indiana, Ohio, Maryland, and Alabama because of a variety of hard goods industries; in Massachusetts, Maine, and Rhode Island, chiefly because of the textile industry; in West Virginia, Kentucky, Montana, Colorado, and Minnesota, because of the mining situation.

Mr. Speaker, this bill does some good. Like those who have preceded me, I hope the bill will pass. I am aware of certain factors and intangibles that existed, and I am sorry they existed in the minds of some who should have been advocating the extension of 1 year. While I would like to see an extension for 1 year, nevertheless this bill is going to do some good for anywhere from 265,000 unemployed workers to 405,000, whichever might develop between now and June 30.

However, Mr. Speaker, I took the floor to call attention of the Members of Congress that we have a persistent unemployment situation existing in our country that we cannot ignore and that must be given early consideration.

Mr. MILLS. Mr. Speaker, I ask unanimous consent that all Members desiring to do so may have 5 legislative days in which to extend their remarks at this point in the RECORD on this bill.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. GALLAGHER. Mr. Speaker, in voting for this extension I do so with great reservation. I can only favor this bill because to fail to do so would doom any extension of the Temporary Unemployment Compensation Act due to expire March 31. And those now eligible for 39 weeks' benefits would abruptly find their qualification entitles them to only 26 weeks of benefits after March 31.

This bill is wholly inadequate to meet the problems of depressed labor areas. Today, unemployment is even greater than it was when the original legislation was enacted. The emergent need to assist a person who wants but cannot find a job has not diminished. Unemployment has increased. Distressed labor areas have grown.

Employment opportunity has not kept abreast of the increase in the business cycle since the end of the 1958 recession.

We cannot ignore mounting unemployment. I support this measure with the great hope that we shall immediately set out to overhaul the permanent program of unemployment compensation benefits through the addition of mini-

mum Federal standards which the States must follow.

Let us also set out immediately to face the reality that there is large scale unemployment in America. Let us not approach this problem merely from a standpoint of statistics. Let us approach the solution of the unemployment problem in terms of people—people and families who want jobs and security and not merely the right to collect unemployment compensation.

We must take a realistic approach in the search for a vigorous program that will provide our country with full employment and full production.

Mr. DONOHUE. Mr. Speaker, I most earnestly hope that the House will suspend the rules and unanimously vote in favor of H.R. 5640, to provide a continuation of unemployment benefit payments.

However, I would like to state my opinion that this measure is unfortunately and seriously deficient in meeting the requirements of the current situation, and it extends too little assistance to the families of the more than 4½ million Americans who are unemployed.

Mr. Speaker, legislation more important in scope may be later presented to this House, but I doubt very much that we will deal with any legislation this session that will be more vitally important in nature than this measure we are now considering.

This unemployment problem goes right to the heart of the morale of the American people, and it provides an unhappy comparison of what the Congress is asked to do in helping our foreign allies and what we are requested to do to assist millions of Americans who are in desperate need. I submit that none of our diplomatic overtures, military aid supports, or foreign assistance programs can be successfully carried on without the backing of an American people possessed of a high morale.

I further submit that such a high morale cannot be asked or expected of our people unless the actions of this Congress convince them that this body is primarily concerned with the sufferings and the needs of our our United States citizens. We have no right to request our people to persevere in their heavy taxation burdens in support of our foreign objectives if we remain indifferent to the unemployment hardships affecting more than 4½ million persons here at home.

Beyond granting a very limited measure of help to a comparatively restricted few, the only other thing this current bill does is to emphasize the imperative necessity for basic revision of the whole unemployment compensation program. There are many adequate bills for this good purpose pending, and I hope the committee and the Congress will deal patriotically and effectively with them before further distress and hardship is imposed upon many more millions of American taxpayers who want to work but can find no employment through no fault of their own.

Meanwhile, on the eve of the birthday of the great St. Patrick, and in the spirit of his renowned concern for the needy and the distressed, I urge you to adopt this bill, as a temporary measure, without further delay.

Mr. BOLAND. Mr. Speaker, I rise in favor of H.R. 5640, a bill to extend the time during which certain individuals may continue to receive temporary unemployment compensation.

This legislation would extend the time from April 1, 1959 to July 1, 1959, during which unemployed persons who have established a claim to temporary unemployment compensation before April 1 may receive such payments.

MANY DRAWING TEMPORARY BENEFITS IN MASSACHUSETTS

Mr. Speaker, in the Commonwealth of Massachusetts, which has been hard hit by the current recession, there were 13,496 unemployed persons drawing unemployment benefits on February 28 last under the Temporary Unemployment Compensation Act of 1958. A week later, on March 7, 1,647 new claims were initiated under provisions of the act. If this bill is not passed by the Congress, I am sure that more than 15,000 unemployed persons in Massachusetts alone, and many more thousands in other industrial States, will be cut off on April 1, from receiving badly needed income for their families in the form of extended unemployment benefits payments.

I urge my colleagues to consider these unfortunate victims of the recession and vote with me in favor of this legislation.

Mr. VANIK. Mr. Speaker, although I support H.R. 5640 to extend temporary unemployment compensation benefits to July 1, 1959, I regret the inadequate nature of this legislation.

It makes no provisions for those of the unemployed who will exhaust their rights under State laws after April 1, 1959, or the millions of unemployable workers who are currently unemployed.

The time is long overdue for Congress to take some positive steps to make provisions for the unemployed and recognize its obligations under the Full Employment Act of 1946.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

SELF-EMPLOYED INDIVIDUALS' RETIREMENT ACT OF 1959

Mr. KEOGH. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 10) to encourage the establishment of voluntary pension plans by self-employed individuals.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Self-Employed Individuals' Retirement Act of 1959".

SEC. 2. DEDUCTIONS OF AMOUNTS PAID AS RETIREMENT DEPOSITS.

(a) ADJUSTED GROSS INCOME.—Section 62 of the Internal Revenue Code of 1954 (relating to definition of adjusted gross income) is amended by inserting after paragraph (6) the following new paragraph:

"(7) DEDUCTION OF AMOUNTS PAID AS RETIREMENT DEPOSITS.—The deduction allowed by section 217."

(b) ALLOWANCE OF DEDUCTION.—Part VII of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to additional itemized deductions for individuals) is amended by renumbering section 217 as section 218 and by inserting after section 216 the following new section:

"SEC. 217. AMOUNTS PAID AS RETIREMENT DEPOSITS.

"(a) GENERAL RULE.—In the case of a self-employed individual, there shall be allowed as a deduction amounts paid by him within the taxable year as retirement deposits. Any amount paid by an individual as a retirement deposit on or before the 15th day of the fourth month following the close of the taxable year may, at his election (made under regulations prescribed by the Secretary or his delegate), be treated as having been paid on the last day of such taxable year. No deduction shall be allowed under this section for any taxable year of the taxpayer begininng after he attains age 70.

"(b) LIMITATIONS.—

"(1) ANNUAL LIMIT.—Except as provided in paragraph (2), the amount allowable under subsection (a) to any self-employed individual for any taxable year shall not exceed whichever of the following is the lesser:

"(A) $2,500, or

"(B) 10 percent of his net earnings from self-employment (as defined in subsection (d)).

"(2) ANNUAL LIMIT FOR INDIVIDUALS ATTAINING AGE 50 BEFORE 1959.—In the case of any individual who attained age 50 before January 1, 1959, the annual limit for the taxable year provided by paragraph (1) shall be increased by one-tenth for each full year of his age in excess of 50, determined as of January 1, 1959.

"(3) LIFETIME LIMIT.—The aggregate amount allowed as deductions to an individual under subsection (a) for all taxable years during his lifetime shall not exceed an amount equal to 20 times the maximum annual deduction allowable if the annual limit provided in paragraph (1) (A) (computed without the application of paragraph (2)) were the only annual limit.

"(4) LIFETIME LIMIT FOR PARTICIPANTS IN CERTAIN EMPLOYEE PLANS.—In the case of an individual who—

"(A) for any prior taxable year has received any amount under an employee plan (as defined in subsection (c)(2)(B)), or

"(B) at the close of the immediately preceding taxable year, has nonforfeitable rights in any such plan,

if any portion of such amount or rights is attributable to an employer contribution, the lifetime limit provided in paragraph (3) shall be computed by using (in lieu of 20) a lesser number, equal to 20 reduced by the number of years of such individual's service to which his rights under such plan are attributable.

"(c) SELF-EMPLOYED INDIVIDUAL DEFINED.—

"(1) IN GENERAL.—For purposes of this section, the term 'self-employed individual' means, with respect to any taxable year, any individual who is subject to tax for the taxable year under section 1401 (imposing a tax on self-employment income), or who would be subject to such tax for the taxable year but for—

"(A) paragraph (4) (relating to ministers of a church and members of a religious order) or paragraph (5) relating to physicians, etc.) of section 1402(c), or

"(B) section 1402(b)(1) (relating to reduction of net earnings for wages paid).

"(2) INDIVIDUALS COVERED BY CERTAIN EMPLOYEE PLANS.—

"(A) IN GENERAL.—Notwithstanding paragraph (1), the term 'self-employed individual', with respect to any taxable year, does not include an individual—

"(i) who during such taxable year receives an amount any portion of which is attributable to an employer contribution under an employee plan, or

"(ii) in respect to whom during such taxable year an employer contribution is made (or treated under section 404(a)(6) as having been made) under an employee plan, whether or not such individual's rights under the plan are nonforfeitable.

"(B) EMPLOYEE PLAN DEFINED.—For purposes of subparagraph (A) of this paragraph and subsection (b)(4), the term 'employee plan' means —

"(i) a pension, profit-sharing, or stock bonus plan described in section 401(a) which is exempt from tax under section 501(a), or an annuity plan meeting the requirements of section 401(a)(3), (4), (5), and (6), or

"(ii) a pension plan established for its employees by the United States or any agency thereof, by a State or Territory or the District of Columbia or any political subdivision or instrumentality thereof, or by any organization described in section 501(c)(3) (relating to religious, charitable, etc., organizations) which is exempt from tax under section 501(a).

For purposes of this subparagraph, references to provisions of this chapter shall be treated as including references to the corresponding provisions of the Internal Revenue Code of 1939.

"(d) NET EARNINGS FROM SELF-EMPLOYMENT DEFINED.—For purposes of this section, the term 'net earnings from self-employment' means the net earnings from self-employment as defined in section 1402(a), but determined—

"(1) without regard to paragraphs (4) and (5) of section 1402(c), and

"(2) without regard to items which are not included in gross income for purposes of this chapter, and the deductions properly allocable to or chargeable against such items.

"(e) RETIREMENT DEPOSIT DEFINED.—For purposes of this section, the term 'retirement deposit' means a payment in money to—

"(1) a restricted retirement fund (as defined in section 405(a)), or

"(2) a domestic life insurance company (as defined in section 801) as premiums under a restricted retirement policy issued on the life of the taxpayer.

In the case of premiums described in paragraph (2), only that portion of such premiums which (under regulations prescribed by the Secretary or his delegate) is properly allocable to the cost of restricted retirement benefits shall be allowable as a deduction under this section.

"(f) RESTRICTED RETIREMENT POLICY DEFINED.—

"(1) IN GENERAL.—For purposes of this section, the term 'restricted retirement policy' means a contract (other than a term insurance contract) which is an annuity, endowment, or life insurance contract, or combination thereof—

"(A) issued by a domestic life insurance company (as defined in section 801) on the life of the taxpayer,

"(B) which provides for the payment of restricted retirement benefits, and

"(C) which meets the requirements of paragraph (3).

"(2) RESTRICTED RETIREMENT BENEFITS.—For purposes of paragraph (1)(B), a policy shall be treated as providing restricted retirement benefits only if it provides that the entire value of the policy is payable in one or more of the following methods:

"(A) to the insured not later than at age 70½,

"(B) to the insured as a life annuity (which may provide for a minimum term certain not extending beyond his life expectancy), beginning not later than at age 70½,

"(C) to the insured and his spouse as a joint life annuity or as a joint and survivor annuity (which may provide for a minimum term certain not extending beyond the insured's life expectancy), beginning not later than the time the insured attains age 70½, or

"(D) to the insured (or, in the event of his death, to his beneficiary) as an annuity certain beginning not later than the time the insured attains age 70½ and not extending beyond his life expectancy.

No annuity shall be treated as satisfying the requirements of subparagraph (B), (C), or (D) if it provides for payments which (after annuity payments begin) may increase for any reason other than dividends or increases in investment income allocable to the policy.

"(3) RESTRICTED RETIREMENT POLICIES MUST BE NONASSIGNABLE, ETC.—

"(A) IN GENERAL.—To meet the requirements of this paragraph, a policy—

"(i) shall be nonassignable, and no person other than the insured shall have any of the incidents of ownership, and

"(ii) shall not provide for life insurance protection after age 70½.

"(B) SPECIAL RULES.—For purposes of subparagraph (A)(i), there shall not be taken into account—

"(i) the right to make any designation described in paragraph (2),

"(ii) the right to designate one or more beneficiaries to receive the proceeds payable in the event of death of the insured before he attains age 70½, and

"(iii) any designation made pursuant to a right described in clause (i) or (ii).

"(g) IDENTIFICATION OF POLICIES AND FUNDS.—

"(1) POLICIES.—No deduction shall be allowed under this section with respect to any amount paid as a premium on a restricted retirement policy for any period before such policy has been identified as such, in such manner and form as the Secretary or his delegate shall by regulations prescribe.

"(2) FUNDS.—No deduction shall be allowed under this section with respect to any amount paid to a restricted retirement fund by any individual before such fund has been identified as such, and before such individual has been identified as a participant in such fund, in such manner and form as the Secretary or his delegate shall by regulations prescribe.

"(h) FACE-AMOUNT CERTIFICATES.—For purposes of this title, any reference to a restricted retirement policy as defined in subsection (f) of this section shall be treated as including a face-amount certificate, as defined in section 2(a)(15) of the Investment Company Act of 1940 (15 U.S.C., sec. 80a–2), issued after December 31, 1954, but only if such certificate provides restricted retirement benefits within the meaning of subsection (f)(2) and meets the requirements of subsection (f)(3). With respect to any face amount certificate described in the preceding sentence, references to an insurance company or the insurer in this section and sections 78, 6047, and 7207 shall be treated as including a reference to the company issuing such certificate.

"(i) CROSS REFERENCES.—

"(1) For taxation of amounts received from a restricted retirement fund or policy, see section 78.

"(2) For provisions relating to information requirements with respect to restricted retirement funds and policies, see section 6047."

(c) CLERICAL AMENDMENT.—The table of sections for such part VII is amended by striking out the last item and inserting in lieu thereof the following:

"SEC. 217. Amounts paid as retirement deposits.

"SEC. 218. Cross references."

SEC. 3. AMOUNTS RECEIVED FROM RESTRICTED RETIREMENT FUNDS OR POLICIES.

(a) GENERAL RULE.—Part II of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to items specifically included in gross income) is amended by adding at the end thereof the following new section:

"SEC. 78. AMOUNTS RECEIVED FROM RESTRICTED RETIREMENT FUNDS OR POLICIES.

"(a) RESTRICTED RETIREMENT FUNDS.—

"(1) IN GENERAL.—Except as otherwise provided in this section, amounts of money and the fair market value of property received from a restricted retirement fund shall be included in the recipient's gross income for the taxable year in which received.

"(2) SPECIAL RULES.—In the case of a restricted retirement fund—

"(A) RETURN OF EXCESS CONTRIBUTIONS.—There shall be excluded from gross income any amount received which has become an excess contribution by reason of the disallowance of a deduction taken with respect to amounts paid to the fund, but only if such excess contribution (and the income attributable thereto) is returned as provided in section 405(c)(2)(D). The exclusion provided by this subparagraph shall not apply to income attributable to any such excess contribution.

"(B) CONTRIBUTIONS KNOWN TO BE EXCESSIVE.—If at any time an individual knowingly makes contribution to one or more restricted retirement funds in excess of the amount which he reasonably believes will be allowable as a deduction for such contributions for the taxable year, his entire interest in all restricted retirement funds shall be treated for purposes of paragraph (1) as amounts received during such taxable year.

"(C) DISTRIBUTION OF ANNUITIES.—Notwithstanding any other provision of this subtitle, no amount shall be includible in gross income by reason of the receipt of an annuity contract from such fund, if such contract and the distribution thereof meets the requirements of section 405.

"(3) PROHIBITED TRANSACTIONS, ETC.—If the trustee of a restricted retirement fund knowingly engages in a prohibited transaction (within the meaning of section 405(d)(3)), the member (or members) in respect of whom such transaction occurred shall be treated as having received, in his taxable year in which such transaction occurred, his entire interest in the fund. The period for assessing a deficiency for any taxable year, to the extent attributable to the interest described in the preceding sentence, shall not expire before one year after the date on which the Secretary or his delegate is notified, in such manner as he shall by regulations prescribe, of such prohibited transaction.

"(4) BASIS.—The adjusted basis of any person in a restricted retirement fund shall be zero.

"(b) POLICIES.—

"(1) GENERAL RULE.—Any amount received under a restricted retirement policy shall be taxable under section 72 (relating to annuities) with the modifications set forth in paragraph (2).

"(2) APPLICATION OF SECTION 72.—In applying section 72 for purposes of paragraph (1)—

"(A) Section 72(e)(3) shall not apply.

"(B) Notwithstanding section 72(e)(1)(B), any amount received before the annuity starting date shall be included in the recipient's gross income for the taxable year in which received to the extent that—

"(i) such amount, plus all amounts received by all persons under such policies and includible in gross income under this subparagraph, does not exceed

"(ii) the aggregate amount allowed under section 217 with respect to the policy for the taxable year and all prior taxable years.

"(C) In computing—

"(i) the aggregate amount of premiums or other consideration paid for the policy for purposes of section 72(c)(1)(A) (relating to investment in contract), and

"(ii) the aggregate premiums or other consideration paid for purposes of section 72(e)(1)(B) (relating to certain amounts not received as an annuity),

there shall not be taken into account any amount allowed as a deduction under section 217, nor (as determined under regulations prescribed by the Secretary or his delegate) any portion of the premiums or other consideration which is properly allocable to other than the cost of restricted retirement benefits (within the meaning of section 217(f)(2)). Proper adjustment to basis, or premiums or other consideration paid, shall be made for advances which are treated as income under paragraph (3)(B), and shall have been repaid.

"(3) SPECIAL RULES.—In the case of a restricted retirement policy—

"(A) PROCEEDS OF LIFE CONTRACTS PAYABLE BY REASON OF DEATH.—Paragraph (1) shall not apply to the extent that amounts received under a life insurance contract by reason of the death of the insured exceed the cash surrender value of such contract immediately before the death of the insured, and to such extent such amounts shall be treated as provided in section 101.

"(B) BORROWING, PURCHASE OF INSURANCE.—

"(i) If during any taxable year of the insured any part of the value of the policy is borrowed by the insured from the insurer, the amount so borrowed shall be treated for purposes of paragraph (1) as having been received by the insured under the policy during such taxable year. This clause shall not apply to a borrowing in an amount not in excess of the current annual premium, if applied to the payment of such premium and if repaid in full within 12 months after the due date of such premium.

"(ii) If, under any option or under any other arrangement with the insurance company, any amount of the value of a restricted retirement policy is applied to the purchase of other than restricted retirement benefits (within the meaning of section 217(f)(2)), the entire cash surrender value of such policy at such time shall be treated for purposes of paragraph (1) as an amount received under such policy, except to the extent that such value is within 60 days after such time irrevocably converted into a contract which provides only such restricted retirement benefits.

"(iii) This subparagraph shall not apply in the case of any borrowing or any purchase, to the extent that the aggregate amount which has been so borrowed or applied does not exceed the cash surrender value at the time the policy (or a predecessor policy) became a restricted retirement policy.

"(C) ASSIGNMENT OF CONTRACT.—If during any taxable year the insured assigns (or agrees to assign) any portion of the value of the policy in violation of section 217(f)(3), the entire cash surrender value of such policy at such time shall be treated for purposes of paragraph (1) as an amount received under such policy.

"(D) TAXATION OF CASH SURRENDER VALUE ON DEATH BEFORE AGE 70½.—If the insured dies before he attains age 70½, the entire cash surrender value of a restricted retirement policy shall be treated for purposes of paragraph (1) as an amount received under the policy, except to the extent that such value is applied to provide an immediate annuity for his surviving spouse which will be payable for her life (or for a term certain not extending beyond her life expectancy).

"(c) COMPUTATION OF TAX.—

"(1) AMOUNTS TO WHICH SUBSECTION APPLIES.—This subsection shall apply only to amounts (other than dividends) referred to in subsection (a) or (b) which are received by any person while the self-employed individual is living and has not attained age 64½ and includible in such person's gross income.

"(2) INCOME TO BE SPREAD FOR PURPOSES OF COMPUTATION.—

"(A) IN GENERAL.—If the aggregate of the amounts to which this subsection applies received by any person in his taxable year equals or exceeds $2,500, the increase in his tax for the taxable year in which such amounts are received shall not be less than 110 percent of the aggregate increase in taxes, for the taxable year and the 4 immediately preceding taxable years, which would have resulted if such amount had been included in such person's gross income ratably over such taxable years.

"(B) PERIOD WHERE DEDUCTIONS HAVE BEEN TAKEN FOR LESS THAN 4 YEARS.—If the self-employed individual has been allowed deductions under section 217 for a number of prior taxable years less than 4, subparagraph (A) shall be applied by taking into account a number of taxable years immediately preceding the taxable years in which the amount was so received equal to such lesser number.

"(3) AMOUNTS AGGREGATING LESS THAN $2,500.—If paragraph (2) does not apply to a person for the taxable year, the increase in tax of such person for the taxable year attributable to the inclusion in gross income of amounts to which this subsection applies shall be 110 percent of such increase (computed without regard to this paragraph).

"(d) LUMP SUM DISTRIBUTIONS OF ENTIRE INTEREST.—

"(1) APPLICATION OF SUBSECTION.—This subsection shall apply—

"(A) in the case of a self-employed individual, if—

"(i) after attaining age 64½ he receives within 1 taxable year his entire interest under all his restricted retirement funds and policies,

"(ii) he has been allowed deductions under section 217 for 5 or more prior taxable years (whether or not consecutive), and

"(iii) no person has theretofore received any amount under any of his restricted retirement funds or policies (other than dividends on such policies); and

"(B) in the case of the estate or other beneficiary of a decreased self-employed individual, if there is received by such beneficiary within one taxable year such beneficiary's entire interest under all restricted retirement funds and policies of the deceased.

"(2) LIMITATION ON TAX.—In any case to which this subsection applies, the tax attributable to the amounts so received for the taxable year in which so received shall not be greater than 5 times the increase in tax resulting from the inclusion in gross income of the recipient of 20 percent of the amount so received which is includible in gross income.

"(e) DETERMINATION OF TAXABLE INCOME.—Notwithstanding section 63 (relating to definition of taxable income), for purposes only of computing the tax under this chapter attributable to amounts includible in gross income by reason of this section, the taxable income of the recipient for the taxable year of receipt (and for any other taxable year involved in the computation under subsection (c)) shall be treated as being not less than the amount by which—

"(1) the aggregate of such amounts so includible in gross income, exceeds

"(2) the amount of the deductions allowed for such taxable year under section 151 (relating to deductions for personal exemptions).

In any case in which the preceding sentence results in an increase in taxable income for any taxable year, the resulting increase in the taxes imposed by section 1 or 3 for such taxable year shall not be reduced by any credit under part IV of subchapter A (other than section 31 thereof) which, but for this sentence, would be allowable.

"(f) DEFINITIONS.—For purposes of this section—

"(1) SELF-EMPLOYED INDIVIDUAL.—The term 'self-employed individual' means an individual who has been allowed a deduction under section 217 for any taxable year.

"(2) DIVIDEND.—The term 'dividend' means any amount received, by a policyholder of a restricted retirement policy in his capacity as a policyholder, which is in the nature of a dividend or similar distribution.

"(3) RESTRICTED RETIREMENT FUND.—The term 'restricted retirement fund' means any fund (including a predecessor fund) with respect to which the self-employed individual has been allowed a deduction under section 217 for any taxable year.

"(4) RESTRICTED RETIREMENT POLICY.—The term 'restricted retirement policy' means any policy (including a predecessor policy) with respect to which the self-employed individual has been allowed a deduction under section 217 for any taxable year."

(b) TECHNICAL AMENDMENTS.—

(1) Section 72(m) of the Internal Revenue Code of 1954 (relating to cross references) is amended to read as follows:

"(m) CROSS REFERENCES.—

"(1) For special rules relating to amounts received under restricted retirement policies, see section 78.

"(2) For limitations on adjustments to basis of annuity contracts sold, see section 1021."

(2) Section 316(b)(1) of the Internal Revenue Code of 1954 (relating to definition of dividends) is amended by adding at the end thereof the following new sentence: "The definition in subsection (a) shall not apply to the term 'dividend' as used in section 78 (relating to amounts received under restricted retirement funds and policies) or in section 217 (relating to deduction for retirement deposits)."

(c) CLERICAL AMENDMENT.—The table of sections for part II of subchapter B of chapter 1 of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new item:

"Sec. 78. Amounts received from restricted retirement funds or policies."

SEC. 4. RESTRICTED RETIREMENT FUNDS.

(a) DEFINITION.—Part I of subchapter D of chapter 1 of the Internal Revenue Code of 1954 (relating to pension, profit-sharing, stock bonus plans(etc.) is amended by adding at the end thereof the following new section:

"SEC. 405. RESTRICTED RETIREMENT FUNDS.

"(a) IN GENERAL.—For purposes of this chapter and section 6047, the term 'restricted retirement fund' means a trust established under a retirement plan for one or more self-employed individuals.

"(b) RETIREMENT PLAN.—For purposes of subsection (a), the term 'retirement plan' means a trust instrument for the exclusive benefit of the participating individual or individuals who are members of the plan, for the purpose of investing and reinvesting, and of distributing to the respective members of the plan, or to their estates or other beneficiaries, the corpus and income of the trust.

"(c) REQUIREMENTS FOR RETIREMENT PLAN.—A plan described in subsection (b) shall be

treated as a retirement plan only if the requirements of paragraphs (1), (2), and (3) of this subsection are met:

"(1) TRUSTEE MUST BE BANK.—The trustee is a bank (as defined in section 581).

"(2) TERMS OF TRUST.—Under the trust instrument—

"(A) INTEREST NONASSIGNABLE.—A member may not assign (or agree to assign) any portion of his interest in the fund, but he may—

"(i) designate one or more beneficiaries in the event of his death, or

"(ii) direct the trustee to transfer his entire interest to another restricted retirement fund designated by such member.

"(B) TERMINATION OF TRUST, ETC.—

"(i) Before the member attains age 70, his entire interest in the trust will be distributed or applied to the purchase of an annuity described in subparagraph (B), (C), or (D) of section 217(f)(2) which does not provide life insurance protection, and which is immediately distributed to the member, or he will have elected to have his entire interest in the trust distributed before he attains age 80 (with not less than 10 percent of the value of such interest, determined at age 70, being distributed in each taxable year beginning with the taxable year in which he attains age 70).

"(ii) If the member dies before he attains age 70, his entire interest in the trust will, within 5 years after the date of his death, be distributed, or applied to the purchase of an immediate annuity for his surviving spouse which will be payable for her life (or for a term certain not extending beyond her life expectancy) and which will be immediately distributed to such spouse.

"(C) INTERESTS TO BE PROPORTIONATE.—If the trust has more than one member, the interest of each member shall be proportionate to the money he has paid in (or his interest which has been transferred thereto in accordance with subparagraph (A)(ii)), and to the income and other adjustments properly attributable thereto.

"(D) RETURN OF EXCESS CONTRIBUTIONS.—The trustee is required to distribute promptly to the member, any amount paid in by him for any taxable year in excess of the amount deductible by such member for such year under section 217, together with all income attributable to such excess.

"(3) PERMISSIBLE INVESTMENTS.—Under the trust instrument, the trustee may not invest or reinvest the corpus or income of the trust other than in—

"(A)(i) stock or securities listed on a securities exchange which is registered with the Securities and Exchange Commission as a national securities exchange (not including stock and securities in a corporation if, immediately after the acquisition thereof, the aggregate ownership of voting stock in such corporation by the trust and by its members (including ownership attributed to such members under section 318) is more than 10 percent of such voting stock), (ii) bonds or other evidences of indebtedness issued by the United States, any State or Territory, or the District of Columbia, or any political subdivision or instrumentality of any of the foregoing, and (iii) stock in a regulated investment company meeting the requirements of section 851; and

"(B) the purchase, for the account in the plan of a member thereof, of an annuity on the life of such member (or a face-amount certificate which meets the requirements of section 217(h)) which provides only restricted retirement benefits (within the meaning of section 217(f)(2)).

"(d) REQUIREMENTS FOR EXEMPTION FROM TAX.—

"(1) IN GENERAL.—A restricted retirement fund which has engaged in a prohibited transaction shall not be exempt from taxation under section 501(a).

"(2) TAXABLE YEARS AFFECTED.—Paragraph (1) shall apply only for taxable years after the taxable year during which the fund is notified by the Secretary or his delegate that it has engaged in a prohibited transaction; except that if the trustee knowingly engaged in a prohibited transaction, paragraph (1) shall apply with respect to the accounts in the fund of the member or members in respect of whom such transaction occurred for the taxable year in which such transaction occurred and all taxable years thereafter.

"(3) PROHIBITED TRANSACTION DEFINED.—For purposes of this subsection, the term 'prohibited transaction' means any transaction in which the trustee—

"(A) lends any part of the corpus or income of the fund to;

"(B) pays any compensation for personal services rendered to the fund to;

"(C) makes any part of its services available on a preferential basis to; or

"(D) acquires for the fund any stock securities, or evidences of indebtedness from, or sells any stock, securities, or evidences of indebtedness of the fund to,

any person described in section 503(c) (for this purpose treating each member of the plan as the grantor of the trust). The term also includes any transaction pursuant to which the fund ceases to meet any requirement of subsection (c) of this section, and any failure to comply with any provision of the trust instrument required by such subsection.

"(4) CROSS REFERENCES.—

"(A) For tax consequences to members involved in a prohibited transaction, see section 78(a)(3).

"(B) For tax-free transfer of interests to other restricted retirement funds of members not involved in the prohibited transaction, see subsection (c)(2)(A)(ii).

"(e) OTHER TRUST RULES INAPPLICABLE.—The provisions of part I of subchapter J (section 641 and following, relating to estates, trusts, and beneficiaries) shall not apply with respect to restricted retirement funds, so long as they are exempt from tax under section 501(a)."

(b) EXEMPTION FROM TAXATION.—Section 501(a) of the Internal Revenue Code of 1954 (relating to exemption from tax of certain organizations) is amended by adding at the end thereof the following new sentence: "A restricted retirement fund (as defined in section 405) shall be exempt from tax under this subtitle except to the extent such exemption is denied under section 405(d)."

(c) CLERICAL AMENDMENT.—The table of sections for part I of subchapter D of chapter 1 of such Code is amended by adding at the end thereof the following new item:

"Sec. 405. Restricted Retirement Funds."

SEC. 5. TECHNICAL AMENDMENTS.

(a) RETIREMENT INCOME CREDIT.—Section 37(c) of the Internal Revenue Code of 1954 (relating to definition of retirement income) is amended by adding at the end thereof the following new sentence: "Such term does not include any amount received from a restricted retirement fund (as defined in section 405) or under a restricted retirement policy (as defined in section 217(f))."

(b) TREATMENT OF AMOUNTS RECEIVED BY SPOUSE OF OTHER BENEFICIARY UNDER A RESTRICTED RETIREMENT FUND OR RESTRICTED RETIREMENT POLICY.—Section 691 of the Internal Revenue Code of 1954 (relating to recipients of income in respect of decedents) is amended by relettering subsection (e) as subsection (f), and by inserting after subsection (d) the following new subsection:

"(e) AMOUNTS RECEIVED BY BENEFICIARY OF A PARTICIPANT IN RESTRICTED RETIREMENT FUND, ETC.—For purposes of this section, amounts received after the death of the member of a restricted retirement fund (as defined in section 405), or after the death of the insured under a restricted retirement policy (as defined in section 217(f), from such fund or under such policy shall, to the extent included in gross income under section 78, be considered as amounts included in gross income under subsection (a)."

(c) INFORMATION REQUIREMENTS.—

(1) IN GENERAL.—Subpart B of part III of subchapter A of chapter 61 of the Internal Revenue Code of 1954 (relating to information concerning transactions with other persons) is amended by adding at the end thereof the following new section:

"Sec. 6047. Information Relating to Restricted Retirement Funds and Policies.

"(a) BANKS AND INSURANCE COMPANIES.—Every bank which is a trustee of a restricted retirement fund (as defined in section 405), and every insurance company which is the issuer of a policy which is a restricted retirement policy (as defined in section 217(f)), shall file such returns (in such form and at such times), keep such records, make such identification of policies and funds (and accounts within such funds), and supply such information, as the Secretary or his delegate shall by forms or regulations prescribe.

"(b) SELF-EMPLOYED INDIVIDUALS.—Every individual who—

"(1) is a member of a restricted retirement fund (as defined in section 405), or

"(2) is the insured under a restricted retirement policy (as defined in section 217(f)),

shall furnish the bank or insurance company such information, at such times and in such form and manner, as the Secretary or his delegate shall by forms or regulations prescribe.

"(c) CROSS REFERENCE.—

"For criminal penalty for furnishing fraudulent information, see section 7207."

(2) CLERICAL AMENDMENT.—The table of sections for such subpart B is amended by adding at the end thereof the following:

"Sec. 6047. Information Relating to Restricted Retirement Funds and Policies."

(3) PENALTY.—Section 7207 of the Internal Revenue Code of 1954 (relating to fraudulent returns, statements, or other documents) is amended by adding at the end thereof the following new sentence: "Any person required pursuant to section 6047 (b) to furnish any information to any bank or insurance company who willfully furnishes any information known by him to be fraudulent or to be false as to any material matter shall be fined not more than $1,000, or imprisoned not more than 1 year, or both."

SEC. 6. TAXABLE YEARS TO WHICH APPLICABLE.

The amendments made by this Act shall apply only with respect to taxable years beginning after December 31, 1958.

The SPEAKER. Is a second demanded?

Mr. SIMPSON of Pennsylvania. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

Mr. KEOGH. Mr. Speaker, I ask unanimous consent to include in the statement I am about to make extraneous matter. Further, Mr. Speaker, I ask unanimous consent that all Members who may desire to do so may extend their remarks in the body of the RECORD today preceding the vote on the bill and that all other Members who desire to extend their remarks may do so within the next 5 legislative days.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. KEOGH. Mr. Speaker, I yield myself 8 minutes.

Mr. Speaker, on July 29 last year we moved to suspend the rules and pass a bill which was identical to the pending bill today. The pending bill is H.R. 10, Mr. Speaker, but it might very well be any one of the following bills introduced by distinguished Members of this body on both sides of the aisle. Those bills are:

H.R. 9, by Mr. SIMPSON of Pennsylvania.

H.R. 18, by Mr. ANFUSO, of New York.

H.R. 98, by Mr. FOGARTY, of Rhode Island.

H.R. 506, by Mr. FASCELL, of Florida.

H.R. 567, by Mr. MILLER of California.

H.R. 1265, by Mr. JUDD, of Minnesota.

H.R. 1286, by Mr. MCDONOUGH, of California.

H.R. 2327, by Mr. DOOLEY, of New York.

H.R. 2401, by Mr. HERLONG, of Florida.

H.R. 2555, by Mr. PORTER, of Oregon.

H.R. 2562, by Mr. REUSS, of Wisconsin.

H.R. 2889, by Mr. LIBONATI, of Illinois.

H.R. 3038, by Mr. MATTHEWS, of Florida.

H.R. 3389, by Mr. WAINWRIGHT, of New York.

H.R. 3481, by Mr. LOSER, of Tennessee.

H.R. 3507, by Mr. STEED, of Oklahoma.

H.R. 3616, by Mr. COFFIN, of Maine.

H.R. 3660, by Mr. LIPSCOMB, of California.

H.R. 3846, by Mr. BROOMFIELD, of Michigan.

H.R. 3879, by Mr. ZELENKO, of New York.

H.R. 3894, by Mr. CRAMER, of Florida.

H.R. 4211, by Mr. KARTH, of Minnesota.

H.R. 4419, by Mr. WITHROW, of Wisconsin.

H.R. 4999, by Mr. FULTON, of Pennsylvania.

It might be one of several other similar bills such as:

H.R. 327, by Mr. BOSCH, of New York.

H.R. 4463, by Mr. RAY, of New York.

H.R. 5017, by Mr. ROOSEVELT, of California.

The same or similar principles have been incorporated in bills introduced by approximately 14 Members of the other body.

Mr. Speaker, coming, as it does, relatively shortly after July 29, and this being the 16th of March, I trust that I will be permitted to remind the Members of a story that is supposed to have taken place in Dublin, Ireland. Mr. De Valera was standing on a soapbox on a corner in Dublin one night making a speech, and His Majesty's troops summarily took him into custody. He was just as quickly tried, convicted, and sentenced to 1 year in prison. On the expiration of the year he left the prison, went directly to that corner on the street in Dublin, stood on the precise same soapbox, and started his remarks as follows:

As I was saying before we were interrupted.

I say today, as we were interrupted by the sine die adjournment of the 2d session of the 85th Congress and the later expiration of that Congress, that this bill is most meritorious. It comes to you with the active support of a long, distinguished list of national, professional, and businessmen's associations, as follows:

American Angus Association.

American Association of Medical Clinics.

American Association of Small Business.

American Bar Association.

American Brahman Breeders Association.

American College of Radiology.

American Dental Association.

American Farm Bureau Federation.

American Federation of Labor.

American Hereford Association.

American Hotel Association.

American Institute of Architects.

American Institute of Certified Public Accountants.

American Institute of Chemists.

American Medical Association.

American National Cattlemen's Association.

American Ophthalmological Society.

American Optometric Association.

American Patent Law Association.

American Podiatry Association.

American Society of Industrial Designers.

American Society of Internal Medicine.

American Veterinary Medical Association.

American Women's Society of CPA's.

American Association of Consulting Chemists and Chemical Engineers, Inc.

Association of Consulting Management Engineers, Inc.

Association of Stock Exchange Firms.

Authors League of America.

Bureau of Salesmen's National Association.

Conference of Actuaries in Public Practice.

Consulting Engineers Council.

Engineers Joint Council.

Investment Bankers Association of America.

Maritime Law Association of the United States.

Mobilehome Dealers Association.

National Association of Chiropodists.

National Association of Plumbing Contractors.

National Association of Real Estate Boards.

National Association of Retail Druggists.

National Association of Retail Meat and Food Dealers, Inc.

National Association of Tax Accountants.

National Association of Women's & Children's Apparel Salesmen, Inc.

National Association of Women Lawyers.

National Automobile Dealers Association.

National Council of Salesmen's Organizations, Inc.

National Federation of Independent Business.

National Food Brokers Association.

National Funeral Directors Association.

National Liquor Stores Association, Inc.

National Live Stock Tax Committee.

National Medical Veterans Society.

National Shorthand Reports Association.

National Society of Professional Engineers.

National Society of Public Accountants.

National Sugar Brokers Association.

National Wholesale Furniture Salesmen's Association.

Panel on Management Responsibility for Employee Compensation.

Public Relations Society of America, Inc.

The Tax Institute.

United States Chamber of Commerce.

It comes to you with the support of such nonprofessional groups as the American Farm Bureau Federation, the U.S. Chamber of Commerce and, in hearings held before our committee, it received, in principle, the support of the spokesman of the American Federation of Labor Congress of Industrial Organizations.

Mr. Speaker, on July 29 I took occasion to indulge in lengthy amenities. Those amenities are as appropriate today as they were then for, Mr. Speaker, if it were not for your splendid leadership, for your realizing that this body should have the right to vote up or down on a principle about which they have heard for years, we would not be here today. And I commend our majority leader for his cooperation and support. I must pay my respects to the distinguished chairman of the Committee on Ways and Means and all the other members thereof. This bill comes to you today with the overwhelming support of the membership of that committee.

I regret the absence today from our body of our late distinguished Member, Mr. Reed, of New York, and Mr. Jenkins, of Ohio, both of whom contributed immeasurably in the promotion of this legislation and both of whom would, I am sure, support our position today both as to form and content. I must, and I do pleasurably, include the distinguished ranking minority member of our Committee on Ways and Means, Mr. SIMPSON, of Pennsylvania, who has cosponsored the pending bill and has been a source of great help. The chief counsel of the committee, Leo H. Irwin, and assistant chief counsel, John M. Martin, Jr., and Gerard M. Brannon, of the professional staff; Thomas A. Martin, minority counsel; Colin Stam, chief of staff of the joint committee, and his associates, all have given graciously of their time and have been of great assistance. Edward O. Craft and Ward M. Hussey of the legislative counsel's office have, too, been most cooperative.

You and I who have been here for any length of time have become accustomed to the indulgence by others in cliche-like terms that are bandied about and

used as substitutes for logical and clear thinking. We have heard it said by those who are either uninformed or irresponsible that this is opening a loophole. Well, let me tell you, many years ago this Congress enacted what became later section 165 of the 1939 code, which section was reenacted virtually in its entirety and, with subsequent amendments, as section 401 of the 1954 code. And in 1942 we enacted an amendment that gave rise to the tremendous growth of qualified private pension plans, approved by the Treasury Department, to the point that in June of 1958 there were approximately 45,000 such plans in existence covering upward of 18 million of employees of the country, and in which there are now held funds in excess of $35 billion and into which, in 1957, there was contributed, for the most part by the corporate employers of this country. $3.7 billion, tax deducted to those employers and tax free to their employees. During that same year (1957), the members of such private pension plans were, on their own part, contributing only $600 million.

Yes, Mr. Speaker, today $6 of every $7 contributed to the existing qualified private pension plans are being paid for by the taxpayer of the United States of America, 52 cents on every dollar, of which the 7,100,000 of our intrepid, courageous, self-employed, those who have made their mark in their professions and their businesses, are contributing their proportionate share.

Who are these 7,100,000? They are those who engage in the private practice of their chosen professions. They are those who, by law cannot or, by choice do not, operate as corporations. They are denied the right under law of doing anything to provide for their superannuation or retirement.

We come here to you with a restricted voluntary plan that, as all measures before this body should be, has been exposed to the severe and grueling test of time. It has proven that it could withstand that test of time. The interest in and the support of this measure has grown session after session.

Mr. Speaker, closing a loophole? Why, this is a long-delayed and very meritorious extension of this privilege to those decent, honest Americans who for the most part constitute the great middle class, the existence and the continuance of which will mark this great country of ours as different from most in the free world and all behind the Iron Curtain. Closing a loophole? Away with you who seek to mislead.

The pending measure is just, meritorious, anti-inflationary and a savings incentive. It removes an obvious and an admitted inequity and should receive the overwhelming support of this House.

Mr. SIMPSON of Pennsylvania. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, I am happy to join my distinguished colleague on the Committee on Ways and Means, the gentleman from New York [Mr. KEOGH], in urging passage of legislation having the very substantial support of the membership of our committee.

This proposal has been before the Congress in the past. It was approved by the House of Representatives last year. Its purpose and provisions are well known. There is no element of surprise in bringing the bill before us under a suspension of the rules.

I am happy to be one of the cosponsors of this bill which was so ably described by the gentleman from New York [Mr. KEOGH]. I call to the attention of my colleagues on this side of the aisle that our beloved and recently departed friend, the Honorable Daniel A. Reed, was a sponsor of this legislation in a previous Congress, as was our good friend, the Honorable Thomas A. Jenkins, of Ohio.

I am ordinarily opposed to the hasty consideration of legislation under the suspension procedure. However, my usual objection to the suspension procedure is on this occasion substantially lessened by the fact that the substantive provisions of H.R. 10 are well-known to the membership of the House by virtue of the numerous hearings and other publicity that had been devoted to the legislation as well as by the fact that the bill before us today is identical to the bill that the House of Representatives passed last year. Thus, there is not inherent in today's procedure any element of inadequate consideration that often attends the debate of important legislation under suspension.

Mr. Speaker, I would like to commend one of my colleagues whom I anticipate will speak in opposition to the suspension of the rules today. I refer to my able and esteemed colleague on the committee, the gentleman from Wisconsin [Mr. BYRNES]. I believe it should be made clear in fairness to him that his opposition is not based on indifference to the problems of the self-employed in providing for their retirement security. There is no man who has been more conscientious and diligent in his efforts to assure fiscal integrity in our Federal Government and to provide fairness and equity in our Federal tax structure than has Mr. BYRNES. I sincerely regret that he and I find ourselves on opposite sides on this issue. I believe it fair to say that we are both equally aware of the need for and are interested in fiscal responsibility and tax fairness.

Many in this body have learned over the years that we may, with similar motivations, follow different courses to attain our goals. Our objectives in the present situation, in my judgment, are to attain a greater degree of fairness and equity in our tax laws and, at the same time, to assure an increased measure of fiscal integrity in the long run.

Thus am I satisfied with the justification for H.R. 10 and that is why I speak in support of this bill.

On the last point, that of fiscal integrity, I insist that the tax burden upon all the people, particularly on the independent, the self-employed worker, is intolerable. The farmer would benefit under this proposal, as would the butcher, the carpenter, the small druggist, the barber, the grocery-store proprietor, the accountant, the doctor, the lawyer, and many others. Men who work for themselves would have a chance to care for their families by not paying a portion of their taxes this year, but paying some years in the future. All we do in this bill is defer the moment of impact of an income tax.

I do not think that tax rates, which in many areas should be lowered right now, will be reduced in the immediate future. Indeed, Congress instead of facing this problem head-on and reducing our rates has chosen by one means or another to compensate for the high rates by providing some other means of relief.

That is why we have the carryback and carry-forward provisions for the handling of losses in our income tax laws. That is why we have exemptions and deductions. That is why we have the depletion provisions. It is why we have employee qualified pension plans about which the gentleman from New York [Mr. KEOGH] has spoken so earnestly in which $4 billion today are going tax free, and from which, if this money were taxed, the Treasury would collect $1,800 million.

On the point of employee pension plans the Congress very wisely a number of years ago recognized that the workers of our country did deserve a tax incentive in providing for their old age and permitted the establishment of qualified retirement plans. Likewise as a means of getting around the high level of taxes that we have today, we have profit sharing plans and stock bonus plans. Today 18 million people are covered by these deferred compensation plans. I do not know on this very day how many more plans, by the action of the Treasury Department, will before evening be approved and exempted from the payment of income taxes on a portion of their earnings. Every day the Treasury is considering new applications from those who seek to have a retirement program under tax-free status. The employees today, to the extent of employer contributions equalling $4 billion are receiving this protection.

Under the bill before us today all we are trying to do is to provide similar tax treatment for the self-employed man who is by law precluded from participating in a qualified pension plan. We are trying to permit him to establish a retirement fund by excusing him temporarily from the payment of income taxes on a portion of his income limited by statute which he can use for certain retirement purposes specified by law. And then, and never forget this, when he does receive the benefits, he does pay income tax upon those benefits. That is what we are attempting to do here. It is done for the great bloc of free, self-employed persons in our country.

Today a lawyer can give up his private practice and obtain a job with some big corporation and thus get every advantage that he will be able to get under this law. Today a doctor can give up his private practice and give up calling upon the sick people of the country. He can go to work for a big corporation and get every benefit that we would give him under this law. I want him to get that benefit and yet remain as a self-employed private practitioner. I want to build up the idea of self-employment in this country of ours and play down the absolute necessity of making corporations bigger.

One of the principal objections raised against this legislation is the revenue loss that may result from its enactment. There have been numerous estimates as to the full-year cost to the Treasury of this legislation. These estimates are at significant variance and range from less than $100 million to the Treasury estimate of $365 million. I do not know which of these extremes is correct. I would point out that any estimate in connection with this legislation is highly speculative in that it must be based on so many contingencies. We do have the actual experience and the facts derived from that experience with similar legislation in other countries. In England, Canada, and New Zealand actual experience demonstrated a considerably smaller revenue loss than had been originally anticipated. I believe that we will similarly find that realized revenue losses in the initial years of this program will fall considerably short of the official Treasury Department estimate.

It is perhaps partially correct to say that from the standpoint of budgetary considerations solely the favorable consideration of H.R. 10 cannot be justified today. However, I submit to my colleagues in the House that the cost of enduring the existing tax inequity that would be corrected by the enactment of H.R. 10 falls on a limited number of Americans. I also submit that if budgetary considerations weigh against achieving greater tax equity, then we should undertake to raise the necessary tax revenues in other ways that do not discriminate and that are not inequitable—or better yet, we might reduce our Federal spending by at least an amount commensurate with the revenue loss.

Mr. Speaker, there is not only an inequity or tax discrimination contained in present law but we find from statistical evidence that in each passing year in which H.R. 10 remains unpassed the disparity in tax treatment increases in magnitude. We hear it said that the revenue loss precludes our giving tax justice to the self-employed, but as I have already pointed out every year thousands of new qualified pension plans are approved by the Treasury without consideration being given to the revenue loss entailed. For example I have said in 1957 employer contributions to qualified pension plans amounted to $4 billion. The total reserves in these plans equalled $34.8 billion and these plans covered upwards of 17 million employees. Also, in 1957 employee contributions equalled $680 million. I have indicated that the discrimination against the self-employed increases each year that existing tax treatment continues. The estimated revenue loss to the Federal Treasury in 1945 from the operation of qualified pension plans equalled $400 million. By 1950 this revenue loss had nearly doubled to $788 million and in the year 1957 the estimated revenue loss had more than doubled over 1950 to $1.8 billion.

Mr. Speaker, I cite these statistics not in criticism of the existence of tax incentives for the establishment of these employee pension plans but instead to cite the growing magnitude of the discrimination against the self-employed. I believe it is desirable social policy that we should encourage any sound plan that improves the economic security of our employed citizens but I am convinced that there is equal merit in encouraging provision for the economic security of our self-employed. Why is it that we are concerned with revenue loss only when the tax saving would benefit the self-employed? Where is the equity in the Treasury Department continuing to approve tax-deferred employee pension plans involving millions of dollars in revenue loss on the one hand and on the other hand having the Treasury Department say that the self-employed cannot provide for their economic security with tax-deferred dollars because the revenue loss is too great?

Mr. Speaker, we are told that deficit financing is inflationary, and I subscribe to that view. However, I do not believe that H.R. 10 will contribute to any inflationary pressure. On the contrary, I am convinced that the favorable consideration of H.R. 10 will tend to reduce inflationary pressures. H.R. 10 will encourage private savings and will increase the availability of funds for capital investment. Such capital accumulations should encourage business expansion and increase productivity for the greater economic good of all concerned.

The point is made that because H.R. 10 is limited in its application to only the self-employed that it contains a discrimination against those employed individuals who do not participate in a qualified employee pension plan under existing law. I would acknowledge that it is desirable that we make the privilege of providing for retirement security on a tax-deferred basis as broad as possible so that we would include not only the self-employed but would include those employed individuals who do not now participate in a qualified pension plan. It is my contention that by recognizing the existence of a discrimination in existing law, the legislation before us today is a step in the right direction of correcting the existing inequity. It can also be argued that by making it possible for a self-employed individual to provide for his own retirement security, we will thereby be encouraging him to take similar steps in behalf of his employees. It should also be noted that our Federal tax laws are not a problem to the low income individual in providing for his retirement security. One must also bear in mind the fact that State laws often preclude some of the professions that are covered under the provisions of H.R. 10 from engaging in those professions in a corporate form. One of the very genuine evils that would be corrected by the enactment of this legislation is that we would be removing one compelling motivating force that drives our citizens from the private practice of the professions to which I refer. Contrary to the contention of some, H.R. 10 does not create new inequities but instead serves to diminish existing inequities.

It is maintained that the enactment of H.R. 10 will bring demands for similar tax deferment with respect to employee contributions in the areas of railroad retirement, social security, civil service retirement, and other employee contributory systems. The allegation is that we are opening a Pandora's box. In this connection I have received a very well considered communication from the distinguished dean of the Law School at Yale University, the Honorable Eugene V. Rostow. Dean Rostow in effect says that this is an argument that the Treasury has consistently resorted to. He also very properly describes the argument as an abdication of responsibility. He properly points out that Congressmen are elected to make discriminating judgments for the people. I will, Mr. Speaker, include Dean Rostow's letter in my remarks:

YALE UNIVERSITY LAW SCHOOL,
OFFICE OF THE DEAN,
New Haven, Conn., March 12, 1959.

Hon. RICHARD SIMPSON,
Member of Congress,
New House Office Building,
House of Representatives,
Washington, D.C.

MY DEAR CONGRESSMAN SIMPSON: I am writing you in behalf of the principle of H.R. 10, the Keogh-Simpson bill. I firmly believe that the retirement opportunities for practicing lawyers and those of corporate employees should be equalized, and I view your bill as a step in the right direction.

In my annual report to the president and fellows of Yale University for 1955–56, I referred to the problem in these terms:

"The independence of the bar, and some of its most significant traditions, are threatened by a variety of factors. There are increasing indications that a changing structure of values and incentives in our culture may actually be weakening the recruitment into law of a fair proportion of the ablest and finest of our young people. We have seen no evidence of such a trend at the law school. But there are signs throughout the country which justify thoughtful concern about the appeal to young people both of law and of other learned and demanding professions. The national flow of law school applications has dropped relatively, like the flow of applications for medical schools and for several other branches of graduate study. And, in increasing number, lawyers are being drawn out of the independent bar by the appeal of incomparably higher financial rewards in business, banking, and other lines of endeavor. It is time for the law schools and the bar to consider prudent steps in the interest of protecting the vitality and the professional freedom of the bar, and the future of the profession. I do not suggest a narrow, defensive program for bolstering vested interests. But energetic efforts are in order to make the profession more effective, and therefore more attractive, in carrying out the wide range of social duties for which it is ultimately responsible. There is no need to stress the continuing social need for independent lawyers as solicitors and as barristers—as detached, professional advisers to private and public interests, and as trial counsel in every forum where rights are settled."

The evidence which continues to come to me as dean of a national law school strongly confirms what I wrote 3 years ago. As I see it, the higher rewards of corporate employment, and especially the availability of pension plans, are imposing an increasing pressure on the legal profession. Some good lawyers have always left the practice for business and banking, and that tradition has been a constructive element in our economic life. But I wonder whether the trend is now becoming too strong. There are signs, it seems to me, that the disparity

between the rewards of law and those of corporate employment may be weakening the independent bar. I don't have to stress to you, I know, how absolutely vital the independent bar is to the preservation and development of all the values of our constitutional system. Where would we be if men like Henry Stimson, G. C. Burlingham, John Lord O'Brian, and George Roberts had not been free agents, willing to speak out responsibly from time to time, when popular passions threatened the fabric of the legal order? And why should I have the advantage of Yale's 10 percent contribution to my retirement, tax free, while lawyers in practice do not?

I am not impressed when I hear sensible proposals for tax reform resisted on the ground that to make one reform would open Pandora's box, or be the "entering wedge," etc. I know you are up against that argument from the Treasury. All Treasuries always fall back on it. It is an abdication of responsibility. The true answer is Justice Holmes'. When confronted with the proposition that "the power to tax is the power to destroy," he said, "not so long as this Court sits." Congress can discriminate. Indeed, why else do we elect Congressmen, if not to make discriminating judgments for us? There should be better arguments than that for not doing what clearly ought to be done.

With every good wish.

Yours sincerely,

EUGENE V. ROSTOW.

Mr. Speaker, on the subject of Pandora's box, I would also point out what is known by us all that the benefits derived under both the railroad retirement program and the social security program are not subject to tax whereas withdrawals from a retirement program that a self-employed individual will make under H.R. 10 will be subject to tax. We should also bear in mind that the employer contributions in connection with these other qualified retirement programs are not subject to tax until the benefits are drawn by the recipient at which time there are numerous provisions in the tax law to further mitigate the final tax liability. I refer to such provisions as the allowance of an additional $600 exemption for an individual over age 65, the annuity rule under section 72 of the code, and the retirement income credit contained in section 37 of the code.

Mr. Speaker, in the brief time that has been available to me I have endeavored to place in factual context the issue that is before us today. The issue is not a controversy involving parliamentary procedure; the issue is not whether or not the U.S. Treasury can afford tax justice to a substantial segment of our citizens; the issue is not a question of a Pandora's box. The issue is not a question of budget-busting or fiscal irresponsibility because that question will not be decided by the one vote that will be cast today on the question before us. The issue is solely related to the question of whether or not we will approve legislation, H.R. 10, on its merits so as to take a major step forward in achieving equity in the application of our tax laws. It is on that issue, Mr. Speaker, that I urge my colleagues in the House to vote affirmatively for the passage of this meritorious legislation.

The SPEAKER. The time of the gentleman from Pennsylvania has expired.

The Chair recognizes the gentleman from New York [Mr. KEOGH].

Mr. KEOGH. Mr. Speaker, I have no further requests for time at the moment, and I am reserving my time pending developments.

Mr. SIMPSON of Pennsylvania. Mr. Speaker, I yield 7 minutes to the gentleman from Wisconsin [Mr. BYRNES].

Mr. BYRNES of Wisconsin. Mr. Speaker, I assume that this is the development.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield.

Mr. CURTIS of Missouri. Mr. Speaker, I want to call the attention of the House to the views of the gentleman from Wisconsin, as they have been expressed heretofore, and to state I join in his opposition to suspending the rules. A balanced budget means more to the group that we are talking about and to the entire Nation than does the removal of this inequity. There are many desirable and, in fact, many needed programs which must be postponed until we get our fiscal house in order. This is one of those programs which I regrettably state have to be postponed. I feel very strongly that this is a good program, but under the circumstances, we cannot pass it at this time.

I thank the gentleman from Wisconsin.

Mr. BYRNES of Wisconsin. I thank the gentleman from Missouri [Mr. CURTIS].

Mr. Speaker, there is a political adage we are all familiar with: Vote for all expenditures and against all taxes.

There is no one of us who takes pleasure in opposing spending programs which we feel are desired by some of our people. At the same time there is no one of us who takes pleasures in voting to maintain the high taxes which are a burden on all of our people.

Nothing would please us more, I am sure, if each day we could vote on some legislation that would give tax relief to some group of our people. I would love it and you would too.

If we are reasonable and responsible Representatives, however, we recognize that if we are going to vote to spend money, we must also vote to raise the money we spend. We cannot have our cake and eat it too.

In the consideration of this bill, I make only one plea—let us be reasonable and responsible.

To me, the bringing of this bill before us at this time and under this procedure is neither reasonable nor responsible.

I am not going to discuss the merits of this bill except to say that I agree that there is today an inequity in our tax laws with respect to the treatment of income set aside for retirement purposes. But contrary to the contention of the proponents, this bill does not achieve greater equality of tax treatment between the self-employed individuals and employees. What it does is to provide favored treatment for certain self-employed individuals in the high-income tax brackets as against all other taxpayers. I will extend my remarks to include a statement showing the difference between the treatment of the self-employed under this bill and the treatment accorded qualified pension plans under the 1954 revenue code.

But even if you believe in the underlying principle of the legislation, I suggest to you that the enactment of this bill at this time and under a gag procedure is neither reasonable nor responsible.

This is a tax-reduction bill. Make no mistake about that. It is a tax reduction for a very limited group. Now, I would just love to be able to vote for a tax reduction for this group. I would like to do it for other groups. This is not the only inequity in our tax laws. Practically every Member of this Congress has introduced one or more bills to provide tax changes which he or she feels will eliminate some inequity. Are you going to single this out as the only or the most glaring inequity in our tax code?

Let me ask you this: With a deficit this current year estimated at around $13 billion, with a budget submitted by the President for 1960 which is only precariously in balance, is it reasonable or responsible for this Congress to consider tax-reduction legislation on a take-it-or-leave-it basis, with only 40 minutes to discuss the merits or demerits of the proposal? I think it is preposterous that the majority leadership should take this matter so lightly.

Certain spokesmen on the majority—the Democrat side of the aisle—are complaining that the President's budget of expenditures is too low, that it should be increased. A Democrat committee has reported out a housing bill that goes beyond the President's spending recommendations by billions, a Democrat committee has recommended an increase in expenditures for airports of almost $100 million above the budget. We hear them complain that planned expenditures for defense, in the face of Berlin and the Soviet threat, are woefully inadequate.

Yet they bring to this House a bill to reduce the Government's revenue by over $350 million a year. In fact, this bill could be called a $3 billion tax reduction bill because it certainly sets the stage for further tax revision in this area which will result in revenue losses of over $3 billion a year.

Are you going to vote for this bill and tell the railroad employees that you are unwilling to permit them to deduct their compulsory payments to the Railroad Retirement System?

Are you going to vote for this and tell the civil service employees and teachers that they shouldn't be able to deduct the contributions they make to a retirement system?

Of course not.

If your object is to treat all of our people equitably, you are going to have to

follow this bill up with similar tax reduction bills for these people and others.

We have had a lot of talk by Members recently about the need for balancing our income and expenditures—of balancing the budget.

We have heard speeches complaining about the $8 billion carrying charge on our national debt of over $280 billion and the necessity for a program looking to the orderly reduction of that debt.

Let me ask a few questions:

Are you going to vote for this tax reduction of $350 million and still stand for a balanced budget?

Are you going to vote for this tax reduction and still maintain we must do something about reducing the national debt?

If you are going to be reasonable and responsible, you cannot do both. When you vote on this bill you will be making your choice.

In only hope that your choice will be in the interest of our Nation in this critical time and in the interest of all of our people.

Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include a letter from the Secretary of the Treasury and a statement of the principal features of H.R. 9 and H.R. 10 and qualified pension plans under the 1954 Revenue Code.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

(The matter referred to follows:)

THE SECRETARY OF THE TREASURY
Washington, March 13, 1959.

Hon. JOHN W. BYRNES,
House of Representatives,
Washington, D.C.

MY DEAR MR. BYRNES: This is in reply to your telephone request for Treasury's current position on H.R. 9 and H.R. 10, bills to encourage the establishment of voluntary pension plans for self-employed individuals. I am glad to reaffirm the Treasury opposition, for the reasons cited below, as expressed in a report and appearance before the Committee on Ways and Means by Mr. David A. Lindsay, Assistant to the Secretary for Tax Legislation.

These bills would permit employers or self-employed persons to establish their own private pension plans without requiring them to make any provision for the retirement of their employees. This is difficult to justify, especially since about two-thirds of all employees are not covered by any pension plans.

There is no effective means provided under the two bills to prevent or discourage the use of the specified savings before the age of retirement. Consequently, persons with fluctuating incomes would be able to use the plan for averaging their incomes, providing an advantage not available to other taxpayers.

H.R. 9 and H.R. 10 would involve very substantial revenue losses which would seriously affect our budgetary situation. We have estimated this loss at $365 million on a full year's basis, assuming eligible persons invested only part of the allowable amounts. About 80 percent of the total tax relief would go to the self-employed with incomes over $10,000. We do not believe that selective tax relief of this magnitude should be permitted at a time when general tax relief is not possible.

Adoption of H.R. 9 and H.R. 10 would be a precedent for an extension of the privilege of deducting contributions to retirement plans to all employees. If all taxpayers were allowed deductions for retirement savings in accordance with the terms of the bills, it is estimated that the revenue loss would be $3 billion a year.

For the reasons stated, it is hoped that H.R. 9 and H.R. 10 will not be adopted.

With warm regards.

Sincerely yours,

ROBERT B. ANDERSON,
Secretary of the Treasury.

Principal features of H.R. 9 and H.R. 10 (86th Cong., 1st sess.) and qualified pension plans under the 1954 Revenue Code

Feature	H.R. 9 and H.R. 10	Qualified pension plans
1. Coverage	Limited to self-employed individuals	Limited to employees.
2. Antidiscrimination requirements	None	Must not discriminate as to coverage or benefits in favor of officers, executives or highly paid employees.[1]
3. Maximum contributions	10 percent of self-employment income up to $2,500 a year and $50,000 over the individual's lifetime.	Employers' contributions generally limited to 5 percent of compensation of covered employees; however, with certain limitations, higher amounts are allowed if needed to finance stated benefits and to fund benefits for past service.[2] Employees may also make contributions on their own behalf.
4. Tax treatment of contributions: Contributions made by the covered individual.	Deductible in arriving at adjusted gross income	Not deductible.
Employers' contributions		Not included for tax purposes in income of covered employees.
5. Rights of covered individuals to contributions under the plan.	Participants keep fully vested rights to contributions	Employees typically do not get vested rights to employers' contributions until they have reached a specified age or have worked a specified number of years (or both) and frequently forfeit rights if they leave the firm.
6. Investment media	Restricted retirement policies purchased from life insurance companies and face amount certificates. Trusteed plans can invest in listed stocks or securities, Federal, State and local bonds, stock in regulated investment companies or restricted retirement policies. (However, see prohibited transactions, item 9 below.)	Annuities purchased from life insurance companies under either a trusteed or nontrusteed plan. Pension trusts have very wide latitude in investing funds. For example, they may place their funds in all types of securities and real estate. (However, see prohibited transactions, item 9 below.)
7. Benefits	Annuities, lump-sum payments or other payments from the retirement trust. Participants can arrange to have benefits begin at any age, but not later than 70. Trusts must complete distributions to the participant by the time he reaches 80.	Pensions payable at retirement which usually is at age 65 but may be earlier. Benefits may be payable before the retirement age in the event of disability. Lump-sum payments may be made if the participant leaves the firm or dies.
8. Tax treatment of benefits received from plan: Withdrawals after age 65	Annuities and periodic payments taxed in full as ordinary income. Tax on lump-sum withdrawals generally limited to 5 times the tax resulting from including ⅕ of the sum in income in the year of withdrawal.	Pensions taxed as ordinary income, but exclusions are allowed under the life expectancy method of taxing annuities, for the tax-free return of the employees' own contributions. Capital-gains treatment is granted to lump sums paid because the employee becomes separated from the firm or dies. Also, up to $5,000 of payments to the beneficiary of a deceased employee may be exempt from tax.[3]
Withdrawals before age of 65	Withdrawals of less than $2,500 taxed at 110 percent of the liability otherwise applicable had funds been withdrawn after age 65. Withdrawals of $2,500 or more generally taxed at 110 percent of the liability resulting from spreading them in equal parts over the taxable year and up to four immediately preceding years.	Same as benefits received after age 65 except that a sick-pay exclusion up to a rate of $100 a week applies to disability payments received before retirement age.
Exemptions, tax deductions and tax credits.	Exemptions are applied against income resulting from withdrawals; however, the amount of income includible because of withdrawals cannot be reduced by personal deductions and the tax credit for retirement income does not apply.	Personal exemptions, personal deductions, and the tax credit for retirement income may be applied against pensions and other benefits received from pension plans.
9. Prohibited transactions	Plans may not engage in certain specified transactions with the participant, certain members of his family or a corporation controlled by him. Such prohibited transactions include lending them money, paying them compensation for personal services, making services available on a preferential basis or purchasing or selling securities from or to them.	Pension plans may not engage in certain specified transactions with the grantor of the trust (the employer), certain of his relatives or a corporation controlled by him. Such prohibited transactions include lending them money without adequate security and a reasonable rate of interest, paying unreasonable compensation for personal services, making services available on a preferential basis, purchasing securities for more than they are worth, selling securities for less than they are worth, and engaging in a transaction which diverts its funds to them.

[1] Coverage requirements are met if (1) 70 percent of employees are eligible for coverage and 80 percent of those eligible are actually covered exclusive of temporary, part-time and seasonal employees, or (2) coverage of the plan is approved by the Internal Revenue Service as not discriminatory.

[2] A study of a sample covering 5,800 pension plans for 1951 indicated that in about ¾ of these plans, employers' contributions averaged 10 percent or more of nondeferred compensation.

[3] This $5,000 exemption of death benefits paid to the beneficiary of an employee under a pension plan applies (1) to all lump-sum payments, and (2) to payments other than lump sums, where the deceased employee did not have a vested right to such payments at the time of his death.

Mar. 12, 1959.

Mr. RAY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. RAY. Mr. Speaker, H.R. 10 gives substantial tax reduction to self-employed individuals who establish and make payments into pension trust funds or who purchase retirement annuities.

The cost to the Government of providing this subsidy for the self-employed, some 6 million in number and mostly professional people such as lawyers, doctors, engineers, and so forth, would be between $320 and $365 million for the first year and $365 million per year thereafter. Under present circumstances it is, I believe, vital that Government receipts at least equal Government expenditures. The Government simply cannot afford to lose the revenues which would be lost to it if H.R. 10 were enacted. The bill is opposed by the administration.

This is important legislation. Its merits and demerits should have adequate debate and there should be opportunity for amendments. Adequate debate being impossible and amendments being precluded by the procedure under which this bill comes before the House, I must vote against the motion to suspend the rules.

One respect in which the bill should be amended concerns the formula for measuring the tax reduction the bill would make available to individuals. The maximum deduction from otherwise taxable income is $2,500 per year. That maximum applies to self-employed individuals whose net earnings from self-employment are $25,000 or more for that year. Take the case of two individuals having net earnings from self-employment of $25,000 per year, and therefore entitled to pay $2,500 into pension trust funds. Each would have a $2,500 reduction from otherwise taxable income. If one of the individuals had no other source of income, his effective tax rate would be approximately 39 percent. The other whose taxable net income might include $25,000 received from other sources would have an effective tax rate of approximately 53 percent. Having an outside income, the second individual would have a tax subsidy one-third higher than the man with no outside income.

In past years I have introduced bills to provide smaller individual tax reductions for self-employed and also for those employed in businesses which do not have pension plans. This latter group numbers about 35 million. If H.R. 10 were amended to include all of that group, the total loss to the Government would be $3 billion.

The conclusions I express reflect some change of opinion on my part. That change is compelled by the current financial condition of the Treasury and to some extent by estimates not heretofore available to me as to the workings of the formulas set forth in H.R. 10.

Mr. SIMPSON of Pennsylvania. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois [Mr. MASON].

Mr. MASON. Mr. Speaker, I have been for the principle of this bill ever since it was introduced many years ago. I believe in the principle of the bill and in the provisions of the bill.

When the social security program was adopted in 1934 it was then adopted as a floor of security under the aged people, and upon that floor they were supposed to be able to build more security of their own.

The farmers of the land are self-employed; most of them are under social security. Social security provides that floor and this provides a method upon which they can build upon that floor, and that is one of the principal reasons for this bill.

Now, fiscal integrity. Fiscal integrity. I have heard about that so much on this floor for the last 20 years that I am sick of hearing it. I claim that I have a greater respect for fiscal integrity on the part of the Government than many of the Members of this House who have been yelling for fiscal integrity yet voting for billions of dollars for foreign aid that I have refused to vote for.

Mr. BYRNES of Wisconsin. Mr. Speaker, will the gentleman yield?

Mr. MASON. No, I will not yield. I have not very much time; the gentleman had his time.

Now, what am I referring to? I am referring to the sixty-odd billions of dollars of foreign aid that this House has voted since the last World War. I am speaking of an administration that pretends to be concerned about fiscal integrity and balancing the budget, yet sends up here a recommendation to continue this foreign aid spending to the tune this year of about $4 billions.

Now, Mr. Speaker, if we want to be consistent on fiscal integrity we can vote 3 or 4 hundred million dollars in this bill for our respectable American citizens who are on their own, and cut the foreign appropriation of $4 billion for citizens in foreign lands by 10 percent, and you will have the budget balanced, according to the administration. Why balance the budget by favoring billions for foreign aid and deny one-tenth of that amount to our own people who are self-employed?

Mr. KEOGH. Mr. Speaker, I yield 3 minutes to the gentleman from Vermont [Mr. MEYER].

Mr. MEYER. Mr. Speaker, I have to speak against this bill because I believe it is more or less out of order so far as tax legislation is concerned. I feel that we should first consider an increase in the exemptions from $600 to $800 per dependent before we pass legislation such as this. I believe that there are many inequities and that there are many reasons why the professional people and self-employed deserve better consideration than they have received; however, I fear that later, after we have passed this bill, it will be used as an argument against raising the exemption from $600 to $800. Therefore I am against the pending bill.

Mr. SIMPSON of Pennsylvania. Mr. Speaker, I yield such time as he may require to the gentleman from California [Mr. UTT].

Mr. UTT. Mr. Speaker, I rise in support of H. R. 10.

Mr. Speaker, in discussing the plan for voluntary pensions for self-employed individuals, I believe that a brief review of the pre-legislative history as well as the legislative history of what is today called the Keogh-Simpson bill will interest you. For more than a quarter of a century there has existed some form of preferential tax treatment to employed individuals whose employer, corporate or otherwise, set up a qualified pension plan for its employees. The employer contributions to these funds, together with the annual income earned on these funds were not subject to income tax liability upon the employer. The tax liability would arise when the benefits thereunder would be received by the beneficiary or his survivors.

These limited pension programs provided several advantages:

First. While the money was credited to the account of the employee, he did not have to pay an income tax on it until he actually received its enjoyment. This was highly proper because the funds as a rule did not vest in the employee until after a certain number of years. So why should he pay tax on something he might never enjoy?

Second. The earnings from his retirement fund were tax exempt until they were distributed.

Third. The pension benefits to be enjoyed by the employee would be distributed to him at a time in life when he would be without earned income and have a double deduction, after the age of 65, and therefore be in a lower income tax bracket than he would have been at the time the fund was created for him.

These limited pension funds became very popular, and today there are 40,000 private pension funds providing savings and retirement for more than 15 million employees. The present total assets in these funds, most of which are invested in common stock, amount to more than $30 billion, and are growing at a rate which would indicate some $70 billion within the next decade.

With this background in mind, it is not surprising that the self-employed individual, be he a doctor, lawyer, merchant, farmer, or in any other profession of self-employment, would seek out a manner in which he could defer a portion of his earnings through some kind of a restricted pension plan and thus obtain a tax equality equal to an employee.

As early as 1945, a group of New York lawyers met and inaugurated discussions on ways and means of providing such a restricted retirement program, not only for themselves, and other self-employed individuals, but also for the 30 or 40 million employees who were not covered by any such voluntary employer-employee pension benefit plan. It was first hoped that this could be done through section 165 of the Internal Revenue Code, under which such other employee plans have been permitted. But it was found that such a program could not qualify under the Treasury Department's ruling, for several reasons. Two years later, Harry Silverson published an article in the American Mercury entitled "A New Tax Proposal" which in essence provided

limited preferential tax treatment for any taxpaper for the purpose of creating a retirement pension plan. The investment of these deductions was to be in nonassignable Government bonds bearing 1-percent interest, redeemable at any time, on or before 10 years after the death of the taxpayer, and the tax liability would attach against him or his heirs at the time of redemption. The Silverson plan was considered, along with other plans, by the tax section of the American Bar Association in 1948. The Treasury Department violently opposed these plans as a scheme for tax averaging, resulting in not less than a billion dollars a year loss of revenue, and they were abandoned.

Following this, in 1950, the American Bar Association appointed a committee on the general problem of retirement benefits. In this work the New York State Bar Association played an important part. These studies resulted in the drafting of legislation for presentation before Congress.

The first draft was prepared under the supervision of Mr. Leslie M. Rapp, a member of the New York and District of Columbia bars. The original bill was then introduced in the 82d Congress by Representative EUGENE KEOGH, of New York, and Representative Daniel Reed, also of New York, both of whom were members of the House Ways and Means Committee. Mr. Reed was a Republican, and Mr. KEOGH is a Democrat, thus giving the legislation bipartisan sponsorship. While the proposed legislation embodied many of the Silverson and other proposals, it appeared to be a true restricted retirement program rather than an income averaging device.

This was in 1951, and while it was prepared and presented by the legal fraternity, it immediately attracted nationwide support from most professional groups, including the American Medical Association and the American Dental Association.

The following year, extensive public hearings were held by the House Ways and Means Committee. The Treasury Department vigorously opposed the measure, mainly on the grounds of loss of revenue at a time when the budget was facing a deficit. The insurance companies also opposed the legislation on the grounds that such deducted investment funds could not be used for the purchase of life insurance annuities and other such contracts. The original Keogh-Reed bill provided much more liberal deductions and accumulations than are provided in the current legislation. No action was taken by the House Ways and Means Committee during that session, and the bill died with the adjournment of Congress. The following year, Mr. Reed became chairman of the Ways and Means Committee, and the legislation was again introduced by Representative Tom Jenkins and Representative EUGENE KEOGH, thus retaining the bipartisan basis. That was my first year as a member of the Ways and Means Committee, and no action was taken, as work was going on for the general revision of the Internal Revenue Code, which was completed in 1954. In the meantime, several modified retirement bills were introduced by a number of members of the New York delegation, among them Representative JOHN RAY of Staten Island. There was an effort made to incorporate the Ray bill in the omnibus tax revision bill, but this move failed, and all legislation again died with the adjournment of Congress in 1954.

The legislation was again introduced at the opening of the session in 1955. The Jenkins-Keogh bill was again introduced with technical changes to permit its integration—I hate the word—into the revised revenue code. By this time the Treasury Department, headed by Secretary George Humphrey, recognized the tax inequity which existed between employed and self-employed persons, but continued to oppose the legislation on budgetary grounds, making it appear that any legislation, regardless of how equitable it might be, which reduced Federal revenues rather than increased them, would be opposed by Treasury, a principle with which I have never been able to agree. The life insurance companies were still demanding, and reasonably so, that any such restricted pension fund should include the right to purchase insurance contracts. While it was the hope and the original intention of the sponsors of this legislation to not only include the self-employed but also those employed persons not then or now enjoying employer-employee pension plans, it became apparent that favorable action would only be obtained by limiting the legislation to self-employed individuals. Amendments were therefore offered by Mr. KEOGH to confine the bill to self-employed persons, to permit insurance policies to be used as a funding medium, in a limited fashion, and to broaden the allowable investment portfolio for custodian accounts. Amendments were also offered and adopted reducing the annual and lifetime exclusions and the legislation was included in the omnibus tax bill upon which the Ways and Means Committee was then working.

An abortive attempt was made to amend the Jenkins-Keogh bill into other pending legislation, which sometimes is a good parliamentary move, and sometimes a bad one, in that you can load a bill down to a point where it falls of its own weight. This situation appeared to be in the making, and the proponents of the legislation decided henceforth to move it forward on its own merits. It was again introduced in 1957 as the Jenkins-Keogh bill with all of the previous amendments adopted by the House Ways and Means Committee. The new bill had several points of refinement, and after further amendments reducing the annual and lifetime excludable amounts, the bill was passed by the committee and by the House late in 1958. It went to the Senate so late in the session that it was not considered by the Senate Finance Committee, and died again with the close of the session.

This legislation has more lives than a cat, and was again introduced this year in exactly the same form in which it had previously passed the House. However, the sponsorship shifted from Mr. Jenkins, who did not run for reelection, to the gentleman from Pennsylvania, Representative RICHARD SIMPSON; but on the Democratic side, the bill still retains the sponsorship of Mr. KEOGH. So today, we have before us the Keogh-Simpson bill. This, then, is the legislative and prelegislative history of the bill to provide limited retirement pensions for self-employed individuals, of whom there are more than 10 million in the United States.

The bill provides that the amounts paid by an individual as a retirement deposit shall be included in the section of the Income Tax Code allowing itemized deductions for individuals, and may be made any time within 3 months and 15 days after the close of the taxable year, and shall be considered as having been made on the last day of such taxable year. No deduction shall be allowed for any taxable year after the taxpayer attains the age of 70.

There are limitations upon the annual allowable deductions as well as on lifetime deductions. The annual limit for an individual is $2,500 or 10 percent of his net earnings from self-employment, whichever amount is the lesser, and the lifetime aggregate amount allowed as deductions to an individual during his lifetime shall not exceed $50,000 which is 20 times the maximum annual deduction. However, if an individual has reached the age of 50 before January 1959, his annual allowable deduction is increased by one-tenth for each full year of his age in excess of 50. In other words, if as of today you have attained the age of 60, your annual deductions would be $5,000 or 20 percent of your net earnings, whichever is the lesser, but the lifetime limit remains at $50,000. In cases where a self-employed individual has previously been covered under a restricted employee pension plan, but is now self-employed, his aggregate lifetime exclusions are to be reduced by the number of years he was so covered, multiplied by $2,500. In other words, if a self-employed individual had been covered for a period of 10 years under a restricted employee benefit plan, his aggregate lifetime deductible amount would be reduced by 10 years times $2,500, or $25,000, so that his remaining lifetime deduction would be $25,000 instead of $50,000, provided, of course, he had acquired a vested interest in the previous retirement plan.

The bill further provides that any self-employed individual who is receiving benefits from an employee retirement plan, or to whom contributions are being made by the employer for his account, and such contributions are vested, cannot participate in this plan during such taxable year.

A self-employed individual is defined, with respect to any taxable year, as any individual who is subject to self-employment social security tax, or would be subject to such tax if he were not excluded, such as ministers, physicians, dentists, and so forth.

An employee restricted pension plan which excludes a self-employed individual from participating in the provisions of this legislation, is defined as a pension, profit sharing, or stock bonus plan, which is exempt under section 501(a) or

an annuity plan which meets the requirements of section 401(a) 3, 4, 5, and 6, or a pension plan established for the employees of the U.S. Government or any agency thereof, by a Territory, or the District of Columbia, or any political subdivision or any instrumentality thereof. Thus, you see, I, as an employee of the Federal Government which has set up a restricted pension program for me, cannot participate in the provisions of this legislation, even though I am otherwise self-employed under the provisions of the Social Security Act relating to tax on self-employed individuals.

Retirement deposit, as defined in the bill, means the payment of money into a restricted retirement fund or into a domestic life insurance company as premiums on a restricted retirement policy issued on the life of the taxpayer. In the latter case, only those funds are deductible which are allocable to the cost of the restricted retirement benefits.

The legislation defines a restricted retirement policy as an annuity, endowment, or a life insurance contract, or a combination thereof which meets certain specifications, among which are that it must be paid to the insured not later than at age 70½ or to the insured as a life annuity, payable within his life expectancy, beginning not later than at age 70½, or to the insured and his spouse as a joint life and survivor annuity. Here there are several technical restrictions which I am sure will require the services of the legal profession, and the legal profession will require the services of the doctors, when they get a severe headache over the confusion which is certain to arise when the regulations are issued by the Internal Revenue Service.

These retirement policies must be nonassignable, and there shall be no incident of ownership by anyone except the insured, and cannot provide life insurance after the age of 70½.

I must warn you that you will not be permitted any of the deductions above referred to with respect to premiums paid on a restricted retirement policy before that policy has been identified as such in the manner and form prescribed by the Secretary of the Treasury or his delegate. Likewise, no deductions can be allowed with respect to any amount paid into a restricted retirement fund by any individual before such fund has been identified as such, nor before such individual has been identified as a participant in such fund in the manner and form prescribed by the Secretary of the Treasury or his delegate.

Now I will direct your attention to the tax treatment of benefits received under these plans. In general the amounts of money and the fair market value of property received from a restricted retirement fund shall be included in the recipient's gross income for the taxable year in which it is received, except that if these benefits are received in a lump sum, the tax liability shall be computed over a 5-year average. The bill provides special rules in the case of the return of excess contributions and in cases of contributions made which were known to be excessive. There are certain prohibited transactions imposed upon the trustee of a restricted retirement fund. The general rule applying to annuities will be applicable to annuity payments accruing under this retirement program. There are several exceptions to this, too detailed to mention.

Proceeds from a life insurance policy under this program in case of death receive special treatment, in that the amount of the cash-surrender value of the policy on the day preceding the death of the individual shall be taxable as income to the recipient, and amounts in excess of that will be taxed as any other insurance.

If the insured borrows against the cash surrender value of his policy during his lifetime, that amount will be considered as taxable in the year it was borrowed, with the exception that he may borrow not in excess of the current annual premium if he applies the money so borrowed to the payment of the annual premium, and liquidates the loan within 12 months. The taxpayer also has options which permit him to receive the full cash surrender value at any time, provided that within 60 days thereafter such money is irrevocably converted into a contract providing restricted retirement benefits. The taxpayer cannot make an assignment of his policy without being subject to a tax on the entire cash surrender value.

There are several technical sections involving the tax treatment of the benefits and they should be carefully studied before any affirmative action is taken.

In cases where a trust fund is established the trustee must be a bank, and a trust instrument issued in accordance with the provisions of H.R. 10 as well as any subsequent rules and regulations issued by the Secretary. Here again, the trustor's interest cannot be assigned, but he may designate one or more beneficiaries in the event of his death, or he can direct the trustee to transfer his entire interest to another restricted retirement fund. The trust must terminate and be distributed, or the funds applied to the purchase of an annuity before the trustor reaches the age of 70, or he must elect to have his entire interest in the trust distributed before he reaches the age of 80 with not less than 10 percent of the value of such interest determined at the age of 70 being distributed each taxable year thereafter. If the trustor dies before he reaches the age of 70, his interest in the trust must be distributed within 5 years of the date of his death, or applied to the purchase of an immediate annuity for his surviving spouse, payable for her life or for a term certain which cannot go beyond her life expectancy. One or more individuals may associate themselves in the same trust, and their interest must be apportioned on the basis of their contributions. The trustee has a large range of permissible investments, including any stock or securities listed on an exchange which is registered with the Securities and Exchange Commission, subject, of course, to the prohibited transactions which are defined in the bill. These trusts receive special treatment and are subject to the general rules relating to estates, trusts, and beneficiaries.

The bill provides that the income from such a restricted retirement fund shall be exempt from income taxes. Banks and insurance companies are required to file informational returns.

This, then, is a thumbnail analysis of the pending legislation, the provisions of which, of course, are subject to revision by the Senate Finance Committee and the Senate as a whole. H.R. 10 is not a substitute for social security, but rather a retirement program supplemental to it; and I urge the immediate passage of H.R. 10.

Mr. UTT. Mr. Speaker, I ask unanimous consent that the gentleman from Washington [Mr. PELLY] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PELLY. Mr. Speaker, I support H.R. 10, the so-called Keogh-Simpson bill, which is to give to voluntary pension plans of self-employed persons the same tax deferment that is granted under present law to the retirement savings of employees under qualified plans. This equalizing legislation is sought by doctors and lawyers and professional persons such as accountants, all of whom are considered to have high earnings. By postponing the tax on payments to retirement savings plans it might be in the nature of relief to those in high income brackets, but also it will help plumbers and independent workers, the butcher, the baker, the candlestickmaker, and persons with modest earnings.

Last year I voted to suspend the rules and pass the same measure, but it was late in July and never became law.

Now, the Secretary of the Treasury opposes the bill because of the need of the Government for revenue. I do not want to unbalance the budget, and sympathize with the Secretary, but to me a reduction or economy in Government spending is the answer to that. So, as for me, I will vote for H.R. 10 and if it becomes law I will support efforts to reduce nonessential Federal expenditures to make up the difference. My support of this bill is not a vote for an unbalanced budget. I am firmly for holding the line on spending. I want to make that point clear.

Mr. JOHNSON of Colorado. Mr. Speaker, I rise to review how this problem came about and to discuss some of its implications. During the war years there was, as you will recall, a wage freeze. Many corporations and many workers sought for means by which wage increases could be granted without breaking the wage freeze orders. It was at this time that fringe benefits including pension funds became popular. The War Labor Board and the Treasury joined to rule that payments on behalf of employees would not be viewed as income, and tax treatment was modified accordingly. The effect of this was, of course, to open the door to tax-free contributions made by employers on behalf of their employees. Concessions having been made, it was inevitable that the Congress should be asked to provide some similar form of tax treatment for self-employed persons who do not have the

options made available to employed persons by that war-time ruling.

The bill facing us today represents an answer to the request for relief by the self-employed. There is a relative inequity which justifies some revision of tax treatment. I regret, Mr. Speaker, that the relief being offered takes the form that it does. This bill, for good and sufficient reason of tax accounting, carefully limits the kinds of investments which shall be accorded such favored tax treatment. In the process it influences, and I think adversely, the freedom of such persons to manage their estates as may seem to them best. I find nothing in this bill that would give tax relief, for example, to a young doctor if he were to decide that the best investment he could make of his income would be in the form of the building of a medical clinic. There is nothing in this bill to encourage a small businessman to invest up to 10 percent of his income in the building up of his business.

It seems to me that if we are to give tax favors for investment of a portion of one's income, then we ought to permit the investor to use his own best judgment as to the form the investment should take. More than that, we ought to give at least equal tax treatment to an investment in a form which enhances his own productivity and capacity to earn income. This should be at least as important as tax encouragement to retirement plans.

It may seem strange to some that members of the business community are urging upon the Congress the passage of a tax law that will limit their freedom to manage their own business affairs rather than expand that freedom. I would suggest that their purposes might have been better served by a fundamental tax reform. For example, the Federal law might deal with the whole range of taxpayers by providing that 10 percent, or some other reasonable percentage of their income, shall be treated as tax exempt if it is invested, with the added proviso that upon realization of income from such sale or other disposition of assets, such receipts shall be treated as taxable income. This would give the taxpayer complete freedom to manage his income as seems best to him. It would avoid favoring one type of investment over another. Moreover, if the Congress were to remove this inequity, we ought to charge any employer contribution on behalf of the employee against the first portion of that tax exempt allowance. For example, if the employer contributes an amount equal to 6 percent of the employee's wage to a retirement account, that 6 percent should first be credited and, then any other investment by the employee permitted to use up the remainder of the 10 percent. This more fundamental reform might be a more equitable solution for the inequity that now exists.

Or to pursue completely this line of attack, it has been suggested, for example, by a recent article in Fortune magazine, that the high marginal rates are a fundamental inequity in the income tax because of their uneven application to various types of income. It has been suggested that the $365 million of tax relief which we are approving with the passage of H.R. 10 could instead be used to reduce the top rate to 65 percent. This would perhaps be a less satisfactory solution to the small businessman but it might be a wiser course from the standpoint of an equitable income tax structure.

I shall vote for H.R. 10 reluctantly because I think an inequity exists and has existed for many years that is partially remedied by H.R. 10. But I find in H.R. 10 a further invasion of the taxpayer's freedom to manage his own income and estate. This invasion may be justified in order to simplify tax accounting over a man's lifetime. It is not justified by any considerations of the resulting economic consequences either to the taxpayer or to the community. I think both will suffer from that invasion.

I sincerely hope that the business community will join the Congress in a thorough re-examination of our tax structure, looking toward a far more fundamental tax reform that will protect the integrity of our tax system, protect the integrity of the budget, and expand the freedom of individuals and businessmen to manage their own affairs as seems to them best without the tax angle becoming the decisive factor in business decisions.

Mr. KARTH. Mr. Speaker, once again the House considers a worthy bill to help millions of self-employed persons—the small businessmen, doctors, dentists, lawyers, and other professionals—provide for themselves a sound, convenient, and orderly plan for retirement income.

Late last session this bill was approved by the House but unfortunately it died at adjournment before it could be considered in the other house and included with the other small business legislation which the 85th Congress passed because of able and vigorous Democratic leadership. This series of measures, incidentally, if properly financed and sympathetically administered, could well initiate the renaissance of American small business.

H.R. 10 when adopted will round out the basic structure in this system to help men and women who are gifted with ideas and energy but short of other resources to invigorate and put meaning and substance in the idea of free enterprise.

Our economy is in dire trouble because the giant corporations since World War II have through consolidation, purchase, or a variety of other dubious methods crushed out of existence much of their competition. Our country is now paying the terrible price for the monopolization of our economy with inflation, underproduction, and unemployment. Negative weapons of antimonopoly legislation have failed—the promising, positive program of encouraging small business is an inspired effort to keep the American economy democratic and dynamic. I am proud of the leading part that the Democratic Party, both nationally and in my State of Minnesota, has had in reinvigorating small business. Some considerable tribute has to be paid too to those fearless members of the minority party who have voted with the Democrats despite the formidable disapproval of the Republican administration.

This administration has fought tooth and nail against any really effective program for small business and when it has been forced to accept, reluctantly, Democratic sponsored measures it has practiced cold, deliberate sabotage against small business as our distinguished and venerable colleague WRIGHT PATMAN has revealed.

The administration's big guns are now being trained on H.R. 10 to destroy any chance for the millions of self-employed persons to get only a fraction of the tax consideration received by high-salaried corporation executives, those exalted employees with their bonuses in stock, stock options, company contributed pensions, and other fancy emoluments—not including that ultimate in tax evasion devices, expense-account living.

The Republican congressional leaders and the administration through Secretary of Treasury Anderson have now declared war on H.R. 10 and in effect say to small businessmen, the doctors, dentists, lawyers, and other professional people of this Nation that as far as retirement income is concerned, "you can drop dead."

Republicans in the administration wrap the flag of patriotism around them saying that to enact H.R. 10 would throw the President's budget into deficit and would be doing Karl Marx's work of destroying capitalism. Yet where is patriotism when Secretary of Defense Neil McElroy plans, with the President's best wishes, to desert his crucial post as the countdown in Berlin nears a possible blast-off for civilization itself, just so that Mr. McElroy can, as the press reports, save the pension and other interests given him by his soap factory?

Should our civilization survive the summer I hope than an H.R. 10 enacted into law will spur the millions of America's self-employed persons to do better democracy's work of invigorating free enterprise by helping themselves provide for their golden years.

I urge the passage of H.R. 10.

Mr. HEMPHILL. Mr. Speaker, it is indeed a pleasure for me to rise in support of H.R. 10. The distinguished gentleman from New York [Mr. KEOGH], has spent many years in behalf of this very much needed legislation for our business and professional people, and I hope the bill will become a law soon. He came close to making it last year, but the Senate did not act following the passage of the bill by the House.

This year, as last year, I have had a number of my own constituents write to me about this legislation and I feel they deserve the benefits to be derived from such legislation.

This bill gives hope, help, relief, and encouragement to the small, independent businessman and professional man. Many of my friends in business have complained that big outfits have deductible pension plans, but the small businessman had no allowance for deduction. This gives the small businessman that deduction.

The self-employed businessman, having a small organization, has his hands full. He is burdened with taxes of every kind, and spends many long hours doing paperwork for the Government. He has all the responsibility of leadership in his business, as well as the burden of terrific competition. This legislation seeks to give him a chance at a pension plan.

The professional man, such as the doctor, accountant, engineer, consultant, lawyer, and clergyman will also benefit. Each professional man, as each businessman, contributes daily to the life of his community. Unless he is employed by some company, he cannot have a self-propelled deductible pension plan of his own. This legislation gives him the same opportunity as the professional man on the payroll of another. It gives him a measure of tax relief.

Aside from the tax relief and encouragement, we must recognize that this will encourage saving, and will generate capital for new investment. Our form of government, our standard of living, our way of life—are each and all dependent on constant investment and reinvestment of capital to provide expansion, new plants, promote new ideas, and provide lending capital to promote new jobs. In one chain of plants in my district, the employees are allowed to buy stock. What opportunity.

The provisions of the bill make the participation voluntary. No one is forced into it. No Government funds are involved. No new administration is created, and no new or old bureaucracy encouraged. We are just saying to the man who runs his own business: "You deserve the same consideration of those who work for someone else, and Congress is going to try to give it to you."

The average businessman today actually works 7 to 9 days a month for Uncle Sam. I say this because all of us are aware of the heavy taxes we have. I had hopes for and urged tax relief this year, but the leaders of the parties vetoed the idea. This measure is in the right direction and I hope and pray that next year we can enact a real tax relief bill across the board.

I believe the American people would be in favor of this bill which helps the small businessman and professional man. I hope the legislation will pass.

Mr. ROGERS of Florida. Mr. Speaker, I am privileged once again to join in support of legislation which, if enacted, will prove of inestimable value to an increasingly large segment of Americans. H.R. 10, by permitting self-employed individuals to take a deduction for a limited amount of investment in certain types of retirement programs, will help straighten out the inequalities under the present tax setup where the employee is receiving this type of tax treatment, but the self-employed person is not.

While company officials and employees receive benefits from retirement plans which are not counted as income until the money is actually drawn out, the small businessman, farmer and professional man now has to save at a great disadvantage since income put into savings for retirement is taxable at a higher rate during peak income years, rather than later in life when income is normally reduced.

It is true that such a measure as this would result in some revenue loss. However, to oppose such a measure, desirable apart from its impact on receipt of revenue by the Treasury, is to preclude reform in our tax structure when reform is indicated. I submit that the relatively small loss in revenue which will result from passage of this bill, will be more than balanced if we dedicate ourselves to the task of cutting down unnecessary Federal spending.

It is for the millions of small businessmen, farmers, and professional people that the Congress must act favorably on this bill. These people have every right to enjoy the fruits of their labor during their reclining years on an equal footing with the man who now qualifies for retirement benefits as an employee.

This measure will reiterate our belief in the free enterprise system by removing the present disadvantage the independent businessman finds himself in regarding savings for retirement.

It will recognize that the inherent qualities of success—thrift, initiative, and consideration for the future—will receive their just reward.

I sincerely hope that the House will adopt this measure and thereby go on record in support of equal treatment for the farmers, small businessman, and professional people who have contributed so much to the economic and social growth of the America we know today.

Mr. FASCELL. Mr. Speaker, I am extremely pleased that the House leadership has scheduled H.R. 10 for debate and vote today. I have long been an enthusiastic supporter of this proposal and cosponsored it during the last Congress and again this year.

The gentleman from New York [Mr. KEOGH] has made an excellent presentation of this proposal in his usual eloquent and precise manner. His bill will provide self-employed individuals with the opportunity to deduct from their annual taxable income, an amount—not to exceed 10 percent—paid by him into a restricted retirement policy or trust fund as a contribution toward his retirement income. These contributions, plus all accumulated earnings, will become taxable when drawn upon after age 65.

I hope that the other body will accord this worthwhile and reasonable legislation its early and favorable consideration.

Mr. GRIFFIN. Mr. Speaker, except for the retroactive feature in this legislation, I wholeheartedly subscribe to the principles and purposes which it embodies. Since I am a lawyer by profession and intend to return someday to the practice of law, it is not difficult for me to find merit in the bill.

However, Mr. Speaker, this is not the time in the session to enact tax cutting legislation. The pressures which have been brought to bear by well-intentioned business and professional people for passage of this bill, should first be directed toward the requirement that Congress maintain a balanced budget.

I would pledge my enthusiastic support for the passage of this bill at the end of the session providing that this Congress, at that time, has not appropriated more money than is called for in the President's balanced budget.

Mr. Speaker, if it should be that lawyers and doctors cannot understand the necessity for fiscal responsibility, then I fear there may be little hope left for the country.

Mr. QUIGLEY. Mr. Speaker, it is with mixed emotions that I rise in opposition to H.R. 10.

First, I regret that I find myself on the other side of this or any other issue of my good friend and distinguished colleague, the gentleman from New York, the sponsor of this bill.

My reaction upon finding myself on the other side of the issue from the cosponsor on the other side of the aisle, my distinguished colleague from Pennsylvania, is, I must confess, somewhat different. We have been on opposite sides on so many issues that I suspect we are both slightly embarrassed on those rare occasions when we find ourselves in full accord. I can assure the gentleman that neither of us is in danger of being embarrassed at this time.

To say this is not to say that I do not see considerable merit in H.R. 10. I recognize that it has real merit—not the least of which is that it would put money in my pocket. And this would be a deposit that could be made not just once or twice but for every year of my life.

The only trouble is that for me to have this money it must come from someone else. H.R. 10 is a perfect case of robbing Peter to pay Paul. In this instance, it would be a case of taking care of JIM at the expense of Uncle Sam.

Now I recognize that the most persuasive argument in favor of this measure is that it is an attempt to restore fairness and equity to our tax structure because as we all know for many years other Jims, along with Joes, Dicks and Harrys have been taken care of quite well at Uncle Sam's expense. Under the circumstances, it is indeed understandable if the professional and self-employed in this country long for the advantages which our tax laws give to the key personnel in the American business community. I know from personal experience the feeling of envy with which members of the legal profession have looked upon the manner that big businesses and businesses not so big, have in recent years lavished pension and retirement benefits on their executive personnel. We would be less than human if we reacted otherwise.

However, Mr. Speaker, I suggest that what the country needs at this time is not an organized effort on the part of the members of the bar, or the doctors, or the businessmen, or the farmers, to see that they too get theirs. What we need, Mr. Speaker, is a revision in our basic tax structure which would give us at one and the same time the fairness in our tax structure and fiscal integrity which my colleague from Pennsylvania referred to.

I want fairness in our tax laws and I believe that our country needs fiscal integrity. Unfortunately, H.R. 10 guarantees neither. In fact, it all but makes it a certainty that we will not have both.

As the gentleman from Wisconsin has correctly pointed out, H.R. 10 succeeds in being fair to the professional and the self-employed of this country vis-a-vis the employees of many private industries, but it succeeds in doing this only by making the situation more unfair as far as other deserving groups are concerned—the civil servants and the railroad workers to cite just two examples.

Mr. Speaker, within the past week the President of the United States has challenged those of us who have been critical of his "we can't afford" approach to come forward with proposals which will provide the additional taxes which will be necessary to give this country the defense posture it must have—our children the schools they need; the families of America the decent homes they are entitled to have; the Nation the economic growth so essential if the American worker is to have a job; and the American businessman to enjoy anything which resembles prosperity. Under the Constitution, I am not at all certain that, regardless of how annoyed he may become at his critics, the responsibility to propose a tax program still rests with the executive branch of our Government. Even if it does not, I confess that I am not enough of a tax expert to be the one in the Congress who would attempt to pick up that challenge. However, Mr. Speaker, I do recognize that, much as we might like it to be otherwise, we cannot have everything. And sometimes the choices we must make are not always easy.

The choice before us today is one of those hard ones to make. But it seems to me if I must choose between voting for a bill which will do well by me in my declining years and vote for a bill which will do well by my children during their formative years, the choice becomes a lot easier. In my judgment, I have no choice but to see to it that my children and all the children of this country get the best education possible.

If I must choose between being nice—no, Mr. Speaker—not nice, being fair to myself and to millions of other Americans similarly situated and making certain that America remains the place wherein these millions can continue to practice their profession, pursue their own business efforts, plow their own fields, then I find it an easy choice to make. Rather than run the risk of being unfair to this country, I would sooner be unfair to myself.

For all of these reasons and for many more which I will not now take the time to detail, I feel I am constrained to vote against this bill.

Mr. DAVIS of Georgia. Mr. Speaker, I rise to support H.R. 10. This bill will help to encourage initiative, push, and determination—the will to succeed by dint of one's own efforts.

Our economy requires big business and a large number of corporate employees to keep it going on an even kilter. In order to help keep it that way, we need a large group of self-employed. This would include professional men, lawyers, doctors, dentists, architects, artists, artisans of various kinds and businessmen who work for themselves.

If we still want to preserve this type of individual, as I am sure we do, the Government, which has done so much to tear down the spirit of self-reliance with quasi-socialistic programs in the past quarter century, must make amends for its past errors. It should do this by seeing to it that men and women with a spirit of individual enterprise should have the opportunity to succeed at their chosen endeavors. The Government, which has largely created the difficulty, should see to it that the large numbers of self-employed are not so handicapped by taxes that they choose the status of an employee, thus holding themselves back as well as others.

By its heavily graded income taxes—the so-called progressive tax—the Government is actually doing the opposite of what it should be doing. It is discouraging self-employment and individual free enterprise when it should be lending it every aid. There is no system at present of averaging for hard times—the bad years—which are altogether too common for the self-employed—or to make any practical provision by which the self-employed can save money for catastrophic periods and the winter of old age.

Tax laws now in effect do not provide for the self-employed in similar fashion to the statutory aid to pension plans for the employed. The bill under discussion today, H.R. 10, would correct that inequitable situation, if enacted into law. It would give the self-employed an opportunity to save their own money for their own retirement. No subsidy or use of Treasury money is involved. The people involved would be the ones saving for themselves. They would be getting no handout. While the immediate beneficiaries would be the self-employed, in a larger sense America would be as much the beneficiary. Self-reliance would be rekindled in America. The individual entrepreneur could get a new birth of freedom by this bill.

These high taxes and high living costs make it hard indeed for the self-employed man or woman to create an old-age retirement fund out of current income. This point must be crystal clear to us by now. H.R. 10 would give them the opportunity that is their due to save a small part of their money, under the provisions of the bill, which are fair and sound, and on which they will pay their own taxes when they retire.

I am happy to support H.R. 10 and hope that it shall pass.

The SPEAKER. The question is on the motion that the rules be suspended and the bill be passed.

The question was taken; and (two thirds having voted in favor thereof) the rules were suspended and the bill was passed.

REVISION OF LAWS RELATING TO DEPOSITORY LIBRARIES

Mr. HAYS: Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 519) to revise the laws relating to depository libraries.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act shall be known as the "Depository Library Act of 1959."

The term "Government publication" as used in this Act and the amendments made by it means informational matter which is published as an individual document at Government expense, or as required by law.

Government publications, except those determined by their issuing components to be required for official use only or those required for strictly administrative or operational purposes which have no public interest or educational value and publications classified for reasons of national security, shall be made available to depository libraries through the facilities of the Superintendent of Documents for public information. Each component of the Government shall furnish the Superintendent of Documents a list of publications, except those required for official use only or those required for strictly administrative or operational purposes which have no public interest or educational value and publications classified for reasons of national security, which it issued during the previous month that were obtained from sources other than the Government Printing Office.

SEC. 2. That section 501 of the Revised Statutes, as amended (March 1, 1907, ch. 2284, sec. 4, 34 Stat. 1014; 44 U.S.C. 82), is hereby amended to read as follows:

"SEC. 501. The Government publications, which may be selected from lists prepared by the Superintendent of Documents and when requested from him, shall be distributed to depository libraries specifically designated by law and to such libraries as may have been designated by each of the Senators from the several States, respectively, and as have been or shall be designated by the Representatives in Congress from each congressional district and at large, and by the Delegate from each Territory, or the Resident Commissioner from each Commonwealth: *Provided,* That additional libraries within areas served by Representatives, Delegates, or Resident Commissioners may be designated by them to receive Government publications to the extent that a total of not more than two such libraries, other than those specifically designated by law, which are qualified to fulfill minimum requirements as provided by law for depository libraries, may be designated within each area; however, before any additional library within a congressional district, Territory, or Commonwealth shall be designated as a depository for Government publications, the head of that library shall furnish his Representative, Delegate, or Resident Commissioner with justification of the necessity for the additional designation. This justification, which shall also include a certification as to the need for the additional depository library designation, shall be signed by the head of every existing depository library within the congressional district, Territory, or Commonwealth or by the head of the library authority of the State, Territory, or Commonwealth within which the additional depository library is to be located. The justification for additional depository library designations shall be transmitted to the Superintendent of Documents by the Representative, Delegate, or Resident Commissioner."

SEC. 3. That section 502 of the Revised Statutes, as amended (January 12, 1895, ch. 23, secs. 53 and 61, 28 Stat. 608 and 610; 44 U.S.C. 83), is hereby amended to read as follows:

"SEC. 502. The Superintendent of Documents shall currently issue a classified list of Government publications in suitable form, containing annotations of contents and listed by item identification numbers in such manner as to facilitate the selection of only those publications which may be needed by designated depository libraries. The selected publications shall be distributed to depository libraries in accordance with regulations issued by the Superintendent of

Documents, so long as they fulfill the conditions provided by law."

SEC. 4. That section 5 of the Act of June 23, 1913 (38 Stat. 75, ch. 3; 44 U.S.C. 84), is hereby amended to read as follows:

"SEC. 5. The designation of a library to replace any one of not more than two depository libraries, other than those specifically designated by law, within a congressional district, Territory, or Commonwealth may be made only when the library to be replaced shall cease to exist, when the library voluntarily relinquishes its depository status, or when the Superintendent of Documents determines that it no longer fulfills the conditions provided by law for depository libraries."

SEC. 5. That section 4 of the Act of March 1, 1907, as amended (34 Stat. 1014, ch. 2284, and 52 Stat. 1206, ch. 708; 44 U.S.C. 85), is hereby amended to read as follows:

"SEC. 4. Upon request of the Superintendent of Documents, the components of the Government which order the printing of publications shall either increase or decrease the number of copies of publications furnished for distribution to designated depository libraries and State and Territorial libraries so that the number of copies delivered to the Superintendent of Documents shall be equal to the number of libraries on the list: *Provided,* That the number thus delivered shall at no time exceed the number authorized under existing statute: *Provided further,* That such copies of publications which are furnished the Superintendent of Documents for distribution to designated depository libraries shall include the journals of the Senate and House of Representatives; all publications, not confidential in character, printed upon the requisition of any congressional committee; all Senate and House public bills and resolutions; and all reports on private bills, concurrent or simple resolutions; but shall not include so-called cooperative publications which must necessarily be sold in order to be self-sustaining.

"The Superintendent of Documents shall currently inform the components of the Government which order the printing of publications as to the number of copies of their publications required for distribution to depository libraries. The cost of printing and binding those publications which are distributed to depository libraries, when obtained elsewhere than from the Government Printing Office, shall be borne by components of the Government responsible for their issuance; those requisitioned from the Government Printing Office shall be charged to appropriations provided the Superintendent of Documents for that purpose.

"All land-grant colleges shall be constituted as depositories to receive Government publications subject to the provisions and limitations of the depository laws."

SEC. 6. That section 70 of the Act of January 12, 1895 (28 Stat. 612, ch. 23; 44 U.S.C. 86), is hereby amended to read as follows:

"SEC. 70. Each library which may hereafter be designated by Representatives, Delegates, or Resident Commissioners as a depository of Government publications shall be able to provide custody and service for depository materials and be located in an area where it can best serve the public need, and shall be located within an area not already adequately served by existing depository libraries. The Superintendent of Documents shall receive reports from designated depository libraries at least every two years concerning the condition of each and shall make firsthand investigation of conditions for which need is indicated; the results of such investigations shall be included in his annual report. Whenever he shall ascertain that the number of books in any such library is below ten thousand, other than Government publications, or it has ceased to be maintained so as to be accessible to the public, or that the Government publications which have been furnished the library have not been properly maintained, he shall delete the library from the list of depository libraries if the library fails to correct the unsatisfactory conditions within six months. The Representative, Delegate, or Resident Commissioner in whose area the library is located shall be notified and shall then be authorized to designate another library within the area served by him, which shall meet the conditions herein required, but which shall not be in excess of the number of depository libraries authorized by law within each district, Territory, or Commonwealth."

SEC. 7. That section 98 of the Act of January 12, 1895 (28 Stat. 624, ch. 23; 44 U.S.C. 87), is hereby amended to read as follows:

"SEC. 98. The libraries of the executive departments, of the United States Military Academy, and United States Naval Academy are constituted designated depositories of Government publications. A depository library within each independent agency may be designated upon certification of need by the head of the independent agency to the Superintendent of Documents. Additional depository libraries within executive departments and independent agencies may be designated to receive Government publications to the extent that the number so designated shall not exceed the number of major bureaus or divisions of such departments and independent agencies. These designations shall be made only after certification by the head of each executive department or independent agency to the Superintendent of Documents as to the justifiable need for additional depository libraries. Depository libraries within executive departments and independent agencies are authorized to dispose of unwanted Government publications after first offering them to the Library of Congress and the National Archives."

SEC. 8. That section 74 of the act of January 12, 1895, as amended (28 Stat. 620, ch. 23; and sec. 11, 49 Stat. 1552, ch. 630; 44 U.S.C. 92), is hereby amended to read as follows:

"SEC. 74. All Government publications of a permanent nature which are furnished by authority of law to officers (except Members of Congress) of the United States Government, for their official use, shall be stamped 'Property of the United States Government', and shall be preserved by such officers and by them delivered to their successors in office as a part of the property appertaining to the office. Government publications which are furnished to depository libraries shall be made available for the free use of the general public, and may be disposed of by depository libraries after retention for a minimum period of five years, and in accordance with the provisions of section 9 of this Act, if the depository library is served by a regional depository library. When the depository libraries are not served by a regional depository library, or if they are regional depository libraries themselves, the Government publications, except superseded publications or those issued later in bound form which may be discarded as authorized by the Superintendent of Documents, shall be retained permamently in either printed form or in microfacsimile form."

SEC. 9. Not to exceed two depository libraries in each State, Territory, and Commonwealth, may be designated as herein provided to be regional depositories, and as such shall receive from the Superintendent of Documents copies of all new and revised Government publications authorized for distribution to depository libraries; and in addition shall be entitled to receive a microfacsimile copy of these Government publications which the Superintendent of Documents determines to be suitable for such form of reproduction and which can be furnished by him within the limits of available appropriations. Designation of regional depository libraries may be made by a Senator, Delegate, or the Resident Commissioner within the areas served by them, after approval by the head of the library authority of the State, Territory, or Commonwealth, who shall first ascertain from the head of the library to be so designated that the library will, in addition to fulfilling the requirements for depository libraries, retain at least one copy of all Government publications, either in printed or microfacsimile form (except those authorized to be discarded by the Superintendent of Documents); and within the region served will provide interlibrary loan, reference service, and assistance for depository libraries in the disposal of unwanted Government publications as herein provided. The agreement to function as a regional depository library shall be transmitted to the Superintendent of Documents by the Senator, Delegate, or Resident Commissioner when designation is made.

The libraries designated as regional depositories shall be authorized to permit depository libraries, within the areas served by them, to dispose of Government publications which they have retained for at least five years after first offering them to other depository libraries within their area, then to other libraries, and then if not wanted to discard.

The SPEAKER. Is a second demanded?

Mr. SCHENCK. Mr. Speaker, I demand a second.

Mr. HAYS. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. HAYS. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, H.R. 519 is identical with H.R. 13140, a bill that passed the House unanimously last July. It would revise the laws relating to Federal depository libraries. The bill passed the House last year without a dissenting vote, but got over to the other body too late to be considered by the Committee on Rules and Administration. I sent a letter to the members of that committee and received replies from all of them that they were very much interested in the proposal, and they hoped the bill could be before them early in this session so that they could have ample time for its consideration.

Briefly, what this bill does is to revise the laws relating to depository libraries; which laws, I might add, have not been revised since they were passed at a time when the population of this country was 70 million people.

It allows some additional libraries to be designated for more effective distribution of Federal publications. More importantly, in my opinion, Mr. Speaker, it allows designated libraries, upon certification, after 5 years, to dispose of Federal documents which, under the present law, they must keep in perpetuity. It is estimated that if all of the libraries that could become eligible under this law were designated, there would be an additional cost to the Government of approximately $150,000 a year. However, a poll that we have taken indicates that there will only be about one-fourth

of those designated actually, which would reduce the cost, the maximum cost, to about $40,000 a year. In my opinion, by sending out, as this law provides, a more selective list so that the libraries can be more discriminating about what they select, there should be indicated savings to the Government. I might say that we polled 1,000 librarians by questionnaire in the preceding Congress as to their ideas about this law.

We held hearings in Washington and in four widely scattered points in the United States, and we believe this bill now embodies the recommendations of the people most vitally concerned with the matter, namely, the librarians, the Public Printer, and all others who have associated interests. Now, it is a rather complex bill, and I will be glad, to the best of my ability, and I am sure my colleague, the gentleman from Ohio [Mr. SCHENCK], the ranking minority member of the Committee on House Administration, will be glad to the best of his ability, to explain any points in question for the membership.

Mr. DAVIS of Georgia. Mr. Speaker, will the gentleman yield?

Mr. HAYS. I yield to the gentleman from Georgia.

Mr. DAVIS of Georgia. I have checked into the situation in the district that I represent, and I have been told that we now have three such depositories in the Fifth Congressional District of Georgia. If that is correct, and I have been told by a qualified agency here that it is correct, would this bill have the effect of cutting them down to two?

Mr. HAYS. No. This bill will not cut down any present depositories. As a matter of fact, your case is unique, but it is not the only one in the United States. This situation came about by redistrictings where intrastate boundaries have been redrawn through the years and mergers of districts have developed. We have a district in Ohio that actually has four depositories, and none of those will be affected by this legislation.

Mr. DAVIS of Georgia. I thank the gentleman.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. HAYS. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. I might say, to the converse, I represent a district that has not got one. I have tried to get one to qualify who would be eligible under the law. I have not been able to do so. I made efforts only within the past week or 10 days, exploring the situation again. So, as the gentleman from Georgia says, he has three in his district and the gentleman from Ohio says he knows of one Ohio district that has four because of the changed congressional lines, I am unfortunately in the position where I have not got any, although I am entitled to one under the law. But, no one seems to be interested among those who could qualify or there is no institution within my district that can qualify in accordance with the basic law.

Mr. HAYS. I thank the gentleman. There are other districts in exactly the same situation in which he finds himself. I might say that this matter first came to my attention from a university which has an enrollment of 9,000 students, but it is not a designated Federal depository. Forty miles away from this institution is another college which was designated 50 years ago and has an enrollment of only 600 students. This will not take away from the college with 600 students its designation, but it likely permits the university with 9,000 students to secure a depository status and thus avail itself of these Government publications.

I might say that none of these are in my district. There is no library in my district that I know of that now desires to be designated. I have no personal interest in it whatever. It came before my subcommittee as one of those matters which needed attention, and we spent some time trying to write the best piece of legislation that could be drafted on this broad subject.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. HAYS. I yield to the majority leader.

Mr. McCORMACK. Mr. Speaker, I want to compliment the gentleman because I know that he and the members of his subcommittee conducted hearings in various parts of the country. In fact they conducted very extensive hearings in the city of Boston.

Mr. HAYS. I thank the gentleman.

Mr. MONAGAN. Mr. Speaker, will the gentleman yield for a question?

Mr. HAYS. I yield.

Mr. MONAGAN. Am I correct in assuming that these depositories concern only, or primarily, the documents that are published by the Government itself?

Mr. HAYS. Only documents published by the Government. That is all this bill concerns.

Mr. HAYS. Mr. Speaker, I ask unanimous consent to revise and extend my remarks, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

EXPLANATION OF PURPOSES AND OBJECTIVES OF H.R. 519

Mr. HAYS. Mr. Speaker, under permission to extend my remarks on the bill (H.R. 519), to revise the laws relating to Federal depository libraries, I have developed a list of important features contained in the proposal, and desire to set forth this series of simple statements explanatory of the various topics. While the House report accompanying the bill is lucid and clear in its analysis, I believe that a short condensed answer is very often of greater assistance to one who seeks information, and for that reason I have chosen a set of subjects and explanations which have been most frequently asked during our study of this important measure.

BETTER AND MORE SELECTIVE DISTRIBUTION OF GOVERNMENT PUBLICATIONS

The bill permits more effective distribution of Government publications to depository libraries, based on need together with more selectivity by libraries for publications they chose to receive.

STATUS QUO FOR PRESENT DEPOSITORIES—EXCEPTIONS

Presently designated depositories would retain their status, if desired, unless, found not to comply with requirements.

ADDED DEPOSITORIES

An additional depository could be designated by Representatives, Delegates, and Commissioners within their areas when the need for it is shown to exist, as outlined in the bill.

SELECTING PUBLICATIONS

An improved listing from which publications would be selected by depositories is provided in bill.

REPLACING EXISTING DEPOSITORIES

Replacement for depositories is provided in cases where they either cease to exist or fail to meet requirements for retaining designation.

GOVERNMENT PUBLICATIONS OBTAINED FROM OTHER THAN GPO

Publications obtained by departments and agencies elsewhere than at the GPO would be distributed to depositories, when requested, thus fulfilling a need that has long been felt by these libraries.

EXECUTIVE DEPARTMENTS

Libraries of independent agencies as well as those of executive departments could, when needed, be designated depositories.

DISPOSAL OF OUTMODED PUBLICATIONS

Depository libraries could dispose of Government publications after 5 years if no longer needed.

REGIONAL DEPOSITORIES

In most States, one regional depository would probably be adequate. Only in a few States would two be considered necessary. Regional depositories would receive and retain copies of all Government publications; would provide interlibrary loan, reference service, and assistance to depositories in disposal of unwanted publications.

MICROFACSIMILE COPIES OF PUBLICATIONS

The Superintendent of Documents would be authorized to supply microfacsimile copies of Government publications to regional depositories after determining which of several existing forms is preferable. In microfacsimile form, as many as 400 pages can be put on a card the size of a single page. With an adequate reading device, it is as easy to read and as accessible as a book and takes a minimum of storge space. This form of reproduction is much desired by libraries which would be required to retain all Government publications.

Mr. SCHENCK. Mr. Speaker, our committee spent considerable time holding hearings on this proposed legislation both in 1957 and again in 1958. This legislation has been requested by the American Library Association for nearly 20 years. It is very meritorious. I know of no objection to it. I have no requests for time on this side.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield?

Mr. SCHENCK. I yield to the gentleman from Missouri.

Mr. CURTIS of Missouri. I notice that the budgetary amounts are not very great. Is this included in the budget, if the gentleman knows?

Mr. SCHENCK. My understanding is that it is included in the budget. It is also my understanding that it is very likely to result in substantial savings.

Mr. CURTIS of Missouri. I thank the gentleman.

Mr. SCHENCK. Mr. Speaker, I reserve the balance of my time.

The SPEAKER. The question is on suspending the rules and passing the bill H.R. 519.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

ECONOMY AS A SOURCE OF INCOME—TIME TO ACT

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, for many years the investigative committees of Congress, the two Hoover Commissions and many other objective groups have shown conclusively the great overlapping, duplication and waste in the military supply and service systems. Within the last year, the Comptroller General of the United States has issued some 200 reports from worldwide investigations which confirm the enormity of the mismanagement in the military supply and service systems.

I might add, Mr. Speaker, that the Department of Defense Reorganization Act of 1958 and prior statutes give the President and the Secretary of Defense adequate authority to develop an effective, efficient and economical supply and service setup for the Department of Defense.

There can be no better time to use this authority than right now. I hope that history will not record that a fatal amount of defense money was spent for fat instead of muscle.

One of the large supply management problems involves the disposal of surplus property.

Richard Fryklund had an excellent article on this subject in the Washington Star on March 15, 1959, which article I include as a part of my remarks:

PENTAGON PLANS $60 BILLION SURPLUS SALE—HUGE CLEANOUT HINGES ON ALTERING DISPOSAL CEILING

(By Richard Fryklund)

The Pentagon hopes to get rid of almost $60 billion worth of surplus defense equipment and supplies in a mammoth bargain sale and a giveaway-throwaway program.

Before the gigantic housecleaning can get under way, however, Congress must lift a $49-million-a-year spending ceiling on the disposal of surplus equipment. Assistant Defense Secretary E. Perkins McGuire will ask for that Wednesday in testimony before the House Appropriations Committee.

If Congress gives the go-ahead, work will begin this summer on emptying the Government's warehouses of surplus items which when new cost almost half again as much as is budgeted to operate the entire Defense Establishment for a year.

The 4-year return to the taxpayers should be about $10 billion. That includes savings through use of the surplus items by other Government agencies, reduced purchasing under procedures designed to hold down future accumulations of surplus, returns on sales of some of the items and savings in warehousing and other costs.

HOPE TO QUIET CRITICS

The Pentagon hopes its plan will quiet at least some of the congressional critics of the buildup of this huge surplus stock.

But Congressmen have served notice on Defense officials that not all of their surplus problems were over. First, disposal of the surplus would not cure what these congressional critics say is the cause of the surplus—nonunified purchasing and handling of supplies. Also, there are good indications that Congress will not vote to remove the spending ceiling on the Pentagon's disposal operations, although it may relax it.

How does the Defense Department happen to have this mountain of unwanted equipment and supplies?

The answer depends on where you ask the question. In the Pentagon they say a large surplus is the price of a large, modern Military Establishment. If the Nation wants its Armed Forces to have billions of dollars' worth of the latest equipment, and if the equipment is not destroyed in a war, then a certain percentage of it will become obsolete each year.

STORAGE COSTS HIGH

In the past this old equipment has not been disposed of quickly enough. It has piled up in the form of aged tanks, planes, ships, shoes, bulldozers, rifles, and spare parts which bulges warehouses all over the country and costs more than $100 million a year just for storage and handling.

The admitted errors of the past, the Pentagon says, will be corrected over the next 4 years if Congress approves the giant disposal program.

Many Congressmen say the Pentagon is telling only part of the story. Men like Senator DOUGLAS, Democrat, of Illinois, and Representative MCCORMACK, House majority leader, say one reason for the mountains of surplus is that too much was bought in the first place.

These Congressmen are trying again this year to get the Defense Department to expand its unified purchasing program—the only way, they say, that wasteful and duplicated purchasing can be avoided.

But whether or not the backlog could have been avoided, the Pentagon has a colossal task ahead of it.

MUCH WILL BE JUNKED

Some $26.7 billion worth of surplus is now ready for processing. It accumulates at the rate of about $9 billion a year. So during the 4-year disposal program another $36 billion worth of material will pile up.

If the program is successful, about $10 billion worth of the total will be used by other Government departments, foreign allies, schools, hospitals and so forth. Almost $48 billion worth will be sold or junked. Only $5 billion worth will be left over.

These are the official valuations put on the material by the Pentagon and Congress. Government accounting procedure requires every item to be listed at its original cost to the Government, no matter how worn it is or what it would be worth on the open market. For instance, a staff automobile bought 5 years ago for $2,000 is still valued at that price, even though after years of hard use it could bring only $200 or $300 on the used-car market.

AIRCRAFT BARGAINS

Recently the Air Force sold a batch of obsolete aircraft, carried on the books at $241 million, for $6 million. Some obsolete tanks valued at $4.3 million were sold by the Army for $30,000. And some old ships valued at $106 million went for $2.4 million.

Except for ammunition, 70 percent of the surplus material is used, even though depreciation does not show up in the bookkeeping.

Most of the surplus is hardware—fighting machinery, spare parts, communications equipment, and the like. About 10 percent is consumable—items like uniforms, medical supplies, food.

The Defense Department has been nibbling at its surplus mountain ever since World War II, but without impressive results. The fact is the military services don't like to admit anything is surplus. The attitude is, "Let's keep it. Who knows, maybe someday it will come in handy."

But now all three services have new programs to determine what is really necessary now or as wartime reserve and to get rid of the rest.

NINETEEN HUNDRED AND SIXTY PROGRAM SCHEDULED

The Defense Department unloaded $1.7 billion worth of surplus in fiscal year 1956, $4.1 billion in 1957, $6 billion in 1958, and expects to increase that to $8 billion in the current fiscal year. The new program would get under way in fiscal 1960—starting this July.

Disposals would rise to $10 billion in 1960 and then to about $12 billion a year until the bulk has been removed. After that, disposals would about equal the annual expected input of surplus material—some $9 billion worth a year.

Total savings to the taxpayer in the 4-year program are hard to estimate. Assistant Secretary McGuire can only point out that receipts from sales should total about $1.3 billion and that storage costs should be reduced by $216 million.

In addition, there will be a savings through utilization of part of the surplus by other departments of the Government, which would otherwise buy the material on the open market.

It would not seem out of line, however, to estimate that the savings could total up to $10 billion in 4 years.

At the same time, disposal operations would cost $416 million. Half of that would be spent to demilitarize equipment—change it from something useful solely to the Armed Forces to something useful by civilians.

Right now Congress says the Pentagon cannot spend over $49 million a year on surplus disposal and that money must come out of receipts from sales.

Mr. McGuire plans to ask Congress to authorize whatever spending is necessary to carry out the program. But Representative MAHON, Democrat, of Texas, chairman of the House Military Appropriations Subcommittee, says he won't go along.

"We want them to have some flexibility," he said, "so they may be able to justify an increase. We have raised the ceiling from time to time in the past. But I don't think the ceiling should be removed."

The Assistant Secretary believes he could launch the program effectively for $104 million, but the ceiling ultimately would have to go to $112 million a year.

Even if Mr. McGuire gets his money, Congressmen are expected to hammer at the waste and duplication in military purchasing and supply policies.

NEW SYSTEM IN VOGUE

Integrated, single-manager purchasing systems now exist for several types of items—food, clothing, medical supplies, and petroleum. But when the Defense Secretary tries

to extend the single-manager system to other items, the services object strenuously. Even though all three use, for instance, the same types of communications equipment, they believe they can be properly supplied only if they do it themselves.

This adds to the surplus, Congressmen say. Also, the purchasing, storage, and distribution systems are so uncoordinated, they say, excessive waste is found everywhere spot checks are made.

The Comptroller General found the Air Force did not know it had surplus R–2800–103 aircraft engines available for conversion to R–2800–54 engines. It set out to buy new "54" engines until it was told about the "103's." It used the 103's and saved $435,000, the Comptroller General reported recently.

Again, the Navy failed to report a million dollars' worth of unneeded helicopter parts even though the Army was buying just such parts. This was stopped after a Comptroller General report, and $720,000 was saved.

The Pentagon does not deny these horrible examples. But it says it is making heroic efforts to avoid them.

LEASE BUILDINGS FOR NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Mr. BROOKS of Louisiana. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 4913) to amend the National Aeronautics and Space Act of 1958 to authorize the National Aeronautics and Space Administration to lease buildings in the District of Columbia for its use.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

Mr. GROSS. Mr. Speaker, reserving the right to object, and I shall not object, do I understand that the committee will scrutinize any leases that are entered into by the General Services Administration before they become effective?

Mr. BROOKS of Louisiana. The gentleman may be assured of that fact. I saw the article to which the gentleman referred. I was surprised by it, and he may be assured that the committee will carefully watch this matter.

Mr. GROSS. I thank the gentleman.

Mr. GEORGE P. MILLER. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from California.

Mr. GEORGE P. MILLER. For the information of the gentleman, there has been written into this bill the same safeguards that the Committee on Armed Services exercises over leases of real estate.

Mr. GROSS. I would say to the gentleman that I should hope there would be more safeguards than are written into some of the contracts entered into by the military services. If the gentleman was here this morning, he heard me refer to the leasing of space by the military over here in the Arlington Towers apartment building. I think that is one of the reasons why the lease that was suggested for the National Aeronautics and Space Administration, which they attempted to enter into with Arlington Towers, was not consummated. It was because of the fact that some of us are delving into that contract which was entered into by the military, and perhaps the people who are operating that apartment house are beginning to understand that they may be in difficulty over the contracts entered into with the military.

Mr. BROOKS of Louisiana. I understand the gentleman's solicitude; I have read the article. We shall carefully watch this matter.

Mr. GROSS. I thank the gentleman and, Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 203(b)(3) of the National Aeronautics and Space Act of 1958 is amended by inserting after "or any interest therein" the following "(including buildings or parts of buildings in the District of Columbia acquired for the use of the Administration under leases for periods not exceeding ten years)".

With the following committee amendment:

Strike all after the enacting clause and insert the following: "That the National Aeronautics and Space Act of 1958, section 203(b)(3), be amended by inserting the following after the semicolon following the phrase 'continental United States': 'to acquire by lease or otherwise, through the Administrator of General Services, buildings or parts of buildings in the District of Columbia for the use of the Administration for a period not to exceed ten years without regard to the Act of March 3, 1877 (40 U.S.C. 34)'."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. HARRIS. Mr. Speaker, I ask unanimous consent that the Committee on Interstate and Foreign Commerce may have permission to sit during general debate this week.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

DISTRICT OF COLUMBIA APPROPRIATION BILL, 1960

Mr. RABAUT. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5676) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending June 30, 1960, and for other purposes; and pending that motion, I ask unanimous consent that general debate on the bill be limited to not to exceed 2½ hours, ½ to be controlled by the gentleman from Arizona [Mr. RHODES] and the other half by myself.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 5676, with Mr. PRICE in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. RABAUT. Mr. Chairman, this is the annual appropriation bill for the financial operation of the District of Columbia Government. As the committee report indicates, we are asking you to approve a bill recommending appropriations of $237,186,112. This is a reduction of $9,511,888 in the budget estimates but an increase of $33,152,652 above funds appropriated to date in fiscal 1959.

There are two significant points, in my opinion, relating to this bill.

One is the fact that the bill recommends appropriations from the general fund of the District totaling $1.6 million more than presently anticipated revenues. It can be argued that there is no need for the committee to recommend an unbalanced budget. All we have to do is recommend an increase in the Federal payment and we could eliminate the deficit.

But despite some objections to the contrary, the committee has already approved a 25 percent increase in this Federal appropriation. In my opinion, this is a significant factor in the fiscal relationship between the District and the Federal Government. I might add parenthetically here that I have seen very little mention of this increase of $5 million.

Rather than being pleased with this increase, the press and other individuals comment about the reduction of $7 million from the authorization. The point that everybody seems to overlook is that, to date, the District Government has never received more than $20 million as a Federal payment from the U.S. Treasury and this bill increases the prior maximum by $5 million.

We have had presented to us the argument that the $32 million Federal payment is authorized by law; therefore, the committee has no choice but to recommend the full authorized Federal payment. However, the committee believes that this authorization is no different from any other of the very numerous authorization acts passed by Congress. In the normal course of legislative procedure, each program requiring the expenditure of funds from the Federal Treasury is reviewed and the funds necessary to carry out the proposed program are approved—usually in an amount less than that originally authorized.

This year the District budget proposed the expenditure of $246.7 million. Of this total budget $201,372,000 was proposed to be financed from the general fund. To finance this portion the District anticipated $151.3 million in various

taxes, $19.5 million as a loan from the Federal Treasury and $32 million as a Federal payment. Last year this same portion of the budget was financed by $146.75 million in District revenues, and a $20 million Federal payment. In other words, to finance this greatly increased budget in 1960, the District has increased its tax revenues by about $4.6 million and asked the Federal Government to increase its share of the expenses by $12 million in cash authority to borrow $19.5 million at a comparatively low rate of interest from the Federal Treasury.

The committee does not feel that the District has shown enough initiative and responsibility to finance such an increased budget. The District seems to want to rely solely on Uncle Sam for the solution to its financial problems. Therefore, the committee has approved a budget in excess of anticipated revenues. While this is not a direct mandate from the Congress to increase taxes to finance the approved budget—and incidentally a property tax increase of only about 7 cents or 3 percent is all that is necessary to eliminate the "deficit"—the Commissioners have the option of reviewing the necessity for the 598 new positions, and some of the new, improved, or expanded services approved by the committee. They can pick and choose, or if each new position or each new improved service is of critical importance to the District, then and only then are the Commissioners obligated to increase taxes.

The second point is a connection with the motor vehicle parking fund which will have a surplus of $2.6 million on this coming June 30. In addition, the Commissioners recently increased the rate on parking meters from 5 to 10 cents. I have some reservations on the wisdom of that decision. Rather than trying to attract the shoppers to the downtown area, the Commissioners seem bent on driving still more shoppers to the shopping centers in the suburban areas. But enough on *that point*. The committee has recommended that the Commissioners proposed legislation which would abolish the parking fund as such; thereby providing additional revenue to the general fund. If the Commissioners follow the committee's suggestion on this point, instead of a deficit of $1.6 million in the general fund, there will be a surplus of $1 million.

Out of all these words one point is obvious, I hope, and that is the committee's concern about the responsibility of the District to finance the improved municipal services it seems to want rather than relying solely on the Federal Government. I note in this connection that the U.S. Census Bureau recently issued the results of a study of the total State and local taxes per $100 of personal income of citizens of the 48 States and the District of Columbia. In this study the District ranks 46th. The only States in which the citizens have a lesser tax burden are Ohio, Missouri, and Delaware.

There are several other items in the bill which I believe I should mention for your information.

Under the public school appropriation we have made several reductions in the various activities of the school system and we have reallocated this reduction of $266,000 to a new program to provide lunches to the children attending elementary schools who—for one reason or another—are in need of such assistance.

The subcommittee has been concerned about this problem for over a year and in our report last year we directed the District government to submit a program to feed these children—estimated to be about 7,300 students by the school officials. The Commissioners proposed a pilot program of feeding about 1,000 students in 11 elementary schools at a cost of $133,000. In effect, we have doubled the size of the program recommended by the Commissioners.

In the Department of Public Health, we have included an unbudgeted $50,000 to finance a roving medical team that will administer prenatal care to prospective mothers. We did so because we received testimony both from the departmental witnesses and some of the witnesses we heard during our all-day session of public hearings relative to the very high infant mortality rate in the District. The rate here is the highest of 16 comparable sized cities in the United States. The addition of another medical team should help in reducing this tragically high rate.

Last year, as a result of our investigation of the Health Department and, in particular, District of Columbia General Hospital, we approved a rather substantial increase in the hospital's budget, amounting to $1.6 million. Again, in this budget, we have recommended another substantial increase of about $1 million. Since the increase in 2 years will be over $2.6 million, the committee has put the Department on notice that future increases will have to be fully justified on the basis of either increased workload or increased costs.

In the Department of Public Welfare, the budget requested 215 new jobs and we have recommended 133. The total reduction of $306,000 was reallocated by us to the public assistance activity as the number of recipients of public assistance grants is increasing very rapidly. A table on page 918 of the hearings indicates this trend. In January 1957 the number of cases was 8,482. In January of 1959, the number is 10,798, an increase of 2,316 in just 2 years.

The surprising thing—and this is contrary to most opinions on this subject of public assistance—is that most of the mothers—about 34 percent—receiving aid under this program were born in the District.

Another statistic is, again contrary to public opinion, that the average length of time that an individual receives such public assistance is only about 2¼ years.

After a careful analysis of the public building construction budget, the committee reduced the estimate by $5.3 million. There are two projects that make up most of the reduction. One was a request for construction funds in the amount of $2.7 million for a new junior high school. The other request was for $1.7 million for a new warehouse.

We also had a request this year for $800,000 to buy a little over an acre of land—near the new State Department building. The agency proposed to build over a period of years an undeground parking garage costing about $5 million, primarily for the convenience of Federal employees in the area. The testimony confirmed that this was an economically unsound project and the committee denied the request.

In summary, I would say that this is a good bill. It does not provide everything the Commissioners requested but no agency in the bill will lose a single employee as a result of the committee's action. Therefore, I urge your support of it.

Mr. REES of Kansas. Mr. Chairman, will the gentleman yield?

Mr. RABAUT. I yield to the gentleman from Kansas.

Mr. REES of Kansas. I notice the report states that this bill is $33 million more than recommended last year. What is the principal item that brings about the increase?

Mr. RABAUT. The cost of last year's Pay Act had a good deal to do with it. We also have some new facilities that must be manned.

Mrs. GREEN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. RABAUT. I shall be pleased to yield.

Mrs. GREEN of Oregon. I wonder if the gentleman can tell me whether there was any testimony before his committee concerning a request for additional pay for athletic coaches?

Mr. RABAUT. We did not have a specific request for that purpose although we did receive some testimony on the subject.

Mrs. GREEN of Oregon. There is not before the committee at the present time a request respecting higher salaries for them than for other teachers?

Mr. RABAUT. There is nothing recommended to our committee for that purpose.

Mrs. GREEN of Oregon. I am very glad to hear that. It seems to me in this day and age of space flight and sputniks that certainly teachers of science, teachers of mathematics, teachers of languages, should receive at least as high a salary as those people who are in the athletic department.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. RABAUT. I yield to the gentleman from Maryland.

Mr. FOLEY. If I understand correctly the gentleman stated that the District stands 46th in the total amount of taxation derived from the individual citizen.

Mr. RABAUT. According to this study the rate in the District of Columbia is $14 and some cents less than the average for the country.

Mr. FOLEY. And the city stands 46th in a total of 49 States?

Mr. RABAUT. Yes; it is fourth from the bottom in taxes that are paid on $100 of personal income.

Mr. FOLEY. Am I correct in understanding that Congress decides what the tax rate shall be?

Mr. RABAUT. The real estate tax rate is determined by the Commissioners, by those who make a study of the fiscal affairs of the District. That is

why this committee suggested that they have a program to equalize the tax rates to have some sort of balance. Some properties in the District of Columbia had not been reappraised for about 30 years.

Mr. FOLEY. Just a couple of questions concerning this additional $7 million in the Federal contribution raising it to $32 million. Was the committee satisfied that the Commissioners have presented justification for their request for the additional $7 million?

Mr. RABAUT. May I say that the Commissioners represent the city and the citizens are very willing to live here and they live well. This is a fine city. But the question in the committee's mind is: Who is going to pay for it?

Mr. FOLEY. It is the recommendation of the committee that the citizens of the District pay that extra amount?

Mr. RABAUT. Yes.

Mr. FOLEY. Finally, in the gentleman's opinion, what would assist the District in solving these problems and concentrating on the $7 million of services needed to complete the $246 million budget that the District has proposed? Would home rule help?

Mr. RABAUT. If they had home rule, I think they should be treated the same as any other State in the Union. We have Federal installations in many States and in some States to a greater extent than in the District of Columbia. We do not give a Federal payment to those States. If the District wants to be a State maybe they would be face to face with that argument for the first time.

Mr. FOLEY. Would the District be better equipped under the home rule system to meet these services?

Mr. RABAUT. That problem belongs to them.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. RABAUT. I yield to the gentleman from Iowa.

Mr. GROSS. Did I understand the gentleman to say that there has been no reappraisal of some property in the District of Columbia for tax purposes in 30 years?

Mr. RABAUT. Up to 3 years ago there were some pieces of property that had not been looked at in that length of time. They did go up and down in value but there was no attention paid to reassessing the property. When we initiated this program to equalize real property tax burden, we wanted everybody to be treated alike. They came up with an improved revenue also, insofar as their own treasury is concerned, of about $4 million a year. This increased revenue will be realized in the fiscal year beginning this coming July 1. However, the committee was somewhat surprised to discover that the new positions requested in the budget totaled exactly $4,105,829.

Mr. GROSS. I thank the gentleman. I certainly do not question the gentleman, but it is an almost unbelievable situation that there had not been a reappraisal of property in the District for 30 years.

Mr. RABAUT. It certainly was a surprise to the committee, too.

Mr. REES of Kansas. Mr. Chairman, will the gentleman yield?

Mr. RABAUT. I yield to the gentleman from Kansas.

Mr. REES of Kansas. I want to commend the gentleman for the effort he has made in trying to deal with this most difficult problem. After the work he has done and the committee has done, we find they are favored in the District by a great deal, comparing their figures against other States of the Union. They pay a lot less than our State, for instance.

Mr. RABAUT. They are fourth from the bottom.

Mr. JONES of Missouri. Mr. Chairman, will the gentleman yield?

Mr. RABAUT. I yield to the gentleman from Missouri.

Mr. JONES of Missouri. I want to commend the gentleman for what looks like a saving, but what is in effect actually spending more money.

I want to know if it is the gentleman's opinion that the Commissioners are never going to take on this job until they are faced with the necessity of having to find this money and not get it from the Congress. Are they not going to do the job until they are forced to do it?

Mr. RABAUT. If the gentleman will read the editorials in yesterday's and today's papers, he will find that they have a lot of people defending them.

Mr. JONES of Missouri. Of course, those people live here in the District of Columbia and are the benefactors of all the advantages they have had. I have been talking about this tax situation in the District of Columbia for the last 10 years. I wasted 6 years of my time on the District of Columbia Committee, and I finally gave up in disgust and figured I made my contribution, let somebody else take it over. I was fighting a losing battle because of the fact these people in the District of Columbia are not paying their fair share of the cost of government. I am getting so tired of it that I do not intend to vote for any appropriation for the District of Columbia until we get a tax rate that is fair.

I would like to ask another question. I notice in the operating expenses in the executive department, for operation of the Executive Office of the District of Columbia, the committee recommends an appropriaton of $576,000. Then the report points out this is a reduction or $84,000, but an increase of $176,500 above the 1959 appropriation. If my figures are correct, that is an increase of more than 40 percent in that one office. I notice the positions that are allowed include seven new positions.

I do not know what the seven positions are. Some of them are very minor positions, it would seem, and yet we are going to spend $176,000 more, and that is 40 percent more for that one department. Now, I do not know how we can justify that big an increase. I want to commend the chairman; you have been trying to do a good job, and if you could get some more people to support you, I think you could get it handled properly. I appreciate what the gentleman has done, but some in our Congress and some people on the committee are not taking this thing seriously, and they are not making these people in the District of Columbia pay their fair share. That is all I want them to do. How can you justify a 40-percent increase in that one office?

Mr. RABAUT. I would have to have the figures before me to answer that question properly and I shall be happy to do so later.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. RHODES of Arizona. Mr. Chairman, I ask unanimous consent that the gentleman from Nebraska [Mr. WEAVER] may extend his remarks immediately following my own remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. RHODES of Arizona. Mr. Chairman, I wish to begin my presentation by paying a very profound and sincere tribute to the gentleman from Michigan [Mr. RABAUT]. This is the first session that I have been on the Committee on Appropriations and on the District of Columbia Subcommittee. The guidance of the gentleman from Michigan, his knowledge of the District of Columbia, and his knowledge of the fiscal affairs of the District, in my opinion, are invaluable as far as the Congress of the United State is concerned and also as far as the District is concerned.

Mr. Chairman, I deplore the fact that many people in the District do not appreciate the hard work and, I think, the fine results obtained by the District of Columbia Subcommittee of the Committee on Appropriations and particularly by the gentleman from Michigan. In my opinion, the work of this committee has done much to keep the District in line as far as its expenditures are concerned, and at the same time to condition the thinking of the people of the District and the Commissioners for the future growth which this city must and will attain. It is a rapidly growing community, a rapidly changing community, it is a community in which there is great need for expansion of public facilities; it is a community which is unique in this country, if not in the world, insofar as it is a city and yet it is not a city, insofar as it is a political entity and yet it is not a political entity, and insofar as its board of governors, so to speak, is the Congress which also controls the whole country in which this particular entity is situated. We of the Congress are the board of governors, the city council, if you will, of the District of Columbia. Our particular committee has the responsibility of approving the money which the District government must spend. This money, or most of it, is raised by the District of Columbia itself by laws of taxation which are passed by the Congress.

Some of the money is paid by the Federal Government. In the past, and I suppose it will be true in the future also, one of the greatest guessing games at this time of any year is what the Federal payment to the District of Columbia should or will be. This year, since we had passed in the last session of Congress a pay increase bill which has cost the District of Columbia government

some $15 million, it became obvious that the Federal payment should be increased.

As a new member of the committee I tried, and the rest of the members tried also, and I think we have been somewhat successful, to rationalize and in some way perhaps to systematize the Federal payment to the District of Columbia. I feel that this payment should somewhat reflect the amount of money which the Federal Government would pay on the property which it owns in the District of Columbia just as if it were an ordinary taxpayer. This amount of money, applying the same rates which the District of Columbia Commissioners submitted to the Congress as the rates which it intended to charge the real property taxpayers of the District, would have amounted to some $22.5 million. In order to be very fair we also took not only the assessed valuation estimate of the Federal property but also the assessed valuation estimate of the embassies of foreign governments located in the District of Columbia. Then in utter fairness we thought, since the District of Columbia at the behest of this committee, reevaluated its assessed property valuations—which will amount to a 9 percent increase in the real property tax of the District—we increased our own estimated tax by 9 percent, and we came up with a figure which is just over $25 million.

The Federal payment to the District of Columbia General Fund for this fiscal year is the sum of $25 million as far as the House of Representatives Appropriations Subcommittee of the District of Columbia is concerned, and we hope as far as the House itself is concerned.

I do not know of anybody who is a member of the subcommittee or a member of the full committee who does not have every desire in the world to be utterly fair with the District of Columbia. I do not know of any Member of Congress who does not want to be utterly fair. I understand that there has been criticism of the way the Congress has run this city in the past, and I do not say that much of it is not justified. However, I want to make it crystal clear that in my opinion this city is not neglected by the Congress as so many people feel it is. In my opinion this city has many advantages because of the fact that it is a Federal city, because of the fact that it has the Congress of the United States and the President acting as its governing body.

To be a little more specific about this bill and some of the problems facing the District of Columbia let me talk for just a moment concerning the situation of general assistance and relief. The figures which we have on page 918 of the hearings indicate that public assistance cases increased from a monthly total in January of 1957 of 8,482 to a monthly total in January of 1959 of 10,798. That is an increase of some 2,400 cases from 1957 to 1959, or just 2 years. The percentage is some 25 percent. The amount of money is, in January of 1957, $639,550 and January of 1959, $1,008,839, or an increase of some $370,000 per month for public assistance cases, in 2 years.

I asked during the hearings why this was so. Of course, there are various reasons as to why the caseload would increase that much. First we ruled out the possibility that there was a seasonal increase; there was not. And then I asked this question of Mr. Shea, the Director of the Department of Public Welfare:

> How does the level of general assistance in the District of Columbia compare to that in Maryland and Virginia?
>
> Mr. SHEA. The District of Columbia average grant on general public assistance in December of 1958 was $72.60, and the average grant for the State of Maryland was $57.41, and for the State of Virginia it was $37.01.

In other words, Mr. Chairman, the average public assistance grant for the District of Columbia was almost double that of the State of Virginia and it was about one-quarter greater than that of the State of Maryland.

Next I asked Mr. Shea:

> So we are a high island surrounded by a desert as far as the public assistance people are concerned?

The answer was:

> Yes, sir.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from West Virginia.

Mr. BAILEY. That difference is probably due to the fact that there has been no distribution of surplus foods in the District of Columbia; so part of that load in Virginia and Maryland has been shifted over to surplus food supplies to the Department of Public Assistance.

Mr. RHODES of Arizona. It is my understanding, I will say to the gentleman, that there has been such a program for some time.

Mr. BAILEY. But just in the last 60 days?

Mr. RHODES of Arizona. I will yield to the chairman of the subcommittee, the gentleman from Michigan.

Mr. RABAUT. The program was started in 1957 and we have in this bill $161,000 for that purpose.

Mr. RHODES of Arizona. The gentleman from Michigan has talked about the tax rate more ably than I would be able to do, but I just want to reiterate that this budget we present as the budget for the fiscal year 1960 for the District of Columbia is $1,600,000 more than the anticipated revenue. However, the anticipated revenue is based on a tax rate of $2.30 per hundred of assessed valuation. This is an estimate until July 1. The District Commissioners may change that estimate and may either raise it or lower it. In order to balance this budget it would be necessary for the District Commissioners to have a tax rate of $2.37 per $100, or 7 cents per $100 higher than they had estimated previously. This is an increase of less than 5 percent.

I may say also, Mr. Chairman, that even considering the fact that the District of Columbia now assesses on the basis of about 50 percent of market value, and in my congressional district we assess on the basis of 33⅓ percent, a little arithmetical interpolation shows that there is not one single school district in Maricopa County, Ariz., which does not have a combined tax rate of at least double the tax rate of the District of Columbia. I do not say that in pride; I say it merely in explanation of the fact that I find it impossible to believe too much of what I read in some of the papers and hear as to the burden of taxation which many people in the District of Columbia feel they are bearing. I believe they must pay their full share. I think they must look to their own resources in the future, and I hope they will, because this is a great city and the District of Columbia residents can help to make it greater, but it is not to be done at the expense of the taxpayers of the rest of the country.

Mr. FOLEY. Mr. Chairman, will the gentleman yield for a question?

Mr. RHODES of Arizona. I yield.

Mr. FOLEY. Sir, I note the gentleman from Arizona states that he is a new member of the subcommittee on appropriations for the District of Columbia. I am also a new member of the legislative committee on the District of Columbia. I am particularly interested in the gentleman's views as a new Member. I know the gentleman has given very careful and thoughtful attention to this, as to the possible ultimate solution of this annually recurring problem of the District of Columbia financing these services for the citizens of the District of Columbia. My question is this: Inasmuch as the gentleman recommends that the District of Columbia citizens look to their own resources for the support and financing in major part of these services, I wonder if in your mind home rule for the District of Columbia would contribute to the lessening of the pressure on this Congress for Federal payments and to the education of the people of the District of Columbia to the shouldering of these particular services for which they are now coming to the Congress for assistance.

Mr. RHODES of Arizona. Of course, the gentleman from Maryland, I am sure, is aware of the fact that the Committee on Appropriations does not have jurisdiction of that particular matter. The legislative committee, of which the gentleman is a member, does have jurisdiction of that. Personally, as far as home rule is concerned and as it concerns the fiscal position of the city of Washington, I would venture to say that if the city of Washington had home rule, it would be treated the same as any other State in the United States is treated insofar as Federal payments are concerned. In other words, if we are speaking only of the fiscal situation, it would be my thought that probably the city of Washington would lose whatever Federal payment that it now receives except insofar as those payments are for services rendered. I might add, in addition to the $25 million which this bill recommends the Congress appropriate to the general fund, we also appropriate funds to the water fund in the amount of $1,532,000 and to the sanitary sewerage works fund in the amount of $686,000. This money is paid for services rendered. These latter two payments would continue no matter whether the District of Columbia had home rule or did not have home rule. But, I doubt very much whether the Congress would be inclined to pay an-

nually to the District of Columbia $22 million, $25 million, or $30 million, or whatever figure it might be any more than it would be inclined to pay the city of New York, for instance, payments in lieu of property taxes for the Federal installations in that city.

Mr. FOLEY. One last question, sir, and I thank the gentleman very much. This inquiry by the subcommittee that the gentleman is a member of is confined basically to determining the extent of the Federal payment; is it not? Or does it go into the total of the proposed $246.7 million budget?

Mr. RHODES of Arizona. We went into the total budget very carefully.

Mr. FOLEY. But the extent of the Federal responsibility is limited solely to $25 million plus Federal payment; is that correct, sir?

Mr. RHODES of Arizona. No, sir; it is not correct. We appropriate money which is collected by the tax laws which the Congress passed applying to citizens of the District of Columbia. This money is collected and then appropriated by the Congress of the United States—every bit of it.

Mr. FOLEY. That is the total budget of $240 million and some odd?

Mr. RHODES of Arizona. That is correct.

Mr. FOLEY. May I ask the gentleman this question? Of course, the gentleman does not have to answer it. Inasmuch as the appropriation is the heart and soul, the body and bone and marrow of the government for the District of Columbia, and inasmuch as it provides the wherewithal for those services, would home rule or would the self-governing function, if it rested with the people of the District of Columbia, in your judgment, as a new member of the Appropriations Subcommittee, facilitate the satisfying of these pressures on the Federal Government and relieve them so far as the pressure is concerned?

Mr. RHODES of Arizona. Well, I think I answered the gentleman's question a little while ago. I do not claim to have any crystal ball that allows me to look that far into the future. I think I know a little bit about human nature, but not enough to psychoanalyze 850,000 people to the extent the gentleman seems to desire that I do.

Mr. FOLEY. No, I am not asking the gentleman to do any psychoanalyzing. I am asking for your opinion as an expert on the Appropriations Subcommittee.

Mr. RHODES of Arizona. I must disavow the title of expert because I have not tried to put myself out as an expert on the subject of home rule. The gentleman lives in this area and I might ask him how he feels about it.

Mr. FOLEY. Well, of course, you can probably gather how I feel about it. I am very strong for home rule. I feel that if the people of the District of Columbia have to look to their own resources for the future, they should have the legislative means of accomplishing that purpose.

Mr. RHODES of Arizona. Of course, I do not want to be misunderstood. I do not think the Federal payment of $25 million was exactly kicking the District of Columbia out the front door or even out the back door. My only point was that in the future it will be, I think, necessary for the District of Columbia government to make sure that it provides the means of financing at least its share of any improvements that it requests. This budget which came up from the District Commissioners, in my opinion, was unrealistic because it would be completely unbalanced unless the Federal Government put in $32 million as a Federal payment.

Mr. FOLEY. What is the share of the District of Columbia? You said they should finance their share.

Mr. RHODES of Arizona. Their share of the $237 million?

Mr. FOLEY. Is it not 88 percent?

Mr. RHODES of Arizona. I have not figured the percentage of $237 million. The Federal Government pays $27,218,000. If the gentleman wants to get out his pencil and figure the percentage, he may do so.

Mr. FOLEY. The gentleman made the statement that the District should finance its share. I was wondering what you meant, in your own terms.

Mr. RHODES of Arizona. I do not have any particular percentage in mind. I have our Federal Government's share, and that is the position we would be put in as a property owner, the same as any other taxpayer. As to the services rendered by the District, this is a figure that the District Commissioners figure out themselves.

Mr. SANTANGELO. Mr. Chairman, will the gentleman yield?

Mr. RHODES of Arizona. I yield.

Mr. SANTANGELO. Is it not a fact that in addition to the $25 million Federal payment, a grant of one-half million dollars for public assistance is given to the District?

Mr. RHODES of Arizona. The gentleman is absolutely correct, and there are other Federal payments made which are concealed—not concealed knowingly, but they are concealed in this budget.

Mr. SANTANGELO. And in addition to that, the Federal Government loans money to the District, some of it being interest free?

Mr. RHODES of Arizona. That is correct.

Mr. SANTANGELO. And on the other loans, the rate is a very low rate?

Mr. RHODES of Arizona. That is also correct.

Mrs. GREEN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. RHODES of Arizona. I yield.

Mrs. GREEN of Oregon. I directed a question a few moments ago to the distinguished chairman of the subcommittee in regard to the amount paid to athletic coaches. Have extra payments to athletic coaches been contemplated?

Mr. RHODES of Arizona. I think it is definitely possible that this could be done. However, it would require authorizing legislation. If they needed some money for this purpose, it would also be necessary to ask for a supplemental appropriation. The gentlewoman is correct, that there was no request of this committee for such pay adjustments as the gentlewoman has suggested. I may say, as one member of the committee, if such adjustments were made without the knowledge and consent of this committee, I would be very unhappy.

Mrs. GREEN of Oregon. I am very pleased to hear the gentleman state that.

One other question in regard to the school lunch program: Is my understanding correct that at the present time there are no hot lunches for any of the youngsters in the elementary schools in the District of Columbia?

Mr. RHODES of Arizona. That is correct. We have appropriated $266,000 to start a bag lunch program for some 2,000 children who are hungry and who cannot afford to bring lunches to school.

Mrs. GREEN of Oregon. But there are hot lunches that are provided for students in the high schools?

Mr. RHODES of Arizona. In the high schools and also in the junior high schools.

Mrs. GREEN of Oregon. Can the gentleman tell me how it was decided that it was more important to provide hot lunches for the students in the high schools than in the elementary schools?

Mr. RHODES of Arizona. I am sure that decision was made long before either the gentlewoman or I became Members of this body. I do not know the answer. Perhaps the chairman of the subcommittee can answer the lady.

Mr. RABAUT. The facilities to prepare a hot lunch are not in the elementary schools for one reason.

Mrs. GREEN of Oregon. Does it cost more to provide facilities in the grade schools than in the high schools?

Mr. RABAUT. No; but when the schools were constructed they did not have those facilities, as it was felt that the children could walk to their homes at the noon hour for their lunch.

Mrs. GREEN of Oregon. It is my understanding—perhaps I am wrong—if the gentleman will yield for just one more question, that the elementary schools in the District have rather large enrollment; I am told as high as 1,500 or 2,000. Do not these pupils come from greater distances than the high school children?

Mr. RABAUT. I do not think so, unless it is for some special reason. The schools are placed in these areas predicated upon the population. In some places the population has grown, and then new schools are put adjacent thereto, not immediately adjacent, but some place quite close.

We are very much interested in the school lunch program; we want to give it this impetus in the elementary schools, and in order to get it started we have approved a bag lunch and milk program.

Mr. RHODES of Arizona. I might also say to the gentlewoman from Oregon that the committee was so interested in the program that it increased it to over 2,000 children; the committee felt the program was so important that we doubled the amount of money and at least doubled the number of children who will receive these bag lunches in the next fiscal year.

Mrs. GREEN of Oregon. I am very pleased to hear that, but it is still woefully inadequate. Can the gentleman

tell me the number of hungry children in the District schools?

Mr. RHODES of Arizona. Seven thousand.

Mrs. GREEN of Oregon. Seven thousand?

Mr. RHODES of Arizona. That is correct.

Mrs. GREEN of Oregon. So one hungry child out of seven hungry children will receive a school lunch under this program?

Mr. RHODES of Arizona. I would say to the gentlewoman, one out of three and a half.

Mrs. GREEN of Oregon. I am glad the committee has recognized that this problem exists here, but I must say that it is indeed shocking that here in the Capital of the United States, one of the wealthiest cities in the Nation, we find hungry children in our schools when we have such a surplus of food going to waste in the storage bins and warehouses of the country.

Mr. RHODES of Arizona. I might say to the gentlewoman from Oregon after talking to the members of the committee, I can assure her and other Members of the House that as rapidly as possible progress will be made in this field.

Mr. HOFFMAN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. Your committee put in quite a long time of pretty hard work on this. You learned, did you not, that the people of the District of Columbia are highly favored in the way of steady jobs and no missing of pay checks?

Mr. RHODES of Arizona. But I would remind the gentleman that notwithstanding that there is considerable poverty here in the District of Columbia.

Mr. HOFFMAN of Michigan. The people here have steady jobs, steady payrolls, and a comparatively steady employment. Why can they not feed their own children?

Mr. RHODES of Arizona. Of course there are people in the District of Columbia as there are in all wealthy cities who are not well off, many of them through no fault of their own, and the gentleman from Michigan also knows that I pointed out in answer to a question a while ago that of the money we are appropriating all but $25 million is supplied by the people of the District of Columbia.

Mr. HOFFMAN of Michigan. Of course, no child should be permitted to go hungry; we are all agreed on that, but what puzzles me is why with almost continuous pay checks rolling out and steady employment, what is wrong in the District, what makes it necessary for these people to let their kids go hungry? Other people find a way to feed their children. What is wrong that there is such a desperate situation in the District of Columbia?

Mr. RHODES of Arizona. Maybe the gentleman from Michigan would like to answer that for himself; I cannot answer it for him.

Mr. HOFFMAN of Michigan. If I had any idea what the correct answer was, certainly I would not be asking about it. I understand they have here a guaranteed annual wage, too.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Iowa.

Mr. GROSS. The gentleman from Michigan must remember that we are feeding people in underdeveloped areas all over the world. They must be taken care of first.

Mr. HOFFMAN of Michigan. Are you advocating that we transport these children to these underdeveloped areas and feed them there?

Mr. GROSS. I am advocating that we use some of our surplus food to feed our own.

Mr. Chairman, I want to take this opportunity of commending the gentleman from Michigan [Mr. RABAUT], and I am sure the gentleman from Arizona joins with me, for stopping this fantastic parking project that was being advocated for the District of Columbia. I want to commend both of you as well as the other members of the subcommittee.

Mr. IRWIN. Mr. Chairman, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Connecticut.

Mr. IRWIN. Could the gentleman tell me if this budget that he is presenting here represents a cut in the administration proposals on this matter?

Mr. RHODES of Arizona. The budget which we propose here today is below the estimates, that is correct.

Mr. IRWIN. To what extent?

Mr. SANTANGELO. $9,500,000 below.

Mr. RHODES of Arizona. It is $9,500,000 below.

Mr. IRWIN. The committee is cutting the administration request by $9 million; is that correct?

Mr. RHODES of Arizona. That is correct.

Mr. REES of Kansas. Mr. Chairman, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Kansas.

Mr. REES. First, I want to tell the gentleman that we appreciate his analysis of this legislation. We know it is a difficult situation with which we are faced in regard to this tax business. But it is one we have been faced with over the years. This is repetitous perhaps but in view of the fact that we are favored here in the District of Columbia and rank probably as the 46th State in the amount of taxes we pay per $100 of personal income, does it not seem to the gentleman that somehow in some way we ought to say to the people who pay taxes here: All we want you to do is to pay your fair share. Can we not do that in this Congress? Are we helpless or what is the matter?

Mr. RHODES of Arizona. I will say to the gentleman from Kansas that is exactly the thing this committee is trying to do in submitting the type of budget we have submitted today.

Mr. REES of Kansas. We do not want the people of Washington, the property owners and taxpayers, to pay more than their share but we are trying to raise money to take care of the Government.

Mr. RHODES of Arizona. I agree with the gentleman.

Mrs. ROGERS of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentlewoman from Massachusetts.

Mrs. ROGERS of Massachusetts. Getting back to the hungry children, there are fairly large areas of so-called slums here in the District. Those children go to school too, and they need lunches, is that not true?

Mr. RHODES of Arizona. If the gentlewoman characterizes some sections of Washington as slums, I would have to accept the word.

Mrs. ROGERS of Massachusetts. I do not like the word "slums," let us say underdeveloped.

Mr. RHODES of Arizona. Underdeveloped would be a very good word to use, or maldeveloped.

Mrs. ROGERS of Massachusetts. Or substandard.

Mr. RHODES of Arizona. Yes.

Mr. WEAVER. Mr. Chairman, this is the first time I am speaking on an appropriations bill as a member of the House Committee on Appropriations. It is a new experience for me and, frankly, a very interesting one.

I think that it is well that we in the Congress take a long, very careful look at the District of Columbia. It is unfortunate that in past years more care was not taken by the Congress as a whole to insure a more orderly development of this city's government. It has been a stepchild to a degree, and too often Members have treated it as an unwanted stepchild. Unlike Alaska, Hawaii, and Puerto Rico, the District has never had a voice on the floor of the House itself. As a member of the subcommittee on the District of Columbia appropriations bill, however, I soon learned that the District has a very loud voice of its own. Unfortunately, this voice tends to be discordant at times, and sometimes seems to sound a great deal louder than it actually should be.

For reasons known to themselves, the people of the District—and by that I mean the people of the District's government—appear to feel that they are in a category that differs vastly from every other agency of government. When the Congress cuts the budget of, say, the Department of Commerce, the Secretary and his people accept the cuts and go about the business of running their agency on the reduced funds. Not so the District of Columbia. They apparently think that they have some special place in the sun, and the noise created after a congressional cut is quite considerable. This does not endear these gentlemen either to the Congress as a whole or to your Committee on Appropriations. I have noticed through the years that the committee is thoroughly and constantly castigated by the public press of Washington, and the chairman of the subcommittee has frequently been harshly criticized because he takes the attitude that the taxpayers of his State, or any other State, have some right to say how their money is being spent. Twenty-five million dollars of the District of Columbia budget, or over 10 percent of the total, is supplied by the taxpayers from

Maine to Hawaii, and I think personally they have every right to ask us to guard their tax dollars. The District, however, seems to think it has a peculiar right to this money and that the general public of the rest of the Nation owes them something special and should not ask questions about it.

Mr. Chairman, the subcommittee increased the Federal share of the District of Columbia budget by $5 million this year. This is a 25-percent jump, which represents a pretty handsome increase. This, however, does not satisfy the District nor its government. They want more.

The reason we arrived at the $25 million figure is really quite simple. It represents the amount of money the Federal Government would be paying in property taxes if the Government were a private citizen and subject to these taxes.

For the information of those who complain that the Government ought to pay its fair share of the costs borne by the city for serving the Government, let me say this: We do.

Some examples come to mind. The Government pays its water bills to the District government and its sewage bills are paid. If the Government asks for special protection or special police help, as, for instance, we at the Capitol did after that unfortunate episode involving the Puerto Rican nationalists, then we recompense the District of Columbia government in full for the additional policemen assigned. We also pay our share of the costs of any investigatory work the Metropolitan Police Force performs on Capitol Hill.

These are but a few examples. I think, in general, the Federal Government is bearing its full and honest share of the cost of running the District government. The people of Washington itself must pay the rest.

When the budget was submitted to the Appropriations Committee, it was quite a bit bigger than the bill now before us. The committee chose to cut a number of items from the budget, some of them because they were obviously nothing but frills, some of them because they were wasteful. Specifically, we cut $800,000 from the budget request to buy land for a gigantic new parking garage for the Department of State employees. I voted for that cut because I do not like the idea of the Federal Government financing such a project and then turning it over to a private operator who could then charge the customers $20 monthly each to use the garage. That is $22,000 a month. Actually, this would not even pay the interest on the money spent, and amortize the garage facilities. We asked the District Commissioners why they felt the Government should undertake this project and were told that private garage operators just were not interested in investing their money, but if Uncle Sam was willing to make the investment for them, they most certainly were willing to reap the profits. It just did not make sense.

There are a number of areas in this budget where we made no cuts at all. These include the public schools which asked for $46,685,000 and was approved at that figure which is more than $6 million more than last year. The Library budget is up over last year, and was left uncut by the committee, along with several other departments. We made no really serious cuts in funds for either the police or fire departments. Personally, I have nothing but praise for these two agencies.

We did cut the frills. We did attempt to cut the waste. I think we did a remarkably good job in that.

Generally speaking, there are two ways of financing an increased budget such as the one the District Commissioners presented to us this year.

One method is to increase the burden on the American taxpayer generally by increasing the amount of money given by the Federal Government. This the committee refused to do and I think it did right in thus protecting the taxpayers' pocketbook.

The second way of accomplishing such an increase is through higher taxes. I would like to say this: As long as I have been in public life I have never voted to increase taxes for anyone. I have voted constantly to cut expenses rather than to force the public to dig deeper into its pocket. I am not going to start now, to force people who have no vote to pay higher taxes to support luxuries and waste. Therefore, it was my suggestion to the committee that we trim down the budget, rather than force the Commissioners to increase the property tax. I realize fully that the District's homeowners and businessmen have a tax advantage over many other localities in the country. Be this as it may, I do not think this is any time for the Congress to approve the kind of spending programs which would increase this tax burden they must carry.

For these reasons, Mr. Chairman, I think the bill submitted by the Committee on Appropriations is a good bill. I think it is based on sound principles. I most strongly urge the support of every Member of this House for that bill.

Mr. RABAUT. Mr. Chairman, I yield 10 minutes to the gentleman from Kentucky [Mr. NATCHER].

Mr. NATCHER. Mr. Chairman, the Subcommittee on the District of Columbia of the Committee on Appropriations once again brings to the floor of the House for your approval the annual District of Columbia appropriations bill for the fiscal year 1960.

It has been a pleasure serving with our chairman, the able and distinguished gentleman from Michigan [Mr. RABAUT], and the other members of this committee. We were ably assisted by Francis Merrill, our staff assistant.

For years now we have been confronted with demands for home rule in the District of Columbia. As pointed out by one of the Washington papers, Congress and the President should work toward development of this city as the Capital of the United States and forget the play-acting diversion of some futile form of home rule which would delay rather than hasten that desirable and readily attainable development. A request for voting rights for the people in the District for President and Vice President and for representation in Congress by a nonvoting delegate might be the answer to the home rule plea. This change of that section of our Constitution which provides in part, "To exercise exclusive legislation in all cases whatsoever over such District—not exceeding 10 miles square—as may, by cession of particular States and the acceptance of Congress, become the seat of the Government of the United States, and to exercise like authority over all places purchased by the consent of the legislature of the State in which the same shall be for the erection of forts," and so forth, should be carefully considered by able lawyers because there is considerable doubt in my mind that any change would be constitutional unless approved by the States as provided for under article V, which provides for amendments to the Constitution. To say the least, the problems confronting the people in our Capital City are considerably more important than the home rule play-acting diversion which confronts the Congress each and every session. As pointed out further by one of the Washington papers, home rule is an unrealistic approach, and the government and development of the great Capital of a great country are responsibilities that Congress should discharge. I for one am willing to assume my part of that task.

The city of Washington is today one of the great cities in the world and as our Capital City it should be a model city in every respect. Every member of this House should take pride in the advancement and accomplishments of our Capital City.

The District of Columbia has changed considerably since April 15, 1791 when the cornerstone for the District of Columbia was laid on Jones' Point. Today the total population is about 825,000. There are 39,040 acres in the District of Columbia. The Federal Government owns 11,297 acres in the District excluding the streets, alleys and parkways. This represents 28.9 percent of the total acreage. To compensate for the land owned and controlled by the Government a Federal payment is made each year to the District. Such a payment has been made since the District was established. From 1924 to 1959 the payment has ranged from $4,539,295 to $20 million. The budget for the District during this period has increased from $23,923,754 to the amount recommended in the bill of $237,186,112.

You would naturally assume that the budget requests for fiscal year 1960, which establishes an alltime high would be carefully considered by the Bureau of the Budget. This is not the case. The exact amount requested was simply passed along to Congress with no changes, reductions, or suggestions. This fact was established during the hearings. In this year of budget balancing we have this type of budget for the District. With all of its serious problems brought about by the shifting of its population from section to section of the District and out of the District to Maryland and Virginia, we have pressure groups demanding that the Commissioners and Congress build more buildings and spend additional millions for services. Unsettled conditions

in this city should cause those interested in its future development to face the facts and attempt to formulate plans calling for reasonable expenditure of funds during this period of uncertainty. Instead of constructing some of the buildings requested for the District we should take a look around and try to decide just how many of the present buildings will be vacant and no longer needed as the direct result of the population changes within and outside the District.

The present tax structure of the District is low enough. A real estate tax of $2.30 per hundred, personal property tax of $2 per hundred, and a total tax burden of $68.58 per person per thousand of personal income is low when the national average is $83.42. We have reached the point when we must realize that the people who have carried the tax burdens of the District are rapidly leaving, and the demands continue for more projects and services costing millions of dollars.

The Commissioners of the District are in my opinion able men who are conscientiously attempting to meet the demands of all segments of the population in the District. They, too, should look around and join the Congress in recommending necessary expenditures for the most urgent needs. Instead of record budgets, more time should be given to solving present day problems and those which are bound to come up in the future.

The city with no water problem is the exception rather than the rule. The same applies to sewage disposal and water pollution. All are present today in the District of Columbia. They are more important than some of the requests made in this budget.

Our Police Department is one of the best in the country. We need the best. Our committee has joined hands with the Police Department during the past 4 years and recommended necessary funds for the full number recruited under the authorization allowed by Congress. Certainly we want to stop the murders, rapes, and yokings which take place all too often in the District. The people of this country should be able to visit their Capital City and have no fear of walking the streets during the day or at night. We recommend the sum of $21,750,000 for our Police Department, and if more is required in the future to prevent major crime, then we should appropriate the necessary amount.

In addition to our Police Department, our committee has, during the past 4 years, recommended additional appropriations which have produced results in our schools, hospitals, streets, welfare system, Fire Department, water, sewage disposal, pollution, and the many other governmental functions here in the District.

The practice established by our juvenile judge of waiving jurisdiction in cases involving 16- and 17-year-old juveniles who have committed felonies, with the boys having previous records in court, is to be commended. This action speeds up the processes of our juvenile court, and, at least places our Police Department in a position of knowing that juveniles with records, who are committing crimes almost daily, will be properly punished. In order to assist our Police Department, and our law-enforcement agencies generally, it is imperative that we now have another juvenile court judge to assist Judge Ketcham.

In this bill we recommend $266,000 to feed the hungry children of this District. So far, no money has been appropriated for this particular purpose. This is one of the serious problems of the District.

Our committee took a good look at the real-estate assessment in the District in 1955 and recommended the reassessment program which will be completed on June 30 of this year. The cost was $802,472 and the additional revenue will total $4 million annually. Many inequities were corrected, and the real-estate base was increased some $180 million. This has been one of the more serious problems facing the District.

The Department of Agriculture with its 80,000 plus employees serving 49 States only requested some 536 new employees for 1960, and most of these will be required under the new Poultry Act passed during the last session of Congress. Certainly the District with all of its many serious problems should not try to solve them by adding 939 new employees. This is the number requested for 1960. There are 23,689 persons presently employed by the District. Assistants to the assistants will not solve the problems of our Capital City.

Our school system is faced with problems which are related directly to the shifting of population in the District. Unless more careful attention is given to this problem, we will find a number of new buildings only partially used in certain sections and a shortage of buildings in other sections.

New business life in the downtown area is all important. Congress must join with the District government and save the downtown section. These people are the big taxpayers of the District—producing more and demanding less than all of the other sections combined. Cities are not outmoded and destined to die. They are here to stay and will continue to play a major part in our industrial, commercial, economic, and social way of life. A proper, balanced growth and expansion of our cities is one of the great domestic problems with which we are confronted today.

Abatement of pollution in the Potomac River and expansion of the water system are two of our major problems. Storm water sewers and expansion of the sewage treatment plant are now necessary. If it becomes necessary, the District must take a new look at the demands and dependence of other jurisdictions within the metropolitan area on our water system. Before too many years pass we may be forced to cut off the metropolitan area. We have no authority to extend the present 10 miles square, therefore, a weaning may be in the offing.

The District is financed out of five separate funds, a general fund, highway fund, motor vehicle parking fund, water fund, and a sanitary sewage fund.

The bill before us today calls for a Federal payment of $25 million. This bill provides for a Federal payment to the water fund of $1,532,000 and $686,000 to the sanitary sewage works fund.

In addition to receiving testimony from the officials of the District, we had before us representatives of civic organizations, parent-teacher associations and other organizations interested in the welfare of the Capital City. We carefully considered every request for fiscal year 1960.

Mr. Chairman, our committee recommends this bill to the Members of the House.

Mrs. GREEN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. NATCHER. I yield to the gentlewoman from Oregon.

Mrs. GREEN of Oregon. I thank the gentleman for yielding to me. I share his high opinion of the distinguished gentleman from Michigan. I know of his sincere interest, and I think the very fact that the chairman of the subcommittee has paid attention to the hot-lunch program, and has called it to the attention of all of us in the House shows that he has performed a real service. It is my hope that the committee will be able to proceed in the next few years and not only feed 2,000 of the hungry children, but all of the children who are hungry in the District so that they may have the same kind of a lunch program that the children in the elementary schools in other States receive.

Mr. NATCHER. I thank the gentlewoman.

In addition, Mr. Chairman, to the $266,000 in this bill to take care of the hungry children in the District of Columbia, the chairman of this subcommittee, ever since he has served as chairman of the subcommittee, has seen to it that all the children of the District, not only the hungry children, but all the children have received the necessary protection. Mr. Chairman, it has been a pleasure serving on this committee with our new members. We have Mr. SANTANGELO here, of the great State of New York; Mr. RHODES, of the great State of Arizona; and Mr. WEAVER, of the great State of Nebraska. It has been a pleasure serving with our new members and also, as I pointed out in the beginning, it is a pleasure serving with our chairman, the gentleman from Michigan [Mr. RABAUT].

Mr. MATTHEWS. Mr. Chairman, will the gentleman yield?

Mr. NATCHER. I yield to the gentleman from Florida.

Mr. MATTHEWS. I want to join with my colleagues in congratulating the distinguished chairman of this subcommittee [Mr. RABAUT] and our colleague from Kentucky [Mr. NATCHER] and the other members of this committee who have worked so hard on this appropriation bill.

As the gentleman knows, I am a member of the Committee on the District of Columbia. I am proud of the fact that this afternoon we have several very capable members of our committee here on the floor.

Would the gentleman agree with me that one of the biggest problems of the District is the fact that, according to the Commissioners themselves, the people that make the money to pay the taxes are more and more leaving the District?

Mr. NATCHER. The gentleman is entirely correct.

Mr. MATTHEWS. Would the gentleman agree with me that one of the problems that we are going to have o look into in the District is why that happens, and to see if something can be done to stop that rapid rate of transit from the city? It is my understanding that other cities in America have that same problem, of course, but would the gentleman agree with me that the problem is a little bit more intense in the District?

Mr. NATCHER. I agree with the gentleman. I think it is one of the more serious problems confronting the Congress of the United States.

Mr. RABAUT. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. SANTANGELO].

Mr. SANTANGELO. Mr. Chairman, at the outset I want to commend my chairman, the gentleman from Michigan [Mr. RABAUT], for the wonderful job he did as chairman of this committee and for the courtesy he shows to the witnesses and to the Commissioners when they appeared before the committee. It has been a great pleasure also to serve with the distinguished and able gentleman from Arizona [Mr. RHODES], the distinguished gentleman from Kentucky [Mr. NATCHER], and the distinguished gentleman from Nebraska [Mr. WEAVER].

This is my first year on the House Appropriation Subcommittee on the District of Columbia. I know that there are many people in this House who have served on the District of Columbia Legislative Committee and the Appropriation Subcommittee on the District of Columbia and they are more expert in this field than I. I believe that the expenditures provided for in this bill are amply justified by the evidence we had before the committee.

Much criticism is heard that the Federal Government does not contribute sufficient Federal funds to the District of Columbia and is abusing the residents of this area. In deciding what the Federal Government was to give the District, our objective was to equalize the burden of the District between the residents of the District and the Federal Government. In my opinion, the residents of the District have the right to receive fair treatment, to expect financial contributions from the Federal Government commensurate with the value of the land which the Federal Government occupies and the services it receives from the District of Columbia. In considering what is fair, we must not overlook the fact that the Capital is a mecca and millions of people flock here, not only during the cherry blossom time but throughout the year. By reason of these visitors and by reason of the thousands of governmental employees availing themselves of the hotel facilities and purchasing from the tradesmen, these industries are assured of continuous business and revenue.

In my opinion the residents of the District do not have the right to expect the Federal Government to solve all their problems. Federal money alone cannot solve their problems. They have a duty to call upon their property owners and the residents to contribute their fair share for the support of the District government.

Real estate has in the past been underassessed and the tax rate has been comparatively low. Our decision to approve $25 million Federal contribution was based upon what we believed was fair in the light of our objectives.

The committee recommends an appropriation of $237,186,112 for the operation of the District of Columbia government. The committee recommends an appropriation of $33,152,652 above the fiscal year 1959 appropriations, but a reduction of $9,511,888 in the budget estimates. I would like to point out to this House that the Bureau of the Budget does not pass upon or review the District of Columbia budget, but that we, the committee, pass upon it without any recommendations from the Bureau of the Budget. I believe that the Bureau of the Budget in the future should review the District budget and make recommendations. The $25-million Federal contribution we recommended is 25 percent more than the District of Columbia received in the fiscal year 1959. The amount we recommended for general fund expenditures was $1,600,000 more than anticipated revenues. We have directed attention of the Commissioners of the District of Columbia to section 47–501 of the District of Columbia Code which states in essence that the District must levy sufficient taxes in addition to the Federal contribution to produce sufficient funds to defray the expenses of the District during the year. We have suggested to the Commissioners that they raise this additional $1,600,000 or if they do not wish to raise the tax rate, they should review the need for approximately 598 new positions which they have requested and which we recommended. They can do this by raising the real estate tax rate slightly or if they do not increase the tax rate for real estate for fiscal year 1960 they should cut out some of the jobs which they have requested.

One of the complaints which has been heard is that the Federal Government property is tax exempt and that the District therefore is denied the right to collect taxes on Federal property and on foreign embassies and on other miscellaneous real estate. We have computed the value of the exempt Federal and embassy property and have found the value to be $23,071,953. Adding the average increase of 9 percent in real property taxes which will result from the reassessment program which was initiated, the total value of the exempt property in the District of Columbia would be $25,148,428. Consequently we feel that the Federal contribution on the basis of the value of the exempt property is realistic and fair.

We have also heard complaints that the tax rate in the District is higher than the rate in the adjoining areas. Our examination has disclosed that the tax burden of the citizens of the District compares favorably with that of the surrounding metropolitan areas generally, and that, further, the city of Alexandria, Va., Fairfax County, Va., Montgomery County, Md., and Prince Georges County, Md., are proposing to increase the tax rate on their real estate ranging from 30 cents per hundred to $1.67 per hundred of assessed valuation. In order to raise the additional $1,600,000 of revenues, all that the Commissioners must do is to raise the tax rate approximately 7 cents per hundred. We do not believe that it is an excessive burden to them. The specific amount of proposed increases by the adjoining areas may be found on page 3 of the committee's report.

We have recommended increases in appropriations of fiscal year 1959 for almost all departments. We have provided for services to this community, increased the appropriation for the police and fire department in order to protect the citizens, expanded the school lunch program for the needy children in the elementary schools, increased the number of teachers to reduce the pupil-teacher ratio, increased the expenditures to staff two new libraries and provide a roving medical team to reduce the high mortality birth rate in this community.

Here I would like to interpolate and say that the Secretary of Agriculture has recommended a decrease in appropriations for the school lunch program throughout the United States while this committee has initiated a school lunch program for the needy children in the elementary schools of the District. This is a pilot proposition and when it is seen what is going to develop here I feel, as do many Members of the House, that the school lunch program will be one of the most worthy programs we have in this country and it should be expanded. It is inexcusable that the needy children in this community do not have a school lunch program. I shall favor school lunches in the future.

Mr. RABAUT. Mr. Chairman, will the gentleman yield?

Mr. SANTANGELO. I yield to the gentleman from Michigan.

Mr. RABAUT. Relative to the suburban tax bill, this morning's Washington Post and Times Herald has a headline on page B–3: "Proposed Suburban Tax Bill Raised to $260 Million." I thought that should be in the RECORD.

Mr. SANTANGELO. We have increased the number of teachers somewhat to reduce the pupil-teacher ratio and we have increased the expenditures to staff two new libraries and provide a roving medical team to reduce the high mortality birth rate in this community. We have one of the highest mortality rates in the United States in this District of Columbia.

There is one final point that I would like to make. It is believed in some quarters that in the District of Columbia crime is rampant and uncontrolled.

That is contrary to the facts. There is crime, it is true, but the number of crimes in the District has steadily been reduced, and the District enjoys a police force is second to none. The number of crimes in the District has fallen from a high of 22,848 in 1948 to 16,354 in 1957. The authorized strength of the Police Department has been met and the members of the committee agree that the police force is one of the finest in the United States. Inquiry has disclosed that the percentage of the solution of crimes since the famous Mallory decision has not decreased but has increased, and the chief of police in explaining why the number of solutions of crimes has increased says that adversity brings out the best in them, and perhaps we shall reconsider the Mallory decision in the light of the statistics which have been submitted to this committee. If you seek additional information, the hearings will disclose the extent to which crime has dropped in the District of Columbia. In my opinion, gentlemen, the chairman of this committee and the committee have done a good job. This bill is fair and should be approved.

Mrs. GREEN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. SANTANGELO. I yield to the gentlewoman from Oregon.

Mrs. GREEN of Oregon. As I understand, the D.C. General Hospital and the Glenn Dale Hospital are both District hospitals but Freedmen's is not; it is under the administration of HEW. There is a bill before your Committee on Education and Labor for a new Freedman's Hospital, and yet when the subcommittee went out there the other day we visited the tubercular annex building, and there are two floors that are not used at all. I am told there are 90 beds, but they are not used in any way. Could the gentleman advise me why there should be a request for a new hospital while two floors of a fairly modern building are not being used?

Mr. SANTANGELO. Some of these contract hospitals do not have full occupancy. We have facilities in some of the District hospitals which provide adequately for the types of illness which are being treated in Freedmen's Hospital. We recommended, because of the high cost to these hospitals, an additional $1.20 per patient in the hospitals so that they can meet the rising cost of hospital care. I believe and I think the committee will agree that the reason is that it is being taken care of by the District hospitals.

Mrs. GREEN of Oregon. When we were out at the hospital we were advised by the doctors that the reason those two floors were not being used was that there were no funds appropriated; that the District would not reimburse them for tubercular patients, and yet it is also said that there are people suffering from tuberculosis walking around in the District who should be hospitalized. Does the gentleman know about that?

Mr. SANTANGELO. It does not appear to me to be the fact. We have them taken care of in the District hospitals, and if there is disinclination to go to Freedmen's Hospital, it is because they can receive adequate care in the District hospitals. There are not sufficient cases to fill both hospitals, and where there is a choice, they would send them to a District hospital where the cost is less. The recommendation is that they go to the District hospital. As to the accuracy of the doctors' statement, I could not guarantee.

Mrs. GREEN of Oregon. Does not the gentleman think that somehow we could make use of the two floors and the 90 beds that are unused at the present time?

Mr. SANTANGELO. If they use them and have patients the District reimburses them to the extent of $21.20 per patient.

Mr. RABAUT. Mr. Chairman, we have no further requests for time.

Mr. RHODES of Arizona. Mr. Chairman, we have no further requests for time.

The CHAIRMAN. There being no further requests for time, the Clerk will read the bill for amendment.

The Clerk read as follows:

FEDERAL PAYMENT TO DISTRICT OF COLUMBIA

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there are appropriated for the District of Columbia for the fiscal year ending June 30, 1960, out of (1) the general fund of the District of Columbia (unless otherwise herein specifically provided), hereinafter known as the general fund, such fund being composed of the revenues of the District of Columbia other than those applied by law to special funds, and $25,000,000, which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, 1959), (2) the highway fund (when designated as payable therefrom), established by law (D.C. Code, title 47, ch. 19), (3) the water fund (when designated as payable therefrom), established by law (D.C. Code, title 43, ch. 15), and $1,532,000, which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, 1959), (4) the sanitary sewage works fund (when designated as payable therefrom), established by law (Public Law 364, 83d Congress), and $686,000, which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, 1959), and (5) the motor vehicle parking fund (when designated as payable therefrom), established by law (D.C. Code, title 40, ch. 8), sums as shown herein; and there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, $33,800,000, which, together with balances of previous appropriations for this purpose, shall remain available until expended, for loans authorized by the Act of May 18, 1954 (68 Stat. 101), and the Act of June 6, 1958 (72 Stat. 183), to be advanced upon request of the Commissioners to the following funds: general fund, $19,500,000, highway fund, $13,100,000, and, water fund, $1,200,000.

Mr. RABAUT. Mr. Chairman, I ask unanimous consent that the bill be considered as read and open for points of order and amendments at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The CHAIRMAN. Are there any points of order?

If not, are there any amendments?

Mr. RABAUT. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with the recommendation that the bill be passed.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. PRICE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5676) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending June 30, 1960, and for other purposes, had directed him to report the bill back to the House with the recommendation that the bill do pass.

Mr. RABAUT. Mr. Speaker, I move the previous question on the bill to final passage.

The previous question was ordered.

The SPEAKER. The question is on engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

THE LATE GEN. JOHN SALLING, OF SLANT, VA.

Mr. JENNINGS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. JENNINGS. Mr. Speaker, it is a sad duty that I have today. I have just learned of the death of Virginia's last veteran of the Confederate Army, Gen. John Salling of Slant, Va. He was one of two surviving veterans of the Civil War, both having served in the Confederate Army.

General Salling was 112 years of age. He would have been 113 on May 15, 1959. He had been in good health until entering the hospital last week with a respiratory ailment, which later turned into pneumonia.

General Salling has been a stalwart representative of a great era in the Nation's history. He has been a symbol of the bond that unites our Nation today. Americans everywhere will miss him.

During my tenure in Congress it has been a privilege for me to participate in the observance of General Salling's birthday celebrations. Last year I joined Virginia Senator A. WILLIS ROBERTSON in the observance of the general's 112th birthday at his mountain home in Scott County, Va. Representatives of the Civil War Centennial Commission presented General Salling with

an honorary membership in the Commission; each of the military services sent a representative to honor this soldier of the Confederacy; an aide from the White House carried greetings from the President.

Mr. Speaker, two actions of the Congress serve to illustrate the affection in which General Salling was held. The 84th Congress approved the striking of a special medal for the surviving veterans of the Civil War. General Salling's medal was presented to him by an Assistant Secretary of the Army at appropriate ceremonies at his home.

Last year we approved the payment of a pension to General Salling and the other surviving veteran of the Confederate States Army. I know from personal contact with the general that this pension has meant much to him and his family.

The people of Scott County and Virginia are saddened today over the news of General Salling's death.

I am sure that all of my colleagues wish to join me in extending our sincere sympathy to General Salling's family.

Mr. Speaker, I include with these remarks a copy of the newspaper account of General Salling's death.

The story follows:

JOHN SALLING, VETERAN OF CIVIL WAR, IS DEAD

KINGSPORT, TENN., March 16.—John Salling, one of two Civil War Veterans in the Nation, died today.

The 112-year old Confederate soldier was brought to a clinic here Thursday from his home in Slant, Va., suffering from pneumonia.

The only other survivor of the Civil War, Walter Williams of Houston, Tex., has been ill for several months. Mr. Williams was 116 years old on November 14.

Mr. Salling joined the Army when he was 16 years old. He would have been 113 next May 15.

At his bedside when the end came were Mrs. H. A. McKamey, a daughter; Hobert Hawkins, a grandson, and Miss Linda Hawkins, great-granddaughter, all of Bristol, Va.

Mr. Salling's condition had weakened steadily since he was admitted to the hospital and he had been receiving a constant supply of oxygen.

Mr. Salling liked to see people and talk with them and was mentally alert, although hard of hearing.

About a year ago, a group of WAC's at Fort Myer, Va., presented him with a summer-weight Confederate uniform, which he wore on special occasions.

He once said "I never saw a girl I didn't like." He also liked an occasional toddy and chewing tobacco.

In recent years, his birthday was an occasion, and well-wishers would come from miles around to see him. He received a special gold medal given to surviving Civil War veterans. It was presented by Assistant Secretary of Army Hugh Milton.

Although his hearing was not as good as it once was, Mr. Salling still had a full head of black hair which he attributed to always wearing a hat and never using soap and water on his head. His wit remained sharp and he laughed often.

LIVED WITH DAUGHTER

The general—the title was purely honorary—was born about a mile and a half from the little mountain home where he lived his last years with his daughter, Mrs. McKamey. He moved in with Mrs. McKamey and her husband after he became too old to tend his farm.

Each May 15, on his birthday, Mr. Salling could be counted on to be on his front porch, resplendent in his Confederate uniform, hat on his head and a cigar in his mouth, receiving best wishes from dignitaries and just plain friends.

Birthday cards always came from the President, the Governor, and Members of Congress.

The Civil War was not glamorous for Mr. Salling. He did not wear the gold sash or cavalry hat which distinguished some of the boys in gray. His duties as a member of D Company, 25th Virginia Regiment consisted of digging saltpeter for Confederate gunpower.

After the war he returned to Scott County in mountainous southwest Virginia and married Mary Flanary. They had seven children. His wife died in 1940.

TRIED HAND AT FARMING

Mr. Salling tried his hand at farming and logging and occasionally borrowed a neighbor's 100-gallon still.

"I've made a slight of brandy," he once recalled. He added that "good likker never did hurt no man, if he knew how to drink it."

Mr. Salling flew to Mobile, Ala., in 1953 for the annual Confederate Veterans. Some years earlier he went to Gettysburg, Pa., for the 75th anniversary of that famous Civil War battle. He reported later that he "and a couple of Yankees set together and listened to President Roosevelt speak."

Confined to a wheelchair for the later part of his life, General Salling was always proud of his peaceful nature.

"I've never had a fight, I've never been locked up in jail, I've been a great hand to visit the sick, I've given more than I've got and I always tried to treat everybody right," he would say.

UNEMPLOYMENT IS DECIDED BY THE FOURTH BRANCH OF GOVERNMENT

Mr. NATCHER. Mr. Speaker, I ask unanimous consent that the gentleman from Texas [Mr. PATMAN] may extend his remarks at this point in the RECORD and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. PATMAN. Mr. Speaker, the Federal Reserve System has taken on the job of trying to regulate the economy of the country, and for better or worse it is succeeding to an important extent.

Its main target is total economic activity, which means also, of course, total employment. But it also tries to dampen or stimulate particular kinds of activity. And this does not stop just with regulating stock market credit—where it has a specific duty to exercise selective control.

For example, the big credit squeeze which was begun in late 1955 and applied with increasing pressure, until it ended in the recession of late 1957, was aimed at checking investment in new plants and production equipment.

Chairman Martin and others have testified to this at the time and since. The Fed felt that productive capacity was expanding too fast—outrunning consumer-demand—and if not checked, would ultimately result in a worse recession later. Thus the reasons for the Fed's policy are not always a question of inflation. They hinge on questions of what the Fed thinks is good for the country and, of course, good for the bankers.

For better or for worse, the country is being regulated by a fourth branch of the Government.

In its economic policymaking the Fed has declared itself independent from the three branches of Government created by the Constitution. And it has the final say. It is in a position to overrule any decision the Congress and the President might make as to what level of business and employment the country should have.

How can it do this? What are its powers and its methods?

REGULATES THE QUANTITY OF PRODUCTION BY REGULATING THE QUANTITY OF MONEY

Its power lies in its power to issue money and to regulate the value of money. This is a power which the Constitution reserves to Congress, but Congress has delegated it to the Federal Reserve System.

As to the Fed's methods, these are several.

It can and does determine the supply of money and credit. Also it can and does determine interest rates.

To an important extent the Fed can and does, at times, change interest rates independently of the supply and demand for money. It can do this because the markets for money and securities are not perfectly competitive markets. Prices of money and securities are to an important extent administered prices. These prices are largely made by negotiation; and the Fed itself is one of the most powerful negotiators. It is the biggest single factor both in the money market and in the market for Government securities. And, of course, prices for Government securities affect the prices of other securities, bank lending rates, and so on.

The Fed's main weapon, however, is the money supply. In other words, the Fed is attempting to control economic activity by changing the quantity of money in the private banking system. And by changing the quantity of money in the banking system, it can and does change in indirect ways the amount and price of credit available from nonbank sources—that is, from the insurance companies, and so on, and, even to some extent, the amount available from the industrial corporations. The Fed is fully conscious of these indirect effects, and its policy decisions are frequently aimed at these indirect effects.

The Fed has 3 methods of changing the quantity of money.

CHANGES THE QUANTITY OF MONEY BY OPEN MARKET OPERATIONS

Its most important method is through its open market operations. Its Open Market Committee is trading in Government securities in New York almost constantly. And these trades are made for the purpose of expanding or shrinking the quantity of money in the banking system. When the Open Market Committee purchases Government securities,

it gives the member banks added reserves in the amount of its purchases. And the commercial banking system can then expand credit—that is, expand the quantity of money—up to about $7 for each $1 of additional reserves. In other words, $1 of additional reserves makes it possible for the private banks to expand their loans and investments up to about $7—assuming, of course, that there is a demand for this additional credit and a willingness on the part of the bankers to extend it.

The Open Market Committee has, on the average, a portfolio of about $25 billion of Government securities. It acquired these by creating money—on the credit of the Government—then going into the market and purchasing interest-bearing securities of the Government with this money. In other words, the Federal Reserve acquires Government securities by going over to the Bureau of Engraving and Printing and getting currency and then using this currency to buy the Government's securities. Actually, it does not always go so far as to have the currency printed. Sometimes it simply gives the banks credit on the books for additional reserves. But this credit on the books is backed with the credit of the United States, just as the currency is backed with the credit of the United States and if anyone having this credit desires the actual cash the money in the form of Federal Reserve notes—currency—is delivered to him.

When the Open Market Committee sells Government securities in the open market, it takes reserves away from the commercial banks. And taking reserves away reduces the banks' ability to lend and make investments by the same 7 to 1 ratio.

CHANGES THE QUANTITY OF MONEY BY CHANGING MEMBER BANKS' REQUIRED RESERVES

The Fed's second most important method of changing the quantity of money in the banking system is that of changing the banks' ratio of required reserves. At the beginning of last year, the ratio was such that the banks could make about $6 in loans and investments for each $1 of their reserves. But in the early part of last year, the Board of Governors made several reductions in reserve requirements, so the result is that today the banks can expand at the rate of about $7 for each $1 of reserves.

In recent years the Fed has fallen into some peculiar practices in the use of this method of regulating the money supply. Since 1951 there have been many times when the Fed contracted the money supply, but it has never raised reserve requirements for this purpose, nor for any purpose. It has adjusted reserve requirements in only in one direction, and that is downward. It has made seven reductions in reserve requirements since 1951, but never made an increase in these requirements. This is because the bankers are in favor of the lowest possible reserve requirements, and they have had a campaign on for several years now to get reserve requirements down eventually to the point where they can expand 10 to 1 on each dollar of reserves. The Fed has been going along with the bankers on this, slipping reserve requirements down every now and again, but never raising them when it wants to tighten money.

So, to summarize to this point—the Fed has two methods of giving reserves to the private banks or taking reserves away from these banks. The first is by buying or selling securities in the open market. The second is by changing the ratio of reserves which the member banks are required to keep against their deposits.

When the Fed gives the banks more reserves through its open market operations, it creates the money. And, unless it raises the member banks required reserves by an equal amount, these banks can then create still other new money on the new money—high-powered dollars—which the Fed has created.

When the Fed gives the member banks more reserves by changing its regulations as to the reserves these banks are required to keep against deposits, then the private banks create the new money.

RESERVE BANKS LEND RESERVES TO MEMBER BANKS WITH ODD EFFECTS

In addition to these two methods of giving or taking away bank reserves, the Federal Reserve banks also engage in an activity which affects the quantity of money, although to a relatively minor extent. These banks, in effect, "lend" the member banks reserves under certain circumstances and for brief periods. In other words, the Reserve banks made loans to the member banks through the discount window, charging them the discount rate.

Federal Reserve bank loans involve, however, some practices which are not generally appreciated. This lending of reserves is under rather rigid regulations. It is for the purpose of helping out individual banks only when they are in an emergency situation, not for expanding reserves generally. Furthermore, these loans of reserves are for very brief periods; and any borrowing bank is kept under constant pressure to adjust its affairs—liquidate securities if necessary—and pay back these borrowed reserves. In short, when the Fed thinks it appropriate to let the banking system have more reserves, it does this either through open market operations or by reducing required reserves, not by letting individual member banks borrow from the Federal Reserve banks. Such borrowing is frowned upon at all times.

The member banks are in such a different position with respect to their borrowed reserves that the Federal Reserve authorities look upon these reserves as having a different effect on monetary ease, or stringency, from other, "free" reserves. In fact, when these authorities are considering the question of how much additional credit the banking system could extend, they do not consider simply the amount of the banks' excess reserves, which is the amount of reserves the banks have in excess of the amount they are currently required to keep. On the contrary, they consider free reserves to be the best single measure of credit availability. And free reserves are defined to be excess reserves minus borrowed reserves.

It sometimes happens—when money is made extremely tight—that excess reserves in the member banks actually amount to less than their borrowed reserves. The whole banking system then has minus free reserves. In other words, it has more borrowed reserves than it can pay back; and yet it is under constant pressure to pay back. At such times the banking system not only has almost no money to lend but it is usually having to sell some of its Government securities or call some of its loans.

The banking system is in a minus free reserve position today. Such is the degree of the present credit squeeze.

QUANTITY OF MONEY INCREASED WHEN NOT NEEDED, DECREASED WHEN NEEDED

Early last year the Fed had a program of fighting the recession. For this purpose it gave the banks large amounts of reserves. Early in the year it gave the banks $1.5 billion in reserves through reductions in reserve requirements; and before the year was out it gave them another $2 billion of reserves through open-market operations. This total of $3.5 billion of reserves gave the banks new lending power of up to $24.5 billion. This was said to be for the purpose of enabling the banks to make more loans to business.

The banks did not use their new money-creating power for this purpose. Demand for business loans was shrinking, not increasing. And the total amount of bank loans to business went down slightly between the first of the year and the end of the year.

The private banks did, however, use the reserves they were given to create new money to the extent of $10.4 billion; and they used this money to acquire that amount of additional U.S. Government securities.

But this year, with recovery underway and an actual need for more reserves to increase business loans, the Fed has been reducing reserves. It has reduced reserves, principally through its open market operations, by $2 billion since the first of this year. In other words, it has subtracted $14 billion of lending power from the private banks.

On March 11, it had the member banks in a borrowed-reserve position amounting to $228 million. This compares with positive, or "free" reserves of $546 million only last July.

TIGHT MONEY NOW CAUSING UNEMPLOYMENT

We are back now in a period of tight credit just at a time when there seems to be some moderate demand for additional credit and some tendency for business to make a full recovery.

Interest rates have been raised throughout the financial system. The rate on 91-day Treasury bills, which is the security the Open Market Committee trades in, has been raised from less than 1 percent last summer to a level now above 3 percent. Along with this, prices of long-term Government securities have dropped and interest yields have shot up. As a result, interest rates on corporate bonds have gone sky high. This puts a damper on business spending for expansion, and it eliminates jobs that would otherwise be available.

Also as a result, interest rates on State and local bonds have been pushed up with the result that many States and communities are having to cancel or postpone their plans for building roads, schools and all kinds of public facilities. This eliminates jobs which would otherwise be available to help put the unemployed back to work.

Now how good is this regulation of economic activity by the fourth branch of the Government? How effective is increasing or decreasing the quantity of money, and running interest rates up and down, in regulating the volume of economic activity?

The answer seems to be that this kind of regulation is effective, in a way, in keeping business activity and employment down. It is effective—with many horrible distortions and unwanted side effects—in choking down economic activity.

On the other hand, the magic is lost, if any magic there be, when it comes to trying to stimulate demand. In other words, the Fed can pull on the purse strings to choke off a business boom, but it cannot push on the purse strings to stimulate a recovery when the necessary consumer demand and business confidence are not present.

What caused the business recovery of the latter part of last year? Was it the Fed's action in giving the private banks $10 billion of Government securities? No, of course not.

In case our memories have grown dim as to what stimulated demand last year, a reminder is provided under the heading "The Merchant's Views" by Herbert Koshetz in the New York Times February 22, 1959. This article discusses a recent analysis by Dr. Julius Hirsch, who is now on the graduate faculty of the New School for Social Research. I will quote from Mr. Koshetz' article in part as follows:

> The Nation was fortunate that a series of events last year sparked the recovery. * * * The administration sat tight, according to Dr. Hirsch, in the face of many pleas to take action for stepping up business. The economy, however, did get the benefit of (1) an increase of wages to Federal employees on July 1 retroactive to January 1, 1958, (2) bumper crops of agricultural products, and (3) the late but sudden raising of the Federal debt limit, which permitted larger expenditures for defense.

The question in many of our minds now is, What more is needed to bring about a full recovery and put the 5 million unemployed back to work? Certainly recovery is still far from complete, and the signs are not pointing upward. The widely predicted improvement in employment in February did not come about. Unemployment should have dropped in February, but there were actually more unemployed people in February. And credit was already being squeezed in February.

What can Congress do to bring an end to this recession?

The answer is that our first job is to persuade the Federal Reserve authorities to relax their money squeeze and let the recovery take place to the extent that present demand forces are sufficient to bring about recovery. There is nothing we can do to be really effective without first gaining the Federal Reserve's willingness to have the unemployed back at work.

Our first task is to persuade the Federal Reserve to come back into the Federal Government and direct its policies toward carrying out the wishes of the people.

VETERANS COMMISSION FOR THE PHILIPPINES

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 5 minutes and to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, the other day I introduced House Joint Resolution 307, a joint resolution to establish a temporary commission to study the veterans' program of the United States in the Philippines.

It is time, Mr. Speaker, that we settle this question of Filipino veterans' rights once and for all and I believe that the only way is to create a commission that will restudy the matter carefully, give the Filipino veterans as full and as impartial a hearing as they are entitled to, analyze every single evidence submitted, and then make their report and recommendation. Whatever such commission may decide will be final and the action taken on their recommendation will close this vexing question that will always be a problem to the U.S. Congress and our Government unless we act on the resolution I have proposed.

I have been made to understand that in the Philippines many of the Filipino veterans feel that their claims have not been given the consideration that is their due. If any such feeling exists, it will always be a source of misunderstanding and it can only be effaced if a commission is created that will give them a hearing. I know the commission will be faced with a tremendous task but the work, no matter how difficult, should and must be undertaken, the sooner the better. It is important for America's prestige in Asia, and it is essential to maintain our special relationship with a people that proved their loyaty to us in a critical moment in our Nation's history.

Mr. Speaker, we recall the speeches delivered on this floor by our esteemed former colleague, the then Resident Commissioner of the Philippines, now the Philippine Ambassador to the United States, General Carlos P. Romulo. It was he who extolled the valor and heroism of the Filipino soldiers who fought in Bataan and Corregidor. It was he who described to us the resistance movement in the Philippines, how the guerrillas fought the enemy without any letup and how they saved many American lives with their courage and their determination. General Romulo pleaded on this floor time and again for the recognition of the services rendered by all these Filipino veterans who risked their lives and fought unhesitatingly for our flag. The record is replete with his statements, not only on the floor but in the various committees, underscoring the loyalty to democracy and freedom of these valiant and heroic men who without thought of themselves suffered torture in the hands of the enemy and the rigors of hunger, as well as sickness and the loss of their dear ones while fighting for us in the field. General Romulo, former aide to General MacArthur, a veteran himself, is a worthy and effective spokesman of his fellow veterans.

Our distinguished colleague from Texas [Mr. TEAGUE], who is a war hero himself, and is the able chairman of the Veterans' Affairs Committee, has been indefatigable in his disinterested advocacy of the recognition of the service rendered by the Filipino veterans during the Second World War. There is no reason why his bill No. 261 which is to amend title 38, United States Code, with respect to payment of Philippine pensioners, should not be passed this session of Congress. It is an act of simple justice for the Filipino veteran, who is the only soldier who risked his life for the American flag who is receiving only one-half of the benefits—he is paid in pesos instead of in dollars—what the others are receiving in full.

The veterans commission that I propose will take up other inequalities and other claims that the Filipino veterans feel should be taken up. It is only fair that they should be given a hearing, and they must be made to understand that once this commission has rendered its report and recommendation and action taken on the report, that it is final and the matter a closed one.

World leadership, Mr. Speaker, came to our people without our expecting or wanting it. We want nothing for ourselves; we have no aggressive designs against any nation. But world leadership came to us in a crucial moment in the history of mankind. Human freedom and the dignity of man are in danger. Ours is the duty to defend and uphold both. We can only do so if we appear before the world as exemplars of both. Our strength therefore must be on the moral principles on which we as a Nation stand. If we observe morality in our conduct with other nations as the Father of our Country enjoined us to do in his farewell address, we will have the respect of the world that is the rock, that is the foundation stone of true and abiding national greatness.

I insert in the RECORD at this point two resolutions passed by the two leading veterans' organizations in the Philippines, the Veterans Federation of the Philippines and the Veterans Organization of the Philippines, advocating the creation of a veterans commission and presented to General Romulo during his last visit to Manila:

> RESOLUTION OF VETERANS FEDERATION OF THE PHILIPPINES PETITIONING PRESIDENT CARLOS P. GARCIA, THROUGH AMBASSADOR CARLOS P. ROMULO, TO INITIATE THE CREATION OF A JOINT PHILIPPINE AMERICAN COMMISSION OR COMMITTEE TO STUDY THE ENTIRE U.S. VETERANS PROGRAM AS IT AFFECTS FILIPINO WAR VETERANS
>
> Whereas a special relationship exists between the people of the United States and the Republic of the Philippines by virtue of

their close association for over half a century;

Whereas the Filipino soldiers fought valiantly side by side with the American soldiers against a common enemy during the last World War, displaying a high sense of devotion to duty and loyalty to the cause of democracy, and upholding the highest traditions of the service especially in the trying battles of Bataan and Corregidor;

Whereas the Filipino soldiers during the said war underwent the same risks and suffered the same hardships and deprivation as did the other members of the Armed Forces of the United States and should therefore be entitled to equal protection of U.S. laws and to the same rights and benefits as are enjoyed by other U.S. veterans;

Whereas the problems encountered by Filipino veterans in matter of benefits under laws administered by the U.S. Veterans' Administration and other U.S. agencies have been one of the causes for the widespread clamor in the Philippines for a reexamination of the existing relations and agreements between the United States and the Philippines;

Whereas the American Legion feels that there exists no valid reason for depriving the Filipino veterans of the benefits which the Government of the United States is under legal and normal obligation to extend them;

Whereas the American Legion, in its national convention held in Chicago, Ill., September last year, approved Resolution No. 384 seeking proper representations with the U.S. Government for the creation of a commission that will undertake an immediate survey and restudy of the entire U.S. veterans program in the Philippines and recommend measures that will solve the problems above mentioned and remedy other situations that may be noted during such survey and restudy of veterans affairs;

Whereas the Filipino people and their Government have an abiding faith and confidence in the magnanimity, altruism, and sense of justice and fairness of the American people and their Government;

Whereas the Veterans Federation of the Philippines places its fullest support and endorsement behind the American Legion's Resolution No. 384 for the immediate creation of a Joint Philippine American Commission or a committee to study the entire U.S. veterans program; by unanimous approval: Therefore

Resolved, as the Veterans Federation of the Philippines hereby resolves, to request his Excellency, President Carlos P. Garcia, through Ambassador Carlos P. Romulo to do his utmost, in behalf of the veterans in particular and of his country in general, to seek for the immediate creation of a Joint Philippine American Commission or a committee to study the entire U.S. veterans program.

Adopted in the city of Manila this 12th day of February 1959.

JOSE RAZON,
President.

Attested:

Conrado B. Rigor, Colonel, GSC (FA), Secretary-General; Alfonso Arellano, National Commander, USAFIP–NL; Dionisio S. Ojeda, National Commander, Peftok; Fausto Alberto, National Commander, ECLGA; Vincente J. Benedicto, National Commander, Markings Fil-Am; Antonio F. Garcia, National Commander, Magsaysay Veterans Legion; Basilia M. Baja, Gold Star Mothers Association; Benjamin G. Molina, National Commander, REFIL; Antonio Varias, National Commander, DBC; Tereso D. Pia, National Commander, Hunters ROTC; Silvino Matias, National Commander, UDVAP; Francisco L. Gonzalez, National President, FDVA; Sofia L. Prudenciado, President, Philippine Association of War Widows, Parents, and Orphans.

RESOLUTION OF VETERANS' ORGANIZATIONS OF THE PHILIPPINES URGING THE CREATION OF A JOINT PHILIPPINE-AMERICAN COMMITTEE OR PANEL TO RESTUDY THE ENTIRE U.S. VETERANS PROGRAM IN THE PHILIPPINES

Whereas the Government of the Republic of the Philippines has presented to the Government of the United States an omnibus claim covering among others certain claims of Philippine veterans;

Whereas the veterans' claims covered by the omnibus claim, consist mostly of arrears-in-pay and allowances of former members of the Philippine Commonwealth Army which constitute only a small portion of the benefits sought by the Philippine veterans from the Government of the United States, particularly during World War II;

Whereas by virtue of a rider in the Rescission Act approved on February 18, 1946, Philippine veterans have been denied numerous benefits which are extended to other U.S. veterans such as pension for non-service-connected disability or death, compensation in dollars instead of in pesos, education and training, vocational rehabilitation, and other benefits under the GI bill of rights passed by the U.S. Congress;

Whereas there has been a widespread dissatisfaction among Philippine veterans over the manner they have been deprived of rights and benefits to which they were already legally entitled prior to the approval of the rider to the Rescission Act;

Whereas various other problems have been encountered by Philippine veterans in claims for benefits under the laws of the United States, arising particularly from loss or destruction of service and medical records, discriminatory regulations and policies, and arbitrary rulings of agencies administering those benefits;

Whereas veterans' claims may not be thoroughly covered and favorably considered by the Government of the United States if combined with other government claims cited in the Philippine omnibus claim not germane to purely veterans' matters;

Whereas it is believed that the best and most expedient way to bring the veterans' claims and problems to the attention of the Government of the United States is through a joint Philippine-American committee or panel created by executive and/or legislative authority which shall undertake a survey and restudy of the entire U.S. veterans' program in the Philippines and recommend measures to equitably settle and resolve such claims and problems once and for all instead of by piecemeal measures: Now, therefore, we the undersigned, representatives of various veterans' organizations in the Philippines

Resolve to strongly recommend, as we hereby strongly recommend, to his Excellency the President of the Republic of the Philippines, that in the consideration of the Philippine omnibus claim, all matters pertaining to veterans' benefits be treated separately from the other government claims, and that the President officially propose to the U.S. Government the creation of a joint Philippine-American committee or panel to undertake an immediate survey and restudy of the entire U.S. veterans' program in the Philippines and recommend measures to equitably resolve once and for all the Philippine veterans' problems to the satisfaction of all concerned.

Done in the city of Manila, Philippines, this 13th day of February 1959.

Gen. Macario Peralta, Jr., Commander, Panay Guerrilla Forces; Col. Vicente Umali, Commander, PQOG Guerrilla Forces; Attorney Rafael Estrada, Member, Defenders of Bataan and Corregidor; Col. Alejo Santos, Commander, BMA; Col. Eleuterio Adevoso, Commander, Hunters-ROTC, Guerrilla Forces; Col. Augustin Marking, Commander, Marking's Fil-American Guerilla Forces and Veterans' Organization of the Philippines; Mrs. Luz Belen Sese, National President, Philippine Veterans' Legion Auxiliary; Maj. Francisco Offemaria, National Commander, Philippine Veterans' Legion.

The American Legion in its September 1–4, 1958, convention in Chicago passed a resolution advocating the creation of a commission to restudy the entire veterans program in the Philippines. The resolution follows:

RESOLUTION 384

Resolution to create a Government Commission to restudy entire veterans program in the Philippines

Whereas a special relationship exists between the people of the United States and the Republic of the Philippines by virtue of their close association for over a half a century;

Whereas the organized military forces of the Government of the Commonwealth of the Philippines were inducted into the service of the Armed Forces of the United States (USAFFE) pursuant to the military order of the President of the United States dated July 26, 1941, and were in such service up to June 30, 1946;

Whereas at the time of such induction, the Philippines was a Territory of the United States and the citizens thereof where American nationals;

Whereas the Filipino soldiers fought valiantly side by side with the American soldiers against a common enemy during the last World War, displaying a high sense of devotion to duty and loyalty to the cause of democracy, and upholding the highest traditions of the service especially in the trying battles of Bataan and Corregidor;

Whereas the Filipino soldiers during the said war underwent the same risks and suffered the same hardships and deprivation as did the other members of the Armed Forces of the United States and should therefore be entitled to equal protection of U.S. laws and to the same rights and benefits as are enjoyed by other U.S. veterans;

Whereas existing laws passed by the U.S. Congress, particularly a rider in the First Supplemental Surplus Appropriation Rescission Act of 1946 (Public Law 301, 79th Congress) and the rules and regulations implementing the same have deprived the Filipino soldiers of various benefits to which they should be entitled;

Whereas the existing laws and regulations have created certain classes of veterans and different types of benefits for each class, resulting in misunderstanding, hardships and discontent not only among veterans but also the Filipino people as a whole;

Whereas veterans of other components of the Armed Forces of the United States who are residing in the Philippines have likewise been deprived of certain benefits by reason of their residence outside of the continental limits of the United States or its territories or possessions, such as domiciliary and hospital care and medical treatment;

Whereas the problems encountered by Filipino veterans in the matter of benefits under laws administered by the U.S. Veterans' Administration and other U.S. agencies have been one of the causes for the widespread clamor in the Philippines for a reexamination of the existing relations and agreements between the United States and the Philippines;

Whereas the American Legion feels that there exists no valid reason for depriving the Filipino veterans and other U.S. veterans residing in the Philippines of the benefits which the Government of the United States is under legal and moral obligation to extend to them;

Whereas the Filipino people and their Government have an abiding faith and confidence in the magnanimity, altruism, and sense of justice and fairness of the American people and their Government;

Whereas the immediate solution of these problems is necessary to maintain the harmonious relations which have heretofore existed between the two nations: Now, therefore, the

American Legion, in national convention assembled at Chicago, Ill., from September 1 to 4, 1958, resolves as it hereby does resolve, That the American Legion make proper representations with the legislative or executive branch of the U.S. Government for the appointment or creation of a commission that will undertake an immediate survey and restudy of the entire U.S. veterans program in the Philippines and recommend measures that will solve the problems above mentioned and remedy other situations that may be noted during such survey and restudy of veterans affairs.

U.S. CHAMBER PICKS CANHAM AS PRESIDENT

Mr. LANE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, this headline in last Saturday's papers stated a fact. But that fact opens the door to prospects that will please every American.

Erwin D. Canham, editor of the Christian Science Monitor, is one of the world's best newspapermen. His election as president of the United States Chamber of Commerce is like the coming of spring, bringing new life to the organization that speaks for free enterprise.

The Chamber is to be congratulated for breaking with precedent, and for taking this long step forward. For Erwin D. Canham's career has been just that: digging out all the facts; analyzing and interpreting them in the light of modern realities; growing with his times.

There are many papers that, by the numbers, enjoy a far larger circulation than the Christian Science Monitor, but there are few that measure up to the prestige it has earned for objective reporting and illuminating editorial comment.

The Monitor has always maintained high standards in the field of journalism, but its reputation has become outstanding under the direction of Erwin D. Canham. His talent and his opinions have won increasing recognition. He is former president of the American Society of Newspaper Editors, and has served as an alternate delegate to the United Nations General Assembly. At the age of 55 he brings to his responsible position a wealth of experience, and a capacity for reasoning through problems that inspires respect and confidence. His reaction, upon being informed of the honor that has come to him, is characteristic of Mr. Canham.

I am deeply convinced the United States is involved in the greatest competitive struggle in history—

He said—

One of the tools with which it can work is the progress of American enterprise in cleaning its own house in the last half-century.

The 1900 concept of capitalism is a thing very foreign to the capitalism of today. Business has accepted a deep responsibility and accountability to its customers, its civic neighbors, its workers and its stockholders.

He said that business groups and labor organizations can provide powerful impetus to progress, but only to the degree that they remain voluntary. You have made a good and forthright beginning, Erwin Canham. Those of us who have followed your constructive career, know that you have the intelligence, the sincerity, and the courage to lead the United States Chamber of Commerce to a new high in accomplishment and in public esteem. You have a challenging opportunity, and we know you are equal to it.

With your comprehensive knowledge of national issues and international problems, of economics and human nature, you are equipped to lead the business community of the Nation as no other man before you.

We predict that you will guide the United States Chamber to the most illustrious chapter of its history, to the greater pride of Massachusetts in her distinguished son, and to the benefit of the whole free world.

HELP THE VISUALLY HANDICAPPED CITIZENS OF AMERICA

Mr. MATTHEWS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. MATTHEWS. Mr. Speaker, at the present time, the House Committee on Education and Labor is considering various types of legislative proposals to help the visually handicapped citizens of America. I appeared before the committee last week on behalf of my bill H.R. 1855. The purpose of this proposed legislation is to create a temporary Advisory Committee for the Blind to suggest programs or changes that will improve services to our blind citizens. I have received hundreds of letters of support for this legislation, and many organizations who are working with the blind throughout America have sent me letters of approval. I do not want to burden the RECORD by asking permission to include these many pages of approval of this proposed legislation. I am, however, including the statement that I made before the House Committee on Education and Labor, and I hope my colleagues have an opportunity to read this statement, which follows:

STATEMENT OF CONGRESSMAN D. R. (BILLY) MATTHEWS, EIGHTH DISTRICT, FLORIDA, BEFORE THE SUBCOMMITTEE ON SPECIAL EDUCATION, U.S. HOUSE COMMITTEE ON EDUCATION AND LABOR, ON BEHALF OF H.R. 1855, FOR THE ESTABLISHMENT OF A TEMPORARY NATIONAL ADVISORY COMMITTEE FOR THE BLIND, MARCH 9, 1959

As a young man I became associated with the Lions Clubs of Florida and had the high honor of serving in 1941 as the district governor of the Lions—35 clubs in the northern district in Florida. This great civic association appealed to me partly because of its interest in our blinded citizens. You may recall that Helen Keller appeared before Lion International at one of their great conventions many years ago and asked this civic association to help in every way possible with our blind citizens. As a result, chiefly, I think, of her appeal, throughout the years the Lions' organization has devoted much of its philanthropic effort toward working with the blind and for the blind.

As a district governor of Florida Lions many years ago, I was asked by the Governor of Florida, the Honorable SPESSARD L. HOLLAND, who is now a U.S. Senator, to serve as a member of the newly created Florida State agency known as the Florida Council for the Blind. I accepted this high honor with deep satisfaction and later became the chairman of this State agency. As a former chairman of the Florida Council for the Blind, I take great pride in recollecting that the first executive director of our agency was a young man nearly totally blind by the name of Henry Johnson. He died at a tragically young age, and was succeeded by the Honorable Robert Barnett, who is now, as you know, executive director of the American Foundation for the Blind. The third executive director of the Florida agency, and the gentleman who is now serving, is the Honorable Harry Simmons.

I have given you this personal background in order that you may know that I am no Johnny-come-lately in my earnest desire to be of help to the visually handicapped of America.

Soon after I came to Congress I began to study the Federal statutes that are on the books concerning help for the blind and I found a veritable maze of laws administered by many varied Federal agencies, bureaus, and departments. I found further that the Honorable Caleb Boggs back in 1951 saw this same problem and had introduced a bill to establish a temporary National Advisory Committee for the Blind. I felt that passage of this legislation was of the utmost importance and could probably be the greatest contribution I could make in this field as a Member of Congress. So, in the 84th Congress I introduced H.R. 6500, a bill for the establishment of a temporary National Advisory Committee for the Blind, and in the 85th Congress I introduced H.R. 1955, which was the identical bill. Now in the 86th Congress the same bill is H.R. 1855.

A National Advisory Committee for the Blind would be instrumental in promoting greater coordination and mutual cooperation among Federal agencies. The committee would provide needed guidance in the development of uniform objectives and procedures, improved methods, and increasingly effective programs of services for the blind.

It could be of major significance, for example, in planning and organizing studies and research projects to be carried on jointly by Federal agencies such as the National Institute of Neurological Diseases and Blindness, the Veterans' Administration, the Office of Vocational Rehabilitation, and the Office of Education, in conjunction with such national private organizations as the American Foundation for the Blind, the Braille Institute of America, and the National Federation for the Blind.

Perhaps the present need for establishing coordinated services and uniform standards for blind programs is mostly clearly illustrated by the fact that there are numerous definitions of blindness in laws and regulations of the Federal and State Governments. For instance, under the old-age survivors and disability insurance program there is a specified definition of blindness for purposes

of the disability freeze, which allows an individual to disregard, for benefit purposes, the period of time he is under a disability.

In defining disability for a cash payment under the same program, however, blindness is neither specified nor defined, and therefore is not necessarily a disability. Moreover, under the aid to the blind public assistance program there is no definition of blindness in the Federal law. Thus, presumably, it remains for the States to determine what constitutes blindness. State definitions of the term, as a result, include varying degrees of limited sight. The Department of Health, Education, and Welfare maintains that the Secretary has the power to disapprove a State plan incorporating a definition of blindness which does not comply with the Department's own recommended definition of blindness.

That is in no way of criticism; that is just a statement of fact.

The National Advisory Committee for the Blind could also conduct a thorough study, evaluating existing programs with the purpose of obtaining maximum benefits for the blind. The committee would determine how much Federal money is now being expended on behalf of the blind and in what areas these expenditures are concentrated. The committee could then make recommendations as to the proper allotment of Federal money so as to adjust for inadequate budgets in some programs which have resulted in breakdowns of essential services for the blind.

The role of the Federal Government in this area would be thoroughly explored. The committee would study the public assistance aid to the blind programs to determine whether income restrictions should be liberalized to encourage employment, whether the Federal maximum should be raised, and whether the Federal Government should make a greater percentage contribution to State payments. These are broad questions of policy which will call for the establishment of a basic philosophy in respect to our assistance to the blind.

Other Federal programs in which services to the blind are only one phase of their activities should be studied to determine the extent to which these programs actually serve the blind and whether this phase is receiving proper emphasis.

Moreover, recommendations should be made as to the question of duplication of services between Federal, State, local, and private agencies so that the blind people in the country will get the maximum benefit, regardless of where they live, of the taxes and contributions of the American people.

The establishment of a National Advisory Committee for the Blind, and its subsequent activities, would focus national attention on the potentialities and the achievements of the blind in adjusting satisfactorily to society, thus contributing to the development of positive and realistic national attitudes toward our blind population.

An evaluation of the extent to which the results of modern research are disseminated and made available to all blind people in the country could be explored by the committee.

The committee could also direct its attention to certain aspects of the problems of the blind which have not received sufficient emphasis in the past, such as special treatment and training for the large numbers of people who are handicapped by limited, deteriorating eyesight, but who are not under medical care at the present time.

It should be noted that on June 17, 1957, the administration sent a proposed bill for the blind to Congress which was substantially the same as the National Advisory Committee for the Blind envisioned in my bill H.R. 1855. That was the bill introduced by the distinguished gentleman from New York [Mr. WAINWRIGHT].

In submitting the proposal, Secretary Marion B. Folsom said the proposed study should provide needed guidance in the development of improved methods and increasingly effective programs of services for the blind. He added it should stimulate greater interest and action among our medical, education, industrial, and social science research talent in the prevention of and reduction of the handicapping effects of blindness.

I should like to give you a brief analysis of H.R. 1855. Section 1 of the bill states "There is hereby established a National Advisory Committee for the Blind (in this act referred to as the 'committee'). The committee shall investigate and study the entire field of existing Federal, State, and local activities related to the granting of services to the blind, including the history and development of such activity. The committee shall report to the President and to the Congress, within 24 months after passage of this act, the results of such investigation and study, together with recommendations (1) for accomplishing greater coordination of and more effective results from such activities, (2) for the attainment of maximum benefits for the blind, and (3) with respect to such other matters as the committee may deem appropriate." Section 2 deals with the membership of the committee and states that "The committee shall be composed of nine members, who shall be conversant with work for the blind, to be appointed by the President as follows: (1) One individual from the executive branch of the Federal Government; (2) one individual from the Senate of the United States; (3) one individual from the House of Representatives of the United States; (4) one individual from among officers and employees of the State governments; (5) one individual from a national association of professional workers with the blind; (6) one individual from a national organization of the blind; (7) one individual from a national research organization for the blind; (8) one individual from the field of education of the blind; and (9) one individual from the public at large."

The bill sets forth the organization of the committee which provides that "The committee shall elect a chairman from among its members" and that "five members of the committee shall constitute a quorum." Section 5 of the bill provides for compensation of members of the committee and states a maximum amount of $25 per day when members of the committee are engaged in the performance of their duties, plus reimbursement for travel, subsistence, and any other necessary expenses incurred. Section 6 of the bill states that "the committee shall have the power to appoint and fix the compensation of such personnel as it deems advisable, without regard to the civil-service laws and the Classification Act of 1949, as amended." Section 7 points out the powers of the committee. "The committee, or any authorized member thereof, may, for the purpose of carrying out the provisions of this act, hold such hearings and sit and act at such times and places, and take such testimony, as the committee or such member may deem advisable. Any member of the committee may administer oaths or affirmations to witnesses appearing before the committee or before any authorized member thereof.

"The committee, or any authorized member thereof, is authorized to secure directly from any executive department, bureau, agency, board, commission, office, independent establishment, or instrumentality, information, suggestions, estimates, and statistics for the purpose of this act; and each such department, bureau, agency, board, commission, office, establishment, or instrumentality is authorized and directed to furnish such information, suggestions, estimates, and statistics directly to the committee, or any authorized member thereof, upon request made by the chairman of the committee or any authorized member thereof.

"The committee, or any authorized member thereof, shall have power to require by subpena or otherwise the attendance of witnesses and the production of books, papers, and documents; to administer oaths; to take testimony; to have printing and binding done; and to make such expenditures as it deems advisable within the amount appropriated under authority of this act."

Section 8 authorizes to be appropriated the sum of $250,000 to carry out the provisions of this act, and section 9 states that "the committee shall cease to exist within 30 days after the committee submits its report pursuant to section 1."

Now, I am not wedded to the particular wording of this bill, neither am I committed to try to obtain the passage of this bill exactly as it is presently written. There are some honest differences of opinion about one or two points in the bill. For example, the number of members of the committee or the total amount authorized in the bill for the expenses of the committee. I am firm in the conviction that the advisory committee should be independent of Government agencies, of any set forms and rules of procedure that would interfere with what we might call a free and unbiased study of all of the problems dealing with the blind in America.

The oldest Federal statute, as I recall, concerning the blind dates back to 1879. From that time on we have had a veritable hodgepodge of laws interposed here and there throughout a large number of Government agencies. Surely there should be interest in the establishment of a temporary National Advisory Committee for the Blind to make recommendations to make possible more coordinated services and uniform standards for our blind programs. Many Congressmen have expressed their interest in this legislation, and at least 20 of my colleagues in the House have introduced this same measure. Without any solicitation from me, hundreds of letters have come to my desk supporting this legislation.

I sincerely hope your committee will report favorably on this bill with any appropriate amendments that in the judgment of the committee may improve the legislation.

FORTY YEARS OF SERVICE FOR GOD AND COUNTRY

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, during this month of March, our citizens in every community throughout the country are joining their Legionnaire neighbors in celebrating the 40th anniversary of the birth of the American Legion, the world's largest veteran organization.

It is right and necessary that America should recognize and salute the nearly three million Legionnaire veterans of World War I, World War II, and the Korean conflict for the contribution they have made to the welfare and security of our Nation and all of our people during the past 40 years.

It is appropriate that the American Legion's history and record of service to God and country should be reviewed and

reemphasized during this birthday month.

The American Legion was born at the historic caucus in Paris, France, March 15 to 17, 1919. Attending this meeting in the Cirque de Paris were 1,000 delegates from the first American Expeditionary Force. They agreed to form an organization of American veterans of World War I. They named the new society the American Legion, established a committee of 100 to push plans for enrollment overseas and at home, and left completion of the new organization to a second caucus, held in St. Louis, Mo., May 8 to 10, 1919.

The St. Louis caucus adopted a constitution and by-laws and selected Minneapolis, Minn., for the American Legion's first national convention, November 10 to 12, 1919.

It is interesting to note what historian Richard Seelye Jones wrote of the founding Paris caucus:

> The American Expeditionary Force dissolved. It left its dead in France. It left its record for history. It bequeathed the perpetuation of its memories, comradeships and service ideals to the American Legion.

Forty years of dramatic service to God and country now lie behind the American Legion. It is now starting on the fifth decade of its wonderful life. Today its ranks are mostly filled by a younger generation of American veterans eager and anxious to write the greatest chapters in the history of the American Legion.

The march of time has changed the entire world. We are living today in a fantastic period that we call the space age. Mankind is hard at work cutting its earthbound shackles to reach literally for the stars.

The American Legion too has changed. But it has changed only in dimensions, not in character and integrity. It is today a three-war organization. It has 17,000 community posts. It has outposts in every land outside of the Iron and Bamboo Curtains. It can well be said today that the sun never sets on the domain of the American Legion. It has an Auxiliary today with 14,000 community units. It has grown far beyond the fondest dreams of its founders—grown in stature, in membership, in prosperity, in prestige, in influence and best of all in public esteem.

Today the men and women in the uniform of the American Legion still are charter members of war, chairmen of democracy and treasurers of peace. They are still filled with an aggressive Americanism, sparking with the victory volts of the ideals of freedom. They are still teaching by word and by example that love of country is America's best bodyguard. They are still warning that danger lurks where patriotism shirks and that when liberty is lost it passes to no one and is never regained. They are still implanting in American youth the fiery concept that sacrifice is the salt of patriotism and that willingness to sacrifice is the watermark of the patriot.

Today the American Legion still offers all eligible veterans the world's greatest fellowship value. Today the typical American Legion post home is still a kind of heartbeat house for community activity.

Today it is still a source of fierce pride to the American Legion that it is regarded by the Communist Party of the United States as its public enemy No. 1. Today the American Legion still is in the foreground in militantly opposing Communist and other subversive activities, in ripping off the masks of Communist front organizations and in teaching and preaching that it is not enough to be merely anti-Communist. In the American Legion you have first to be pro-American.

The American Legion has had an immeasurable impact on the American scene during the first 40 years of its life. This impact was registered through its major basic programs which brought new concepts of service to the entire Nation and changed the thinking of all Americans.

Through its rehabilitation program for veterans of World War I, the American Legion actually pioneered in bringing about enlightened modern methods of taking care of the disabled and physically handicapped and of retraining them to become self-sustaining and useful members of society. Today such care and rehabilitation are available to all American citizens through public programs, services and resources unheard of before World War I.

The American Legion has become the greatest name in rehabilitation. The Veterans' Administration is today its greatest living memorial.

Through its far-sighted fathering of the GI bill of rights for World War II veterans and its subsequent Korean GI bill, the American Legion has contributed to the raising of the educational level of the entire nation. This same legislation also gave a tremendous boost to home ownership in the United States.

GI bill-educated or trained veterans today boast of a 15 percent greater earning power than nonveterans of the same age brackets, a complete reversal of the situation 13 years ago.

The American Legion is largely responsible for bringing about modern concepts of child welfare and for streamlining laws, court procedures and public services having to do with the care and protection of all American children. Horse and buggy period adoption and probation laws have been brought up to date. Uniform state laws on desertion have been enacted. Juvenile court procedures have been revamped. These changes came about mostly through American Legion leadership.

Since 1925 the American Legion has expended more than $148,000,000 in emergency financial aid to children in need. Most of this money has gone for food, clothing, shelter, and medical treatments.

Today The American Legion still pioneers in the field of child welfare. It is financing through grants from its National Child Welfare Foundation research studies and surveys aimed at improved training and services for mentally retarded children, at helping partially seeing youngsters and at training police officers for careers in working with juveniles who have become delinquent.

Its Americanism program is one of the brightest jewels in the crown of the American Legion. Through its constant accent on its positive programs of youth-training it has built soundly over 40 years for future good citizenship. Some 2 million youngsters annually are enrolled in its activities such as Boys States, Boys Nation, the high school oratorical contest, the School Medal Awards, the 4,300 Boy Scout troops sponsored by our posts, and in other local, department, or national projects.

More than 400,000 selected high school students participate annually in the American Legion's nationwide oratorical contest. The objective of this program is to stimulate original study and research by these students of the United States Constitution and Bill of Rights. They have to prepare their own orations on some phases of these documentary bulwarks of American freedom. Think of how many constitutional lawyers this program must have produced—men and women dedicated to upholding the Constitution and defending it against emasculatory amendments.

If any organization has helped effectively to hold down patriotic illiteracy in these United States, that organization is the American Legion. Legionnaires have always been praise agents of America—to enhance popular appreciation of all American blessings.

Taking note that the path away from the altar leads to the pagan shadows of the Red Star in Moscow and concerned over an increasing number of American families in which religious vacuums have developed, the American Legion in 1950 launched its nationwide, nondenominational "back to God" movement. In this program American Legion chaplains at all levels have come into their own as true spiritual leaders. This activity has three simple objectives—daily family devotions, regular church or synagogue attendance, and religious training of American youth. Through this program thousands of dedicated Legionnaires are working to strengthen the churches and synagogues of their home towns. They are putting the accent on divine guidance in daily living. It is fitting to note that the birth of the American Legion in Paris in 1919 was ushered in by a prayer by an Army chaplain.

In its militant opposition to communism, the American Legion has always had the courage to speak up for America. The House Committee on Un-American Activities whose exposés and reports to the American people have aroused them to a realization of the Communist infiltrations in this country, came into being in 1938 in response to a resolution adopted by the 1937 national convention of the American Legion in New York City. At every session of Congress over the last 20 years the American Legion led the legislative fight to assure adequate funds for the work of this committee.

In fighting communism the American Legion relies chiefly on education and on

exposure. It is to the credit of the American Legion that its chief traducers today are those whose first allegiance is not to America.

In the stirring days that lie ahead, there will be still greater calls on the services of the American Legion and its loyal courage and realism. The American Legion is entering its fifth decade geared with fresh strength and greater community bulwarks for its bases of operations. Today more than 60 percent of all American Legion posts own their homes which have an aggregate valuation of more than $300 million. From these fortresses of freedom radiate patriotic influences that are serving to bring about a dynamic conviction of Americanism to cope with the tidal waves of communism.

The American Legion continues to give the best of itself to its communities, States, and Nation. Its gifts are precious for they are tied with heartstrings. The 17,000 American Legion posts are the lengthened shadows of 2,700,000 patriots working for God and country.

YES AND NO TO EVENING STAR EDITORIAL

Mr. JOHNSON of Wisconsin. Mr. Speaker, I ask unanimous consent to extend my remarks and include extraneous matter at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. JOHNSON of Wisconsin. Mr. Speaker, this past Friday, March 13, the Washington Evening Star ran an editorial on the subject of milk standards for the District of Columbia. I would like to comment on portions of this editorial, and I ask unanimous consent to include the editorial at this point in the RECORD:

HIGH MILK STANDARDS

All parties concerned with the current milk controversy are agreed that the standards of purity for milk sold in Washington should be high. Views differ widely, however, as to just how high they ought to be. For our part, we believe they should be high enough to protect the public health—but not so needlessly high as to adversely affect the cost to the consumer.

The Commissioners are to be commended, therefore, in sponsoring an intensive and comprehensive study by the District Health Department of present laws and regulations fixing milk standards for Washington. Such a study offers the best approach to a solution of the question raised by certain local dairies as to whether the standards here are too high.

It is a fact that the standards set by the District under a 1925 law are higher than those prevailing in most other parts of the Nation. They are higher than the standards approved by the U.S. Public Health Service and adopted by health authorities in 35 of the States and in more than 1,500 municipalities. The Chestnut Farms (Sealtest) and Thompson dairies contend that the Federal requirements are as adequate for Washington as they have proved to be for other jurisdictions. The Washington-Virginia Milk Producers Association, a cooperative organization of dairy farmers, is waging a vigorous fight against any lowering of the District standards. The co-op seeks to prevent Chestnut Farms from importing milk from areas outside the Virginia-Maryland milkshed. This milkshed is under constant inspection by the District Health Department.

Involved in the dispute, of course, are economic factors of special concern to the farmers and the distributors of milk. Lowering the standards would permit importation of cheaper milk and presumably permit reduction of milk prices to the consumer. The co-op has declared that there is no assurance, however, that importers of cheaper milk would pass the savings on to the consumer. There is the possibility, on the other hand, that widening of competition with respect to milk supplies might result in lower milk prices for everybody.

The paramount consideration, in any event, must be the health of the community. The consumer must be assured of an adequate supply of milk that is safe by every reasonable standard. If such milk can be supplied under the model code approved by the U.S. Public Health Service and at a cost lower than that possible under the stricter standards now in force here, we can see no good reason for banning the Federal standards in the Nation's Capital.

I beg to differ with the first two paragraphs of that editorial. A review of the District of Columbia's milk standards—and a revision of those which are outdated, arbitrary, and unduly restrictive—would, of course, help the local situation. But this same appalling situation exists in countless other Eastern and Southern cities. What we really need is a national quality yardstick for milk shipped in interstate commerce. My milk sanitation bill, H.R. 3840, would make the proven U.S. Milk Ordinance and Code that quality yardstick.

The need for national legislation in this field is underlined by the fact that 17 of my colleagues have introduced companion bills to my H.R. 3840 in the House. A similar bill has been introduced in the Senate by Senator HUMPHREY, of Minnesota. Cosponsors are Senator MCCARTHY, of Minnesota, and Wisconsin's Senators WILEY and PROXMIRE.

I am sure I speak for the 17 Congressmen and the Senators I have just mentioned when I say we feel that health rules which are used to maintain a local milk monopoly do not serve the public interest. Sanitary standards for milk should protect the consumer. They should not be used to make the consumer pay more for milk or to penalize the large body of producers of high-quality milk.

I cannot agree with another portion of this editorial, which reads:

It is a fact that the standards set by the District under a 1925 law are higher than those prevailing in most other parts of the Nation. They are higher than the standards approved by the U.S. Public Health Service and adopted by health authorities in 35 of the States and in more than 1,500 municipalities.

In a talk on the floor of the House on March 9, I pointed out some of the things which make the U.S. Milk Code a reliable standard for milk. I would like to review a portion of that speech. In it, I said:

The U.S. Milk Code, regarded as a model for the industry, was the result of the work of top technical experts in both the health and dairy fields. It was not a product of the U.S. Public Health Service alone, since the code was developed with the aid of an advisory board of experts in the fields of dairy technology, veterinary medicine, agriculture, and public health—in addition to State and local agencies who use the code, industry and interested Federal agencies, including the U.S. Department of Agriculture, which has approved the present edition.

Mr. Speaker, the code is revised frequently to keep pace with the rapid improvements in milk processing, handling, and shipment. Since the first code was published in 1924, it has been completely revised 12 times.

Currently, the U.S. Milk Code is being used as the basis for milk sanitation regulations in 35 States and has been voluntarily adopted by some 1,900 cities and counties. It is used as the quality standard for milk purchased for our Armed Forces.

At Walter Reed Hospital here in Washington, D.C., the milk served to patients must meet the specifications of the U.S. code rather than the District of Columbia's sanitary regulations. Many of this country's distinguished citizens have been treated at that hospital, and I have never heard of any of them suffering ill effects from the milk they drank there.

In the same speech, I pointed out that two dairy plants in my district had offered to deliver class I, grade A milk to Washington, D.C., for $1.12 per hundredweight less than dairy plants here have to pay for milk they are now buying. I also showed that the two Wisconsin plants I have just mentioned are rated higher by the U.S. Public Health Service than the two major dairies supplying metropolitan Washington.

On March 11, in answer to charges made by the general manager of the local milk monopoly that I was trying to pass grade B Wisconsin milk off as grade A milk, I gave the names of 12 other dairy plants in my district that are equipped to sell class I, grade A milk. The majority of these also rate higher than the District plants. They are: Barron Co-op Creamery, Barron, Wis.; Boyceville Farmers Co-op Creamery, Boyceville, Wis.; Baldwin Co-op, Baldwin, Wis.; Chippewa County Co-op Dairy, Bloomer, Wis.; Colfax Co-op Creamery, Colfax, Wis.; Ellsworth Co-op Creamery, Ellsworth, Wis.; Falls Dairy Co., Stanley, Wis.; Land O'Lakes Dairy, Whitehall, Wis.; Sanna Dairies, Inc., Menomonie, Wis.; St. Croix Valley Co-op Dairies, Glenwood City, Wis.; Wisconsin Co-op Dairies, Inc., Elmwood, Wis.

No, the District of Columbia milk regulations do not secure higher quality milk than does the U.S. Milk Code. They only insure higher cost milk.

Mr. Speaker, the only reason I mention this local milk problem is that 17 of my colleagues and I are trying to pass legislation which would correct not only the situation here but wherever a similar situation exists. And I know from experience when hearings on similar legislation were held last year before the Health and Science Subcommittee of the Interstate and Foreign Commerce Committee that the members of each local group who have been using health laws to maintain their own little milk monopoly will be telling the subcommittee the same story we are hearing here in

Washington, D.C., namely, that they do not want a national quality standard for milk because then their own inspectors will not be able to check the farms and dairies from which the milk comes. These local monopolists claim they cannot trust the Wisconsin, Minnesota, Iowa, and other midwestern inspectors—men who under the terms of our bill will have been trained by the U.S. Public Health Service to give uniform inspections.

What these milk monopolists are saying in effect is that it is OK to have Federal inspection of meat and poultry—but not of milk. As a result, Mrs. Housewife is paying a higher price for her milk because dairymen are not allowed to supply her full needs for fluid milk.

Can anyone believe that the U.S. Public Health Service will not see to it that Mrs. Housewife gets milk of the highest quality and purity? This is the same U.S. Public Health Service which now administers our Food, Drug, and Cosmetic Act and has such a high reputation for insuring that the American people have pure food.

I can but say a hearty amen to the last paragraph of the Evening Star's editorial, which reads:

> The paramount consideration * * * must be the health of the community. The consumer must be assured of an adequate supply of milk that is safe by every reasonable standard. If such milk can be supplied under the model code approved by the U.S. Public Health Service and at a cost lower than that possible under the stricter standards now in force here, we can see no good reason for banning the Federal standards in the Nation's Capital.

Pure milk of the highest quality can be obtained under the U.S. Milk Code, and there is no reason why those standards should be banned anywhere.

Mr. Speaker, it is now possible for any dairy plant in the United States to be rated under the U.S. Milk Code. These ratings are printed in a report titled "Sanitation Compliance Ratings of Interstate Milk Shippers." I am going to ask that the January 1959 report be placed in the RECORD at the end of my remarks so that any Member of Congress who wishes may check to see how the dairy plants in his area compare with the ratings of the District of Columbia dairies. I think many Congressmen will find their local dairies rate higher than the District of Columbia ones.

I hope that this documented proof will end the brainwashing we have been receiving for the past few weeks by way of ads on radio, television, and in the local newspapers from the local milk monopoly. These ads claim that the District of Columbia milk regulations give the Washington area better milk than is produced in any other area of the country. I say this is not true—and the sanitation ratings of interstate milk producers prove my point. Under unanimous consent, I include at this point the "Sanitation Compliance Ratings of Interstate Milk Shippers":

Sanitation compliance ratings of interstate milk shippers, Jan. 1, 1959

Name and address of shipping station or plant	Type of product	Type of rating		Percent compliance rating				Enforcement rating	Rating agency	Date of rating
		Area	Individual	Raw milk	Receiving station	Pasteurizing plant	Pasteurized milk			
ARKANSAS										
Acee Co., Fort Smith, Ark.	Pasteurized milk and milk products.		X	95.5	------	98.0	97.0	98.3	SHD	May 23, 1958.

U.S. EXPORT CONTROL AND SOVIET TRADE

Mr. LIPSCOMB. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. LIPSCOMB. Mr. Speaker, the teeter-totter policies in our trade control procedures, and more particularly the export control program have resulted in uncertainties for our own industries and, more importantly, I believe, they may have been detrimental to our overall national security.

Today, for reasons I shall elaborate on in a moment, I have introduced a resolution calling for a study of our export control program. The emphasis under the resolution would be to determine the effectiveness with which the will of Congress and the best interests of the Nation have been carried out concerning the control over strategic materials flowing to the Soviet bloc.

The resolution reads as follows:

Resolved, That the Committee on Banking and Currency of the House of Representatives, acting as a whole or by subcommittee, is authorized and directed to conduct a full and complete investigation and study of the administration, operation, and enforcement of the Export Control Act of 1949 (63 Stat. 7), as amended, with a view to assessing the accomplishments under that Act, determining whether improvements can be made in the administration, operation, or enforcement thereof, and improving congressional oversight and guidance over the formation of U.S. policies involved in such Act. In carrying out such investigation and study, the committee shall give particular attention to the following matters:

(1) The problems involved in the control of trade between the United States and foreign countries, particularly the foreign countries comprising the Sino-Soviet bloc.

(2) Present methods and procedures in the formulation of policy with respect to the determination of which articles, materials, supplies, and technical data shall be controlled under such Act, and the extent of such control.

(3) Procedures followed under such Act in obtaining information, advice, and opinions with respect to determinations of which articles, materials, supplies, and technical data shall be controlled under such Act, from departments and agencies of the United States which are concerned with aspects of our domestic or foreign policies and operations which have a bearing on exports.

(4) The extent to which decisions heretofore made under such Act concerning the control of exports have adversely affected the security of the United States.

(5) Whether or not such Act is being administered by the appropriate department of the Federal Government.

(6) The interrelationship between such Act and related Acts (such as the Mutual Defense Assistance Control Act of 1951, and the Trading With the Enemy Act) and other discussions or agreements entered into by the

United States (such as the Coordinating Committee (COCOM) discussions and agreements) which affects or relate to the control of trade between the United States and foreign countries.

For the purpose of carrying out this resolution the committee or subcommittee is authorized to sit and act during the present Congress at such times and places within the United States, including any Territory, Commonwealth, or possession thereof, or elsewhere, whether the House is in session, has recessed, or has adjourned, to hold such hearings, and to require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, and documents, as it deems necessary; except that neither the committee nor any subcommittee thereof may sit while the House is meeting unless special leave to sit shall have been obtained from the House. Subpenas may be issued under the signature of the chairman of the committee or any member of the committee designated by him, and may be served by any person designated by such chairman or member.

The committee shall report to the House as soon as practicable during the present Congress the results of its investigation and study, together with such recommendations as it deems advisable. Any such report which is made when the House is not in session shall be filed with the Clerk of the House.

The export control program, established under the Export Control Act of 1949, is administered by the Department of Commerce. Export control is of two basic types: short supply controls and security controls. Under the trade control program, exports are controlled through a licensing system.

I have been following the administration of our export control program for a good many months. Recent actions in this area have caused me to bring these matters to the attention of the House of Representatives.

For example, during a recent liberalization of our export control policies, 7,760 tons of copper and copper-based alloys were licensed for export to the Soviet bloc. Though this decision to liberalize has been rescinded insofar as this item is concerned, other items which were formerly restricted to the Soviet bloc can still be sent.

The liberalization policy, announced August 14, 1958, became effective in November 1958. In the 2 months following, it resulted in approximately $4,185,829 worth of copper scrap and electrolytic copper wire bars being authorized for shipment to the U.S.S.R. and its satellites.

On February 12 Secretary of Commerce Lewis Strauss banned the further export of copper and copper-based alloys to the Soviet bloc. Although I am concerned that the decision did not take effect until February 20, that a 6-month grace period is permitted during which the copper already licensed for export might be shipped to the Soviet bloc, that the Secretary did not completely reverse the former decision, and that even the sending of materials and data for complete industrial plants is still possible, I believe the Secretary deserves the gratitude of the Nation for reversing the policy on this strategic commodity, copper.

Another example of what I believe constituted an unfortunate revision in regard to our export controls concerned a Russian tire factory. Briefly, that story, which I discussed in detail in the House on June 16, 1958, is as follows: The U.S.S.R. decided to build a tire-manufacturing factory capable of increasing its total tire production by 15 percent, and contracted with a British combine for the equipment for the plant. Various American firms were approached by the British combine to supply technical know-how for plant design and layout.

When approached for an export license by the American firms, the Department of Commerce originally prohibited the export of such technical data on the grounds that the information was of a strategic nature and that since tire plant engineering in the United States was considered superior to that available elsewhere its transmission would be detrimental to our national security.

The American firms claimed that technical know-how comparable to that available in the United States existed abroad. These American firms argued that since the Soviets could purchase the data elsewhere, they should not be frustrated by an export ban. This view was accepted by the Department of Commerce and in February 1958 it reversed its earlier position.

It seems to me that this was a very unfortunate decision because I believe there is serious doubt that tire manufacturing engineering equal to that possessed in the United States does exist elsewhere. If indeed it does, why was the British combine so anxious to purchase the know-how from an American firm? It was my view that the decision was detrimental to our security.

In response to my request for an expression of opinion on this matter, the Defense Department in a letter to me dated April 8, 1958, stated that in its opinion, any assistance given to the Soviet tire industry, either in providing production facilities, technology, or export of tires by U.S. firms, would constitute a significant contribution to the Soviet war machine, and from a military point of view would be contrary to the security interests of the United States.

Based on this reply, it is extremely doubtful that much, if any, communication took place between the Defense Department and the Department of Commerce before the latter reversed its original decision and permitted such data to be authorized for shipment.

As this matter turned out, the British combine decided to subcontract with an English firm for the technical data and know-how, but the fact remains that our system of control was weakened by the Commerce Department's decision.

The current copper scrap incident goes back to the summer of 1958, and the Paris meeting of the Coordinating Committee on International Export Controls, known as COCOM. This body consists of representatives from the European NATO countries, Canada, Japan, and the United States. It is of interest that these 15 nations were responsible for almost half of the total 1957 exports to the Sino-Soviet bloc or slightly over $1.5 billion out of combined free world exports which approached $3.1 billion. The 1957 COCOM exports increased a half billion dollars over the 1956 totals, the last 2 years for which information is available.

In the summer of 1958, when Khrushchev was singing a wispy melody for greater trade—especially if the United States extended credits to the Russians—and the tensions were increasing in the Middle East partly caused by the Soviet Premier's more thundering bleats, the United States participated in these Paris meetings. Our delegate was a member of the State Department operating under the direction of Mr. C. Douglas Dillon, Under Secretary of State for Economic Affairs and Administrator of the Mutual Defense Assistance Control Act of 1951, the so-called Battle Act.

According to Secretary of Commerce Weeks, in an August 11, 1958, letter to me, the Commerce Department's role in these discussions was "generally restricted to the supplying of technicians where needed and advising the Administrator of the Mutual Defense Assistance Control Act on the strategic characteristics of individual commodities."

Secretary Weeks added that—

> The COCOM recommendations to governments represent a minimum level beyond which any member government is free to employ additional controls. We are, therefore, at the present time reviewng the problem of what additional effective controls over and above those recommended by COCOM can be employed by the United States under the Export Control Act of 1949, as amended. As you know, the primary responsibility for these decisions rests with this Department.

Three days later, on August 14, Mr. Weeks announced a liberalization of controls over the export of some goods previously banned for strategic reasons. Copper and copper-base alloys could now be shipped to the Soviet Union and its satellites. They have been.

The framework—the external events, domestic pressures, and general criteria—within which decisions were made by the Commerce Department in this period is revealed in a speech given by a high official of that Department.

On November 6, 1958, Mr. Frank W. Sheaffer, Acting Director of Export Supply, Bureau of Foreign Commerce, addressed the American Management Association meeting in New York City. Mr. Sheaffer pointed out that for years "the Russians have been trying to excite free world businessmen and governments with stories about profits to be made by trading with the Soviets."

He also aptly observed that such overtures reach their crescendo during periods when the free world is reviewing its security trade controls. Furthermore, in that expert's opinion, Russia lacked the ability to sell enough goods in the American market to justify Mr. Khrushchev's June pleas for more trade.

An analysis of Soviet bloc trade requests revealed to Mr. Sheaffer that "the United States is looked upon only as a supplier of specialties—of advanced technology, and of such items of equipment that go with this technology that cannot be bought elsewhere."

Sheaffer stated that the inquiries and applications concerned petrochemical

plants, petroleum refineries, tire and tire cord plants, textile-processing plants, synthetic fiber plants, plastics plants—especially polyethylene, and steel-finishing plants, especially high-speed continuous tinning and galvanizing lines.

The Acting Export Supply Director added that the tables of licensing to the Soviet bloc are somewhat misleading "as they show only commodities, and not technical data. Technical data licenses rarely contain any dollar figures, as the specific transactions take a long time to work out, and may involve many complicated, international transactions."

Then he continues:

So far, however, the major technical data licenses issued have been for plants for the production of synthetic fibers; for textile manufacturing plants; and for tinning and galvanizing lines. Among the license applications rejected have been petroleum-refining plants; technical data related to petroleum exploration and production; and certain petrochemicals and plastics which have highly strategic applications.

Even more revealing than the point that technical data approvals do not usually show up in the published table of commodities exported to the Soviet bloc are the two criteria under which applications for both data and commodities are reviewed. In Mr. Sheaffer's own words:

First, does the proposed sale of equipment or technical data involve items of significant strategic importance? And, second, would a denial be meaningful, or would it only result in making it easier for a foreign firm to get the business?

Based on the Department of Commerce's reasoning in the tire factory case, I must express great doubt, Mr. Speaker, as to which of the criteria mentioned in Mr. Sheaffer's New York address—the strategic importance of an item versus the fact that denial of an export license would not be meaningful if the Soviet bloc could purchase such commodities from abroad—outweighs the other. Some reasoned in the tire case that since the Soviets could buy the data in Europe anyway, why should not American businessmen sell it to them first?

If our country were faced with a war of profits and not a struggle for survival, then such reasoning might be at least superficially compelling. However, it is our national security with which we are concerned.

On January 27, I wrote the Department of Commerce requesting information on strategic-type goods, especially technical data and commodities shipped to the Soviet bloc, which would not have been sent under the Commerce Department policy in effect prior to August 14, 1958. A letter of February 9, 1959, from the Bureau of Foreign Commerce, U.S. Department of Commerce, reported that as a result of the August 14, 1958, decision, by then Secretary of Commerce Sinclair Weeks, which followed the liberalization of export controls recommended by COCOM, "a number of licenses have been approved for commodities for export to soviet bloc countries that would not have been approved for such shipment prior to the COCOM review."

The Department said that no technical data had been shipped to date which would not have been shipped prior to the COCOM revision governing the exports of strategic commodities. It is pertinent to remember that we do not have to liberalize our trade restrictions merely because COCOM agrees to do so.

I am including a table in the RECORD at this point which details the commodity, country of destination, value, and stated end use of those materials shipped to the Soviet bloc which would not have been granted an export license prior to Secretary Weeks' decision of August 14:

Approvals August–December 1958 for which presumption was for denial prior to Aug. 15, 1958

Month, 1958	Commodity	Country of origin and/or from which reexported	Country of destination	Value	Stated end use
November	Vacuum pumps [1]	United States	U.S.S.R.	$8,100	Polyester textile plant.
Do	Stainless steel pipe valves.[1]	do	U.S.S.R.	161,750	Do.
Do	Stainless steel pipe [1]	do	U.S.S.R.	407,000	Do.
Do	Electrolytic copper wire bars.	do	Czechoslovakia	59,136	Manufacture of semi-finished products.
Do	do	do	U.S.S.R.	2,564,100	Wire consumer products; manufacture of electrical equipment.
Do	Copper scrap	do	Czechoslovakia	337,400	Production of refined copper.
Do	do	do	East Germany	397,000	Do.
Do	do	do	Hungary	340,765	Copper articles; consumer goods; remelting.
Do	Cold rolled steel sheets	United States via Holland.[3]	East Germany	95	Sample shipment.[3]
Do	Stainless steel pipe	United States	U.S.S.R.	33,000	Polyester textile plant.
December	Electrolytic copper wire bars.	do	Czechoslovakia	34,160	Production of copper products.
Do	do	do	Hungary	34,160	Do.
Do	Copper scrap	do	Czechoslovakia	62,160	Refining.
Do	do	do	East Germany	55,940	Production of rods, wire, sheet.
Do	do	do	Hungary	301,008	Production of copper products.
Do	Tinmill black plate rejects.	do	do	15,820	Manufacture of shoe-polish cans and other packaging containers.
November	Antibiotics	do	Czechoslovakia	99,800	Treatment of disease.
Do	do	United States via Belgium.[4]	do	8,422	Do.
December	do	United States via United Kingdom.[5]	do	4,577	Do.[3]
Do	do	United States via Belgium.[4]	do	24,034	Do.[3]
Do	do	do [4]	Hungary	2,320	Do.[3]
Do	do	United States	do	775	Do.

[1] Transshipment.
[2] Part of a complete synthetic fiber textile plant which was not itself rated.
[3] Transshipment from Holland authorized.
[4] Transshipment from Belgium authorized.
[5] Transshipment from United Kingdom authorized.

I have already mentioned Secretary Strauss' reversal on February 12 of a part of the August 14 decision. This action on his part effectively prevents copper and copper-base alloys from being shipped to the Soviet bloc. However, as I have said before, I fail to see why the order did not become effective until February 20 and that it does not affect those export licenses already issued provided that the shipments are made within 6 months of the decision. Since November 10, 7,760 tons of copper-based metal have been approved for shipment to the Soviet bloc. Its value is estimated at $4,185,829. At last report, only 500 tons have been shipped; the remainder may still be sent provided that it is done within the next 6 months.

There is no question but that free world exports of copper are of significance to the U.S.S.R.

For many years the domestic supply of copper in the U.S.S.R. has been inadequate, and significant quantities have been imported from the free world. Imports reached their highest level under lend-lease agreements during World War II, when the U.S.S.R. received a total of nearly 440,800 tons of copper from the United States alone. During 1944 alone, the United States supplied the U.S.S.R. with almost 60 percent of its copper requirements. These imports enabled the U.S.S.R. to accumulate a large stockpile of copper by the end of the war.

Although Soviet production of copper has tripled since the end of World War II, the demand for copper in the U.S.S.R. probably has quadrupled. To keep pace with this increasing demand, production of copper in the U.S.S.R. has been supplemented by imports from the free world and by withdrawals from the Soviet stockpile. The U.S.S.R. also has substituted other, more plentiful materials for copper in many uses.

Until 1953, Soviet imports of copper were fairly small, averaging less than 11,020 tons annually during 1946–52. During 1953–57, imports of copper from the free world again became an important factor in the Soviet supply, amounting to about 330,600 tons, an average of 66,120 tons per year. In 1958, Soviet imports from the free world probably were at least 88,160 tons.

From August 1950, when copper was put under embargo by COCOM, until August 1954 when copper wire 6 millimeters and less was removed from the embargo list, most of the copper purchased

by the U.S.S.R. was through clandestine channels and was in unwrought form—for example, cathode, wirebar, ingot. This probably was because the unwrought forms are less costly than semifabricated forms, such as wire, and more copper could be purchased for a given amount of foreign exchange.

Since August 1954, most of the U.S.S.R's purchases of copper have been in the form of bare wire, 6 millimeters or less. For example, in the 3 years 1955 to 1957 bare wire represented about 87 percent of the total imports of copper; the remainder consisted of covered wire and cable and a small quantity of unwrought copper. The imported bare copper wire probably was drawn to the smaller sizes needed by the U.S.S.R. Following the removal of COCOM controls on all forms of copper in August 1958, the U.S.S.R. increased its purchases of unwrought copper in the remaining months of 1958.

The U.S.S.R. has released no quantitative information on the use of copper for more than 20 years. In 1955 the U.S.S.R. is estimated to have consumed between 440,800 and 551,000 tons of refined copper, more than half of which would have gone into the production of electrical machinery including wire and cable. It is estimated that the current pattern of use does not differ significantly from that of 1955.

From mid-November 1958 to mid-February 1959, the United States licensed 4,930 tons of copper wirebars and 2,830 tons of copper scrap for export to the Soviet bloc. Virtually all of the wirebar was licensed for export to the U.S.S.R., while virtually all of the scrap was licensed for export to the European satellites. None of the wirebar has been exported to date; but 700 tons of the scrap have been shipped to Hungary. On February 12, copper exports to the Soviet bloc were embargoed by the United States, effective February 20, 1959.

The Secretary's order of February 12 did not include the vacuum pumps, stainless steel pipe valves, stainless steel pipe, cold rolled steel sheets, tin-mill black plate rejects or the antibiotics for which the presumption was for denial prior to August 15, 1958. Of course, we have no objection to sending antibiotics to such nations af Czechoslovakia and Hungary; and the supposed manufacture of shoe polish cans does seem innocent enough; however, I do have reservations about sending pumps, valves, and pipe to build a polyester textile plant which will compete with American exports in this field. I regret that I cannot tell the Congress what firms are selling such materials since such information is classified.

It seems to me, Mr. Speaker, that the American public is entitled to know what firms are trading with the Soviet Union. While I can understand why such information would be regarded as confidential during the preliminary stages of a trade negotiation, for reasons of competitive business practice, I fail to see why such information cannot be made public once the contract between the Soviet bloc country and the American firm has been signed and the export license has been granted by the Department of Commerce. At present, the Department is refusing to divulge such information citing section 6(c) of the Export Control Act which reads:

> No department, agency, or official exercising any functions under this act shall publish or disclose information obtained hereunder which is deemed confidential or with reference to which a request for confidential treatment is made by the person furnishing such information unless the head of such department or agency determines that the withholding thereof is contrary to the national interest.

I recognize that some firms might regard the release of such information as detrimental to their so-called public relations. I also recognize that the Department of Commerce which depends to a large degree on the voluntary submission and accuracy of commercial trade statistics by business forms might be reluctant to mar such cooperation. However, part of an investigation might well consider the need for such confidentiality after the negotiation has been completed in terms of our American tradition of freedom of the press and the fundamental assumption that the public must be an informed one if democracy is to be effective.

This brief review of some of the recent actions taken under our export control policy points up a number of problems which I believe require some searching study by the House.

Problem 1. Administration of our export policy: I believe there exists a pressing need for a complete study and evaluation of the Export Control Act and its administration by the Department of Commerce in order to determine the effect on our national security of the decisions made and the policies established in carrying out the act.

Problem 2. Consultation with other agencies: The Export Control Act is administered by the Department of Commerce. The act provides that in determining which exports are to be controlled, the administering agency "shall seek information and advice from the several executive departments and independent agencies concerned with aspects of our domestic and foreign policies and operations having an important bearing on exports."

I have expressed doubt with reference to the tire factory case whether consultation did exist prior to the reversal by the Commerce Department of their previous decision not to export technical data pertaining to tire manufacture. We know that the Defense Department opposed the reversal. I should think that their opinion as to the strategic nature of such data would be relevant and perhaps overriding, especially when this factory could increase Soviet tire production by 15 percent. Study should be given to determine whether the consultation provisions of the act are actually being put into effect.

Problem 3. Coordination of our total export policy: While the Export Control Act is administered by the Department of Commerce, on the other hand the Mutual Defense Assistance Control Act of 1951, which provides for a joint effort with other nations to restrict a potential aggressor through export regulation, is administered by the Under Secretary of State for Economic Affairs. Because these two programs are so similar in purpose, serious evaluation must be given to the consultative procedures existing between these agencies. Possibly overall control and coordination should exist at the White House level as part of the Office of International Economic Security. At least this is a problem which should be thoroughly examined and thoughtfully analyzed.

Problem 4. The conflicting responsibilities that exist within the Bureau of Foreign Commerce: The program of export control under the Export Control Act is carried on in the Bureau of Foreign Commerce in the Department of Commerce. It is significant that the primary function of that division is to work for the promotion of trade. The official description of its duties as described, in part, in the "U.S. Government Organization Manual" is that the Bureau is charged with the promotion of "international trade—broadly construed as including the export and import of goods and services, investment abroad, international travel, and other activities, contributing to the vigor and growth of the foreign commerce of the United States."

Thus, while the Bureau is charged with devoting its utmost effort to encouraging American trade abroad through dispensing information, organizing trade missions, and maintaining direct contact with both American and foreign buyers and sellers, on the other hand, under the Export Control Act, its function is to control and prohibit trade where it would be contrary to U.S. interests to do so.

These two functions do not seem so mutually exclusive or diametrically opposed that it would not be within the realm of possibility to expect them to be administered by the same unit of Government with equal fervor, and determination of purpose. However, it is my impression that the Bureau looks at the Export Control Act trade prohibitions as merely burdensome hurdles to overcome in order to exercise its trade promotion functions.

Problem 5. Should we trade with the Soviet bloc? The basic problem, however, to be faced by any study of our export control program is the consideration of the nature of the struggle in which we are engaged. While we should like to be at peace with every nation, there are some nations which would not have it so. A determination as to what American commodities are strategic or nonstrategic as far as our national security is concerned must be related to our view of the purposes of the Soviet Union and the Communist feudal domain which follows its lead.

It is not new to recognize that we are engaged not only in a political and military contest for survival, but also in an economic one. Mr. Khrushchev might not expect to see the hammer and sickle

flying over our Capitol during his lifetime, but his pink-tinged glasses certainly lead him to the rosy view that someday it inevitably will fly there. Although Khrushchev succinctly reminded us of basic Communist intent when he predicted "We will bury you," this does not necessarily mean under a pile of rubble. His was a sentiment that should not be forgotten as the iceberg policy of the Soviet Union floats now and then into warmer and more thawing waters: A small part of the Communist policy expediently warming and melting, but the hard core safely secure beneath.

The last rites might well be performed from afar, instead of on the crumbled cities of America, following a total loss of our foreign markets and friends. The Soviet Union is engaged in a constant war of economic disruption whenever the opportunity suits its political convenience. Well known are the dumping activities by which the U.S.S.R. invades our markets in order to ruin our industries with products sold below their cost of production.

In late 1958, huge Soviet shipments of platinum caused the price of this precious metal to drop to $52 an ounce which was $51 less than it was in early 1957. The Russians' actions with respect to tin dumping are notorious and have resulted in constant price fluctuations and harmful effects on many of the free world's strongest supporters and traditional suppliers. In addition, the Soviet Union has offered arms to incite unrest in the global tinderboxes in exchange for cotton which is then poured on the world market.

On November 29, 1958, it was announced that the U.S.S.R. had concluded an agreement to sell $13,500,000 worth of benzene to the Dow Chemical Co. The price was 6 cents per gallon lower than the U.S. price. American benzene spokesmen claimed at the time there already was a substantial oversupply in the United States.

Early last month, the Soviet Union sent an initial supply of school scientific equipment. Despite import duties averaging over 40 percent, these items sold at two-thirds less than American products in the same field.

While such bargains seem attractive initially, it is prudent to remember the comparative standard of living and cost of the labor which is involved and the capacity of the Communist-owned state trading monopoly to cut its prices at will. The revealing series of precedents concerning platinum, tin, cotton, and machine tools among others should awaken us to the fact that this is not trade, be it ever so sweet and ever so cheap. This is an economic war.

The Soviet Union also has shown great interest in the latest machines so that it could duplicate them at a lower cost and then outsell us in the very markets which we have created. It is our blueprints and not our yellow corn that they seek.

We must seriously reflect whether or not more trade will lead to a better understanding between the American and the Russian peoples. Is a Communist bureaucrat at the wharf receiving a shipment of American raw materials and manufactured products on behalf of a monopolistic state trading corporation more likely to become our friend?

The driving forces of a totalitarian system are not so easily wooed, subdued, or contained. Pressure should be continued on the Soviet bloc economies not in the belief that this will cause them to reduce immediately their war production, but in the hope that in the long run the so-called revolution of rising expectations will evolve as completely in the U.S.S.R. and its satellites as it has done in the more underdeveloped, but freer, areas of the world.

Believing that eventually even in a totalitarian system some additional response must be granted to consumer demands, we can hope that by economic containment we will prevent outselves from aiding the war preparations of those who would aggress against us. Let us avoid the errors of the thirties when we shipped scrap metal which was later returned to us with compounded interest: a form of interest, I suggest, at which recent history has shown the Communists to be amazingly adept.

HUNGARIAN FREEDOM DAY

The SPEAKER. Under previous order of the House, the gentleman from Illinois [Mr. O'HARA] is recognized for 60 minutes.

Mr. O'HARA of Illinois. Mr. Speaker, I ask unanimous consent to revise and extend my remarks, and further that any Members who so desire may have 5 legislative days in which to extend their remarks in the RECORD following my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. O'HARA of Illinois. Mr. Speaker, March 15 is Hungarian Freedom Day. For 110 years, the Ides of March have been one of the chief national holidays of the Hungarian people.

On that date in 1848, Hungarian youth, inspired by the revolutionary spirit of the period and the patriotic leadership of Louis Kossuth staged a bloodless revolution, presented a 10-point demand for reforms, and circulated a stirring revolutionary poem which became the Marseillaise of Hungary. March 15 has through the years become the symbol of political reform and the ideals of liberty which the people of Hungary have kept alive in their hearts and minds. Ideals of liberty are still a motivating force among the Hungarian people whether they are in their homeland, or have sought refuge in other lands. It was this spirit which gave them the courage in October 1956 to rebel against Soviet oppression.

We honor ourselves in joining with freedom-loving Hungarians here and throughout the world in paying tribute to March 15, Hungarian Freedom Day.

In paying this tribute, it is proper that we inquire into the place Hungary has earned for herself in Europe and the free world, as well as bring ourselves up-to-date on the present position of Hungary and the lot of Hungarian refugees who have sought asylum in the free world.

HUNGARY'S PLACE IN HISTORY

I. HISTORICAL BACKGROUND

Though Hungary has ever been a small nation set in the middle of Europe and ranged about by various formidable nationalities, it has maintained throughout its history a distinctiveness which can be traced back a thousand years. Neither its origin nor its language bears any relationship to the countries round about it, a conglomerate group, most of them larger in size and usually more powerful politically, over which, however, it for some time claimed leadership. Tongue in cheek, one enthusiast says that, "the whole Hungarian nation claimed descent from the most brilliant barbarian conqueror, Attila the Hun."

To this day, Hungary's intensely proud claim to independence dates from the year 1001, when Pope Sylvester II sent the Holy Crown to St. Stephen. The King of the country was subject to the Pope in religious matters; but not in secular matters to the Emperor of the Holy Roman Empire. Even with the invasion of foreign princes and the extinction of the national dynasty at the beginning of the 14th century, those who succeeded to the rule of Hungary had to pledge that the country would be governed according to its own laws and independently of the laws or interests of other realms which might be under the same rule.

In addition to this basis for independent thinking, the Hungarians, from 1341 to 1382 became the center of a geographical and political triangle in Europe, which at one time touched upon three seas, the Baltic, the Adriatic, and the Black Sea. This Intermarium has been revived in our own century in the Polish political and economic concept promoted between World Wars I and II.

Dominating the history of Hungary for over a thousand years has been the nationalist thought and claim of Hungary as "the center of Europe" geographically. Hence there arose the psychological and political idea of leadership. Much of Hungary's achievement during the centuries has been inspired by this conception. Hungarians claim that their country was the center of "a system—the Hapsburg monarchy—from 1527 to 1918."

When, under the first of the Hapsburgs, Hungary became united with the Kingdom of Bohemia and the hereditary provinces of Austria, it had already been united with Poland, had earlier ties with Bohemia, and been a national dynasty with the greater realm of kings who ruled at once Croatia, Wallachia, Moldavia, and at one time also Bulgaria.

In a Europe which held in high esteem jurisprudence and the theory of positive law, a famous collection of Hungary's laws, known as the "Werboczy's collection," dates from the 16th century. The lord judge of the realm at the time of the Turkish invasion of 1526 had codified the liberties and privileges of Hungary in a form which became "the textbook of

the ruling classes and the framework of the national conscience."

This respect for the law and, still more important, the institution of Christianity, survived the Turkish invasion. Hungary's primary claim to a place in European history was as the "fortress of Christendom."

II. HUNGARIAN INDEPENDENCE IN THE 19TH CENTURY

(a) Kossuth and the Revolution of 1848 to 1849: It was to a Hungary aware of its tradition of ancient values, of historic championing of the individual, of independence, of traditional law, justice, and humanitarian concepts, and a Hungary at its height in art and letters that the colorful figure of Kossuth was born. His excellent letters at the time of the reform movement in Hungary in the middle 19th century developed into an organized parliamentary gazette. Despite efforts of the intrenched government at censorship, he continued to gain popular attention to such an extent that he and several colleagues were thrown into prison on charges of high treason. Indignation at his treatment was so widespread and forceful that the legislature itself refused to pass any government measures until the prisoners were released. Upon his release, Kossuth became a popular and irrepressible leader, continuing his agitation for a free Hungary. With the outbreak of revolution in March 1848, Metternich was driven from power. When, on March 3, 1848, Kossuth demanded parliamentary government for Hungary and constitutional government for the rest of Austria, he at once became the leader of the European revolution.

With the formation of the first responsible ministry in Austria, after the flight of Metternich to England, Kossuth became Minister of Finance. In this capacity he continued his efforts toward an independent Hungary, even to the coining of separate Hungarian coins. In the great patriotic movement of which he was "the soul and head" Kossuth by his devotion to the cause of the Magyars incurred the enmity of the other races in Hungary among whom were the Slavic peoples in the south. Because of the conflict thus precipitated, Austria was able to combat the new order of things in Hungary. The Ministry was dissolved.

After further development, however, Kossuth became head of the Committee of National Defense with dictatorial powers, and prosecuted with extraordinary energy the war both against Austria and against the forces from the south. After some early reverses the Hungarians won a series of brilliant victories, which were due in no small measure to Kossuth's able organization of forces.

(b) Declaration of independence by Hungarian Legislature, 1849: The culmination of Kossuth's efforts came with his persuasion of the Diet—legislature—to declare that the Hapsburg dynasty had forfeited the throne and to proclaim the independence of Hungary, April 14, 1849. The Hungarian Republic was established with Kossuth as Governor.

(c) Russia's part in the fall of the new Republic: Meanwhile Russia had gone to the aid of the Hapsburg dynasty. Kossuth had been disappointed in his hopes of intervention on the part of the Western Powers. Hungary now had to face the full force of Russia's overwhelming might added to that of Austria.

Fighting had continued, Hungarian forces being led by General Görgey. After weeks of decimating fighting, wearying marching, and racking disease, the Hungarians, greatly outnumbered by the united Russian and Austrian forces, were gradually driven to the wall. Finding that further fighting was hopeless, Görgey's army surrendered August 13, 1849. Though the general for this surrender was blamed and charged with treachery, the facts revealed that on the day of surrender his forces numbered 24,000 men with 140 cannons, while five armies with more than 200,000 men and 1,000 cannon were opposing him from all sides.

III. HUNGARIAN REVOLT OF OCTOBER 1956

(a) Background of events: In the national elections held in Hungary immediately after World War II, the Hungarian voters were divided among six political parties. Five of these won seats in Parliament. Four of the major parties formed a coalition; but Communist influence, having gradually asserted itself, had, by 1948, so far repressed all opposition that leaders of the non-Communist groups had all been silenced. Many had been arrested. Some had fled abroad. In 1949, Hungary officially became a people's democracy, with actual control in the hands of a Communist trained in Moscow, Mátayás Rakosi. Hungary soon closely resembled the pattern of the Soviet Union. Individual liberty and free speech ceased to exist. Arbitrary imprisonment became common. Secret police, with methods of terror, made frequent arrests, often followed by charges of attempts to overthrow the democratic regime, and leading ultimately to execution.

When, early in 1956, a relaxation of police rule was encouraged by the Communist Party of the U.S.S.R., the response among Hungarian people was immediate. Traditional independence in Hungary had asserted itself as early as 1955 among Hungarian authors and artists. The scope of protests against the dictatorial regime gradually widened and even became the basis of forum discussion, chiefly among young Communist intellectuals.

An announcement cn October 19, 1956, by the Ministry of Education that certain changes would be made as a result of Hungarian student requests precipitated demonstrations at first peaceful but which soon became far-reaching. On the same day, too, news of Poland's move toward greater independence of the U.S.S.R. was received enthusiastically by Hungary. Friendship between the two peoples had been traditional for centuries.

(b) Mass demonstrations, October 22, 1956: Student meetings preceded a planned, peaceful mass demonstration on October 22, 1956, and drew up demands embodying protesting views on national policy. A ban against the demonstration had been announced by the Ministry of Interior, but later withdrawn.

When the demonstration got underway, the people gathered together numbered between 200,000 and 300,000. Justly angered by an episode, the crowd, which had shown no sign of other than a peaceful dispersion, began freely to express resentment. The following day a similar crowd gathered to await the outcome of a delegation being sent to try to broadcast the student demands. Tear-gas bombs were thrown to disperse the crowd and a minute or two later members of the secret police opened fire, killing a number of people and wounding many.

An armed uprising resulted and developed into a 5-day battle in which Soviet troops with mechanized forces took part against the Hungarians. The Hungarian Army disintegrated from the beginning, certain of the units fighting on the side of the insurgents. When Soviet tanks fired on a group of unarmed demonstrators, killing many, the whole nation was aroused. A cease-fire was ordered on October 28. Estimates of the number of dead and wounded vary considerably, as the United Nations Special Committee on the Problem of Hungary state. The minimum number killed, according to this source, is estimated at some 1,800 to 2,000 in Budapest and 2,500 to 3,000 in the whole country, and 11,000 to 13,000 wounded.

Mr. Nehru's figures on this subject, quoted also by this Committee, but thought to be too high, were given thus:

Mr. Nehru said that from such information as he had received, "it would appear that about 25,000 Hungarians and 7,000 Russians died in the fighting."

IV. RESOLUTIONS OF THE UNITED NATIONS GENERAL ASSEMBLY ON THE SITUATION IN HUNGARY

A special session—the Second Emergency Special Session of the United Nations General Assembly—was held from November 4 through November 10, 1956, to discuss the situation in Hungary. Five resolutions were passed: Nos. 1004(ES–II)—1008(ES–II), inclusive. The substance of them is discussed below.

(a) Resolution 1004(ES–II): The General Assembly of the United Nations on November 4, 1956, adopted, without reference to a committee, a resolution—1004(ES–II)—condemning the use of Soviet military forces to suppress the efforts of the Hungarian people to assert their rights; noting the avowed policy of the U.S.S.R. of nonintervention in the internal affairs of other States as stated in the declaration of October 30, 1956; noting the grave loss of life and widespread bloodshed which resulted from the intervention of the Soviet military forces in Hungary; and calling upon the U.S.S.R. to withdraw all of its military forces from Hungary. This resolution also requests the Secretary General to send observers to Hungary to investigate the situation, report on it, and suggest methods of terminating it, in accordance with the principles of the U.N. Charter. It calls upon all U.N. members to cooperate with these

observers, and also to cooperate with the Secretary General in supplying the needs of the Hungarian people which have arisen out of the satuation.

(b) Resolution 1005(ES–II): A few days later, on the 9th of November, the General Assembly passed another resolution—1005(ES–II—calling for free elections in Hungary, under U.N. auspices, as soon as order has been restored, to determine the form of government which the people wish to establish for themselves in their own country.

(c) Resolutions 1006(ES–II) and 1007 (ES–II): On the same day—November 9, 1956—the General Assembly passed two other resolutions regarding Hungary. One of these calls for full cooperation on the part of both Hungary and the U.S.S.R. in efforts of the United Nations, the International Red Cross, and other such organizations, to provide food, medical supplies, and humanitarian assistance to the people of Hungary. It also considers the plight of large numbers of refugees from Hungary; and requests the Secretary General to consult with appropriate agencies—including the United Nations High Commissioner for Refugees—to arrange for emergency assistance for them; at the same time urging member States to make special contributions for them.

The other—resolution 1007(ES–II)—of November 9, 1956, resolves to undertake on a large scale immediate aid of the same sort for the affected areas, under the international cooperation provision of the U.N. Charter, article 1, paragraph 3.

(d) Resolution 1008(ES–II): The following day the General Assembly decided—by resolution 1008(ES–II) of November 10, 1956—to place the Hungarian question on the provisional agenda of its next session, the 11th, as a matter of priority.

(e) Resolutions 1127(XI) to 1131(XI): At the 11th session of the General Assembly, which met from November 12, 1956, to March 8, 1957, six resolutions were passed concerning the situation in Hungary. Concerned with the urgency of the situation, they called upon the Soviet Union to suspend immediately deportation measures against Hungarian citizens and to return to their homes those who had been deported—No. 1127(XI); called upon the incumbent Government of Hungary to allow the Secretary-General to enter its territory and circulate freely—1128(XI); requested immediate cooperation from other Governments with the Secretary-General in his efforts to better the situation of the Hungarian refugees—1129(XI); reiterated to the U.S.S.R. the appeal to conform to earlier resolutions, to renounce intervention, and allow the U.N. observers to go into Hungary—1130(XI); and, again reiterating the same appeal, asked that the U.S.S.R. remove its armed forces from the areas where the observers were to be present; and allow the reestablishment of political independence in Hungary.

(f) Resolution 1132(XI): On January 10, 1957, the General Assembly of the U.N. established, by resolution 1132(XI), a special five-nation, factfinding committee to gather information on the Hungarian revolt and its suppression.

(g) Resolution 1039(XI): By a resolution of January 23, 1957, the General Assembly, commenting upon the Report of the U.N. High Commissioners for Refugees, made an urgent plea for funds to determine and relieve the needs, both material and financial, of the Hungarian refugees.

(h) Resolution 1133(XII): In June 1959, the Special Committee reported its findings. On September 14, 1957, the General Assembly, after considering the report of the Special Committee, approved a resolution—1133(XII)—which endorsed the committee's work, condemned action taken by the Soviet Union in depriving Hungary of its liberty and political independence, and requested Prince Wan Waithayakon, as special representative of the Assembly, to do what he could to effect compliance with various Assembly decisions in the case.

(i) Resolution 1166(XII)—All refugees under the U.N.: A resolution of November 26, 1957—1166 (xii)—of the General Assembly dealing with the international refugee program under the United Nations and making new arrangements for it, does not mention the Hungarian or any other group specifically, but does take into consideration "that new refugee situations requiring international assistance have arisen which augment the problem."

(j) Further U.N. activities concerning Hungary: Following an announcement on June 16, 1958, from the Hungarian Ministry of Justice that Imre Nagy and Pál Maléter and two of their associates had been executed, the Special Committee met as a matter of urgency and issued on June 21 a communique deploring these tragic events.

In another resolution reported in January 1959, the General Assembly again denounced the execution of the Hungarian patriots and condemned the continued defiance of the resolutions of the General Assembly.

V. THE PRESENT SITUATION IN HUNGARY AND THE HUNGARIAN REFUGEES

(a) The United Nations and Hungary: The resolutions of the United Nations General Assembly on the situation in Hungary were disregarded, i.e.—"held in contempt." The representatives of other countries there deplore continued repression in Hungary and, in horror, the executions of Hungarian patriots, "whose only crime, they considered, was to try to free their country from foreign control." The Special Committee accordingly held emergency meetings in 1958, and recommended that the Assembly "consider what further action might appropriately be taken by the United Nations" in view of the findings of the Committee. A special report of that Committee, of July 14, 1958, noted that, in spite of Hungarian Government pledges of immunity to leaders of the uprising, there was, in addition to the executions of Pál Maléter and Imre Nagy, a list of 30 death sentences said to have been carried out in the year between June 1957 and June 1958. It also named a hundred persons sentenced to prison terms.

(b) The refugees: As for the Hungarian refugees, in the course of the year 1956 and 1957, some 169,700 of them were transported from Austria and Yugoslavia to countries of second asylum or other countries of resettlement. Other refugees numbering 71,613 had emigrated under the auspices of the Intergovernmental Committee for European Migration.

Considerable attention is being paid to the reunion of families, some members of whom have in the past been rejected on medical grounds. The United States in 1957 made provision to revise its Immigration Act with this problem in mind.

In addition to the refugees settled under the schemes mentioned above, there have been others who have resettled in various European countries under other special arrangements. In some instances, this resettlement was done with aid from the United Nations Refugee Emergency Fund or the U.S. escapee program; in others it was done independently by the receiving Governments.

Mr. DULSKI. Mr. Speaker, for centuries Hungarians had been under Austrian rule, and during that long period they managed to retain their distinct identity and their burning desire for national freedom. In 1848 when revolutionary waves swept over Europe, and the news of disturbances in Paris and Vienna reached them, they staged a bloodless demonstration in Budapest, presented their just grievances to the government and demanded radical reforms, including freedom. That was done on March 15, 111 years ago. The Government met their demands, and from then on that day is celebrated as Hungarian Freedom Day, and all Hungarians everywhere proudly celebrate it as a national holiday. I gladly join all Americans of Hungarian descent on this anniversary celebration, and naturally wish Hungarians in their homeland similar success in their fight against Communist totalitarian tyranny.

Mr. BOLAND. Mr. Speaker, Hungarians were unhappy during the 18th and 19th centuries under Austrian rule, and they were most unhappy during the first half of the 19th century when the Austrian Government was run by the iron-fisted Metternich. This arch-conservative and foe of freedom for some 50 years of his ascendency did everything in his power to hold down all subject nationalities and stifle all national aspirations among them. But this was not easy to do in the case of the Hungarian people. They were restive; they clamored for reforms, and demanded freedom and independence. They had their chance in the revolutions of 1848.

Hungarians there prepared to stage a revolution of their own, if necessary, for the attainment of their goal. But as the forces of freedom and liberty were gathering momentum, and those of despotism and autocracy were weakening, revolution proved to be unnecessary in Hungary. The startling news from Paris and Vienna reached Hungary. Then a band of youthful idealists in Budapest held a bloodless demonstration on March 15. They presented their grievances to the government, demanding participation in

the government and freedom. Fortunately for the government, as well as for all concerned, these demands were met; freedom was granted, and a new day dawned for the Hungarians on March 15. Since then that day has become a national holiday. I am indeed glad to join in the anniversary celebration of that significant and symbolic event, the Hungarian Freedom Day.

Mr. WALLHAUSER. Mr. Speaker, yesterday was the 111th anniversary of Hungarian Freedom Day. By all that is morally and legally right the anniversary of March 15, 1848, should have been a day of great rejoicing. Instead, and because of the tyrants who rule the Kremlin, it was a day of sad contemplation.

We of the free world observed Hungarian Freedom Day solemnly, while those captive people behind the Iron Curtain looked upon it sadly and yet with great hope and yearning for eventual freedom and independence.

It was in 1848 under the leadership of the famed and great Louis Kossuth that the patriots of Hungary boldly bid for freedom after being tied to Austria for centuries. It brought freedom and national autonomy. There was great rejoicing as there was in many years following even though this nation of freedom-loving people experienced many hard and trying days.

Then in 1945, Hungary found its freedom crushed completely through occupation by war-minded Soviet Russia. Yet, the cruel yoke of the Communists could not crush the desires of the Hungarian people for a free and independent nation. It burned steadily in their hearts and in their minds. In the tragic fall of 1956 the Hungarian people again rebelled against foreign rule.

Once again they demanded freedom and independence and fought courageously for it. This time from the tyrants of the Kremlin. Unfortunately, the freedom day victory of 1848 was not repeated. Soviet tanks and artillery proved too much for these inspired and dedicated people.

However, it was a sad event that freedom-loving people of the world never should forget. The shocking end of the Hungarian uprising of 1956 cannot and must not be forgotten. Although physically and ruthlessly crushed by Russia's hideous disregard for the fundamental aspirations and rights of mankind, the patriots of Hungary gave enduring proof that their yearning for freedom remains unquenchable.

Today, as we commemorate an earlier era of Hungarian freedom, we honor all Hungarians for their gallant and tenacious longing for liberty and pray together that the day soon will come when the light of freedom and independence again will be burning brightly in their beloved land.

Mr. McDOWELL. Mr. Speaker, in commemoration of yesterday's celebration of that day in the 19th century when Hungary proclaimed its independence from Hapsburg rule, I, under unanimous consent, insert in the CONGRESSIONAL RECORD the following observations.

One hundred and ten years ago, the Hungarian Parliament dethroned the Hapsburgs, issued a declaration of independence and elected Kossuth, president. As we pause to commemorate that declaration of freedom, we find our feelings mixed; it is difficult to rejoice when, in Hungary today, there can be no rejoicing. Sadly enough, the short lived period of Hungarian independence which we commemorate today is the only real chance for freedom that the Hungarians have had in the last five centuries. It almost seems that the fluctuating factors underlying the world's history have worked deliberately against the establishment of that freedom which Hungarian peoples have so long desired.

The Magyars, as the Hungarians call themselves, settled in the middle Danube Basin at the end of the 9th century. The holy crown which to this day represents Hungarian sovereignty and tradition was obtained from Pope Sylvester II by King St. Stephen in the year 1000. This crown was not only a symbol of "all things Hungarian," but also represented the highly developed level of civilized western culture which Hungary had attained.

In spite of the Hungarian people's desire for continued peaceful independence, there has been little time since 1453 when Hungary has been free from the sound of clashing arms. This stems from the fact that every great continental power with imperialistic tendencies has attempted, in the early stages of its imperialism to dominate the Danube Valley—in which Hungary is located. The Turks of the Ottoman Empire, after fighting the Hungarians for nearly 100 years, defeated the Magyar army in 1526 and occupied two-thirds of Hungarian territory while the Hapsburg dynasty ruled the rest. After the Turks were defeated in 1683, the Hapsburgs extended their power over all Hungary. When in 1849 the Hungarian peoples proclaimed themselves independent, the Austrian Emperor called upon Czar Nicholas to help stifle the insurrection. The Russian efficiency in this type of work has historical roots, and they were successful in defeating Hungary. The odds against her were just too great.

It was within this forced relationship with the Austrian Empire that Hungary entered the First World War, but revolutionary movements broke out in Hungary during those war years. The Communist regime of Bela Kun resulted from the seizure of power by one of these rebel groups which developed leadership restricted to a circle of Lenin's terrorist henchmen. Yet, even though the Communists controlled the Hungarian Government, they could not dominate the Hungarian people, for these people fought in the only way they could—by effective, passive resistance.

After much upheaval, a freely elected national assembly in 1920 repealed the measures of the Communist regime, reverted to the monarchial constitution and established Admiral Horthy as regent. But, the Treaty of Trianon had been imposed upon Hungary. This was based upon the Allies' belief that a defeated belligerent nation should pay for the war (a philosophy stemming from a lack of understanding of the true causes of war). We are thankful that the Western Powers abandoned such a philosophy after World War II for we see the results of the difficulties in which that type of approach had placed Hungary in 1920. The Treaty of Trianon stripped that country of much of her territory, and created a general air of discontent. Essentially it had sown the seeds of the Second World War.

In spite of this, order was restored in Hungary between the wars. Under the premiership of Stephen Bethen, Hungary joined the League of Nations, signed the Kellogg-Briand Pact and concluded many treaties of conciliation and arbitration. But all was not well—the Russians loomed as an ominous shadow on one boundary and the Germans, after the Anschluss of Austria, touched Hungary not only geographically but economically. Nazi political pressure was great—and the final blow to any further independent action on Hungary's part was the Molotov-Ribbentrop agreement. This established such a friendly relationship between Hungary's neighbors, that she could move in no direction.

Despite German domination, the bulk of the Magyars openly defied Hitler. As the war progressed, Hungary became a haven for increasing numbers of refugees, especially from Poland; but the Nazis began tightening their control and forcing devastation upon the country. As the Nazis left, the Red army came, bringing with it 160 Communists—Hungarian in origin, but all Russian citizens. These men, known as the Muscovites, formed the Hungarian Communist Party from the remnants of the Nazi Party. The outcome was a form of government detested violently by the Hungarian peoples. They demonstrated their distaste by a revolution which shook world communism to its very foundations—revolution so fervent that the U.S.S.R. resorted to outright slaughter to temporarily control the fire of freedom which it demonstrated.

As we look upon Hungary in its historical perspective; as we see it suffering today, we may come close to comprehending the true meaning of the cost of freedom. There is no nation, no group of people, which has paid more dearly for a chance to be free.

Mr. GALLAGHER. Mr. Speaker, Hungarian Freedom Day commemorates a political event which fills many pages in the book of freedom. No one devoted to liberty and the dignity of man can forget the day 111 years ago when the Hungarian people, under the leadership of Louis Kossuth, recaptured from the Hapsburg dynasty many of their inalienable rights.

Had the Hungarian nation's struggle for freedom ended on March 15, 1848, Hungarian Freedom Day would still be a milestone in mankind's march toward liberty. But the Hungarian people did not long enjoy the victory of 1848. Nor was another victory of the Hungarian nation, the independence it achieved after World War I, its final release from the chains of oppression. Twenty-five years later, the boots of the Red army trampled on and suppressed Hungary's independence.

Thus, Hungarian Freedom Day, 1959, does much more than commemorate the history of a glorious nation. It also

serves notice on the leaders and quislings of communism that the Hungarian people have never in the past and will never in the future surrender to alien governments and alien creeds.

Hungarian Freedom Day is a living symbol for all Hungarian people, wherever they may be. It is a living symbol for all peoples whose backs are bent under the yoke of communism.

As long as there is a Hungarian Freedom Day, every foe of liberty must fear the date, March 15. The Ides of March brought the death of Caesar. Just as surely does the symbol of another March 15, Hungarian Freedom Day, portend the death of Caesarism.

THE POTOMAC RIVER

Mr. NATCHER. Mr. Speaker, I ask unanimous consent that the gentleman from Michigan [Mr. DINGELL] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. DINGELL. Mr. Speaker, the Nation's Capital is reputedly an extraordinarily beautiful city. This reputation is justly deserved but was not cheaply obtained. Millions upon millions of dollars have been expended for monuments, buildings, broad avenues, and lovely parks. The Lincoln Memorial, Jefferson Memorial, Arlington Cemetery grounds, and many Government buildings all contribute to the beauty of the area. Not only are parkways, bridges and statuary all carefully reviewed by planning commissions, fine arts commissions, and other groups to insure their esthetic suitability to the area, but buildings and other architectural units are also subject to their approval prior to construction.

But what of the historic river that flows here—George Washington's river, along which much of the Capital's attractions are situated? This stream has been termed "a national disgrace" because of the extreme pollution of its waters in the Washington, D.C., metropolitan area. Beautiful parkways and sweeping green lawns border both sides of the river, but anyone picnicking here or driving by on a still summer day would be nauseated by the smell of decomposing sewage and the sight of repulsive floating materials in the stream.

Although there is little industry in this area, sewage and street washings from five separate communities are discharged to the Potomac in large quantities, often with no prior treatment. On the basis of many reliable observations and reports, a Public Health Service official concluded that raw sewage discharges have caused objectionable floating solids, sludge deposits, gas bubbles rising from those sludge deposits, and obvious and objectionable odors along the Washington waterfront from the mouth of Rock Creek down to the Lincoln Memorial and pretty much throughout the entire channel.

Under usual conditions we could expect that this material would be washed downstream promptly so that the National Capital area would be spared the effects of its own sewage. However, this stretch of the river is subject to tidal action that carries sewage upstream as well as downstream. The tidal action is so marked that the Potomac at Washington is almost like a lagoon or a lake during periods of low flow, rather than a normal stream flowing down the slope of the stream bed. This means that a great deal of the pollution from the area is more or less held along the waterfront of the area until it is reduced by natural purification.

This constitutes a health hazard not only for local citizens, but for visitors from all parts of the country and the world. The Joint Committee on Washing Metropolitan Problems recently reported upon the Potomac's condition as a source of danger for all water users, an impedance to the building of new recreational facilities, and a continuing national embarrassment:

The natural features of the Potomac River in the Washington metropolitan area are ideal for various types of water sports. Many persons, in defiance or ignorance of the health hazards, indulge in recreation which brings them into close contact with the polluted waters of this stretch of the river. For years, the National Capital Parks has had plans to construct a number of recreational facilities along the Potomac in and near Washington. A principal factor which has caused these plans to be held in abeyance has been the polluted condition of the river. The National Parks has now tired of waiting for the required antipollution works. In the belief that construction of recreational facilities will increase public demand for, and thereby hasten, pollution abatement. The National Capital Parks, this summer, requested, and on June 4 the Congress approved, an appropriation of $290,000 to build a water sports center on the Potomac at the mouth of Rock Creek. Construction will begin shortly and plans call for the center to be in operation by July 1959. The facility will provide capacity for approximately 40 racing shells and also space for 150 canoes, a large portion of which will be for hire to the public. The center will serve as headquarters for rowing teams of colleges and high schools in the area and all over the Nation. The center will also play host to international racing events. Teams from Russia and South America are planning to race at the center this coming summer.

An example of what users of the sports center may look forward to is shown in * * * photographs taken September 28, 1958, during the President's Cup regatta off Hains Point. This annual regatta continues to brave the contamination in the Potomac. Fifteen to twenty boats capsized during the days' sailing and produced scenes—similar to those shown. The young lady in figure 3 who seems to be swallowing more than her pride upon being hauled out of the water is probably unaware that the routine water sample taken by the District of Columbia Department of Sanitary Engineering on October 1 showed that there were 23,000 coliform organisms, bacteria of sewage origin, present per 100 milliliters of the water. This means that approximately 3,000 sewage bacteria would have accompanied each gulp of the water, assuming that the water quality on September 28 was as "good" as that of October 1. It is frequently far worse. Those yachtsmen skilled or fortunate enough to avoid a dunking are nonetheless exposed to sewage bacteria in the spray and on the oars and wet lines. While there is little scientific data to indicate how many pathogenic bacteria of various types constitute a dose sufficient to produce disease in persons with varying degrees of resistance, it is obvious that a sizable inoculum could be ingested. * * *

From a public-health point of view, canoeing and rowing in these waters should be discouraged. From a public-relations point of view, inviting foreign teams to race in these polluted waters seems equally undesirable.

Although the Washington Suburban Sanitary Commission, which treats the wastes originating in the District of Columbia and Maryland, is improving its established facilities, little action has taken place to separate the combined storm and sanitary sewers in the District, the principal source of the continuing pollution problem. In addition, although Virginia vaguely promised to keep pace with sewage treatment improvements on the other side of the river, it continues to discharge significant quantities of wastes to the river.

Must we erect a fence along this most historic of our rivers marked with large signs "Visitor, go home"?

MERAMEC RIVER BASIN, MO.

Mr. NATCHER. Mr. Speaker, I ask unanimous consent that the gentleman from Missouri [Mr. CARNAHAN] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. CARNAHAN. Mr. Speaker, under permission to extend my remarks, I include the following Resolution 51 adopted by the House of Representatives, State of Missouri:

HOUSE RESOLUTION 51

Resolution memorializing Congress to initiate plans for the development of the Meramec River Basin

Whereas plans for the development of the Meramec River Basin were submitted to Congress some time ago; and

Whereas these plans are urgently needed (1) to control almost yearly floods, (2) to increase suitable location for industries, (3) to reduce loss of crops, livestock, and dwellings, (4) to eliminate health hazards, and (5) to provide a recreational area within 30 miles of St. Louis: Now, therefore, be it

Resolved by the House of Representatives of the State of Missouri, That the Congress of the United States be memorialized to initiate the plans for the development of the Meramec River Basin; and be it further

Resolved, That Missouri Congressmen be urged to impel the activation of these plans; and be it further

Resolved, That a duly attested copy of this memorial be immediately transmitted to the Secretary of the Senate of the United States, to the Clerk of the House of Representatives of the United States, and to each Member of Congress from the State of Missouri.

IMPORTATION OF CRUDE OIL AND RESIDUAL FUEL OIL

The SPEAKER. Under previous order of the House, the gentleman from Massachusetts [Mr. CONTE] is recognized for 15 minutes.

Mr. CONTE. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. CONTE. Mr. Speaker, I wish to address myself this afternoon to the far-reaching ramifications of the President's ruling last week imposing drastic curbs on the importation of crude oil and residual fuel oils.

The President acted under section 2 of the Trade Agreements Extension Act of 1954, as amended, which authorizes him to limit importation of any product when he determines that it is being imported in such quantities as to threaten our national security.

Mr. Speaker, with all due respect for the executive branch, I wish to question the wisdom of this decision. I submit that these limitations on the importation of residual fuel oils and crude oil will not only fail to safeguard our national security; they will also work to the detriment of our overall economic health and our position in the free world.

I submit further that these restrictions on oil importations can have disastrous effects in my home State of Massachusetts, in New England, and in the northeastern United States as a whole. They are a blow to the consumer, both the industrialist and the homeowner.

The Presidential proclamation, Mr. Speaker, deals with several categories of oil importation. We in New England are most concerned with the provision which rolls back the importation of residual fuel oils to 1957 levels. Plainly, our need for imported residual oils has risen steadily for the last decade. By way of clarification, it may be pointed out that such fuel is the residue or distillate remaining when crude oil has been processed into various forms of petroleum. Residual oil is an economical and efficient fuel for heating large buildings, for electrical generating plants, for many industrial and other miscellaneous uses.

The Presidential proclamation also restricts imports of crude oil. These imports, I understand, will drop 15 to 20 percent as a result of the ruling. Also restricted are imports on a variety of other petroleum products, in some instances to a sizable degree.

I contend, Mr. Speaker, that it was not necessary to impose mandatory quotas on these oil imports for national security reasons. I find it difficult to believe that the domestic oil industry is in such weak condition that it needs such additional subsidies to expand and prosper and be ready to produce at record levels in the event of a national emergency.

For years we have been subsidizing this industry through the 27½ percent oil depletion allowance, which, in my opinion, is the biggest and least justifiable loophole in our tax structure. This generous preferential tax treatment creates tremendous profits for the oilmen of the Southwest at the expense of every American. It is but one of a number of generous internal revenue provisions which this industry enjoys. I would suggest that the addition of protectionist tariff barriers amounts to a new windfall for this most generously subsidized industry.

Mr. Speaker, what are the facts about the oil industry? The facts are that this 100-year-old industry has been expanding phenomenally since the close of World War II, in spite of increased demand for imports. Up to 1958, each year's oil production reached record levels. The OCDM report recommending the imposition of mandatory import quotas proves this point statistically. The report also shows a steady rise in the number of wells drilled, through 1956. True, the figures indicate a slight drop in the number of wells drilled, starting in 1957, and a slight drop in the number of barrels produced, starting in 1958. We are asked to conclude that the entire oil industry is therefore in peril, and that we need to restrict imports to protect our oil industry and safeguard our national security.

What about the homeowner and the motorist, Mr. Speaker, and the manufacturer battling soaring production costs? What about inflation and national security?

What of our national security in terms of Western Hemisphere good neighbor relations? Is the erection of import barriers the proper way to advance our international relations?

I am no expert on the economics of the oil industry. But I would like to suggest that the drop in oil production during the 1958 recession year was not primarily due to foreign competition. There were other developments peculiar to the oil industry. A warm winter, as we all know, means less demand for fuel. Further, I suggest that our domestic oil production dropped in 1958 for the same reason that our output of automobiles, of radios and television sets, of boats and chairs and lamps and pencils and soda pop dropped—for the very simple reason that we found ourselves in a recession.

The rest of the economy was adversely affected as the oil industry, perhaps more so. But no special tariff or quota privileges were granted to other industries. Even so, the Congress last year approved the extension of the Trade Agreements Act for 4 years.

Yet now, Mr. Speaker, as the Nation's economy proceeds on an upturn, the oil industry is suddenly in need of special protection in the name of national security. Evidently we are all for trade among the nations of the free world except for imports for the things we produce. What sort of foreign economic policy is this?

As an American, and as a New Englander, I object.

I object as an American because the national security argument is specious. Oil production continues at high levels. The industry already enjoys special tax privileges, in capital gains, intangible drilling allowances and depletion. And the oil industry actually limits its own production in the name of conservation. No one has convincingly shown that our oil industry is unable to compete effectively with foreign producers if it really wishes to do so. Such evidence may exist, but I have not seen it. I do not find it in the proclamation of the President, or in the report of the OCDM to him on this problem, or in the report of his Special Committee on Oil. Nor have I heard it here on the floor, as certain Members have argued for mandatory quotas on oil imports. In fact, the whole purpose of the new order would seem to be to establish a floor for oil prices.

Furthermore, I feel that our real national security may well be served best if we do not continue to push our oil production to ever greater levels. Oil is a wasting asset. We can deplete our reserves. If we ever had a national emergency of the most drastic possible nature—so that we were cut off from all foreign sources of oil—then we would want our own reserves as undepleted as possible. On the other hand, if we face a less serious national emergency, then we will still be able to draw on other Western Hemisphere oil producing countries to supply our strategic needs. I can imagine a multitude of possible national emergencies when we would want to get oil from many different spots on the globe, in order to supply our own domestic needs and also our military requirements at various points in the world. It is difficult to foresee a national emergency resulting from the continued marketing of Canadian and Venezuelan oil in the United States.

This brings me to the matter of foreign sources. A relatively small portion is imported from the Middle East. The great bulk comes from Canada and Venezuela, powers which are near to us and friendly to us. How is the national security of the United States jeopardized if we in Massachusetts buy from Venezuela or Canada, instead of being dependent primarily on a handful of domestic suppliers?

And if we are really concerned with national security, what are we to say of the effect these import quotas will have on our relations with Canada and Venezuela? These nations are our good friends of long standing—but we all know of strained relations with Canada, and none of us will soon forget the unhappy experience of the Vice President in Venezuela on his tour last year. A nation can only be as secure as its friends abroad are good and true friends. I can think of no worse move for our national security than steps which will hurt and offend both Venezuela and Canada.

As individuals, many Americans are investors in enterprises in other Western Hemisphere nations. Are we not jeopardizing these savings and our goal of expanding living standards and markets in the Americas by cutting back their dollar exports?

I might also add that these countries are big customers in the United States. Venezuela buys more than a billion dollars worth of goods from us every year. We all know what a large portion of our export market is filled by Canada. If the oil import order curtails American sales to these two countries, as it undoubtedly will, then American workers will suffer. This is the inevitable result of such shortsighted policies.

Mr. Speaker, I submit that the national security argument simply fails to

hold water in this case. Neither the Presidential proclamation, nor the OCDM findings, nor any other reports issued by the White House answer the two crucial questions. First, why does our national security depend on a larger share of the market for American oil producers? Secondly, is foreign competition the real reason for the drop in American oil production? Both points must be proven to establish the case. As far as I know, neither case has been proven.

I submit that we are entitled to an explanation which amounts to something more than a general conclusion hidden under the pious hoopskirt of national security. We also are entitled to assurances that the U.S. consumer will not face a new round of spiralling price increases.

If we cannot be given a convincing national security explanation, Mr. Speaker, then we may be forced to ask ourselves a most unpleasant question. We may have to ask ourselves if this situation might have been provoked not by legitimate national security considerations, but by the power pressure of the domestic oil producers and their Washington operatives. We may be forced to ask if this policy is really designed for the military security of the many, or whether it is designed for the millionaire security of a few whose influence in the Capital is out of proportion to their numbers.

Mr. Speaker, I am speaking today not only as an American who is profoundly concerned with this situation, but as a New Englander. I am convinced that this latest move is another blow to the consumers of my region. And I would warn colleagues from other consumer regions that they, too, will feel the harsh impact of this barrier to foreign commerce.

For decades New England has been suffering as a result of various national policies. Federal aid to industrialize certain Southern areas has made possible the raiding of industries in the Northeast. Thanks to Uncle Sam's beneficence, the raiders can offer cheap power, plants built with fast tax windfalls as well as lower wage standards. Look what has happened to our soft goods industries.

Significantly, Mr. Speaker, the textile manufacturers have not fared as well as the oil producers in protection from foreign import competition. Importation of cheap textiles from Japan and other countries threatens the livelihood of many Americans. The complaints of the heavy electric equipment producers, who are being underbid by millions of dollars by foreign firms, is another case in point. Why is national security a reason for taking care of oil, but not the other industries?

Mr. Speaker, our national tariff policy has had a deleterious effect on New England's economic health. I am not undertaking to question that policy today. But I will say this—you cannot expect New England to submit to discriminatory tariff treatment. You cannot expect her to survive economically when she finds her own products outpriced by foreign imports, only to discover that the tariff policy in regard to fuel and raw material imports is forcing her operating costs upward with further pressures on profit margins.

Residual fuel is absolutely vital to New England's economy. New England imports more than 60 million barrels of residual fuel oil each year. She uses it for her industries, for heating, for electrical power generation and oil refining. Yet the American oil producers have found that their brands of oil are of such high quality that other products, more profitable than residual oil, may be processed out of crude oil. As a result, American production of residual oil has dropped sharply. At the same time, New England has naturally increased her residual oil imports from abroad, particularly from Venezuela.

But now we are threatened with a barren future. Imports are to be cut back, even while demand grows. The oil-producing States will be able to force up the price on residual oil, with no foreign competition. The free market which we have enjoyed, in the tradition of American enterprise, is now a sheltered market for the producer. The consumer is defenseless.

The Presidential proclamation instructs the Director of OCDM to inform the President if oil prices rise as a result of the new import quotas. Of course, the administration is anxious to prevent any price increases. But, Mr. Speaker, the simplest law of economics tells us that when demand increases—or even holds steady—and the supply decreases, prices will rise. It has always happened that way, and always will. Residual oil, as demand increases, will become scarcer and scarcer. The result will be higher prices on residual oil. We will be given a thousand and one explanations to justify them. But the real cause will be the subsidy in the form of import quotas.

Because of this serious economic picture for New England, I feel compelled to make this solemn warning today. If national economic policy continues to work to the disadvantage of New England in almost every instance, there may be the most serious consequences to pay.

Our first responsibility as lawmakers is to the consumer and the taxpayer. This is not a partisan issue. All of us in New England, Democrats and Republicans alike, are profoundly concerned. We are not asking for special treatment or privileges. All we ask is equitable treatment. Otherwise we face the alarming prospect of becoming the Nation's No. 1 economic problem.

Statement in regard to the plan for direct Government control of petroleum imports into our country, by William Naden, president of Esso Standard Oil Co.:

"We believe a serious mistake has been made in bringing imports of heavy fuel oil under mandatory Government control. Cutting back imports of heavy fuel oil to the 1957 level will leave many consumers with no choice except to curtail activities or to turn to higher-cost sources for heat and power.

"Heavy fuel oil is used to heat apartments, schools and other large buildings and as a source of power by countless large and small factories and electric generating stations. Because of the cost factors involved, oil refineries in our country convert the great bulk of the crude oil they process into gasoline and other light products and historically not nearly enough heavy fuel oil has been made by domestic refineries to satisfy the demand of domestic consumers.

"Supplies of heavy fuel oil are available, however, outside the country, and these have been imported into the United States for decades to meet the need for this fuel, particularly in the heavily industrialized east coast area and New England. Thus imports have served simply to make up the difference between domestic supplies and consumers' demands.

"As for crude oil, we regret that failure of the voluntary program made it necessary for the Government to impose mandatory controls on imports. While the method for allocation of the total quota of crude imports has not been announced, there are reports of an allocation method which in our opinion would be grossly inequitable. It is to be hoped this is not the case and that the allocation method finally announced will be fair to all importers and not discriminatory."

[From the Berkshire (Mass.) Eagle, Mar. 12, 1959]

MAKING A FAKERY OUT OF NATIONAL SECURITY

One bad goof calls for another—that seems to be the reasoning behind the administration's decision to lower the boom on imports of foreign oil.

Vexed by the failure of voluntary reductions in crude oil imports, the Government is compounding its error by making the curbs mandatory. And it is rubbing kerosene into the wound by lowering the import quotas below the levels of the past several years.

The Government's justification for the move is embodied in the catchall phrase of national security. The argument, a familiar one by now, is that imports of cheap oil discourage domestic producers. To keep them happy and operating at full tilt, therefore, it is necessary to protect their market, shield them from tough competition. Only then will the domestic oil industry be vigorous enough to meet any national emergencies that may arise.

There are several flaws in this dubious thesis, but on the way to recounting them it should be remarked that the whole idea of import quotas was politically inspired—a concession to the coal industry and parts of the oil industry when Congress extended the Reciprocal Trade Agreements Act in 1955. It is, of course, inimical to the reciprocal-trade philosophy that is supposed to govern our ocean commerce.

For this reason it may well call forth reprisals from the oil-producing countries thus discriminated against. At the least, it will weaken American markets in those lands by shutting off their chief source of the U.S. dollar.

From the regional standpoint, the curbs probably will result in higher oil prices in New England, as oil distributors are forced to rely on the more expensive domestic crude oil and petroleum products. Congressman SILVIO O. CONTE, a liberal Republican himself, put this point forthrightly a few days ago when he warned the administration that the move could have disastrous effects on the struggling New England economy.

Nor is Representative CONTE alone among Republicans arrayed against the curbs. Although the coal industry and the domestic independents in the oil industry support them, the big international oil companies and a good many old-fashioned conservatives see them as unwarranted interference with business. Said a spokesman for the Socony Mobil Oil Co., which has wells all over the world: "We don't see anything in the oil import situation which justifies

putting the industry under such an involved set of extensive Federal controls."

The final rejoinder, though—the one that strikes to the heart of the national security mumbo-jumbo—is the self-evident truth that using up U.S. oil reserves is not the way to strengthen national defense. If new methods must be devised to encourage exploration for oil in this country, well and good; let us by all means adopt them. But let us not simultaneously deplete our own resources and undermine our foreign policy, and then claim we are promoting the national security.

Mr. LANE. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Massachusetts.

Mr. LANE. Mr. Speaker, I want to congratulate the gentleman from Massachusetts for bringing this subject matter to the attention of the Congress today. It is one that has troubled us for a number of years. We have been able to get along fairly well until this recent directive of the administration. It has saddened us in spite of the fact we are having these difficulties in New England. There is no doubt in my mind and in the mind of anyone who is interested in the subject matter that this will, of course, raise havoc with the industries in our section of the country, the Northeast section.

We have had unemployment trouble and unemployment problems for a long period of time, and there is no doubt in my mind that this is going to add to the unemployment which is now prevalent in New England. The gentleman from Massachusetts in bringing this to our attention and outlining the seriousness of this matter, of course, is to be congratulated for his efforts. I know that this subject matter has been close to his heart since his membership in the Congress here. Since he was sworn in, in January, as one of the new Members from Massachusetts, and ever since his stay here in the Congress, he has at all times been interested in this and many other matters, but this one in particular, because it affects the heart of the industrial section of the country, which is New England. I congratulate the gentleman. I have received many telegrams asking that something be done about this crude oil importation so that we can, as the Member has well said, at least have some quotas.

Mr. Speaker, I ask unanimous consent to extend as part of my remarks some of these letters and some of these telegrams together with a fine statement by Mr. Thomas G. Dignan, president of the Boston Edison Co., in which he outlines at some great length the need for help and assistance as far as the importation of crude oil is concerned.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

(The telegrams and articles are as follows:)

WELLESLEY, MASS., *March 5, 1959.*

Hon. THOMAS J. LANE,
House of Representatives,
Washington, D.C.:

Understand White House presently considering mandatory restrictions on imports of residual fuel oil. At the least, this will be an economic blow to New England due to increased fuel costs. One percent shortage in winter of 1947–48 drove New England fuel costs up at rate of at least $100 million annually. In addition, with domestic oil industry incapable of making up artifically created shortages and oil-burning equipment unable to use substitute fuels, parts of New England may be completely without suitable fuel. Urge your intervention to prevent this action which could seriously damage New England economy.

JOHN P. BIRMINGHAM,
President, White Fuel Corp., Boston, Mass.

WASHINGTON, D.C., *March 5, 1959.*

Hon. THOMAS J. LANE,
U.S. House of Representatives,
Washington, D.C.:

On behalf New England Senators, wish to inform letter sent today President Eisenhower urging New England be exempted from mandatory crude oil import quotas or alternately residual oil be exempted. Such restrictions could have adverse economic consequences. You may wish to express position on this important matter. Decision expected soon.

NEW ENGLAND SENATORS CONFERENCE,
CHARLES W. COLSON, *Secretary.*

THE NEW ENGLAND COUNCIL,
FOR ECONOMIC DEVELOPMENT,
Boston, Mass., March 4, 1959.

Hon. THOMAS J. LANE,
U.S. House of Representatives,
House Office Building, Washington, D.C.

DEAR MR. LANE: It was a real pleasure to meet you on my trip to Washington in January. I have delayed writing in order to include now a recent copy of our policy statements and our 1959 handbook, both of which have just been reprinted. Incidentally, if you have not been getting our New Englander magazine you should be receiving it now. Please do not hesitate to let me know if you have not.

As I indicated in your office, the New England council is very interested in any legislation which has a real impact on our economy. This has always been true, but this phase of our program is being constantly stepped up and I hope you will not hesitate to ask our help in any matter which you feel is of concern to our economy. We are, in fact, eager to work with you on matters affecting our region.

I would like to call your attention to our recent correspondence re residual oil import restrictions. This is a matter which hits at the heart of our economy. Any such restrictions or price rise would have a serious effect on our industries' competitive position. We do hope that you can help in this matter.

Once again, I enjoyed meeting you and I look forward to seeing you on my next visit. In the meantime, please feel free to call upon us.

Sincerely,

ALBERT O. MERRILL,
Manager, Industrial Department.

BOSTON EDISON CO.,
Boston, Mass., February 27, 1959.

Hon. THOMAS J. LANE,
House Office Building, House of Representatives, Washington, D.C.

DEAR MR. LANE: Enclosed are copies of Boston Edison Co.'s statements concerning the importation of residual oil which have been submitted to the Office of Civil and Defense Mobilization.

This matter is being studied by the Office of Civil and Defense Mobilization and is also the subject of a number of bills pending in the Senate and House. Restriction on the importation of residual oil is, in my opinion, detrimental to national defense and is discriminatory to New England. There will be a severe economic impact to customers of this company and to many direct users of residual oil, such as hospitals, universities, and industrial concerns. Representatives of other areas of the country, particularly the coal industry, have been very active in support of legislation against the importation of residual oil.

I am sure that your office has been aware of this problem, and I thought that it would be desirable to keep you informed of our activity in this matter.

Sincerely yours,

THOMAS G. DIGNAN,
President.

BOSTON EDISON CO.,
Boston, Mass., February 11, 1959.

Mr. LEO A. HOEGH,
Director, Civil and Defense Mobilization,
Washington, D.C.

DEAR MR. HOEGH: Pursuant to notice which appeared in the Federal Register (Document 59–797) January 28, 1959, and in accordance with Office of Civil and Defense Mobilization Regulation No. 4 as amended January 27, 1959, Boston Edison Co. submits the following comments.

It is to be noted that these comments are confined to a discussion of the need to import residual fuel oil, and are submitted by an electric utility which is a large user of imported residual oil, a byproduct of crude oil remaining after other usable products have been removed.

Boston Edison Co. is an investor-owned utility which provides electric service to 475,000 customers in 40 cities and towns in the Greater Boston area and, through bulk sales to other electric systems, to large numbers of consumers outside its own area. Its interest in this matter is to see that customers, including many vital national defense facilities, have a reliable supply of electricity available at all times and at the lowest possible cost.

Boston Edison Co. contends that no restrictions should be placed upon the importation of residual fuel oil. Importation of residual oil is a special problem and should be considered apart from the importation of other petroleum products. This has been recognized during the period of present voluntary controls and it is urged that continued recognition be given to this point of view.

In the opinion of this company, no justifiable purpose will be accomplished by the restriction of residual oil imports, but rather many serious and undesirable economic consequences will result from such a restriction.

Residual oil is the scrap product of oil processing. In 1957, the amount of residual oil imported represented less than 5.1 percent of the total petroleum products used in the United States. Modern refinery design in the United States permits the distillation of many crudes so that there is no residual oil produced in the refining process. Refiners of domestic oil have not produced sufficient quantities of residual oil. Users of residual oil have been forced to import. As the demand for other more valuable petroleum products increases and the production of residual oil decreases, the use of imported residuals is necessary to fill the gap between domestic production and domestic demand.

This company supplies power to a large metropolitan area which includes a large number of national defense facilities and producers of vital defense products. The use of natural gas on a firm basis is not economic and has been discouraged in recent cases by the Federal Power Commission. Substantial curtailment of the supply of residual oil would force this utility and others to rely on an uninterrupted supply of coal. For such a utility to be dependent upon a

single fuel to produce its power is dangerous to the national defense.

Scarcity of residual oil as a fuel will increase the cost of electricity to customers, including military installations and suppliers. Other national defense considerations include the effect of import restrictions on the size of the tanker fleet which would exist for use in times of emergency. The Suez crisis indicated that the entire world oil supply and oil transportation facilities are of direct interest to the United States of America. Also, restriction of this type of fuel will have an adverse effect on the development and maintenance of very critical port facilities.

A further consideration, important to national defense, is that a large percentage of residual oil imports comes from Caribbean countries. It is a major and nearby source of oil and should be in established use for American needs rather than for other, possibly unfriendly, nations. Finally the record of this investigation should indicate that the friendship of these Caribbean countries is of utmost importance to the national defense of the United States.

The east coast uses more than 50 percent of the residual oil consumed in the United States, and of this amount more than 55 percent is imported. Restrictions would severely disrupt the use of fuel in this area and would affect industrial heating, shipping, and public utilities, as well as other phases of industrial activity. A reduction in the supply of residual oil would increase substantially the cost of power in the east coast area.

This is critical in the entire northeastern area, which is already burdened by the high cost of fuel because of the great distances over which such fuel must be transported. The charge for every kilowatt-hour this company sells includes a fuel adjustment which varies with the cost of fuel. On the basis of its present rates and actual fuel costs in December 1958, its customers would have been required to pay more than $1,500,000 additional for the energy they purchased in 1958 if this company had been unable to obtain residual oil.

The continued use of residual oil imports will aid and not impair national security. In addition, restrictions on importation of this product would threaten the ability of the electric industry to provide a reliable supply of electricity and would affect the price of electricity for a large number of users vital to the national security. Such a restriction is particularly onerous and discriminating to the very important northeastern section of this country. Boston Edison Co. urges that special consideration be given to the importation of residual oil and that no restrictions be placed thereon.

Very truly yours,

THOMAS G. DIGNAN,
President.

REBUTTAL BY BOSTON EDISON CO. RELATIVE TO COMMENTS, OPINIONS, AND DATA ON RESIDUAL OIL IMPORTS AS THEY AFFECT NATIONAL SECURITY

This statement is being filed in accordance with OCDM Regulation 4 as amended, and is Boston Edison Co.'s rebuttal to statements, opinions, and data filed by the National Coal Association and others urging that the Director of OCDM certify that residual fuel oil is being imported in such quantities as to threaten to impair the national defense.

In its filing of February 12, 1959, Boston Edison Co. stated that imports were not impairing the national defense and were, in fact, a material aid to the defense effort. It based these conclusions on the following:

1. The present yield of residual fuel oil from domestic refineries is being reduced each year. The use of imported residual is necessary to fill the gap between domestic production and domestic demand.

2. Curtailment of the supply of residual oil would force this utility and others to depend on a single fuel, coal, which is not in the best interests of national defense.

3. Curtailment of residual oil will increase the cost of power to all consumers including military establishments and defense industries.

4. The maintenance of a large tanker fleet is necessary for national defense.

5. Limitation of residual imports would tend to injure friendly relations with Caribbean countries which are important to the national defense.

6. A reduction in the supply of residual oil will severely disrupt the operations of industrial and institutional users of this fuel.

In rebuttal to material filed with the Director, Boston Edison Co. wishes to make the following comments:

There has been no factual data presented to support the contention that the importation of residual oil is discouraging the discovery of oil reserves in the United States. That this contention is not true can be demonstrated by exhibit 1 attached, which shows that the present yield of residuals from crude runs by east coast refineries has dropped from 21.8 percent in 1950 to 16.7 percent in 1957. This represents a drop in yield of over 23 percent. A further substantial drop has been reported for 1958. It is apparent from this that if the incentive to discover new oil reserves was the potential sale of residual, then the oil industry would not have designed its equipment to produce a lesser amount of residual and greater amount of more valuable products.

I

CURRENT CAPACITY OF COAL INDUSTRY

The National Coal Association developed what it considers to be a fairly accurate calculation of the current mining capacity of the bituminous coal industry (p. 29). It does this by multiplying number of employees times output per man per day times 260 days.

For the number of employees, the association used the average number employed in 1953, and not the highest number.

For output, the association used 9 tons per man per day, whereas it has been as high as 11 tons per man per day.

The number of workdays used was 260 whereas in 1944, a war year, 278 days were worked.

On the assumption that not less than 200,000 employees and 278 workdays are available and using a production of only 9 tons per day the current potential for the coal industry is approximately 640 million tons, after allowing 140 million tons from strip mines.

COAL EXPORTS

Exhibit 2 is presented to show the extent to which the electric power industry has increased its use of coal as a boiler fuel from 88 million tons in 1950 to 157 million tons in 1957. Figures for coking coal are also shown because they represent such a large portion of U.S. consumption and a portion which is not affected by residual oil competition. This exhibit also shows the imports of residual oil expressed in thousands of net tons of coal equivalent compared to bituminous coal exports. This shows quite clearly that coal exports more than equal the imports of residual oil. In the event of a national emergency, the 76 million tons of coal exported in 1957 would more than offset the 41 million tons of coal equivalent residual oil which was imported.

FINANCIAL EFFECT ON BITUMINOUS COAL INDUSTRY

The NCA states on page 34 that "during 1958 the bituminous coal industry operated at little, if any, profit. Complete finance figures are not published for that year, but available data indicate that certain fields operated at a deficit."

This is a serious matter and one with which Boston Edison, a large user of bituminous coal, is vitally concerned. It believes that data which is available should be presented and that no hasty conclusions should be drawn as to 1958 results without authentic figures.

Exhibit 3, attached, shows the percent return on net worth for six of the leading bituminous coal companies for the year ending 1957, and the 10-year average. This is the class of producer which large users of bituminous coal deal with and depend on. As a group they represented total sales in 1957 of almost $1 billion. This does not suggest a distressed industry.

FINANCIAL EFFECT ON COAL-CARRYING RAILROADS

A large portion of the cost of coal delivered in Boston is attributable to the freight charges for rail transportation from the mine head to Hampton Roads. The NCA referred to the financial effect of importing residual oil on the coal-carrying railroads (p. 69).

However, exhibit 4 shows a return on net worth for 5 of the principal bituminous coal railroads which varies from 5.3 percent to 15.3 percent in 1957, and a 10-year average which ranges from 5 percent to 9.5 percent.

DISPARITY BETWEEN CAPACITY OF COAL INDUSTRY AND PROJECTED NATIONAL DEFENSE REQUIREMENTS

In developing its preliminary conclusions concerning the disparity between coal capacity and national defense requirements (pp. 50–54), the NCA has erred in using its own figures.

On page 51 of the NCA statement it is alleged that 90 percent of petroleum delivered to district No. 1 in 1957 was received by ocean tanker. This statement is contradicted by their own exhibit, table 9, page 3. This exhibit shows total petroleum products delivered by pipeline, barge, or rail delivery, and local production to be 561,107,000 barrels. The total supply is shown as 1,255,326,000 barrels. The pipeline, etc., deliveries therefore represent 45 percent of the total supply of petroleum to district No. 1. Thus the balance for ocean tanker delivery could not possibly exceed 55 percent, rather than 90 percent as stated. Therefore all calculations based on this incorrect percentage are erroneous.

II

The NCA's other principal argument is that the utilization of imported residual as boiler fuel by electric power utilities and general industrial establishments renders these operations dependent upon the maintenance of fuel supplies that are unusually vulnerable to interruption by enemy action.

The NCA relies to a great extent on its evaluation of tanker routing in World War II and concludes that all reduction in tanker deliveries of petroleum to the east coast during World War II was caused by the submarine menace. This is mentioned many times—pages 18, 20, 26, 53, 55, 57–59.

The principal reason there were limited tanker deliveries of petroleum products to the east coast during World War II was that tankers were required to supply our own armed forces and those of our allies with petroleum products.

Because of this Boston Edison contends that the continued availability of as many tankers as can be economically justified is required to be prepared adequately for wartime emergencies. To the extent that the importation of residual oil keeps an expanded tanker fleet available, national defense is aided.

The NCA refers repeatedly to the submarine menace. However, both coal and oil, which Boston Edison uses in large quantities,

are presently delivered by oceangoing vessels. Therefore whatever risk exists in oil importation must also apply to coal.

Further, as previously pointed out complete blockade of residual oil imports could be more than offset by reduced coal exports.

It is urgently requested that the Director of the Office of Civil and Defense Mobilization determine that residual oils are not being imported in such quantities or under such circumstances as to threaten to impair the national security.

Mr. IRWIN. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Connecticut.

Mr. IRWIN. I would like to commend the gentleman from Massachusetts for his remarks. I, myself, introduced something in the RECORD last Friday relating to this matter. At the time this was being considered I sent messages to the White House in regard to the matter. I agree with the gentleman that not only does this affect us regionally, and this is, of course, of great importance to us, but it also affects our foreign policy relationships, as the gentleman has pointed out, with two traditionally friendly nations.

Mr. CONTE. I thank the gentleman.

Mr. MEYER. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Vermont.

Mr. MEYER. I would like to compliment the gentleman from Massachusetts, just south of me in Vermont. The people of Vermont have long felt that we have paid excessively high prices for petroleum products, and this action will only aggravate the situation.

Mr. CONTE. I thank the gentleman.

Mr. BOLAND. Mr. Speaker, may I take this opportunity to compliment my colleague and neighbor from Massachusetts [Mr. CONTE] for his cogent remarks on the serious economic plight which Massachusetts and the entire New England region faces as a result of the President's order last week imposing mandatory controls on the importation of foreign oil.

The mandatory order limits the importation of residual fuel oil to 400,000 barrels a day for the entire eastern half of the Nation. This mandatory quota will soon lead to a price increase in domestic residual fuel oil, once present reserves are depleted, and New England industries, colleges, electric powerplants, State and municipal institutions will be paying higher fuel bills. Home owners will eventually be digging down into their pockets to pay higher home fuel bills because of the mandatory quotas set on foreign crude oil.

PROTESTS TO PRESIDENT

I wrote to the President on February 24 and strongly protested any recommendation that would curtail the importation of residual fuel oil and crude oil because of the adverse effect this would have upon the economy of our region.

I am very disappointed with the President's mandatory quotas order. This has been a constant problem New Englanders have been fighting since I came to Congress in 1953. In the past we have been successful in maintaining a free flow of foreign oil into New England and the national security was not put in jeopardy.

ASKS PRESIDENT EXEMPT NEW ENGLAND

Mr. Speaker, I implore the President to reconsider his decision and urge him to exempt New England from these mandatory quotas. I have telegraphed my request and concern in this matter to him.

At this time, under unanimous consent, I include my February 24 letter to President Eisenhower, and a sampling of the telegrams I have received protesting the oil import restrictions, printed with my remarks:

FEBRUARY 24, 1959.

THE PRESIDENT OF THE UNITED STATES,
Washington, D.C.

DEAR MR. PRESIDENT: I am writing with reference to the investigation currently being made by the Office of Civil and Defense Mobilization, at the request of the State Department and the Department of Defense, to determine the effect upon national defense of residual fuel oil importation.

I would strongly protest any recommendation that would curtail the importation of residual fuel oil because of the adverse effect this would have upon New England.

Past experience in import curtailment of oil has demonstrated that such a reduction has resulted in price increases to New England homeowners and industries.

Your thoughtful consideration of the effect of residual oil importation restrictions on New England economy will be deeply appreciated.

With every good wish, I am

Sincerely yours,

EDWARD P. BOLAND,
Member of Congress.

SOUTH HADLEY, MASS., *February 23, 1959.*

Representative EDWARD P. BOLAND,
House Office Building,
Washington, D.C.:

Trade agreements extension act of 1958, empowering the Office of Civil Defense Mobilization to immediately limit the importation of residuary fuel oil, would adversely affect our cost of operation. Past experience in import curtailment has demonstrated that reduction in imports has resulted in price increases to ourselves and all New England. Would appreciate your assistance in requesting the Director, Mr. Leo A. Hoegh, to delay invoking such powers until this problem can be resolved by Congress.

OTTO C. KOHLER,
Business Manager, Mount Holyoke College.

HOLYOKE, MASS., *February 24, 1959.*

Representative EDWARD P. BOLAND,
House of Representatives,
Washington, D.C.:

We are users of residual fuel oil; we are concerned that the Director of the Office of Civil and Defense Mobilization may immediately limit the importation of residual fuel oil. This will undoubtedly cause its price to

rise which would adversely affect our company and its customers. It would also adversely affect the many residual fuel oil users of New England. We are asking the Director to delay making any decision until this problem can be considered by Congress. We would appreciate your help in supporting this request to the Director, Leo A. Hoegh.

ROBERT E. BARRETT, Jr.,
Holyoke Water Power Co.

SPRINGFIELD, MASS., *February 24, 1959.*
Congressman EDWARD P. BOLAND,
Washington, D.C.:

Request Directors of Civilian Defense and Mobilization not to impose import restrictions on crude and residual oil until Congress had had opportunity to examine.

HAMPDEN COAL & OIL CO.,
HARRY HOLSTEIN,
President-Treasurer.

HARMFUL EFFECTS OF TOBACCO AND ALCOHOL AND OTHER DELETERIOUS CONSUMABLES ON AMERICAN SCHOOLCHILDREN

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Utah [Mr. KING] is recognized for 45 minutes.

Mr. KING of Utah. Mr. Speaker, it was my opportunity recently to introduce a bill, designated H.R. 5626, which is designed to promote the education of American schoolchildren on the harmful effects of tobacco and alcohol and other deleterious consumables.

If enacted, the legislation will provide Federal funds to match State funds, for the States which desire this assistance, to educate their boys and girls on the health risks entailed in smoking and drinking and in consuming other potentially harmful substances.

I have considered very carefully the historic implications of this bill. Its enactment would assault gigantic commercial interests. It would attack citadels of power. For, if the bill is successful in its objectives, the sales and profits of these interests will inevitably decline.

With full knowledge of these facts, Mr. Speaker, I have nevertheless resolved to move forward into a field which has been too long neglected. My studies of the harmful effects of tobacco and its connection with the fast-growing and terrible menace of lung cancer, as well as the close, firsthand knowledge of the distressing human tragedies which have been wrought by liquor, have left me no choice.

I have introduced this bill in good faith and with the firm intent to do all within the limits of my humble ability to secure its passage.

My resolve is considerably fortified by the knowledge that the same bill has been introduced in the other body by its author, the distinguished Senator from Oregon, the Honorable RICHARD L. NEUBERGER, who has been pushing the cause of national health and fitness for quite some time. I am grateful for his effort, and for the encouragement he gave me to sponsor the same legislation in this body.

I am convinced that history will vindicate our effort.

Legislation of this nature, though bold and in some aspects unprecedented, cannot forever be ignored nor deferred. The health of our youth, the stamina of our Nation, the survival and continued supremacy of the American people, may well be at stake.

The bill has one paramount purpose—to protect the Nation's youth and, in protecting youth, to safeguard in future generations the general health and vitality of the American people.

It is not the primary purpose of the bill to dissuade any of the adult public generally from smoking and drinking. The adult public should, and always will, exercise free agency in such matters.

The bill is designed to counteract the constant bombardment of clever, malicious commercials which our children face on television and radio and in magazines and newspapers. It seeks to give the generation now in school, and the generations which follow, all of the facts—the facts as presented by impartial scientists and doctors, rather than by paid hucksters and word magicians—before they form any habits which may jeopardize either their individual well-being or the general vitality of their Nation.

What are the facts?

When I argue that tobacco is a cause of lung cancer, the tobacco industry will counter that there are, in fact, no facts. The industry will raise its well-worn cry that medical research has failed to produce conclusive evidence that tobacco, or any of the elements of tobacco, is the specific and immediate agent which induces lung cancer.

I find myself a bit impatient with this argument.

To argue that tobacco does not cause lung cancer is like arguing that speed does not cause traffic accidents. In neither instance, it may be argued, have we conclusive evidence. And in both instances, there may be other causes present.

But in each instance, there is conclusive evidence to show association between the two phenomena and the great likelihood of causal connection. And in lung cancer as in highway accidents, the extent of the connection is measured by grim death tolls.

The Nation's highway death toll last year was 37,000. The toll from lung cancer was only slightly smaller—and growing at a much faster annual rate than the traffic toll. An estimate of the 1958 lung cancer toll, as reported in "Today's Health," the American Medical Association's popular magazine, is 35,000.

Any one factor, even though there may be others, which causes destruction, must share responsibility for such destruction.

Tobacco is a cause of rampant destruction of precious human resource, and must therefore share responsibility.

I believe I am correct in saying that even the most rabid champion of the tobacco industry will admit the possibility that tobacco may be a cause of lung cancer. And will anyone who admits such a possibility deny the wisdom of a course which would forcefully impress that possibility on the public mind, especially the young mind?

For the sake of illustration, let us imagine that we are approaching a highway bridge over a great chasm. Highway engineers have reason to believe the bridge to be unsound.

If the engineers believed there was one chance in four that the bridge would collapse beneath the weight of our car, and plunge us to certain death, do you doubt they would warn us of the risk?

Certainly not.

If the chance were one in a million, the engineers would still warn us. The bridge would be posted—posted, in fact, with glaring signs which even the most casual traveler could not fail to see. Every wayfarer would clearly understand that he rode the bridge at his own risk.

This is all that I ask today, and I ask it for American children—a clear warning, and nothing more, the chance to know and understand fully the risk, before they have harnessed themselves with the habit.

With lung cancer, the odds are not one in a million, and not one in four, that tobacco is a cause. The picture is quite the reverse. The evidence, drawn from independent research—and I stress, independent research—has produced evidence of overwhelming odds that cigarette smoke is, or does contain, an agent which induces lung cancer.

Anyone who doubts this need only examine the research reports, and the statistical record.

Lung cancer, which at the outbreak of World War I was a rare affliction in the human family, today stands as the biggest killer among many dread forms of cancer. The alarming rise in the incidence of this terrible disease has closely paralleled a rise in the consumption, both individually and totally, of cigarettes.

In the current March issue of Today's Health, an article entitled "The Growing Threat of Lung Cancer" has quoted Dr. Alton Ochsner, an internationally distinguished chest surgeon, as saying—and I quote:

> It is my firm conviction that every heavy smoker will develop lung cancer—unless heart disease or some other sickness claims him earlier.

And a Danish physician, quoted in the same article, has left no doubt about what he believes to be the principal factor in the soaring incidence of lung cancer. The good doctor sounded this warning:

> Unless young people are prevented from acquiring smoking habits, we will not be able to avoid one of the major catastrophes of medical history.

It is highly significant, I think, that Dr. Ochsner, in saying, "It is my firm conviction that every heavy smoker will develop lung cancer," also added, and I quote again: "unless heart disease or some other sickness claims him."

The sad reality is that smokers not only risk lung cancer, but they show higher mortality rates from many other ailments, including the supreme killer of our civilization, which is heart disease.

Consider, if you will, the study which the National Cancer Institute made of death rates among nearly 200,000 American veterans. This study, reported last July to the Seventh International Cancer

Congress in London, contains some alarming findings.

Among 198,926 veterans holding U.S. Government life insurance policies, the Institute counted 7,382 deaths. Related statistically to the smoking habits of the veterans, the toll showed these facts:

First. The death rate from all causes was 16 per thousand among persons who used tobacco and 13.1 per thousand among persons who did not use tobacco. It was, after an adjustment which accounted for differences in age distribution between the two groups, 32 percent higher for smokers than for nonsmokers.

In other words: the risk of death from all causes, whether the causes be accidental or natural, was 32 percent higher for those who smoked than for those who did not.

Second. For the steady cigarette smokers, the death rate was much higher. It was 58 percent higher than it was for the nonsmokers.

For the cigarette smokers, the death rate from lung cancer was 10 times—10 times—greater than it was for the nonsmokers.

Third. The death rate from coronary heart disease—and this perhaps was the most distressing statistic of all—was 63 percent higher for the cigarette smokers than it was for the nonsmokers. Of the 6,203 smokers whose deaths were counted in this study, nearly two-thirds died of diseases of the heart, blood vessels and kidneys.

The total effect of this study, and of others like it, is to reaffirm a principle which health authorities have recognized for many years. The tobacco habit is not compatible with tiptop physical condition. Smoking does, in fact, impair and weaken the general health.

The rising incidence of lung cancer has given tragic and dramatic new emphasis to this truth.

I regard it as utterly shameful that we, as a nation, countenance in our mass communication media commercials which ignore this fact—commercials which, instead, strongly persuade our children that smoking is a social grace, to be equated to social distinction itself, which the habit, of course, is not.

Maliciously overdrawn and irresponsible advertising is, I think, the gravest abuse of our freedom of the press. It ignores responsibility; more important, it is incompatible with awareness that responsibility is the fortress of that freedom, as it is of every freedom.

I have not overlooked the weakness of statistics. Figures can be framed, I know, to serve either side of any controversy.

At the same time, however, I do not overlook the practical experiences which the Nation's doctors have had, and are having, with lung cancer patients. I have heard chest surgeons, the men closest to the problem, discuss it, and invariably they have given the same story.

In the great majority of cases, the men who develop lung cancer are smokers. And, equally important, the smoker who develops lung cancer has appreciably smaller chances of surviving, and of leading a normal life, than the nonsmoker.

In the surgery which, in hopeful cases, follows a diagnosis of lung cancer, the smoker faces a second threat often as grave as the cancer itself. Will the patient, after surgery, have the lung capacity to survive? Will he be able to get along with one lung—or will he, as the article from Today's Health describes it, "face a gasping suffocation that leads to heart failure?"

An average healthy adult has about eight times the lung capacity he needs for normal, sedentary activity. Thus, the healthy adult who has never smoked can easily survive the loss of one lung. But the smoker may or may not survive such a loss, because steady, prolonged smoking impairs his lung capacity. Smoking wrecks lung tissue.

In a time when the incidence of lung cancer is mounting sharply, this fact alone, this threat of impaired lung capacity, would—in the complete absence of evidence of a cause-and-effect relationship between smoking and lung cancer—justify any effort we made to warn our youth of the risk in smoking.

The smoker will always face a greater risk of death from lung cancer, where lung cancer occurs—even though we may never prove conclusively that tobacco is a specific cause of the disease.

What is the answer to the lung cancer menace? What is our approach to the problem?

It has become my carefully considered view that education, in the broadest sense of the word, offers the only adequate approach, and that education, in the instance of the public schools, offers the best immediate approach. In the classroom children are free—at least momentarily—of the influence which comes from seeing others smoke. In the same atmosphere lies the hope of making them see the full reality, the seriousness, of the problem, and seeing it objectively.

A similar approach has been used effectively to promote traffic safety and to stem the highway death toll. Statistics reflect the success of driver education.

In this decade, the annual highway death toll has been fairly constant, and was lower in 1958 than in any year since 1954. In the same period, the number of automobile registrations has soared by nearly 20 million, and the number of drivers has grown in about the same proportion. We now have nearly 70 million automobiles on the Nation's highways, and some 80 million drivers.

My legislation proposes no radical changes in American education. It would force the program upon no one. There is no specter of Federal control of education or Federal bureaucracy.

The initiative and control would lie entirely with the States. It would be the responsibility of each State individually to frame its own program, and to appropriate funds.

The bill would provide matching funds for the States that desired them. To qualify for the matching funds the State, or States, would present the program in proposal form, and the U.S. Commissioner of Education would be obligated to approve the proposals which met certain standards.

The bill prescribes certain standards for the sole purpose of assuring the Nation that the matching funds would be spent for the work for which they would be provided.

I am convinced that a concerted educational effort to combat this health menace will have easily as much success as the campaign to combat the highway death toll has had. Its success could be appreciably greater.

In the absence of a concerted effort, I will continue to share the Danish doctor's fear—and I repeat his words:

> Unless young people are prevented from acquiring smoking habits, we will not be able to avoid one of the major catastrophes of medical history.

Mr. Speaker, I ask unanimous consent to revise and extend my remarks at this point in the RECORD, to include from the American Cancer Society's booklet "1959 Cancer Facts and Figures," the section entitled "Lung Cancer and Cigarette Smoking."

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Utah?

There was no objection.

(The matter referred to follows:)

LUNG CANCER AND CIGARETTE SMOKING

Lung cancer is now the leading cause of cancer death in men. In 20 years the disease has increased eight times, the most rapid rise ever reported for a noninfectious disease. This year an estimated 35,000 Americans will die of lung cancer, 30,000 men and 5,000 women.

The American Cancer Society has accepted the evidence that cigarette smoking is a causative factor in lung cancer. As part of its role in the effort of Federal, State, and voluntary agencies to control lung cancer, the society is obliged to make public the known facts derived from research into the causes of this disease.

What are the facts?

1. Twenty-two studies in six countries have shown that lung cancer patients are predominantly cigarette smokers.

2. No evidence of any kind has ever been produced that is inconsistent with the generally held view that excessive cigarette smoking is one of the principal causes of lung cancer.

3. The society's own 44-month study of the smoking habits and fate of 187,783 men from 50 to 70 years old has shown that—

(a) Death from all causes combined rises with the number of cigarettes smoked daily. Rates were more than two times as high for two or more pack-a-day smokers as nonsmokers.

(b) Men who stopped smoking had death rates lower than those who continued to smoke.

(c) Lung cancer death rates were more than 10 times as high among regular cigarette smokers as among men who had never smoked.

(d) Coronary death rates for smokers ranged nearly two and a half times as high for two or more pack-a-day smokers as the rates for nonsmokers.

(e) Deaths from lung diseases other than cancer were nearly three times as high among cigarette smokers as nonsmokers.

(f) Deaths from cancers of sites such as the mouth, esophagus, tongue, and larynx among cigarette smokers were more than five times as high as the rates for nonsmokers.

4. An independent study group on smoking and health composed of seven leading American scientists has reviewed all the available evidence and concluded "The sum total of scientific evidence establishes beyond reasonable doubt that cigarette smoking is a causative factor in the rapidly increasing incidence of human epidermoid carcinoma (cancer) of the lung." The group was organized by the American Cancer Society, the American Heart Association and their Federal counterparts, the National Cancer Institute and the National Heart Institute.

5. The British Government has launched an educational campaign warning of the hazards of cigarette smoking. The action is based on a report by its Medical Research Council that the relationship between cigarette smoking and lung cancer was one of direct cause and effect.

6. The U.S. Public Health Service has declared: "The Public Health Service feels the weight of the evidence is increasingly pointing in one direction: that excessive cigarette smoking is one of the causative factors in lung cancer."

In response to the sharply rising death rate from lung cancer, the American Cancer Society has provided some $2 million for lung-cancer research.

Mr. KING of Utah. Mr. Speaker, I ask unanimous consent that my colleague, the gentleman from Iowa [Mr. WOLF] may extend his remarks at this point in the RECORD, as he desires to be associated with me in this matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Utah?

There was no objection.

Mr. WOLF. Mr. Speaker, I wish to associate myself with the well chosen and temperate remarks of our distinguished colleague from Utah.

It is now fairly clear that we must take seriously the research work that has been carried out at various universities and research institutions across this country on the relationship of cigarette smoking to certain kinds of cancer and other debilitating diseases. From statistics released by the U.S. Public Health Service, smokers' death rates from all causes were 32 percent higher than those of nonsmokers.

In an independent study carried on by Dr. Hammond and Dr. Horn through the American Cancer Society, 187,783 men between the ages of 50 and 69 were studied and examined. It was found that the death rates were higher among regular cigarette smokers than among men who never smoked, that the mortality ratio increased with the number of cigarettes smoked each day, and that the death rates were higher among pipe and cigar smokers than among men who never smoked. Other careful studies such as this one have proven the necessity of making more readily available such facts to the American people.

The only facts the American people now have are those presented by commercials in the mass media. The American people have been saturated on the necessity of smoking for social status and psychological fulfillment. Usually, one does not have to watch television for more than 15 minutes until he is bombarded with a cigarette commercial which will show a handsome young man in a long and flashy convertible pick up a beautiful girl. Upon her entrance into the automobile both of them commune with each other through the lighting of cigarettes.

Besides the obvious symbolisms in such advertising there is the subtle appeal to youth to begin to smoke cigarettes. No one is trying to deny to the youth the right to smoke—if they want to smoke. However, the youth of this Nation should know that there is another side to the question of smoking which is not presented in cheap, slick television commercials.

In a free society one is, for the most part, guaranteed the right to choose alternative modes of life. This is, however, only meaningful when an individual has pertinent information to make reasoned choices. Today, this information does not exist widely enough for the American public and American youth in relation to the medical reasons for not smoking. I hope that ways will be found, through our schools and the various public health agencies, to make it possible for individuals to judge upon fact, rather than illusion, the question of whether or not they want to smoke.

WE NEED WISER TRADE POLICIES

Mr. LINDSAY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and to include an editorial from this morning's Herald Tribune, March 16.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LINDSAY. Mr. Speaker, I should like to compliment my colleague, the gentleman from Massachusetts [Mr. CONTE], on his remarks. At a time when our relations with our friends abroad are of paramount importance, this growing tendency to become restrictive is to be carefully guarded against.

Last week, this body passed a bill designed to drain off waters from Lake Michigan, over the strong and pending protests of the Dominion of Canada. The imposition of mandatory restrictions on oil imports now also serves to irritate and puzzle our neighbor nations to the north. In this connection, I include at this point, Mr. Speaker, an excellent editorial that appeared in this morning's issue of the New York Herald Tribune:

WE NEED WISER TRADE POLICIES

When Prime Minister Macmillan arrives in Washington this week for talks with President Eisenhower, the Berlin crisis will be the most important topic on the agenda, but not the only one. Certain American trade practices are giving the British a good deal of worry. They fear a revival of protectionism in the biggest and richest market in the world.

A number of specific things have aroused this fear. The most annoying to them is the recent rejection of a British company's bid for two turbines for the Greer's Ferry dam project in Arkansas. Although the British bid was 19 percent lower than the lowest American offer—far lower than the ceiling on foreign bids imposed by the Buy American Act—it was turned down for the transparently lame reason that national security was involved. Then, the other day, a conference of the International Civil Aviation Organization in Montreal elected to choose an American air navigation system and reject a British one by standards that Sir David Eccles, the president of the Board of Trade, says were deliberately rigged in the American system's favor. And there is the wool tariff quota, which discriminates against the high-grade woolens Britain produces. In view of the fact that the United States is now the biggest single market for British goods, the anxiety is natural. Furthermore, all this contrasts poorly with our talk of freer trade and economic cooperation.

It is not only Britain. South American countries have long complained that their exports of raw materials cannot find proportionate markets here, and therefore they cannot earn the exchange to develop their economies. The American quotas on lead and zinc are a case in point. Lead and zinc account for almost 15 percent of the export earnings of Peru, and obviously the restrictions are causing economic—and political—repercussions there.

And now there are mandatory restrictions on oil imports, again in the name of national security. The Canadians, whose national security is closely tied in with ours, are especially angry.

There are other examples. But the point is that the United States cannot deprive other countries of markets on which they depend, sometimes for their existence, and still expect these countries to be their friends and allies in every enterprise. And what about the new peoples of Asia and Africa who are struggling against terrific odds to make economically viable nations of themselves? If it is impossible for them to sell their products and buy their equipment in Western markets, and principally in the United States, they will be obliged to do business with the Soviet Union or Communist China, which, whatever their economic mistakes, never pass up a political bargain.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. HENDERSON (at the request of Mr. HOLLAND), from March 13 through March 16, 1959, on account of death in family.

Mr. PORTER (at the request of Mr. SANTANGELO) for the week of March 16, 1959, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. REUSS for 40 minutes on tomorrow.

Mr. POWELL (at the request of Mr. NATCHER) for 60 minutes, on Thursday next.

Mrs. DWYER (at the request of Mr. UTT) for 10 minutes tomorrow.

Mr. PERKINS for 30 minutes on Wednesday next, March 18, 1959.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL

RECORD, or to revise and extend remarks, was granted to:

Mr. CELLER.

Mr. MCGOVERN.

Mr. SAYLOR and to include extraneous matter.

Mr. ALGER and to include extraneous matter.

Mr. PILLION and to include extraneous matter.

Mr. WOLF and to include extraneous matter.

Mr. PRICE and to include extraneous matter.

Mr. POAGE and to include extraneous matter.

Mr. KASTENMEIER and to include extraneous matter.

Mr. KASEM.

(At the request of Mr. NATCHER, and to include extraneous matter, the following:)

Mr. MCDOWELL in two instances.

Mr. ANFUSO.

Mr. BOGGS.

Mr. DULSKI.

Mr. MULTER.

Mr. KING of California.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 79. An act to amend the Federal Food, Drug, and Cosmetic Act to permit the temporary listing and certification of citrus red No. 2 for coloring mature oranges under tolerances found safe by the Secretary of Health, Education, and Welfare, so as to permit continuance of established coloring practice in the orange industry pending congressional consideration of general legislation for the listing and certification of food color additives under safe tolerances.

ADJOURNMENT

Mr. NATCHER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 3 minutes p.m.) the House adjourned until tomorrow, Tuesday, March 17, 1959, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

715. A letter from the Governor, Farm Credit Administration, transmitting a draft of proposed legislation entitled "A bill to amend the Federal Farm Loan Act to transfer responsibility for making appraisals from the Farm Credit Administration to the Federal land banks, and for other purposes"; to the Committee on Agriculture.

716. A letter from the Governor, Farm Credit Administration, transmitting a draft of proposed legislation entitled "A bill to clarify the status of the Federal land banks, the Federal intermediate credit banks, and the banks for cooperatives and their officers and employees with respect to certain laws applicable generally to the United States and its officers and employees, and for other purposes"; to the Committee on Agriculture.

717. A letter from the Director, Bureau of the Budget, Executive Office of the President, relative to reporting that the appropriation for the General Services Administration for "Operating expenses, Public Buildings Service," for the fiscal year 1959, has been apportioned on a basis indicating a need for a supplemental estimate of appropriation, pursuant to section 3679 of the Revised Statutes, as amended; to the Committee on Appropriations.

718. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill for the relief of Dorothy E. Green and Thelma L. Alley"; to the Committee on Armed Services.

719. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill for the relief of the Government of the Republic of Iceland"; to the Committee on Foreign Affairs.

720. A letter from the Attorney General, transmitting a draft of proposed legislation entitled "A bill to provide for the adjustment of the legislative jurisdiction exercised by the United States over land in the several States used for Federal purposes, and for other purposes"; to the Committee on Government Operations.

721. A letter from the Assistant Secretary of the Interior, relative to reporting that an adequate soil survey and land classification of the lands in the San Angelo project, Texas, has been completed as a part of the investigations required in the formulation of a definite plan for project development, pursuant to Public Law 172, 83d Congress; to the Committee on Appropriations.

722. A letter from the Chief Commissioner, Indian Claims Commission, transmitting a report that proceedings have been concluded with respect to the following claim: *The Seneca-Cayuga Tribe of Oklahoma, and Peter Buck, et al., members and representatives of members thereof, Petitioners,* v. *The United States of America, Defendant* (docket No. 341, sixth (general) claim), pursuant to the Indian Claims Commission Act of August 13, 1946 (60 Stat. 1055; 25 U.S.C. 70t); to the Committee on Interior and Insular Affairs.

723. A letter from the Comptroller General of the United States, transmitting a report on the review of Atomic Energy Commission contracts, and the activities under such contracts, relating to the Shippingport Atomic Power Station located near Pittsburgh, Pa.; to the Joint Committee on Atomic Energy.

724. A letter from the Deputy Secretary of Defense, transmitting a draft of proposed legislation entitled "A bill to provide more adequate numbers of civilian positions required by the Department of Defense to carry out scientific research and development relating to the national defense and to improve the management of the activities of the Department, and for other purposes"; to the Committee on Post Office and Civil Service.

725. A letter from the Commissioner, Immigration and Naturalization Service, U.S. Department of Justice, relative to the case of Liw Jack, A-7873096, involving suspension of deportation, pursuant to the Immigration and Nationality Act of 1952; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MILLS: Committee on Ways and Means. H.R. 5508. A bill to provide for the free importation of articles for exhibition at fairs, exhibitions, or expositions, and for other purposes; without amendment (Rept. No. 213). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSON of Montana:

H.R. 5701. A bill to provide a termination date for the excise tax on amounts paid for communication services or facilities; to the Committee on Ways and Means.

By Mr. BENTLEY:

H.R. 5702. A bill to punish the use of interstate commerce in furtherance of conspiracies to commit terroristic crimes and activities, and for other purposes; to the Committee on the Judiciary.

By Mr. BREWSTER:

H.R. 5703. A bill to permit the flying of the flag of the United States for 24 hours of each day on the estate known as Terra Rubra, the birthplace of Francis Scott Key, in Carroll County, Md., and at the grave of Key in Mount Olivet Cemetery in Frederick, Md.; to the Committee on the Judiciary.

By Mr. CEDERBERG:

H.R. 5704. A bill to amend title II of the Social Security Act to provide that an individual's entitlement to child's insurance benefits shall continue, after he attains age 18, for so long as he is regularly attending high school; to the Committee on Ways and Means.

By Mr. FLOOD:

H.R. 5705. A bill to amend the Railroad Retirement Act of 1937, the Railroad Retirement Tax Act, and the Railroad Unemployment Insurance Act, so as to provide increases in benefits, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 5706. A bill to amend the Railroad Retirement Act of 1937, the Railroad Retirement Tax Act, and the Railroad Unemployment Insurance Act, so as to provide increases in benefits, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. HORAN:

H.R. 5707. A bill to amend title 28, entitled "Judiciary and Judicial Procedure," of the United States Code to provide for the defense of suits against Federal employees arising out of their operation of motor vehicles in the scope of their employment, and for other purposes; to the Committee on the Judiciary.

By Mr. KASTENMEIER:

H.R. 5708. A bill to promote public confidence in the integrity of Congress and the executive branch; to the Committee on Rules.

By Mr. KING of California:

H.R. 5709. A bill to amend the Internal Revenue Code of 1954 with respect to income derived from fishing where the catch is landed in Puerto Rico; to the Committee on Ways and Means.

By Mr. LANGEN:

H.R. 5710. A bill to declare that the United States holds certain lands in trust for the Minnesota Chippewa Tribe; to the Committee on Interior and Insular Affairs.

By Mr. LIBONATI:

H.R. 5711. A bill granting the consent and approval of Congress to the Wabash Valley compact, and for related purposes; to the Committee on the Judiciary.

H.R. 5712. A bill to amend the Internal Revenue Code of 1954 to provide an additional $2,400 exemption from income tax for amounts received as annuities, pensions, or other retirement benefits; to the Committee on Ways and Means.

By Mr. MCINTIRE:

H.R. 5713. A bill to amend the Fair Labor Standards Act of 1938, as amended, to exempt homeworkers in rural areas from the minimum wage and maximum hours provisions of that act in certain cases; to the Committee on Education and Labor.

By Mr. MACDONALD:

H.R. 5714. A bill to amend section 1552, title 10, United States Code, and section 301

of the Servicemen's Readjustment Act of 1944 to provide that the Board for the Correction of Military or Naval Records and the Boards of Review, Discharges, and Dismissals shall give consideration to satisfactory evidence relating to good character and exemplary conduct in civilian life after discharge or dismissal in determining whether or not to correct certain discharges and dismissals; to authorize the award of an exemplary rehabilitation certificate; and for other purposes; to the Committee on Armed Services.

By Mr. GEORGE P. MILLER:

H.R. 5715. A bill to require that at least 50 percent of the passenger and cargo air transportation requirements of the Government of the United States be obtained from civil air operators, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 5716. A bill to protect the right of the blind to self-expression through organizations of the blind; to the Committee on Education and Labor.

By Mr. MOORE:

H.R. 5717. A bill to amend the Railroad Retirement Act of 1937, the Railroad Retirement Tax Act, and the Railroad Unemployment Insurance Act, so as to provide increases in benefits, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. MORRIS of New Mexico (by request):

H.R. 5718. A bill to recognize the authority of the States relating to the control, appropriation, use, or distribution of water within their boundaries, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MURRAY:

H.R. 5719. A bill to improve the compensation policies and practices of the Federal Government with respect to civilian personnel thereof, to establish a temporary Commission on Federal Civilian Employees Compensation Policy, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. PHILBIN:

H.R. 5720. A bill to amend the Internal Revenue Code of 1954 to permit the filing of a joint income tax return by a serviceman stationed overseas and his alien wife, and by any other married couple unless both the husband and wife are nonresident aliens; to the Committee on Ways and Means.

By Mr. REES of Kansas:

H.R. 5721. A bill to improve the compensation policies and practices of the Federal Government with respect to civilian personnel thereof, to establish a temporary Commission on Federal Civilian Employees Compensation Policy, and for other purposes; to the Committee on Post Office and Civil Service.

By Mrs. ROGERS of Massachusetts:

H.R. 5722. A bill to incorporate the Army and Navy Union of the United States of America; to the Committee on the Judiciary.

By Mrs. ROGERS of Massachusetts (by request):

H.R. 5723. A bill to establish a Department of Veterans' Affairs; to the Committee on Government Operations.

By Mr. ROOSEVELT:

H.R. 5724. A bill to protect the right of the blind to self-expression through organizations of the blind; to the Committee on Education and Labor.

By Mr. SCHWENGEL:

H.R. 5725. A bill to amend the National Defense Education Act of 1958 by repealing section 1001(f) thereof; to the Committee on Education and Labor.

By Mr. TEAGUE of Texas:

H.R. 5726. A bill for the relief of Hood County, Tex.; to the Committee on the Judiciary.

By Mr. THOMSON of Wyoming:

H.R. 5727. A bill to eliminate the fractionated heirship problem on the Wind River Indian Reservation in Wyoming, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ULLMAN:

H.R. 5728. A bill to set aside and reserve Memaloose Island, Columbia River, Oreg. for the use of The Dalles Dam project and transfer certain property to the Yakima Tribe of Indians in exchange therefor; to the Committee on Interior and Insular Affairs.

By Mr. WOLF:

H.R. 5729. A bill to establish permanent authorization of a fully adequate nationwide milk-for-children program and for other purposes; to the Committee on Education and Labor.

By Mr. IKARD:

H.R. 5730. A bill to amend section 270(b) of the Internal Revenue Code of 1954 relating to limitation on deductions allowable to individuals in certain cases; to the Committee on Ways and Means.

By Mr. REES of Kansas:

H.R. 5731. A bill to authorize the payments to local governments of sums in lieu of taxes and special assessments with respect to certain Federal real property, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. THOMPSON of New Jersey:

H.R. 5732. A bill to amend the Federal Reserve Act with respect to the number, term of office, and qualifications of members of the Board, to abolish the Open Market Committee and transfer its functions to the Board, and with respect to the qualifications of directors of Federal Reserve banks; to the Committee on Banking and Currency.

By Mr. McCORMACK:

H.J. Res. 310. Joint resolution to authorize the designation of the period October 17 to October 24, 1959 as National Olympic Week; to the Committee on Judiciary.

By Mr. LIPSCOMB:

H. Res. 210. Resolution to authorize the Committee on Banking and Currency to conduct an investigation and study of the operation of the Export Control Act of 1949 and related matters; to the Committee on Rules.

MEMORIALS

Under clause 3 of rule XXII, memorials were presented and referred as follows:

By Mr. PRICE: Memorial of the 71st General Assembly of the State of Illinois requesting the Congress of the United States to repeal the Federal excise tax now imposed on telephone service; to the Committee on Ways and Means.

By the SPEAKER: Memorial of the Legislature of the State of Arkansas, memorializing the President and the Congress of the United States relative to house concurrent resolution No. 24 of the State of Arkansas, and calling for a convention for the purpose of proposing an amendment to the Constitution of the United States as contained in the resolution; to the Committee on the Judiciary.

Also, memorial of the Legislature of the State of California, memorializing the President and the Congress of the United States, relative to imported tuna; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of Illinois, memorializing the President and the Congress of the United States requesting the repeal of the excise tax now imposed on telephone service; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of Michigan, memorializing the President and the Congress of the United States to repeal the Federal excise tax on motor vehicles; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of New Mexico, memorializing the President and the Congress of the United States to give favorable consideration relative to the employment of Albert Gallegos as a page in the House of Representatives or the Senate of the United States; to the Committee on House Administration.

Also, memorial of the Legislature of the State of North Dakota, memorializing the President and the Congress of the United States, to vigorously legislate to stamp out racketeering in the labor and management fields, and to protect the democratic rights of member control within labor unions; to the Committee on Education and Labor.

Also, memorial of the Legislature of the State of North Dakota, memorializing the President and the Congress of the United States, to establish as a national park a suitable area of land lying at the confluence of the Yellowstone and Missouri Rivers in northwestern North Dakota and northeastern Montana; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of Texas, memorializing the President and the Congress of the United States relative to requesting the elimination of grave and wasteful expenses that have been brought to our attention in the foreign aid program; to the Committee on Foreign Affairs.

Also, memorial of the Legislature of the State of West Virginia, memorializing the President and the Congress of the United States relative to house concurrent resolution No. 30, of the State of West Virginia, praying for the early recovery of the Honorable John Foster Dulles; to the Committee on Foreign Affairs.

Also, memorial of the Legislature of the State of Alaska, memorializing the President and the Congress of the United States to amend Federal income tax laws relating to Alaskan taxpayers; to the Committee on Ways and Means.

Also, memorial of the Legislature of the Territory of Guam, memorializing the President and the Congress of the United States to extend the benefits of the Small Business Act of 1953, as amended, to the Territory of Guam; to the Committee on Banking and Currency.

Also, memorial of the Legislature of the Territory of Guam, memorializing the President and the Congress of the United States to amend the Organic Act of Guam, so as to provide that the Legislature may override with finality, the veto of the Governor of Guam; to the Committee on Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BAKER:

H.R. 5733. A bill for the relief of Park National Bank; to the Committee on the Judiciary.

By Mr. FOLEY:

H.R. 5734. A bill for the relief of Angelo DiChio; to the Committee on the Judiciary.

By Mr. LANE:

H.R. 5735. A bill for the relief of Joseph Bell, Herman Karp, Hyman M. Oberman, and Abraham Smith; to the Committee on the Judiciary.

By Mr. McDONOUGH:

H.R. 5736. A bill for the relief of Mrs. Jelena Dordevich; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

The Role of the American Citizen in Our Foreign Policy

EXTENSION OF REMARKS
OF
HON. ROBERT W. KASTENMEIER
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Monday, March 16, 1959

Mr. KASTENMEIER. Mr. Speaker, the role of the American citizen in the formulation of our foreign policy was clearly outlined in a recent address by a distinguished colleague, the Honorable LEONARD G. WOLF, of Iowa, to the delegates to the Midwest Democratic Conference in Milwaukee, Wis. Mr. WOLF's thought-provoking speech stimulated the conference delegates to a healthy discussion of the foreign policy issues confronting us today. Under leave to extend my remarks in the RECORD, I include the following address by the Congressman from Iowa:

It is a pleasure to be attending the Democratic Midwest Conference here in Milwaukee. As some of you know I was born and raised in Wisconsin. This meant that during my youth, I considered Milwaukee the hub of the universe. My feeling for this city carried over through my undergraduate days at the University of Wisconsin and now I admire Milwaukee and Wisconsin because it is the home of so many truly great liberal leaders in Congress.

I might say in passing that there are no districts in this country that are better represented in Congress than Milwaukee by HENRY REUSS and CLEM ZABLOCKI. There are no more dedicated and effective Members of Congress than Congressmen REUSS, ZABLOCKI, JOHNSON, KASTENMEIER, and FLYNN. There is no better or harder working Senator than BILL PROXMIRE. He has become the conscience of the Senate just as not so long ago Bob La Follette fulfilled this role for his State and Nation. Yes, the Wisconsin Democratic delegation are legislators of whom we may all be proud. They are men of principle fighting for those liberal ideals which we hope and know will become the policy of the new Democratic administration in 1961.

Milwaukee is, of course, a fitting place to talk about the problems of foreign policy. Here, in such plants as Allis-Chalmers, machinery is built which is used around the world. Machinery which has aided the underprivileged of this world to build homes in place of hovels, roads in place of paths, and factories in place of sweatshops: machinery which has resulted in cultivation of crops in areas where there were no crops. The world has much to thank Milwaukee for, and everyone thanks Milwaukee except the old Boston Braves fans.

In the future as a result of the St. Lawrence Seaway, Milwaukee will take on even added significance in its role as a world city similar in importance to Paris, New York, and Rome.

I am here today to talk about one of my favorite topics. And that is, how the average citizen in this country can participate in decision making in an era when it appears that the important decisions of public policy are vested more and more in the hands of a few. This is a tremendous problem and unless we as citizens of this country solve this problem, we will have, through laxness, indifference and irresponsibility, lost the most prized possession that a democracy can bestow on its citizenry—the right to be heard, to be listened to, and to affect the decisions of its Government.

We cannot allow a few men the right to decide the issue of peace or war,

We cannot allow a few men the right to decide the issue of atom bomb testing,

We cannot allow a few men the right to continue outmoded 19th century colonial policies toward the people of Asia and Africa.

In this past year we have gone from brink to brink on the international front. In June of 1958, American troops were sent to Lebanon. In October of last year Mao Tse Tung and Chiang Kai Shek had us trapped in a Chinese puzzle box called Quemoy and Matsu, a box which could have become the world's casket. Now we are involved in an even more difficult crisis—the Berlin question with all of its attendant problems, such as German reunification, the problem of NATO, and the arming of West Germany with nuclear weapons. Any one of these problems can lead to world war. And make no mistake about it, the present Berlin question, if handled carelessly, dogmatically, and without imagination or knowledge of what our objectives are in Europe, could very well involve us in a world war—a war which will not be limited if nuclear weapons are used. A war that could, if not destroy the human race, return humanity to precaveman days. The stakes are high. The issues are great.

No one can disassociate himself from politics. Every citizen in this country must commit himself to politics. That is why it is more important than ever that each and every citizen fight to make his opinion felt in the public arena. That is why rational discussion about public issues is more important than ever. That is why there must be a full scale debate on the floor of both Houses of Congress on issues such as the Berlin crisis and nuclear bomb tests.

But it is not only in those hallowed Halls that there should be fuller discussion—and I am sad to report that there has not been fuller discussion—there should be fuller discussion in our universities, colleges, and churches. Let us for a moment take the Milwaukee area. Milwaukee is blessed with a number of great educational institutions, among them Marquette University and the University of Wisconsin. These universities should hold open debates on the great ideological and moral problems that nuclear science and communism have brought in our time. Thus, in this city could there be the beginning of the great dialog our beloved Adlai Stevenson talks about. These meetings must not be one-shot haphazard affairs; they must be part of a determined campaign by the Milwaukee Journal, the University of Wisconsin, Marquette University, the AFL–CIO, the chamber of commerce, and all church groups to work together jointly to create the atmosphere for debate and discussion. They must be wide-ranging discussions such as the role of the military in our foreign policy, nuclear testing, what should be our attitude toward Communist nations, the question of Red China. These are questions that should be talked about all over this country, not in television commercial terms but in terms of rational, serious comprehensive discussions. I assure you that your representatives in Washington follow all public discussions and public sentiments with interest. It is your job to create something that these men can listen to. Congress not only needs consent from the governed—it needs direction from the governed.

Finally, in considering the citizen's role in foreign policy, we should attract men—and encourage our most brilliant minds to speak out on issues of foreign policy. If possible, we should attract them into government. These men should be allowed to seek truth wherever they think they can find it. And, just as important, they should be allowed to speak the truth as they see it. If any of you have ever been in an organization, you will know how difficult this is to do.

We as citizens must destroy any ill-conceived notions or time-honored prejudices about the people in Asia and Africa.

We as citizens must think of them as fellow human beings who we must aid and accept just as we aid and accept our next door neighbor.

We as citizens must be tolerant of people in other lands.

We must give aid to all emerging nations in their struggle for freedom and material well-being, for if we do not, communism will conquer these areas without firing a single shot.

We as citizens should know that in complicated international situations one side has never had, nor I daresay ever will have, a complete monopoly of the right, and the other side a complete monopoly of the wrong.

We as citizens must encourage greater contacts between people on more than an official level. It is in this way that we will better be able to understand our neighbors.

We as citizens should train ourselves to keep our heads in time of crisis. For if we do not do this during this period of history we shall never have to worry about keeping our heads during any other future period.

The citizen must encourage and demand from his Congressman that he speak out on foreign policy issues.

In this most difficult of times the discouraging fact is that there is no leadership in foreign policy in the administration. This very fact puts a heavy burden on Congress. Because of this lack, you as citizens have the right to demand of your Congress that it take a more creative role in foreign policy. The public is bewildered. It has been stunned into apathy by this administration's futile foreign policy. Therefore, it is incumbent on the Congress to carry a good share of the responsibility for informing the public and offering constructive alternatives to an administration that is completely bewildered and confused. The average Congressman is reticent about speaking on foreign affairs; unless he knows that his constituency demand it of him. The Congressman in foreign affairs is as informed and aware as his constituency demands him to be.

And finally, the citizenry must keep vigilant and demand of its Government that insofar as is possible, and this means almost all the way, the Government take its people into its confidence about the matters of foreign policy. The people should never forget that government is a creature of the people and not the people a creature of the government. Because of this, upon every citizen in this country rests the responsibility of achieving the goal of peace, freedom, and justice. This is the price that a citizen must pay in a free nation. Thank God, that because we have a free Nation, we have the chance to pay such a price.

H.R. 5549, To Amend the Garnishment Laws of the District of Columbia

EXTENSION OF REMARKS
OF
HON. ABRAHAM J. MULTER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, March 16, 1959

Mr. MULTER. Mr. Speaker, on Wednesday, March 11, I introduced H.R. 5549, to amend the District of Columbia code of laws relating to attachment and garnishment of wages.

The following is my statement before the House District Committee today in support of this measure:

STATEMENT OF REPRESENTATIVE ABRAHAM J. MULTER, DEMOCRAT, OF NEW YORK, BEFORE SUBCOMMITTEE NO. 3 OF THE HOUSE DISTRICT OF COLUMBIA COMMITTEE CONCERNING H.R. 835, H.R. 836, H.R. 2329, AND H.R. 5549, MARCH 16, 1959

Mr. Chairman, I appreciate the opportunity to present this brief statement in connection with the amendment of the District of Columbia code of laws relating to attachment and garnishment of compensation of judgment debtors.

H.R. 835, which you have before you, I believe is identical with H.R. 7035 of the 85th Congress. Both bills were introduced by our distinguished chairman, Mr. MCMILLAN, of South Carolina.

H.R. 835 limits attachments of compensation to 10 percent of the judgment debtor's gross earnings. Obviously this is a marked improvement over existing law.

H.R. 836, I think, is the much better statute because it provides for a 10 percent levy on the first $200 a month of earnings, 20 percent on the next $300 of earnings, and 50 percent of any earnings in excess of $500 per month.

H. R. 2329, introduced by our distinguished colleague from Texas [Mr. DOWDY], prohibits attachments on debtors' compensation. This, I hope the committee will agree, would be a step in the wrong direction.

My bill, H.R. 5549, takes all of H.R. 836 and then adds on to it additional provisions. It is my hope that, regardless of whether the committee goes along with the provisions of H.R. 835 or H.R. 836, it will add as an amendment to whichever bill is reported, the additional provisions of my bill.

I have lifted these provisions bodily from the New York State statute which has worked extremely well since the date of its enactment many years ago. Briefly, what it does is simply this. In addition to the statutory provision permitting a garnishment or attachment of up to 10 percent of the gross earnings of a debtor, as permitted by New York law, any judgment creditor may apply to the court for an order requiring the debtor to pay out of his earnings an additional sum over and above the amount of the garnishment. It does more. It permits the court, upon determining the facts, to require payments by a judgment debtor who, while actually working and earning compensation, pretends to be working for nothing or for unreasonably small compensation for an employer who actually is himself under the guise of a corporation or the business of a friend or relative.

At first blush it would appear that this will load the courts down with additional litigation. In practice it has had the opposite effect in New York. Debtors there have learned that they cannot make themselves judgment-proof and prevent the collection of just debts by doing business under corporate names and paying themselves low salaries, nor can they any longer establish in the name of or transfer to friends and relatives businesses which are actually their own. Upon establishment of the facts, the court is permitted to go behind the shell or color of the transaction and fix a sum to be paid by the debtor commensurate with his earnings and his needs. In cases where the debtor is working for substantial compensation the court has a right to determine how much he needs for the maintenance of himself and his dependents and then fix a fair sum payable out of the excess that he earns, to be paid by him to a judgment creditor.

Knowing that the creditor has these judicial proceedings available to him, the debtor invariably works out a fair settlement with the creditor outside of the courtroom.

I respectfully urge the committee to add the provisions of my bill to any bill that it reports.

Thank you for the opportunity to present this statement.

The Steel Companies and Inflation

EXTENSION OF REMARKS
OF
HON. GEORGE S. McGOVERN
OF SOUTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES
Monday, March 16, 1959

Mr. McGOVERN. Mr. Speaker, I am becoming increasingly alarmed by the so-called administered price practice of leading industrial corporations. This is the practice under which corporations raise prices even in the face of falling demand and reduced output. I am convinced that unreasonable administered price increases by the steel industry, particularly, have been a major cause of both the recent recession and our present inflation. This is the reason for the paradox of recession and inflation.

Following the strike settlement of 1956 which gave steelworkers a wage increase of approximately 19 cents an hour including fringe benefits, the steel companies upped their prices $8.50 per ton. This was done in spite of the fact that wage increase had cost them only about $2.50 per ton. Yet, 6 months later they added another price increase of $5 per ton and followed with a third increase of $6 per ton in July 1957. Thus, a wage increase costing the company $2.50 per ton was used as an excuse to raise steel prices an unbelievable $19.50 a ton.

In 1956 United States Steel sold 23 million tons of steel for a net profit of $348 million, but when their production declined 2 percent in the following year, profits rose to $419 million, an increase of 20.4 percent.

United States Steel's net profit per ton in 1957 was $17.91 compared to $14.56 in the previous year. The tremendous profit increases in the industry are better realized when one considers that in the decade of the 1940's, excluding the war years, the average steel profit was only $6.78 per ton.

Given the brazen price-gouging practices of the big steel companies, it is not surprising to learn that the directors of these great corporations have compenstated themselves in a most handsome manner. In 1955 the 16 directors of Bethlehem Steel voted the tidy sum of $5,683,709 to be divided among themselves. Net profits of the corporation that year were $180 million. The following year, the profits of the corporation dropped by $19 million, but the directors saw fit to increase their own personal share of the take to $6.5 million, an increase of $882,618 over the previous year. Little wonder that of the 18 highest paid men in the Nation, 11 were directors of Bethlehem Steel.

In commenting on this situation, the Senate Judiciary Subcommittee on Antitrust and Monopoly said:

> An average compensation to each officer-director in a steel company of $468,000 in 1 year acts as a challenge, a red flag, to labor unions and individuals to seek all they can. And it is difficult to persuade labor to hold a wage line when it knows the generous manner in which officer-directors compensate themselves.

Mr. Speaker, I am convinced that the basic cause of inflation is the administered prices of the biggest industries combined with the endless round of wage increases which such price practices cause.

It seems to me that Congress and the administration must take effective action to correct this dangerous threat to our economy. I have introduced legislation which is designed to bring the force of public opinion to bear on this problem by requiring huge corporations to justify proposed price increases in public hearings before the Federal Trade Commission.

I am entirely in accord with the suggestion by Senator KEFAUVER that consumers should use every resource including their pencils to urge steel industry and labor union leaders to hold the line against further wage-price increases at this time.

We all know that every time steel prices jump, the cost of automobiles, farm machinery, refrigerators, washing machines, and countless other items also jump. The combine which cost the farmer $4,500 10 years ago now costs $9,000. Labor and management each blame the other for price increases, and the consumer is caught in the middle. In the long run labor and industry cannot profit from this continuous wage-price spiral which has already had the effect of slowing down our rate of production and putting nearly 5 million people on the unemployment rolls.

Inflation is a threat to every family, but it is especially painful to older persons and white-collar workers living on fixed incomes. It has hit hardest of all our farm families who since 1952 have experienced a 20-percent drop in the prices of what they have to sell while the cost of what they buy has gone up $3.7 billion. It is no accident that 4 million people have left the farms of this Nation during the 5 years following 1952.

Thanks to the cost-price squeeze that grips our farm population, net farm income dropped from $15.1 billion in 1952 to $10.8 billion in 1957.

Mr. Speaker, Bernard D. Nossiter, of the Washington Post, has done a remarkable job in reporting on the problems of inflation and administered prices. I call to the attention of the Congress his article appearing in the Washington Post of March 14, 1959, which I include at this point in the RECORD:

INFLATION LAID TO STEEL FIRMS

(By Bernard D. Nossiter)

An investment adviser yesterday blamed the recent inflation and recession on profit-minded executives of steel companies.

Eugene Havas drew this conclusion for the Senate Antitrust and Monopoly Subcommittee.

His views about the importance of steel price increases have drawn partial or full support this week from a wide spectrum of economists. Among them were Raymond J. Saulnier, chairman of President Eisenhower's Council of Economic Advisers; John Kenneth Galbraith, of Harvard, a key adviser to Adlai Stevenson; Woodlief Thomas, economic adviser to the Federal Reserve Board; Gardiner Means, former New Deal economist and author of the administered price theory; and Ralph Young, Research Director for the Federal Reserve Board.

Havas said:

"The steel companies are overtaxing our economy and are responsible for the 1957–58 recession for choking off demand by their price exactings since 1955–56."

Havas said that holding the steel price line was not enough, that steel prices must be rolled back. This, he said, would revive the choked off consumer demand, would relieve unemployment, and would help to find jobs for most of the unemployed of automation.

Havas said the steel company executives had a vested interest in pushing up prices because this pushed up profits. And, he observed, as profits go up, Wall Street puts higher prices on companies' stock. The executives, Havas noted, cash in on this by giving themselves stock options. Thus, the steelmakers can buy their companies' stock at a price far below its market value, sell it and get taxed no more than 25 percent.

In the case of United States Steel Corp., the industry's price leader, Havas said that net profits divided by total shares of stock jumped from $2 in 1948 to $7.33 in 1957 and fell to $5.13 in the slump last year. Currently, per share earnings of United States Steel are estimated at record levels. Meanwhile, the stock has jumped in price from a low of $10.12 in 1949 to a high this year of $99.87.

According to United States Steel's forthcoming annual report, some 258 executives have this prospect—because of stock options outstanding on January 1: They can make a few calls and divide about $19,300,000. And this income of about $75,000 per man is subject to a top tax rate of 25 percent.

Roger M. Blough, whose option claims are considerably higher than the average $75,000 because he is Steel's board chairman, could not be reached for comment on Havas' analysis. Blough's New York office said he was not available.

Havas suggested lowering top bracket personal income tax rates to 75 percent and introducing a graduated corporate excess-profit tax to dampen the increasingly popular stock option device.

Because stock prices and prices generally are driven up, he observed, investors don't want bonds, including the Government's, with their fixed return and price.

Moreover, in the past 7 fiscal years, Havas said, the Treasury has lost $46 billion in taxes it would otherwise have collected because of tax loopholes for corporations.

All these devices, Havas said, make it virtually impossible for the steel companies and other corporations to resist union requests for wage increases.

However, the harassed steel industry finally came up with a defender at the hearings. He was Simon Whitney, chief economist for the Federal Trade Commission. Whitney decried the emphasis on steel because, he said, it accounted for only 3.5 percent of the Nation's total 1957 output.

Whitney blamed price increases on wages and said big steel and auto corporations should not be broken up. His agency is charged with safeguarding the public from monopoly.

John Blair, chief economist for the subcommittee headed by Senator ESTES KEFAUVER, Democrat, of Tennessee, analyzed the price-profit-wage picture. He noted that—

Between 1953 and 1957, the wholesale price per ton of steel went up 30 percent. But the payroll cost of production workers per ton of steel went up 14 percent or less than half.

So, for United States Steel, after-tax profits per ton jumped from $7.47 in early 1953 to $19.31 at the end of 1958. Moreover, steel production was going full blast in early 1953 and was running at about three-quarters of capacity at the end of 1958. Profits went up nevertheless because the industry has become much more efficient through the use of laborsaving machinery.

From the end of 1957 to the end of 1958, productivity, or tons shipped per worker, has jumped 7 percent. As a result, even though the industry is now nearing full production, it is doing it with far fewer workers.

Commemoration of the 20th Anniversary of Slovak Independence

EXTENSION OF REMARKS

OF

HON. JOHN R. PILLION

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 16, 1959

Mr. PILLION. Mr. Speaker, it is a distinct privilege for me to add my small voice to the growing demands for freedom on the part of the millions of Slovaks and other nationalistic groups who are being kept in a captive status under the Soviet Communist rule.

Although Premier Nikita Khrushchev continues to boast of the military strength and the economic advances of the Soviet, he fails to recognize that this apparent strength is based upon a compulsive labor economy that is held together by fear, by military tanks and guns, and by the cloak, spy, and dagger machinations of the select Communist Party membership and leadership.

I am sure that the spirit and the desire for freedom on the part of the Slovak people cannot be quenched and will continue to grow. The nationalistic spirit and the desire for freedom on the part of millions of people under the domination of the Soviet Socialist Republic will continue to be a fatal weakness in the miscalculations of Mr. Khrushchev and his Politburo.

I join with the Slovak League of America in their celebration of the 20th anniversary of Slovak independence on March 15, 1959. I join with the 2 million Americans of Slovak origin in their aspirations for the liberation of the Slovak peoples.

A Congressional Report—Private Enterprise and the "Ruble War"

EXTENSION OF REMARKS

OF

HON. HALE BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 16, 1959

Mr. BOGGS. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

A CONGRESSIONAL REPORT—PRIVATE ENTERPRISE AND THE "RUBLE WAR"

(By Representative STEWART L. UDALL)

If there is no thermonuclear war, it is likely that the whole future balance of world power will largely depend on what has been called "the ruble war"—the struggle for supremacy between the two dominant economic systems in the world today.

Nearly one-third of the world's people have achieved independence during the last 15 years. Of course, these people want above all to establish stable governments and develop economic systems which will improve their lot.

The Kremlin is already bidding for the minds of these people by ruble loans, offers of trade, and mission of technicians who invariably speak the language of the host country and are ready with resource development programs.

The central question, then, may well be whether these nations believe our way, or that of the Communists, offers the best hope for a decent standard of living and the solution of their problems.

To date, the free world countries are offering economic assistance at two counters: Hard loans through the World Bank; and soft loans (repayable at low interest rates over long periods of time) from the Development Loan Fund administered by our Government as part of the foreign aid program. The Loan Fund, established by the last Congress, has yet to establish a history that will permit us to pass judgment on its adequacy, but it is already clear that insufficient development capital is available to underwrite the bare minimum economic growth rate required.

Some students of history point out that the strength of the British Empire last century was due, in part, to the fact that the British businessmen of that era were adventurous exporters of capital—both within and without the Commonwealth. Some of us have been wondering here whether America should not take a cue from the British, and encourage American private enterprise to carry its know-how abroad and help build up the economies of the underdeveloped areas.

Congressman HALE BOGGS of New Orleans pointed out to Congress this year that our foreign investment policy actually discourages expansion by private enterprise abroad. He believes our tax laws should be reconstructed to encourage foreign risk capital as an essential part of our long run national security program.

Last week I joined with Representative Boggs in sponsoring a bill designed to drastically revise these laws. This legislation would enable private enterprise to do business in foreign countries on a competitive basis with investors from other countries (through a new class of foreign business corporations). If enacted it should galvanize our business leaders toward meeting the Soviet challenge on the economic front by conferring tax advantages on earnings abroad. Its success would make it possible to substitute private investment for some kinds of foreign aid, and thus encourage a new American program of economic aid.

It seems to me that we have become preoccupied with the military race with the Communists, and have neglected competition in economic fields where the ultimate test may come.

Who can say that our businessmen might not hit a homerun in the "ruble war" if we gave them an inning at bat? Indeed, why not give them a chance now?

American Legion's 40th Anniversary

EXTENSION OF REMARKS
OF
HON. THADDEUS J. DULSKI
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, March 16, 1959

Mr. DULSKI. Mr. Speaker, under leave to extend my remarks, I wish to insert in the RECORD an address to my fellow Legionnaires on the occasion of the American Legion's 40th anniversary:

Fellow Legionnaires, this occasion marks an important date in the history of our organization. Forty years ago today the American Legion came into being at caucuses of the first American Expeditionary Force held in Paris on March 15–17, 1919. We do not meet here to boast or cast bouquets at ourselves—we leave that to others—but it is only proper that we should remind ourselves, more than a generation and two world wars intervening between the founding of our organization and the present that (I quote from the "Brief History of the Legion" prepared by the national headquarters in Indianapolis) today, 40 years after its inception, the American Legion is "the only major American veterans' association which was formed overseas by fighting men and women. It includes more combat veterans, more disabled veterans, more winners of the Congressional Medal of Honor and other decorations than all other veterans' organizations combined."

There has never been anything like it in American veterans' history save only the Grand Army of the Republic: In its scope and influence the American Legion is to the 20th century what the Grand Army was to the preceding one, but we flatter ourselves that our own legislative history is a bit more savory than that of the older organization which flourished in the heyday of what might be termed the lush era of log-rolling and back-scratching. It reached an all-time high in the first administration of Grover Cleveland when it ran headlong into that formidable and entirely immovable character. Here are two or three examples of the pension bills of Civil War veterans with which Mr. Cleveland had to deal by the hundreds, if not the thousands, back in 1886. One claimant had fallen over a fence with absolutely no injury to his person; but he was a veteran and therefore, on the strength of this shocking calamity, must have a pension. Another demanded a life pension because he had hurt his ankle while intending to enlist. Still another had broken his leg while gathering dandelions long after the war. And so forth and so on. For such claims the Grand Army of the Republic fought with a zeal and valor worthy of a better cause. In contrast to such preposterous goings on, the record of the American Legion in respect to needy veterans offers a bright and lustrous page of solid, enduring achievement. For our legislative record, State and national, we need apologize to none. Our contributions to hospitalization, education, and all manner of public welfare where we can with propriety act, stands, and speaks for itself. But all this is as well known to you as to myself.

It is, however, a great pleasure and satisfaction merely to rise and remind you of that splendid record which first began to be written 40 years ago. May we, one and all, everywhere in this beloved land of ours, continue the good work so proudly begun many years ago and so faithfully and stanchly maintained ever since. May we ever live up to and be worthy of the title of our organization—the American Legion.

The American's Creed: A Summary of the Fundamental Principles of American Political Faith as Set Forth in Its Greatest Documents, Its Worthiest Traditions, and by Its Greatest Leaders

EXTENSION OF REMARKS
OF
HON. FRANCES P. BOLTON
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Monday, March 16, 1959

Mrs. BOLTON. Mr. Speaker, it is significant that "The American's Creed," selected from more than 3,000 statements submitted by Americans from every walk of life, should have been written by a man who at 13 years of age came to work as a page boy in the Capitol of the United States, and stayed on to serve the Members of the House in increasingly important capacities for 61 years. That man was William Tyler Page. At the time of his death in 1942 he was minority clerk of the House of Representatives.

The story of "The American's Creed," how it came to be our national creed, something of its doctrinal origins, and what Members of Congress have said about it, is fascinatingly told by Myrtle Cheney Murdock in her new book, "The American's Creed and William Tyler Page." The author is the wife of the Honorable John R. Murdock, for 16 years a Member of this body from the State of Arizona. Mrs. Murdock, educator, lecturer and writer, has been an official guide in the Capitol Building since her husband's retirement in 1952. Her knowledge of the Government of the United States, her love and appreciation for the Capitol Building and its history, have made her an invaluable friend of the Members of both House and Senate.

Mrs. Murdock was uniquely fitted to write about the American's Creed. She knew William Tyler Page personally, and had drawn from him the hitherto untold story of how the idea of summarizing our basic principles into a brief 100-word creed unfolded in his thinking. He told her of his pride at having worked in the Capitol Building for so many years. He told her he had set aside 1 day each year, Independence Day, to read and reread our great American documents. This systematic study of the Declaration of Independence, the Constitution of the United States, Washington's Farewell Address, Lincoln's Gettysburg Address, the writings of Jefferson, Madison, Hamilton, and other of our Founding Fathers, made him a profound student of the fundamental principles of American political faith as set forth in these documents.

The late Daniel A. Reed, our beloved colleague from the State of New York, came to Congress soon after "The American's Creed" was accepted in 1917. He sensed the true meaning of Mr. Page's effort when he said:

Crystallized within this patriotic creed is the very spirit of a free people. It breathes freedom in every word. This great document has entered the sacred archives of our Republic as a worthy companion of the Declaration of Independence and the Federal Constitution.

At this point in the RECORD, Mr. Speaker, I should like to quote "The American's Creed" as given to us by Mr. Page.

THE AMERICAN'S CREED

I believe in the United States of America as a government of the people, by the people, for the people, whose just powers are derived from the consent of the governed; a democracy in a Republic; a sovereign Nation of many sovereign States; a perfect Union, one and inseparable; established upon those principles of freedom, equality, justice, and humanity, for which American patriots sacrificed their lives and fortunes.

I therefore believe it is my duty to my country to love it; to support its Constitution, to obey its laws; to respect its flag, and to defend it against all enemies.

Mr. Speaker, our national patriotic organizations have been untiring in their efforts to keep "The American's Creed" alive. We in the Congress of the United States have an opportunity and a responsibility to see that the creed and the inspiring story of its conception is introduced into the schools and libraries of our respective States. Along with many of my colleagues, it has been my practice for some years to present parchment copies of the creed to each graduating student of the high schools in my district. Other Members may have utilized the creed in even more effective ways.

I was gratified to receive a gift copy of Mrs. Murdock's book, "The American's Creed and William Tyler Page," this past week. I am happy to know that she has presented a copy to every Member of the Congress. This and other books written by Mrs. Murdock are on sale in the House stationery room at discount prices to the Members. Her books about Washington are: "Your Uncle Sam in Washington," "Your Memorials in Washington," "Constantino Brumidi, Michelangelo of the United States Capitol," "National Statuary Hall in the Nation's Capitol."

Low Farm Price Supports and Their Effect on Surpluses

EXTENSION OF REMARKS
OF
HON. W. R. POAGE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, March 16, 1959

Mr. POAGE. Mr. Speaker, at another point in the RECORD, my friend, Hon. PAUL JONES, has inserted a clipping from the Washington Post, which contained a letter by Mr. Joseph Alsop. I, too, had asked that this article be inserted, but Mr. JONES' request preceded mine. In that letter Mr. Alsop points out his dissatisfaction with policies of the present Secretary of Agriculture and cites his reasons.

While I have, from the very day when Mr. Benson turned his back on Candidate Eisenhower's Kason and Brookings promises, expressed my disagreement with his low support philosophy, it has only been recently that the public has come to realize that this Benson policy has failed completely. Farmers have long realized that it has reduced the average income of farm people to one-half that of nonfarm people even while the Secretary was talking self-righteously about the great increase of per capita farm income in 1958. This was largely due to the great movement of farm families to the cities.

Most people have, however, completely overlooked the fact that Mr. Benson's policies have resulted in cost far and away beyond anything ever experienced under the much higher rigid supports of previous administrations. The public is just now beginning to recognize that flexible supports, which were advanced to save money for the taxpayer and to reduce our surpluses have failed to do either. The cost of operating the Department of Agriculture is today just about four times what it was under Mr. Benson's predecessor, and the surpluses on hand have grown so that the President tells us that it will soon cost a billion dollars a year just to store them.

Mr. Alsop brings out this with his usual clarity. He says:

> I myself was a strong supporter of Secretary Benson when he took office. Like many others, I supposed that he had the determination and the courage to remove the anomalies of the earlier, Democratic farm program. I am only ashamed that it took me so long to notice that Benson's long suit was pious talk rather than positive performance. His efforts to remove past anomalies and extravagances have in fact produced even greater present anomalies and extravagances.

Again he states:

> He has permitted the total cost of the farm program to double and then triple, while prating about economy.

Mr. Speaker, I believe a word of explanation is in order. Mr. Benson's policies seem quite consistent to most people who are not acquainted with farming in one-crop areas—the areas in which most of our surpluses are produced. Mr. Benson says that if you drop the support price on any commodity that farmers will next year quit growing that commodity. That sounds reasonable, but it simply does not work out that way.

Doubtless, Mr. Benson believes his assumption to be true, but I ask you to place yourself in the position of a cotton farmer who has been growing 10 bales of cotton—above the average—and getting $160 per bale—about what he got last year. This meant your gross income from cotton was $1,600. And in most of the Cotton Belt that is no comparable cash crop to which you can turn. Suppose now that Mr. Benson can prove that you as a cotton farmer will, next year, get only $80 per bale. What would you do? I think it is clear that in the absence of controls, you would try to grow 20 bales. This is the only way you have of maintaining income. It is the only way most farmers who grow our basic crops have of supporting their families. Therefore, when confronted with lower supports, farmers grow more, not less.

This is exactly what farmers always try to do. Our largest cotton crop was grown when support prices were only 52 percent of parity. According to the Secretary, we should have imported cotton that year. When cotton supports and prices went up, the pressure was off and farmers grew less, even when there were no controls.

For low prices to reduce production they must be so low and continue so long that they force farmers off the farm.

Mr. Benson seems perfectly willing to use this drastic starvation method of moving farming operations into larger and larger units. Fundamentally, this is the real farm problem. Do we want more farmers forced into town to compete on an already overfilled labor market? Do we want to aggravate industrial unemployment, and place a still further burden on our already overtaxed relief rolls? Do we want our farms to become rural factories owned by absentee corporate operators? Will such a situation help any substantial group of our citizenship? Will it give us cheaper food? Will it give greater purchasing power with which to buy the products of our factories? Will it help us to maintain that unyielding opposition to communism which all over the world has had its roots on the farm?

May it not well turn out to be as poor a long-time investment as Mr. Benson's administration of the Department of Agriculture has turned out to be on a short-time basis? These, Mr. Speaker, are some of the very real questions involved in the farm problem.

Finally, Mr. Speaker, that all may see the record and evaluate it for themselves, I include some tables prepared by the staff of our Committee on Agriculture just about 1 week ago. I believe that it is fair to state that these figures show that never has so little been accomplished with so much:

FARM FACTS AND FIGURES

Total realized net income of farmers after deducting agricultural production expenses from the total cash income from farm marketings:

Last 6 years:	
1953	$13,899,000,000
1954	12,201,000,000
1955	11,470,000,000
1956	12,111,000,000
1957	10,840,000,000
1958	13,060,000,000
Total	73,581,000,000
Six previous years:	
1947	17,304,000,000
1948	16,057,000,000
1949	13,789,000,000
1950	13,185,000,000
1951	15,158,000,000
1952	14,416,000,000
Total	89,909,000,000

During the last 6 years farmers marketed 15 percent more food and nonfood products than in the 6 preceding years, 1947–52 inclusive. Had farmers been paid for the larger volume of food and nonfood products marketed in the last 6 years at the same rate as in the 6 immediately preceding years their net income in the last 6 years would have been $96,700 million, which is $23,109 million above what they actually received. If farm prices, instead of declining, had increased in proportion to all other prices during the last 6 years, then the income of farmers would have been much greater than $96,700 million.

Appropriations for the Department of Agriculture

Last 6 years:	
1954	$1,782,300,000
1955	2,026,500,000
1956	1,601,900,000
1957	3,583,100,000
1958	6,870,900,000
1959	[1] 5,888,600,000
Total	21,753,300,000
Six previous years:	
1948	1,224,500,000
1949	1,183,500,000
1950	1,503,800,000
1951	1,375,900,000
1952	1,817,800,000
1953	1,510,400,000
Total	8,615,900,000

[1] Estimate. Actual expenditures in fiscal 1959 now estimated at $7,341,000,000.

NOTE.—Appropriations are for fiscal years. Appropriation bill of 1952 covered period of July 1, 1952, through June 30, 1953.

Farm price-support losses—(Commodity Credit Corporation)

As of Jan. 1, 1953	$1,064,617,225
As of Jan. 1, 1959	5,853,292,744

NOTE.—The losses in 6 years, from January 1953 through 1958, were more than 4 times the total of losses during the previous 20-year history of Commodity Credit Corporation price-support operations.

20-year loss (1933–52)	$1,064,617,225
6-year loss (1953–58)	4,788,675,519

CCC price-support operations for basic crops only—(wheat, corn, cotton, tobacco, rice, peanuts)

To Jan. 1, 1953 (at end of 20 years) (profit)	$13,011,290
To Jan. 1, 1959 (6 years later) (loss)	2,528,607,297

NOTE.—The CCC price-support program for cotton, over 20 years, showed a profit of $268 million. But this profit has been wiped out, by cotton program losses of approximately $850 million during the last 3 years.

Losses on dairy products

Up to Jan. 1, 1953	$132,523,383
Since Jan. 1, 1953 to Jan. 1, 1958	1,511,038,079
Dairy program total losses	1,643,561,462

CCC investments

Total CCC investments (inventory and loans) as of Jan. 1, 1953	$2,452,000,000
Total CCC investments (inventory and loans) as of Jan. 1, 1959	8,716,071,000

CCC investments in major crops

[Inventory and loans]

Crop	Unit	Amount	Value
Cotton:			
Jan. 1, 1953	Bales	1,097,000	$166,779,000
Jan. 1, 1959	do	6,564,000	1,092,991,000
Wheat:			
Jan. 1, 1953	Bushels	267,847,000	1,081,545,000
Jan. 1, 1959	do	1,250,919,000	3,057,506,000
Corn:			
Jan. 1, 1953	do	368,349,000	587,274,000
Jan. 1, 1959	do	1,416,534,000	2,351,273,000
Rice:			
Jan. 1, 1953	Hundredweight.	168,000	878,000
Jan. 1, 1959	do	13,719,000	92,980,000
Peanuts:			
Jan. 1, 1953	Pounds	192,528,000	22,644,000
Jan. 1, 1959	do	287,208,000	30,647,000
Tobacco:			
Jan. 1, 1953	do	544,067,000	250,373,000
Jan. 1, 1959	do	966,661,000	621,137,000
Dairy products:			
Jan. 1, 1953			8,445,000
Jan. 1, 1959			62,612,000

Farmers (1952 and 1958)

	1952	1958
Farmers' net income (billions)	$14.4	$13.06
Farmers' share of food dollar (cents)	47	40
Prices paid by farmers, index (percent of 1910–14 average)	287	293
Prices received by farmers, index (percent of 1910–14 average)	288	250
Parity ratio	100	85
Number of farms	5,421,000	4,750,000
Farm population	24,283,000	20,800,000

COMPARISONS (1958)

Per capita income

People on farms	$1,068
Nonfarm people	2,034

Hourly earnings

Farm workers	$0.757
Factory workers	2.13

FARM PRICES AND INCOME

Average of farm prices in 1958 down 13 percent from 1952. Net form income in 1958 was 9 percent below 1952.

CONTRAST

Hourly earnings industrial workers in 1958 up 28 percent since 1952. Corporation dividend payments in 1958 up 37 percent since 1952.

Farm prices (as percentage of parity)

	Percent
1942	105
1943	113
1944	108
1945	109
1946	113
1947	115
1948	110
1949	100
1950	101
1951	107
1952	100
1953	92
1954	88
1955	84
1956	83
1957	82
1958	85

Cash receipts of farmers (not including Government payments)

1932	$4,748,000,000
1947	29,620,000,000
1948	30,227,000,000
1951	32,958,000,000
1952	32,632,000,000
1955	29,556,000,000
1956	30,539,000,000
1957	29,757,000,000
1958	33,206,000,000

Net income of farmers (including Government payments)

1932	$1,928,000,000
1947	17,304,000,000
1948	16,057,000,000
1951	15,158,000,000
1952	14,416,000,000
1955	11,470,000,000
1956	12,111,000,000
1957	10,840,000,000
1958	13,060,000,000

National income

1932	$43,049,000,000
1948	210,098,000,000
1951	253,304,000,000
1952	268,805,000,000
1955	302,493,000,000
1956	320,024,000,000
1957	333,856,000,000
1958	333,863,000,000

CONSUMERS

During the quarter of a century the farm program has operated the consumer has gotten better food at an expenditure of a smaller part of his income. Although costs of hauling, processing, handling, and merchandising food have increased substantially in the last few years, the average wage paid to factory workers in the United States would buy in 1958 almost twice as much food as the average hour's pay in 1929.

Consumers: Quantities of foods purchased by 1 hour of factory labor

	In 1929	In 1958
Bread—loaves	6.4	11.0
Steak—pounds	1.2	2.0
Milk—pints delivered	7.8	16.8
Butter—pounds	1.0	2.9
Bacon—do	1.3	2.7
Eggs—dozens	1.1	3.5
Potatoes—pounds	17.7	33.8
Oranges—dozens	1.3	2.8

Overhaul of Our Farm Policy Is Needed

EXTENSION OF REMARKS

OF

HON. LEONARD G. WOLF

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 16, 1959

Mr. WOLF. Mr. Speaker, under leave to extend my remarks I am introducing for the RECORD my sentiments regarding a letter that appeared in the Washington Post on March 14, 1959. This letter was written by the distinguished columnist, Joseph Alsop. He points out that the sincerity and religious conviction of Mr. Benson does not change the fact that he has been an inept Secretary of Agriculture who has created a farm surplus problem that is almost insurmountable. Mr. Alsop clearly implies that a complete overhaul of our farm policy is needed under the leadership of a new Secretary of Agriculture. I heartily concur with these remarks.

Reply to American Bar Association

EXTENSION OF REMARKS

OF

HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 16, 1959

Mr. CELLER. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include a letter addressed to the New York Law Journal in reply to a letter from the President of the American Bar Association addressed to me and published in the March 4 issue of the New York Law Journal. The text of my letter follows:

MARCH 10, 1959.

Mr. JUDSON F. FALKNOR,
Editor, New York Law Journal,
217 Broadway, New York, N.Y.

DEAR MR. FALKNOR: The March 4 issue of the New York Law Journal carried the text of a letter to me from President Malone of the American Bar Association, in which he challenged my criticism of the recent action by that organization on the report and recommendations of its committee on communist tactics, strategy, and objectives.

Mr. Malone maintains that the action of the house of delegates in approving a number of recommendations calling upon Congress to overrule by legislation certain decisions of the Supreme Court was a responsible expression of professional criticism. He further maintains that since the house of delegates specifically disclaimed any intention to censure or attack the Supreme Court, my statement condemning the ABA for maligning the Supreme Court was wholly unjustified.

As Al Smith used to say: "Let's look in the record." The recommendations approved by the house of delegates came before it as part of the report of its committee on communist tactics, strategy, and objectives. The essence of that report is that communism is a danger to the United States and that the Supreme Court is soft to Communists, has encouraged Communist activity, and has caused the paralysis of our internal security.

Let me quote directly from the report:

"Many cases have been decided in such a manner as to encourage and increase Communist activity in the United States."

The report goes on to say:

"The paralysis of our internal security grows largely from construction and interpretation centering around technicalities emanating from our judicial process."

Is this the temperate, reasoned, thoughtful approach to difficult problems which we have a right to expect from a convention of lawyers?

I think that it is not and I believe that Mr. Malone agrees with me. Last Friday, he and I appeared over the CBS network on "The Leading Question." I asked Mr. Malone whether he thought the report of the committee represented a fair and justifiable criticism of the Court. Mr. Malone candidly replied that he would not have written the report that way.

Aside from its tenor, the report is objectionable for several other reasons. First and most important, it is unconcerned with the preservation of individual liberties. Here and there lipservice is paid to constitutional

guarantees. But unfortunately the committee on communist tactics, strategy, and objectives, created to deal with the problems of communism, did not allow its thinking to become confused with any real concern for the effect of its solutions on civil liberties.

Secondly, the conclusion of the committee that the decisions of the Supreme Court in the 24 cases discussed in the report have paralyzed our internal security is totally unsubstantiated. Taken either individually or together, it is difficult to see how decisions like *Pennsylvania* v. *Nelson, Watkins* v. *U.S., Gold* v. *U.S., Kent* v. *Dulles* could destroy America from within. Rather, I feel that were it not for some of those decisions we might, in our search for complete security, have put ourselves well on the way to destroying ourselves.

Mr. Malone argues, however, that the ABA cannot be held responsible for the report of its committee, since the action of the house of delegates was only on the recommendations. While this distinction may have some relation to the niceties of ABA procedures, it has none to the realities of the situation. The fact is that it is the report which provides the reasons for the recommendations. It is the report which reveals the level of deliberation which produced the recommendations. And it is the rhetoric of the report which characterizes the ABA's attitude in the public mind and in the press. I believe that the report is no more separable from the recommendations than are the roots from the tree, and that the ABA must accept the unhappy responsibility for both.

Very sincerely,

EMANUEL CELLER, *Chairman.*

One Hundredth Anniversary of Brooklyn School

EXTENSION OF REMARKS

OF

HON. VICTOR L. ANFUSO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 16, 1959

Mr. ANFUSO. Mr. Speaker, not many private schools in the country can boast of an uninterrupted existence extending over a whole century. The Heffley & Browne Secretarial School in Brooklyn is now celebrating the 100th anniversary of its existence. The citizens of Brooklyn are very proud of this institution. On the occasion of this celebration, I have today forwarded the following letter of congratulations to Mr. George A. Klaum, the principal of the school:

MARCH 16, 1959.

Mr. GEORGE A. KLAUM,
Principal, Heffley & Browne Secretarial School, Brooklyn, N.Y.

DEAR MR. KLAUM: I note with a great deal of delight in your letter of March 9 that the Heffley & Browne Secretarial School is now celebrating the 100th anniversary of its existence and that it is the oldest school of its kind in the East.

You most certainly have much cause to be proud of this record of uninterrupted service to the community. Most noteworthy is also the fact that the school has graduated more than 100,000 students, many of whom are serving in important positions in the business world, in government, and in other fields of activity. This, in itself, is an accomplishment which deserves to be recorded on the occasion of your anniversary.

May I take this opportunity to extend to you, your faculty, staff, students, and graduates my congratulations and sincerest wishes for success and continued accomplishments. We in Brooklyn are very proud of this institution, its past achievements, and its influence to the good in the future. May you continue to help raise and to inspire many more generations of young Brooklynites for the task ahead and for the responsibilities required of them by our community. As you enter the second century of existence, may you find the going easier and the rewards greater.

Sincerely yours,

VICTOR L. ANFUSO,
Member of Congress.

Simpson-Keogh Bill, H.R. 10

EXTENSION OF REMARKS

OF

HON. JOHN P. SAYLOR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 16, 1959

Mr. SAYLOR. Mr. Speaker, among the progressive groups in the medical field are the Cambria County Medical Associations. Their sincere effort to keep themselves not only well informed on the latest advancements in their own field but also in allied fields is to be commended.

At the meeting of the Cambria County Medical Society in Johnstown, Pa., on Thursday, March 12, an invitation was extended to the Honorable RICHARD M. SIMPSON, ranking Republican on the House Committee on Ways and Means, to discuss the major legislation which would be considered by the present Congress.

Representative SIMPSON is the dean of the Pennsylvania Republican delegation and has been the chairman of the Republican congressional committee for several years.

However, Mr. SIMPSON, while a strong party man, has always placed the interest of his country first in attacking any problem. He is a man of strong convictions and one whom I am privileged to call a friend.

In view of the consideration of H.R. 10 by the House of Representatives today, I want to draw attention to the statement made by Representative SIMPSON in Johnstown last Thursday evening, and herewith include it as part of my remarks.

REMARKS OF THE HONORABLE RICHARD M. SIMPSON BEFORE THE CAMBRIA COUNTY MEDICAL SOCIETY, JOHNSTOWN, PA., THURSDAY, MARCH 12, 1959.

I am privileged to express appreciation for the honor that you have extended to me by your kind invitation to visit Johnstown this evening for the purpose of addressing the distinguished membership and honored guests of the Cambria County Medical Society.

When your capable and experienced Congressman, JOHN P. SAYLOR, asked me to come to Johnstown, he had planned to accompany me but other legislative duties have prevented him from being here. As the ranking Republican on the important House Committee on Interior and Insular Affairs, JOHN SAYLOR'S official duties have placed great demands on his time. You may be assured that if JOHN could have been here tonight, he would have been. He did ask that I convey his regret and he sent to you his warm greetings. As one who knows whereof he speaks, based on personal observation and association, I will categorically state to you that the 22d Pennsylvania District is fortunate to have a man of the stature and dedication to duty that JOHN SAYLOR brings to his responsibilities as your Representative in the Congress of the United States.

In addition to renewing acquaintanceships with the many old friends I have found in your presence and making the acquaintanceship of new friends, my purpose in being here tonight is to discuss with you a legislative subject that is of very genuine interest to all self-employed Americans and their families. Because it represents a matter of tax equity and tax principle, it should also be of interest to every American. I refer to what is presently denominated as the Simpson-Keogh bills, H.R. 9 and 10, legislation to provide deferment of tax liability on earned income from self-employment paid into certain defined retirement programs.

In the next few minutes I would like to present briefly some background information with respect to the proposal and then provide a general outline of the provisions and purpose of the current version of the bill. In parlance of the medical profession I will endeavor an analytical diagnosis as to the identity and then undertake a prognosis as to legislative prospects. I will not endeavor a technical discussion of the bill and I offer that to you as a solemn promise.

The importance of the need for the self-employed to provide for their retirement security is somewhat shockingly demonstrated by a study conducted in the spring of 1958 by the Bank of New York. That study indicated that fewer than 3 of every 10 self-employed taxpayers—by their own admission—now have a planned retirement program of any kind.

The genesis of the Simpson-Keogh proposal can, in my judgment, be traced to two basic causes.

The first of these is the steep progression of the existing individual surtax schedule. If we were blessed with a more modest surtax schedule that did not take one-fifth (20 percent) of a taxpayer's first dollar of taxable income, that did not begin to take one-half (50 percent) of his taxable income at $16,000, and that did not take more than nine-tenths (91 percent) of his taxable income in excess of $200,000, we would not today have the agitation for the type of tax equity proposed in the Simpson-Keogh bills. Thus, the first basic consideration bringing about the creation of this tax deferment idea is the onerous character—the confiscatory character, if you will—of the tax burden that is presently imposed on our citizens.

The second cause on which is based support for the Simpson-Keogh proposal is tax equity—equity that does not exist in the present tax structure with its discrimination against self-employed individuals who by law are not eligible to participate in employer-established qualified pension plans. Under section 404 of the Internal Revenue Code of 1954 an employer deducts as a cost of doing business amounts he pays into a qualified retirement program; the employee is not taxed currently on what his employer pays into the fund in his behalf, even though it is in the nature of additional compensation for his services. The employee is taxed only when he gets the money at retirement, as and when it is received.

The estimated 10 million self-employed persons in the United States, such as farmers, professional people, and shopkeepers,

cannot benefit from these tax-favored pension plans since technically they are not employees. It is in the interest of achieving tax equity and opportunity to provide for retirement security for these self-employed that we find the second basic cause motivating support for the Simpson-Keogh proposal.

The impact of these two causes—high taxes and tax equity—can be demonstrated by an examination of a hypothetical but not untypical case. Assume the case of a 40-year-old taxpayer who has a taxable income of $13,000 so that the top tax rate applicable is 40 percent. Assume also that he decides to set aside $1,000 each year until he reaches age 65 and assume an interest rate of 4 percent compounded annually.

The $25,000 of out-of-pocket savings which he would accumulate at the rate of $1,000 a year for 25 years on a tax-deferred basis would grow to $41,646 before taxes. If, on the other hand, tax deferment had not been allowed so that he was saving tax discounted dollars, his accumulation would amount to less than half as much, $20,717. The reason for the disparity in tax-deferred accumulation and tax-discounted accumulation is an obvious one. If tax deferment had not been allowed, his original $1,000 of annual saving would have been reduced to $600 that was left for investment; the investment rate is reduced to 2.4 percent instead of the assumed rate of 4 percent. The tax-deferred dollars would be fully employed at the full assumed rate of investment and would have the privilege of tax-free accumulation. Consequently their growth from year to year would be accelerated.

I would like to turn now to a brief examination of the historical development of the Simpson-Keogh proposal. This examination takes us back for its beginning to the early years of the post-World War II period. At that time a small group of lawyers met informally in New York to consider the problem of the self-employed professional people in providing for their retirement. This group met intermittently during the ensuing few years in an attempt to develop a solution to this problem. Concurrently numerous plans for tax deferment on investment in various forms of retirement security were being developed and publicized.

It was on June 7, 1951, during the 1st session of the 82d Congress, that the original version of what is now known as the Simpson-Keogh plan was introduced. The original proposal would have allowed all taxpayers to deduct a portion of their income paid into a restricted retirement fund, with the limitation that the annual deduction could not exceed the lesser of 10 percent or $7,500. In May 1952 this legislation received its first formal congressional consideration in public hearings held by the House Committee on Ways and Means.

With the convening of the 83d Congress this legislation was again introduced in the House of Representatives. In August of 1953 the legislation again received consideration in public hearings by the committee. Subsequently further hearings were held in 1955 and 1958. In May 1958 I joined as a cosponsor of the bill and introduced it in the House of Representatives. Two months later the Committee on Ways and Means finally favorably reported the legislation to the House and it was passed by voice vote in that body. Regrettably the little time remaining in the session and the resulting adjournment rush did not permit Senate consideration of the proposal.

In the current 86th Congress Congressman KEOGH of New York and I have again joined as cosponsors of the legislation and as you know it was favorably reported to the House of Representatives on February 24, 1959.

Before I undertake the prognosis of legislative prospects that I promised you, it might be well if we look briefly to the substantive provisions of the bill in the form in which it was reported by the Committee on Ways and Means.

As I previously indicated the basic purpose of the bill is to allow a deferment of tax liability on limited amounts of net income earned from self-employment. Thus, the coverage of the proposal would be limited to self-employed persons and would not be available to any self-employed person who during the taxable year received an amount any portion of which was attributable to an employer contribution under an employee plan. Furthermore, a special limitation on the lifetime deduction contained in the bill is imposed on individuals who have previously received a payment or acquired nonforfeitable rights to employer contributions under a qualified pension, profit-sharing or stock-bonus plan.

The amount on which tax deferment can be claimed has both an annual limit and a lifetime ceiling. The annual deductible limit is 10 percent of net earnings from self-employment or $2,500, whichever is lower. The maximum lifetime limit is $50,000. There is a stepped-up annual rate of exclusion for individuals who are over 50 years of age on the effective date of the act. For such individuals the limitation on the annual deduction would be increased by one-tenth for each year that his age exceeds 50 on the effective date so that if an individual were 60 years of age on January 1, 1959, the annual limit on his deduction would be 20 percent of self-employment income not to exceed $5,000.

The participant in this self-employed retirement program has certain prescribed alternatives with respect to the disposition of the annual amounts he is setting aside for his retirement For example, he may undertake to invest the proceeds in an annuity or an endowment policy issued by a domestic life insurance company. If life insurance benefits are included in such a policy, the life insurance features may not extend beyond age 70. This policy must be nonassignable. The deduction annually available is limited to so much of the yearly premium as is allocable to the restricted retirement benefits under the policy.

Such a participant may also invest in what is known as a face-amount certificate as defined in the Investment Company Act of 1940.

The participant may alternatively elect to pursue an investment course of placing deposits in a restricted retirement trust fund with the requirement that the trustee must be a bank. There are of course special restrictions placed on all of these investment alternatives so as to assure the validity of the retirement program and to prevent the tax deferment privilege from becoming a short-term avoidance device. I will not undertake to detail these restrictions other than to the extent that I have already referred to them. You may be assured that the savings institutions such as insurance companies, banks, and other activities authorized under the act to be depositories for these retirement funds will have trained experts to advise the individual participant with respect to the necessary procedures he must follow to stay within the limits of the act.

Having considered the questions of individual eligibility and investment alternatives, it is now appropriate that we should examine the aspect of the proposal relating to when and how the proceeds eventually are taxed. The bill provides rules relating to the income tax treatment of such receipts. Generally speaking, amounts received from the fund or policy are included in gross income when received. Special rules are set forth prescribing when income shall be considered as received and special rules prescribe the tax treatment of such income. If the self-employed individual undertakes to make withdrawals from his accumulated fund prior to reaching retirement age, the bill provides that a penalty tax will apply. On the other hand, liberalized rules are provided in the case of the lump-sum withdrawal after reaching retirement age and in the case of a lump-sum distribution to beneficiaries upon the death of the self-employed individual. The retirement income credit under section 37 of the Internal Revenue Code is not available with respect to amounts received from the restricted retirement fund or policy. No tax deferment on payments into a retirement plan is allowed to a taxpayer for any year beginning after the year in which he attains age 70, and it is required that the individual must begin to take withdrawals from the accumulated fund upon attaining age 70.

I have touched on the general principles and highlights of the proposal contained in the House-passed version of this legislation. I trust that I have outlined the principal mechanics of the manner in which H.R. 10 would at least in some measure add to the retirement security of the self-employed.

To this point I have deliberately undertaken to cast this proposal in a favorable light. However, any frank discussion of the subject requires at least a brief recognition of the factors that argue against its enactment. In the interest of brevity I will mention the two most compelling.

The first of these possible objections to the legislation is the fact that while it tends to correct a tax inequity that exists with respect to self-employed individuals—a group numbering approximately 10 million—it purports to do nothing for the 30 million Americans who are employed but who are not covered by a qualified pension and profit-sharing plan. I am referring to such persons as the employed clerks in a small retail store, an employed filling station attendant, and employed persons in similar occupations. This exclusion is an acknowledged serious shortcoming, and it is a matter to which we all must give earnest attention.

Without disregarding the need for taking care of this latter group, there are at least four reasons why it is appropriate to enact H.R. 10 so as to take care of the self-employed group. The first of these reasons is that many of the occupations covered under this proposal are precluded by the respective State laws from practicing their professions in an incorporated form.

A second reason for enacting this measure in its present form is that to do so will encourage the sole proprietor or partner who cannot benefit from a plan under section 401 to establish a 401 plan for his employees in view of the employer's entitlement to make comparable provision for himself under the terms of this bill.

A third reason for the enactment of H.R. 10 in its present form is that the retirement problems of the low income individual do not stem primarily from his tax burden.

A fourth reason supporting this legislation is that it reduces the number of American citizens who under present law are being discriminated against. The fact that it does not go far enough is a point on which we can agree, but at least it represents a step in the right direction.

The second argument against the enactment of H.R. 10 is the revenue loss that would be entailed. The Treasury Department has estimated a revenue loss in excess of $360 million in the first full year of operation. In this day when it has become fashionable to speak about Government finance in terms of billions, such a revenue loss may not seem a formidable obstacle. However, I would point out to you that the Federal budget projected for fiscal year 1960 is in balance only by a margin of $100 million in surplus

and the estimated revenue loss from this bill, assuming all other estimates are correct, would mean another year of deficit financing.

We must also realize that the Congress this year will likely be called upon to provide another increase in the statutory debt limit. This mounting public debt constitutes a deferred tax increase that we are imposing not only on ourselves but also on succeeding generations. When we defer through fiscal policy until tomorrow the bills that we should pay today, we are in effect saying that the taxes of tomorrow will have to be increased to a level in excess of what they would otherwise have to be.

Also, in connection with the consideration of the fiscal implications of this legislation we must realize that if retirement savings are to mean anything in terms of purchasing power, we must protect the integrity of those savings against the onslaught of inflation.

To place this budgetary objection to the enactment of H.R. 10 in some perspective, I would call attention to the fact that the amount of revenue loss is a highly speculative matter. The revenue loss magnitude depends on several variable factors, such as the number of people who will participate, the extent to which they will participate, and the tax brackets in which they find themselves at the time of their contributions. It is my conviction that rather than retain unjustifiable discrimination in our tax structure against any group, we should seek a more equitable apportionment of the tax burden among all the taxpayers.

The revenue loss consequences of this proposal should also be examined in the light of experience with similar measures in other countries of the free world. The previously existing inequity in the position of the self-employed was terminated through legislative action in Great Britain in 1956, and in Canada and New Zealand in 1957. The Honorable Walter Harris, Minister of Finance in Canada, observed in this 1957 budget speech that the annual yield of the income tax could be reduced by as much as $40 million through the enactment of the Canadian plan. The actual Canadian experience was a revenue loss of only $7 million. The English and New Zealand experiences also found the revenue losses less than had originally been projected.

I have mentioned inflation in the context of need to eliminate deficit financing if we were to preserve the integrity of our retirement savings. I would like to mention inflation in another context, this time arguing in support of the enactment of H.R. 10. The distinguished chairman of the Federal Reserve Board, William McChesney Martin, and the distinguished Secretary of the Treasury, Robert B. Anderson, have both expressed the view that inflation is one of our principal concerns. Secretary Anderson has gone on to say that savings by the public must be relied on "to the greatest extent possible" to help stabilize the economy. The chairman of the President's Council of Economic Advisors, Dr. Raymond J. Saulnier, in a speech before the National Press Club on Friday, February 27, also labeled inflation as one of our greatest dangers and stated that one of the factors necessary to combat it would be an adequate accumulation of funds for capital investment. I submit that the necessary efforts to combat inflation and to provide augmented capital funds are entirely consistent with this legislation and would be strengthened by its enactment.

Money is like any other commodity and the price for its use is responsive to the factors of supply and demand. By encouraging thrift we will be increasing the availability of funds for capital investment and thereby tending to depress interest charges. This will serve to reduce the forces of inflation while at the same time increasing business expansion with the resulting greater economic opportunity for all that results from such expansion.

In closing I have promised to express my prognosis as to the legislative prospects of H.R. 10. For what it is worth, I will express the view that this legislation will pass the House of Representatives and the Senate during the 86th Congress. Because it would be inappropriate for me to do otherwise, I will not speculate as to what action the President might take in the event that the legislation reaches his desk for approval or disapproval.

I will observe that budget-busting and unrestrained spending activity by the "Spenderocrats" in Congress will seriously jeopardize prospects of Presidential approval. Accordingly, if the Congress will act with restraint during its consideration of money authorizations and appropriations bills, the chances for approval of this legislation will be greatly enhanced.

I can assure you that consistent with my stand on Government economy in the past, I will vote for sufficient economy in Government to more than make possible the enactment of this meritorious proposal. It is my hope that a sufficient number of my colleagues in the Congress will join with me in this effort for economy so as to make possible the realization of the tax equity represented by the Simpson-Keogh proposal.

May I, in closing, thank you for being a wonderful audience and reiterate my appreciation for your thoughtfulness in permitting me to join with you tonight.

Tax Exemptions on Public Housing Bonds

EXTENSION OF REMARKS
OF
HON. GEORGE A. KASEM
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, March 16, 1959

Mr. KASEM. Mr. Speaker, it has been related to me that some municipal authorities have been concerned over the fact that H.R. 5096, recently introduced by my colleague from California [Mr. GORDON MCDONOUGH], would be a step toward eliminating tax exemptions on other bonds. The bill would remove long standing tax exemptions on public housing bonds.

Ever since I can remember, the Federal Government has made interest on local bond issues nontaxable so that local governments and school districts can issue bonds at lower interest rates.

I heartily endorse this principle as it gives the local taxpayer a break on interest payment and the municipalities and school districts much needed advantages in the money market.

Public housing, as the term implies, is a public undertaking for a purpose equally as desirable as other governmental activities—the providing of a minimum standard of housing for American families.

IMPEDE PUBLIC HOUSING

It is obvious that the bill's purpose is to impede public housing rather than to correct any alleged tax inequity. To allow this device to succeed would open the gate to using the removal of tax exemption, which has become an integral part of all local bond issues, to defeat municipal or local projects that a legislator might oppose when he either cannot defeat or will not attack the project directly.

This would be a very bad precedent to establish.

Washington Report

EXTENSION OF REMARKS
OF
HON. BRUCE ALGER
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, March 16, 1959

Mr. ALGER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following newsletter of March 14, 1959:

WASHINGTON REPORT

(By Congressman BRUCE ALGER, Fifth District, Texas)

Hawaiian statehood was the big debate of a lively week. The Territory consists of eight major islands (six well developed) and many smaller ones stretching 1,900 miles, 2,200 miles southwest of the United States. The present population includes approximately 168,000 military and Federal employees and dependents, leaving 445,000 native population of whom 23 percent are Caucasian, 37 percent Japanese, 17 percent Hawaiian, and the rest Filipino, Chinese, Korean, Puerto Rican, or others. Thirty-five percent of the marriages mix races, accounting for the dwindling number of pure Hawaiians.

Arguments for: (1) If Alaska, then Hawaii; (2) they deserve statehood because they want it, the people believe in our Constitution and form of government, and the islands are economically sound; (3) the House previously passed Hawaiian statehood several times (1947, 1950, 1953) and both parties have pledged support.

Arguments against: (1) Islands are spread out and noncontiguous to the United States (also noncontinental, which Alaska is); (2) 445,000 people will have 2 Senators (and 1 Representative) who can nullify New York's 16 million, California's 14 million, Texas' 9 million, or each of the other States; (3) the International Longshoreman Workers' Union leaders are Communist influenced, if not controlled, and could through strikes cut off and isolate Hawaii, totally dependent on ocean trade (and also our Pacific Fleet Command Headquarters). There were many other able presentations, but these are the basic ones. The bill passed 323 to 89. For my part, the arguments against could not be wished or rationalized away.

The Ways and Means Committee work continues ceaselessly. (1) The minerals depletion hearings ended. I was most critical of the endless litigation of the Treasury Department, whose zeal for collecting revenues transcribed fairness and equity, it seems to me. Additional tax suits were filed repeatedly against minerals industries by the Internal Revenue Service after court cases were lost time after time. This is unfair expense to the Nation's taxpayers and to the businesses sued. (2) The Keogh-Simpson bill (retirement help for self-employed through tax deferment) and temporary unemployment compensation bill will soon be before the House. Our committee agreed to terminate the Federal part of TUC except

for tapering off those who have claims filed. Now it's up to the House and Senate to follow through.

Bills I introduced this week: (1) The Defense Facilities Protection Act of 1959 seeks to protect our own defense effort from the subversive efforts and dangers of Communists. Without this bill the Defense Department cannot rid itself of the Communist-controlled union which handles the Pentagon's own messages, coded or otherwise. Nor can the 2,000 or more identified saboteurs employed in vital defense plants be removed. Surely Congress will take action. (2) The natural gas bill is the same one I cosponsored before. It simply will restore Congress' intent (overturned by the Supreme Court) of the 1938 law, specifically exempting gas production from Federal Power Commission control.

The Defense budget debate, and our military preparedness in view of Berlin and other danger spots, has taken on some very political, and therefore dangerous, overtones. Those who seek to discredit the President's leadership for political gain are playing with dynamite. As to the arguments—obviously we cannot match the enemy in manpower, so a cut in our armed personnel is not the crucial point some are seeking to make it. It's our total destructive potential that deters, because this is what wins wars. For the same reason, we cannot agree to fight "brush fire" type wars with one hand tied behind us, namely, by agreeing not to use our nuclear weapons. On both counts the President deserves our support. Strength not weakness, firmness not vacillation, unity not division, are what are needed now, not political maneuvering for the 1960 election. It's one thing to argue merit of conflicting viewpoints—it's entirely another to criticize loosely or seek political advantage by demanding more expenditures. Forgotten by some is this—our defense strength is no stronger than our economic strength.

Defense needs and their costs come first, completely overshadowing other Federal services, particularly the welfare services so unnecessary by comparison. Here's a partial list of areas where the Democrats are already planning spending beyond the budget, besides defense—housing, airport construction, space, atomic power, public works, school construction and education, depressed areas, water pollution, and educational TV. The total cost—billions beyond the $77 billion budget. Who pays? John Doe. How? Through increased taxes, or, more likely, through Government's deficit financing and a watered dollar, which means less buying power for John Doe. My continuing guidelines: (1) Stop increasing Federal Government size, control and spending; (2) reduce or eliminate Federal Government in places where it has no place being (business operation, for example), (3) return power to States wherever possible; and (4) remember the Declaration of Independence and the Constitution.

Correcting Inequities Applicable to Fishing Catch in Puerto Rico

EXTENSION OF REMARKS

OF

HON. CECIL R. KING

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 16, 1959

Mr. KING of California. Mr. Speaker, I have today introduced a bill to amend the Internal Revenue Code of 1954, as amended, for the purpose of correcting inequities in existing law applicable in Puerto Rico, which I believe were not the intent of Congress when the law was enacted. It is intended also to encourage the development of fisheries and their allied industries in that great Territorial commonwealth, which has encouragement and backing of our Government.

Under sections 931 and 933 of the Revenue Code of 1954, mainland citizens of the United States who establish bona fide residence in insular possessions such as Puerto Rico are entitled to certain tax exemptions, all designed to promote the industry and welfare of the people of such possessions. As a condition under section 931(a)(2)(B), it is required of the citizen to be entitled to this exemption that "50 percent or more of his gross income—computed without the benefit of this section—for such period or such part thereof was derived from the active conduct of a trade or business within a possession of the United States, either on his own account or as an employer or agent of another."

Usually this condition is entirely fair. In the instance of a fisherman catching fish on the high seas, however, the Treasury Department has ruled that the actual catching of fish, the active conduct of a trade or business is not conducted within the possession. The facts that the citizen is a bona fide resident of the possession, sells his fish in and receives payment therefor within the possession, and in every way contributes the economy of the possession just as though he spent all of his time on shore, are disregarded. The unfair consequences are as follows:

(a) The citizen does not receive the exemption from U.S. Federal taxes in accordance with the intent of the law.

(b) The fisherman is subject to having withholding taxes deducted from his wages, salary, or other compensation both under the Federal income tax law and the tax laws of the Commonwealth of Puerto Rico. Although he makes eventual recovery of the Puerto Rico deductions, he is deprived of the use of his own money until reimbursement is made. This makes it difficult for a boatowner to employ such citizens.

(c) Should the fisherman have income from properties on the mainland subject to Federal income taxes, by the inclusion of Puerto Rican income in his tax return he becomes liable for taxes in higher income tax brackets.

(d) Puerto Rican personal income taxes are somewhat lower than Federal income taxes, which again operates to the disadvantage of the citizen.

(e) Should a fisherman catch all of his fish in waters within the 3-mile limit of the possession, he would receive the full benefits of the exemption. If he spends more than 50 percent of his time outside of the 3-mile limit he is deprived of the exemption.

It is submitted that the fisherman is just as important to the economy of Puerto Rico as the one who works in the cannery that buys and packs such fish; in fact, even more so because without his fish the cannery employee would have nothing to do. For all practical purposes the fisherman's income is derived from sources within Puerto Rico, because that is where his fish are delivered and sold.

The amendment to section 933 has been so worded as to make it clear that the exemption applies to a proprietor or partner as well as to an employee, as is the case under section 931. The requirement of bona fide residence remains unchanged.

Section 3401(a)(8)(C) is amended to conform to the amendment to section 933.

Mr. Speaker, under unanimous consent to extend my remarks, I include the bill in the RECORD, at this point as a part of my remarks:

H.R. —

A bill to amend the Internal Revenue Code of 1954 with respect to income derived from fishing where the catch is landed in Puerto Rico

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 933 of the Internal Revenue Code of 1954 (relating to income from sources within Puerto Rico) is amended by adding at the end thereof the following new sentences:

"For purposes of this section, income derived (either on his own account or as an employee or agent of another) from the conduct of a fishing venture shall be treated as income derived from sources within Puerto Rico, if the catch of fish is landed, sold, or delivered in Puerto Rico. For purposes of the preceding sentence, the term 'fish' means fish, whether in the round, gilled and gutted, filleted, split, salted, iced, or frozen, and includes shellfish and crustacea, whether whole, headed, salted, iced or frozen."

SEC. 2. Section 3401(a)(8)(C) of the Internal Revenue Code of 1954 (relating to withholding tax on wages) is amended to read as follows:

"(C) for services for an employer (other than the United States or any agency thereof) performed by a citizen of the United States within Puerto Rico, or in connection with a fishing venture where the catch of fish (within the meaning of the last sentence of section 933) is landed, sold, or delivered in Puerto Rico, if it is reasonable to believe that during the entire calendar year the employee will be a bona fide resident of Puerto Rico; or."

SEC. 3. (a) The amendment made by the first section of this Act shall apply to taxable years beginning after December 31, 1953, and ending after August 16, 1954.

(b) The amendment made by section 2 of this Act shall apply to wages paid on or after the first day of the month after the month in which this Act is enacted.

Columnists Praise Hon. John McCormack's Position

EXTENSION OF REMARKS

OF

HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 16, 1959

Mr. PRICE. Mr. Speaker, under permission to extend my remarks, I enclose an editorial entitled "The First Blow,"

written by David Lawrence and appearing in U.S. News & World Report on March 16, 1959. Also, an editorial entitled "Striking the First Blow," which appeared in the Catholic Standard, Washington's archdiocesan newspaper, on March 15, 1959; together with a transcript of certain testimony involving questions by Congressman JOHN W. MCCORMACK, House majority leader, and answers thereto by the Secretary of Defense Neil H. McElroy at hearings held by the House Committee on Science and Astronautics, on March 2, 1959:

[From U.S. News & World Report, Mar. 16, 1959]

THE FIRST BLOW

(By David Lawrence)

The Secretary of Defense, Neil McElroy, at a hearing last week, was asked by Representative JOHN MCCORMACK, Democratic leader of the House, whether it is still the military policy of the United States that "under no conditions will we attack first." Mr. MCCORMACK inquired whether this isn't an untenable position in the event of a grave emergency.

The Secretary agreed that it is a very difficult thing militarily. Then he explained that the policy not to attack first is currently true, and added: "Whether that will always be true, I think, could be something else."

Representative MCCORMACK promptly said he was glad to get such an assurance of possible change. For he believes that America should say it reserves to itself the same freedom of action as the Soviets now enjoy.

Thus, at least, there has come into the open a phase of Communist tactics which is largely responsible for the cockiness of the Soviets in the cold war.

For Moscow has known that the U.S. policy is to accept the first blow and that, indeed, Chicago, or Detroit, or New York, or Washington—or perhaps many of our air bases—could be destroyed before any retaliatory blow would be struck.

What is truly involved is the official strategy adopted by the Soviet Union in 1955 when, through the influence of Nikita Khrushchev, the military policy of attacking a potential enemy first was formally decided upon in the councils of the Kremlin. This was not termed preventive war but preemptive war.

The policy has been fully set forth by high military officers of the Soviet Union in its military journals. Excerpts from these articles and comments by western military men were published in U.S. News & World Report on June 10, 1955, December 13, 1957, and February 7, 1958.

The preemptive war doctrine now should also be adopted by the United States in its own defense. This is perhaps the best way to prevent war from ever happening. The doctrine, as the United States could pursue it, was outlined by Capt. W. D. Puleston, retired naval officer, who, in an article in this magazine on December 13, 1957, wrote:

"Our Government should also make it equally clear to the Soviets that we will not stand idly by and wait to be attacked—that we will not permit any nation to prepare and mount a surprise attack upon this country or any of its allies.

"If Russia—or any other nation—should give positive evidence that it is preparing such an attack, the United States should immediately:

"1. Alert its Armed Forces and deploy them for an instant attack upon the threatening nation.

"2. Serve immediate notice upon the threatening nation that, unless it dismounts the attack preparations within a specific brief period of time, the United States will attack in self-defense, without waiting to be hit first.

"Then, if the Russians or their satellites should defy this warning, the United States would be in a position to get at least an even break. If the enemy should attack, we could attack simultaneously. If the enemy should persist in its preparations to attack, we could—with honor—attack first, and thus gain the initial advantage instead of conceding it."

The frank discussion of this terrifying contingency is a healthy sign. There must be a resumption at once of the international conferences, recently suspended at Geneva, dealing with the subject of "surprise attack." Although the United States has said it would accept the "first blow," it is clear now that our Government may wish to consider a change. This fact—even though no change has as yet been decided upon—at least moves the problem nearer to solution.

For at the moment the Soviets have a free hand. They can bluff us out of Berlin and out of our bases in Europe. They can threaten to destroy our big cities. They can threaten us everywhere with their new missiles. And we are supposed to wait for the first blow, however devastating it may be, and then conduct our massive retaliation with most of what you have left, as Secretary McElroy said to Mr. MCCORMACK.

Mr. McElroy told his press conference last week that preparation for an attack by bombers or missiles in the foreseeable future would be so complex that they would most certainly be discovered by the free world before the blow could get under way.

But what do we do when we discover it?

In self-defense, we should announce now that we will interject or forestall the first blow. We have the same right to apply the doctrine of preemptive force that our adversaries do. To avow this is to hasten the day when an ironclad agreement can be made to insure against the mobilization of missiles and bombers by either side. For such a mobilization itself can be a signal for the outbreak of war, even as it has been in the past. This is the most pressing problem before the world today.

[From the Catholic Standard, Mar. 15, 1959]

STRIKING THE FIRST BLOW

A deadly matter is being discussed these days. Is it morally permissible to strike the first blow in a nuclear war? The recent incisive questions at a hearing, proposed by House Majority Leader JOHN MCCORMACK (whose line of questioning we highly approve) focused attention on this point.

Behind the matter stands the erroneous but generally accepted opinion that the first blow will obliterate the enemy population and perhaps a large segment of the nonbelligerent population. Related to this opinion is the false idea that a war must necessarily involve total surrender.

In relation to these questions, the church has always taught that a nation can use sufficient force to repel an aggressor and that if an aggressor shows clearly his evil intentions adequate measures can be taken for thwarting an aggression. This does not mean, even with nuclear weapons, that it is necessary to obliterate the enemy to forestall an attack and many of our experts have spoken clearly and eloquently on this. Thomas E. Murray has steadily contended that a development of a full graduated system of nuclear weapons would enable us to deal with each situation according to its severity and thus relieve us of the awful predicament of a sudden war of obliteration of the enemy. Total annihilation or unconditional surrender is not and should not be considered the only objective in a war. Furthermore, a graduated use of force would be, it is hoped, a sufficient deterrent since the enemy realizes our full potential for destruction. Henry Kissinger, another expert, has supported in general this thesis. Father John Courtney Murray, S.J., has also written eloquently on it.

The majority leader also indicated at the congressional hearing that it would be better not to inform the enemy that we would never strike the first blow. We feel that this is eminently wise, especially since the first blow need not be total destruction of the enemy but only a stern and adequate warning.

Now is the proper time to think about these grim questions particularly for eradicating the erroneous opinions that a war must be fought to unconditional surrender and must involve, with today's weapons, a holocaust for the enemy.

The CHAIRMAN. Mr. MCCORMACK.

Mr. MCCORMACK. Well, Mr. Secretary, what you have said in substance is that our whole military position is predicated upon the policy that under no conditions will we attack first.

Secretary MCELROY. Our policy is that we will not attack, first, Mr. MCCORMACK.

Mr. MCCORMACK. Rather an untenable one from a military angle in case of grave emergency, is it not?

Secretary MCELROY. I think it is a rather difficult one but I think it is the one that would be supported by public opinion in this country.

Mr. MCCORMACK. Well, public opinion is not going to win wars. We are coming down to leadership.

Secretary MCELROY. In any case——

Mr. MCCORMACK. Public opinion is important, but other things win wars.

Secretary MCELROY. I agree that this is a very difficult thing militarily, Mr. MCCORMACK.

Mr. MCCORMACK. Well, we are tied to that.

Secretary MCELROY. That is our policy.

Mr. MCCORMACK. That is described by the President, by the executive branch. That is correct, is it not?

Secretary MCELROY. That is currently true. Whether that will always be true I think could be something else, Mr. MCCORMACK.

Mr. MCCORMACK. Well, I am glad to get that latter now because that is a little relaxation. Could you see conditions under which that would not apply?

Secretary MCELROY. This would again be a matter of national policy which would take quite high review. I think I must begin back where I began, which is, for the present and the indeterminate future our policy is not to attack with the big weapons first.

Mr. MCCORMACK. What do you mean not to attack with the big weapons first, would we attack with other weapons first?

Secretary MCELROY. No, I think we would not attack first even with other weapons.

Mr. MCCORMACK. So no matter how powerful our military might be we are strictly in a defensive posture.

Secretary MCELROY. Yes, because we are not aggressors.

Mr. MCCORMACK. I just want to have that established. Now our main reliance, of course, is SAC. That is correct, is it not?

Secretary MCELROY. Yes, our principal deterrent is the Strategic Air Command. We have other very major elements.

Mr. MCCORMACK. Well, that is true but you have already said on a number of occasions—only in the U.S. News & World Report a few weeks ago, that our principal reliance at this time is on the heavy and medium bomber capacity of the Strategic Air Command, that is certainly number one.

Secretary MCELROY. That is correct, that is true.

Mr. MCCORMACK. Well, suppose they have a defense against our bombers, what then?

Secretary McELROY. Well, of course, if they have a defense against anything that we have then it makes our problem just that much tougher but I think we have some right to judgments on whether or not they can have a defense against our bombers that will keep us out and I think that the belief of our military people is that they will not keep us out any more than we can keep all of their bombers out if they come at us.

Mr. McCORMACK. Well, of course it is not a question of keeping them out, it is a question of the attrition rate.

Secretary McELROY. Yes, there would be some attrition.

Mr. McCORMACK. If the rate is too high there is the question of sustaining the attack?

Secretary McELROY. There would be a question of sustaining but I think in this kind of war you are likely to use most of what you have in your initial strike.

Mr. McCORMACK. We are going to strike after we are hit?

Secretary McELROY. Yes, but you are going to use most of what you have left.

Mr. McCORMACK. You have also stated that within a year or two you expect the Soviet Union to be considerably ahead of us in intercontinental ballistic missiles.

Secretary McELROY. I do not expect that they will. I consistently say that they can be. The intelligence that we have, of course, does not get inside the Russian mind to know what they are going to do. The only thing we can judge is what they could do with their facilities of scientists, facilities of materials, their facilities of production, manpower, and so on. Now then, there is one of the interesting points really that is under discussion in this general debate. We do assume in what we are preparing to do with our own forces that they will make use of their top scientists and their material facilities and their production facilities to make this quantity of weapons but we do not say they will produce these. We say they could produce these if they had the national decision to do so.

Mr. McCORMACK. Well, it is reasonable to assume they are going to do what they think they ought to do.

Secretary McELROY. Yes, but the interesting point in retrospect on that, Mr. McCORMACK, lies in the history of what they did on heavy bombers.

Mr. McCORMACK. I know. You refer to that in this article here. You refer to General Twining's views when he came back from Moscow. Is that what you have reference to?

Secretary McELROY. Yes. General Twining—and he can speak for himself at any point here if you would like him to—came back from Moscow feeling that the Russian capability to manufacture heavy bombers was such that we could expect really to have a superiority of heavy bomber capabilities by Russia over the United States. This was very disturbing to the country. He had this capability but he did not produce it. Why, I do not know. Everybody has his own theory as to why he did not do so. In addition to a capability to do you have to have a national decision to do. The only thing we can say in our intelligence is that he has the capability to do; whether he is going to make the national decision to do we do not know.

Mr. McCORMACK. Might it not be that they concentrated on missiles rather than bombers realizing that the perfecting of missiles would more or less outmode bombers?

Secretary McELROY. The thing that makes that doubtful is our observation of new bombers in the air over there, so they have not given up bomber aircraft. They have an advanced bomber, we believe, in test.

Mr. McCORMACK. I do not want to appear to be in a position of cross-examining any of you gentlemen because we are all Americans, we all want to do the best we can.

Secretary McELROY. Surely.

Mr. McCORMACK. We have our limitations up here. We can appropriate money, but we can't compel it to be spent. We have seen that in the Army and the Marine Corps in the last year.

By the way, do you think the reduction in our Army, in the light of the situation today, was wise?

Secretary McELROY. We think the size of the Army is adequate.

Mr. McCORMACK. That isn't answering my question.

I will leave it there.

The CHAIRMAN. Mr. FULTON.

Mr. McCORMACK. No, I have just one or two more questions.

The CHAIRMAN. Excuse me.

Mr. McCORMACK. For the benefit of the people, what is your opinion as to the relationship of the Soviet Union and our own country in the development of the intercontinental ballistic missile? Are they ahead of us?

Secretary McELROY. My judgment is—and when I say "my judgment," let me say that this is a distillation of the views of the intelligence community and of our own scientists, so that I am not talking as an individual, I am simply reflecting a combined view—my judgment in that context is that developmentally we are very close to each other in the development stage of the ICBM.

Mr. Khrushchev announced, I would guess maybe a couple of months ago, maybe not quite that much, that their ICBM was in serial production. This was a term not commonly understood here. It was interpreted by some to mean mass production, and you all may have read recently that a Russian scientist who was in this country explained—and this was reported in the New York Times—that "serial production" is not mass production but is production that is in between prototype production and mass production.

I can read it right here, if the committee would be interested.

This is in the New York Times of Friday, February 13, and this was a meeting of scientists.

The questioning lifted momentarily as Mr. Lebedev explained the "serial production" of the intercontinental ballistic missile. He said this was an intermediary stage—I guess intermediate is what should be here—I hate to correct the New York Times. Maybe I better not do that. He said this was an intermediate stage between the "specimen" or "prototype," and mass production. It means, he said, the production of limited quantities.

Now, of course, the Atlas is in serial production in that kind of sense, because I believe that this committee has visited the production facilities of the Atlas, has it not? I know that you have been down at Cape Canaveral and at Huntsville.

In any case, if you have observed this, the Atlas missiles are moving through on what I would consider in this way serial production, but whether we are in serial production or not doesn't make much difference to me.

I think in answer to your question, sir, that the evidence seems to me to be that there is very little difference in the development stage of their missile and ours from everything that we can judge.

Mr. McCORMACK. Would you express an opinion, either you or General Twining—I know when you express your opinion, it is the collective judgment of many others—as to how long the SAC will be our main reliance so far as retaliatory action is concerned.

Secretary McELROY. Well, in answering this, I think we should make clear that the intercontinental ballistic missiles are being assigned for deployment to SAC, so I think your question has to do with SAC bombers.

Mr. McCORMACK. I am talking about the bombers now.

General TWINING. Well, I think it will be several years, certainly until sufficient quantities of the ICBM's are not only in stockpile but on launchers and of proved dependability. Then it will be a combination of the two. The bombers will stay as the missiles come in. Even though the ICBM's may be perfect, we still want the capability from the manned bombers, for I would say 10 or 15 years, but not just the bomber. It will be the missile too, a combination of both. But SAC will still be the unit, as the Secretary said, that is the deterrent force for the country. It will always maintain the deterrent, with a combination later on of both the missile and the airman.

Mr. McCORMACK. Is it fair to assume that there might be discoveries through tests and a satisfactory bomber might be used more effectively than now; whether there might be a capacity to project a weapon a longer distance than they can now toward the target?

General TWINING. The Hound Dog is an example of that. I am thinking of that when I say the bomber will stay with us 10 to 15 years. The bomber can carry a great load of nuclear power and pinpoint targets, and you will need that capability.

Mr. McCORMACK. The greater the increase in the mileage from the target, the more effective the bomber will be in the future?

General TWINING. It can stand off a thousand miles from a target, keep out of a heavily defended area, and launch a missile from a bomber.

Mr. McCORMACK. Is it reasonable to assume there is a capability of 500 miles?

General TWINING. Definitely. We are encouraged on that.

Mr. McCORMACK. Mr. Secretary, you said a few weeks ago that the danger from the Russian conspiracy is about the same: "I think they intend to destroy us if they can, one way or another."

You remember you said that in the interview with U.S. News & World Report.

Secretary McELROY. Yes.

Mr. McCORMACK. That is still your opinion today?

Secretary McELROY. It is my belief.

Mr. McCORMACK. Have the events of the past week, the visit of the representative of a friendly ally of ours, caused you to change your opinion?

Secretary McELROY. If anything, it has reaffirmed my opinion.

Mr. McCORMACK. Just one more field.

Is there any consideration being given to the establishment of one agency in the field of outer space to take over military and civilian research and development?

Secretary McELROY. There is nothing current in that direction. It is our belief in the Department of Defense that the agency that has been set up, and the Space Council which has been set up to give common direction to the overall program can best do its work along with the military as carrying a portion of this responsibility.

We think that it would be a quite doubtful thing for the military use of space to be assigned outside of the military for development, with all that could mean—not necessarily would mean, but all that it could mean, of difference in point of view on the part of the military and of the other agency as to the importance militarily of certain use of outer space.

Mr. McCORMACK. Well, you have used very guarded language, which I understand, I think.

In other words, you think it would be a great mistake if military research and development was to be transferred to an

agency embracing both military research and development and civilian?

Secretary McELROY. I think the present setup is a good setup and will be workable.

Mr. McCORMACK. Well, there are many twilight zones on some of those questions, I would judge?

Secretary McELROY. Yes, there are, but I don't see why we can't work this out as reasonable men working together, and in the aeronautical field, Mr. McCORMACK, when NACA was the agency, the Department of Defense really had no problem in working out the division of functions as between the two groups.

Mr. McCORMACK. But the powers of the two are different now. You have more power in NASA than in NACA. They are more competitive.

Secretary McELROY. They have somewhat more power, but I think the legislation was very well written to reserve to the military the military use of space.

Mr. McCORMACK. Well, take the twilight zone, don't you think the doubt should be resolved in the world of today on the side of the military?

Secretary McELROY. I think I would prefer to say, Mr. McCORMACK, that the President, as the Chairman of the Space Council——

Mr. McCORMACK. I was chairman of the committee.

Secretary McELROY. I know you were, sir. I think it was a wise conclusion that any doubts that there are as to jurisdiction should be resolvable at the highest executive level through the Space Council, of course, which is chairmaned by the President.

Mr. McCORMACK. We put language in our bill that the Congress further declares that such activities shall be the responsibility of and directed by a civilian agency exercising control over aeronautical space activities sponsored by the United States, except that activities peculiar to or primarily associated with development of weapons systems, military operations, or the defense of the United States, and, in brackets, making it stronger, including the research and development to make effective the defense of the United States, shall be the responsibility of and shall be directed by the Department of Defense, and that determination as to which such agency has responsibility for and direction of such activity shall be made by the President in conformity with section 201(e).

That is pretty strong language there, and we made it just as strong as we could. In other words, if there is a situation that develops in the world of today—tomorrow it might be different, but in the world of today we have to consider these things. What might be military today may not be in a peaceful world, we recognize that, but in case there is any attempt to transfer what is considered to be of vital importance to our country in the military field, are you prepared to fight for the retention by the military of those things you consider to be essential for our preservation?

Secretary McELROY. Without any hesitation, and I think on the other side that I am unlikely to need to fight, because the man who is the head of NASA is a man who is, I think, a very reasonable man and a very good man. I think the point was excellent, and I don't anticipate any problem at all in working these out with Mr. Lanham. But if for some reason or other there is an honest difference between him and me, I would certainly be quite prepared to fight, yes.

The CHAIRMAN. Mr. FULTON.
